TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Oakland Savings Bank

Central Bank, Oakland
New Subway Terminal Building, Los Angeles

New Mark Hopkins Hotel, San Francisco

Federal Reserve Bank, San Francisco

New Hunter-Doolin Building, San Francisco

New Russ Building, San Francisco

Pacific Telephone and Telegraph Building, San Francisco

Sold by most progressive dealers throughout Pacific Coast.

For special information write or wire

Congress of March 3, 1879.

PROHIBITION LAW CREATES NEW DEPARTURE IN ARCHITECTURE

Prohibition has made such pronounced
changes in the life of San Francisco
that it has even altered the design of
residential hotels, architects announce.

Time was when each hotel, on its up-
per floors, was just one room and bath
after another.

Then came prohibition. Cost of refin-
ishing furniture that was damaged by
the action of raw liquor spilled upon
table and dresser tops led at first to the
general use of glass tops on all furniture
in the better class buildings.

But the rugs and hardwood floors
were not immune.

The result has been the apartment
hotel. There had been hotel apartments
in the pre-Volsteadian days. The apart-
ment hotel, however, is an idea put into
use here during the last year, and now
several such places have opened and
more are being planned. These have the
customary room-and-bath arrangement,
but in each room there is added a cabinet
kitchen.

This new type of kitchen looks like a
built-in wardrobe when closed. Opened,
it reveals a tiled sink, an electrical re-
frigeration unit, several electric conven-
ience plugs, and, above, several cabi-
nets and shelves conveniently placed.

"Just the thing for a hurried break-
fast," explains the clerk showing the
room. "You can plug in your percolator
here and your waffle iron here, and then
you know there are various appliances
now for frying and boiling by electricity."

"A good line," chuckles the average
room-hunter up his sleeve. He gets the
idea at once. "Mighty handy for mixing
fizzes and cocktails. Don't have to send
out for ice, can always have the ingredi-
ents cold, and I can serve right here
instead of having friends park glasses
and liquor stains all over the place."—
S. F. Bulletin.

1927 BUILDING OPERATIONS IN S. F. ROLL UP \$47,032,848 TOTAL

BY THE OBSERVER

Building operations undertaken in San
Francisco during the year 1927 repre-
sented an expenditure of approximately
\$47,032,848. The figures are taken from
records of building permits issued by
the Department of Public Works and
are approximate only. During the year
9,182 building permits were issued in-
cluding building repair and additions as
well as new structures.

Show Loss

The 1927 total is \$10,921,100 less than
those for the year 1926. The highest
yearly valuation for building construction
in San Francisco was recorded in 1926,
with a total of \$57,952,948 when 10,085
building permits were issued. The next
best year was that of 1924 when the
operations totaled \$37,852,973, when 10,-
272 permits were issued. During 1925,
records show, 11,087 permits were granted
for improvements aggregating an expendi-
ture of \$50,392, 793.

December Building

December, 1927, operations are segre-
gated by the City Building Permit De-
partment as follows:

Class	No. of Permits	Est. cost
A	1	\$ 20,000
C	12	278,350
Frames	204	1,286,955
Alterations	394	996,710

TOTAL 611 \$2,582,015
December, 1926, totals were 756 permits
for improvements aggregating an expendi-
ture of \$5,066,659.

Outlook for 1928

Projects contemplated for the year
1928 will involve an expenditure exceed-
ing that for the year 1927. A conser-

vative estimate places the cost of 1928
construction in excess of \$60,000,000.

This prediction is made possible after
a careful check-up of those projects on
the boards in the offices of San Fran-
cisco architects and on a few projects
where architects will be commissioned
shortly.

Many big jobs will go ahead during the
coming year of which no announcement
will be made until plans have passed the
preliminary stages and negotiations for
sites and financing have been completed.

Total sums for annual building opera-
tions in San Francisco for the past
twenty-one years are summarized as
follows: (these figures are compiled from
building permit records:

*1906.....	5,686	\$39,947,386
1907.....	6,437	56,578,844
1908.....	6,729	51,668,341
1909.....	5,773	26,184,068
1910.....	5,690	20,508,556
1911.....	6,079	20,915,474
1912.....	6,316	23,338,563
1913.....	5,606	21,037,264
1914.....	5,907	28,177,563
1915.....	6,461	13,990,794
1916.....	6,492	18,837,173
1917.....	5,513	15,635,319
1918.....	3,688	7,924,319
1919.....	5,263	15,163,242

1926.....	10,085	57,953,948

*Covers period from May to December.
Records previous to that time destroyed
in catastrophe of April 18, 1906.

EUROPEAN CEMENTATION PROCESS IS INTRODUCED IN UNITED STATES

In Europe and more particularly in Great
Britain, a cementation process has been
developed by the Francois Cementation
Co., and used on many wet shaft sinking
operations. The term cementation is
applied to high pressure injections of
liquid cement mixture into cavities, fis-
sures, pores or cracks so that they are
completely filled, rendering the rock
structure impermeable to water. This
process has recently been introduced and
is now being employed in the United
States by the Dravo Contracting Co.,
Pittsburgh, Pa. Major J. S. Crawhall
has recently come from England to join
the staff of the Dravo Contracting Co.,
as an expert on the cementation work.

It is reported that the Francois com-
pany is employed on such work in Eu-
rope as the restoration of St. Paul's
Cathedral, the Mersey Tunnel, and the
London tube subways. The Dravo Con-
tracting Co., states in its announcement
that while ordinary grouting has been
and still is a very useful aid in engi-
neering work, its application is limited,
and that those engineers who have had
long experience in grouting have been

the first to recognize the possibilities of
cementation in greater elasticity and
efficiency.

An important feature of the Francois
process is that a continuous stream of
grout is pumped into the fissures at
pressures ranging up to 3,000 pounds
per sq.in. The fissures are rendered
more tractable to the reception of grout
by the lubrication action of a patented
chemical process so that, it is claimed,
the finest hair cracks are sealed. In
mining, the method is principally applied
to shaft-sinking, tunnel driving through
water-bearing or loose ground, sealing
leakages in existing shafts and tunnels
and in the construction of water-tight
mine dams. In the civil engineering field
cementation is said to be even more
extensive. Apart from tunnels and shafts
in wet ground, the process is claimed
to have proved sound and economical
in preparing the underlying rock for
reservoir construction and in avoiding
deep core wall trenches. It has also
been used in sealing leakages in existing
reservoirs and culverts, in the conversion
of gravels into concrete, and in the con-
solidation of defective foundations.

BUSINESS OUTLOOK IMPROVED - SAYS U. OF C. ECONOMICS PROFESSOR

The year 1928 will be one of fair prosperity in general business, and the total volume of transactions for the United States as a whole during the first half of the new year is expected to be about 4 per cent above the corresponding period of 1927, according to Dr. Norman J. Silberling, associate professor of economics of the University of California.

Definite forecasts as to whether or not the immediate future will be prosperous in general or in a given community are made by Dr. Silberling, whose unique statistical methods of studying economic conditions have led to the establishment of an economic research laboratory known as the Silberling Business Service.

The "probable range" which general or local business will follow during the coming year, as prepared by Silberling and his staff, is based on the ratio of supply and demand for bank credit, and has for many years proved to be within a small percentage of absolute accuracy.

There are four distinct types of change which must be studied in interpreting business movements, according to Silberling. Changes due to growth cause a gradual trend upward, but there is also a cyclic movement, which causes a speeding up or lessening of the upward trend.

"Still another form of change which is encountered is the seasonal fluctuation," says Dr. Silberling. "This is relatively simple and familiar, yet it has taken science a long time to provide business with accurate instruments for measuring these changes arising from the regular changes in the weather and the buying habits of the people, and thus to carefully determine cyclic conditions after allowing for this factor."

Accidental changes, due to wars, earthquakes and other occasional major

disturbances, are of rare occurrence as far as the United States is concerned, according to Dr. Silberling, while minor disturbances do little to affect the general curves of business.

The Silberling staff not only prepares analyses indicating national business conditions and the proper policies for business men to follow as conditions change, but also undertakes studies of conditions in certain special branches of industry, such as building construction, automobile distribution, retail merchandising, etc., especially as these relate to the various parts of the Pacific Coast.

"Two regions within a hundred miles of each other may have at a given time quite different economic situations," says Silberling. "This is a fact which few people realize. A business which may be successful in one town might fail miserably in a nearby one. An intelligent survey of the situation would bring the facts to light."

Fluctuations in the security markets are also important phenomena capable of statistical analysis which can be of great value to the careful investor. "Ninety per cent of the public who put money in stocks do so by following personal 'tips,' with the result that they continually fritter away their capital. The economist, using facts and figures as a scientist would use his microscope, should be able to bring order and meaning out of a chaos of the ever-changing prices and financial situations," says Dr. Silberling.

"One of the most needed services for the average investor is impartial advice as to the principles underlying the investments of various distinct classes of stocks and the proper times for buying and selling them," says Dr. Silberling.

ANNUAL MESSAGE OF HERBERT HOOVER

(Statement issued on request of newspapers by Herbert Hoover, Sec. of Commerce)

An answer to the usual annual request of the press for a statement of prospects requires a short catalogue of the economic forces which dominate the business situation at our entry into the New Year.

The more general of these forces, of course, include the credit situation, the degree of accumulated stocks of goods or speculation in them, the size of the crops, the rate of wages, the outlook in labor relations and employment, the prospects of foreign trade and to these also need be added the particular forces in motion in the different major industries.

Upon these points it may be said that there is an ample supply of credits at low rates; the somewhat larger stocks of goods which were accumulated during the summer are being reduced; there is no consequential speculation in commodities; the crops have been abundant; wages are at a high level; we are recovering from some partial unemployment, especially in the automobile industry. There is peace in most sections of the labor world except bituminous coal; there is more peace in the international world than at any time since the war; the foreign world is recovering its economic strength and buying power, therefore, our foreign trade is steadily increasing. The phenomena usually accredited as premonitory of a slump are therefore absent.

During the past year there have been important shifts in our own economic world which have an important bearing upon the future. While the average

wholesale price of all commodities at about 50 per cent above pre-war is today the same as a year ago, yet if we divide them into agricultural and non-agricultural goods, it will be found that the average price of non-agricultural products has fallen in the twelve months from about 60 per cent above pre-war to 51 per cent pre-war; while the average of agricultural products at central markets has risen from about 35 per cent above pre-war to about 54 per cent above pre-war; however, prices on the farm show only a rise of from about 30 per cent above to about 39 per cent above pre-war. Manufacture and distribution have by savings and diminished profits accommodated themselves to this situation of decreasing prices without reduction in the average level of wages and therefore in the national buying power. But the great extent to which industry has accommodated itself to lower prices by decreased costs makes for a sounder condition for the ensuing year. Despite decreasing prices, production and consumption of manufactured commodities have been maintained upon a high level, as shown by car-loadings of class of goods, which have been about equal to those of last year.

As to particular industries, agriculture, textiles, bituminous coal and some metals—still lag behind the others. The contract let for future execution in the construction industries are at as high a level as at this time a year ago.

Taken in a broad sense we enter the New Year with the forces of stability dominant in the business world.

ALAMEDA COUNTY BUILDERS ELECT OFFICERS

J. H. Pedgrift, general contractor, was elected president of the Builders' Exchange of Alameda County, at the annual meeting and Christmas Tree Jinks, Dec. 28. Wm. Makin, plasterer, was elected first vice-president and Sam D. North, paint manufacturer, second vice-president. Herbert Beckwith, brick contractor was elected treasurer and A. B. Greenberg, structural steel contractor, secretary.

The following directors were elected to serve for the ensuing year: Wm. Makin, J. H. Pedgrift, J. H. Fitzmaurice, Herbert Beckwith, W. J. Rigney, W. W. Dennis, Joe Turgeon, Sam D. North, Wm. Moehlmann, A. B. Greenberg, Al M. Poulsen and Waverly Tilden.

Immediately following the election of officers the usual Christmas tree jinks was held under the supervision of the Entertainment Committee composed of Geo. F. Bacigalupi and A. B. Greenberg. A buffet luncheon and entertainment were features of the evening.

LUMBER MANUFACTURERS SECURE NEW FIELD ENGINEER

Reuben W. Smith, who has been temporarily attached to the western division office of the National Lumber Manufacturers Association, has joined the staff as field engineer, it is announced by A. C. Horner, division manager. For two years Smith was professor of wood utilization at the New York State College of Forestry at Syracuse. During that time he compiled and published statistics, by species, of the amount of lumber and forest products used in the wood-working plants and by the retail lumber trade of New York state. He also spent a year at the Forest Products Laboratory at Madison, Wisconsin, and a year as chief treating engineer of the Charles R. McCormick Lumber Company, St. Helena, Oregon. His most recent position was a chief of the consulting department of the Protexol Corporation, Kenilworth, New Jersey. Smith is a graduate of the forestry school of the University of California and did graduate work at the University of Wisconsin.

R. R. COMMISSION RATE DEPARTMENT HAS BUSY YEAR IN 1927

The year 1927 was an extremely busy one for the Rate Department of the State Railroad Commission which has supervision over approximately 1400 public utilities, including steam and electric railways, water carriers, automobile carriers, express companies, warehouses, wharves and airplanes. These utilities have some 15,000 active tariffs and probably 100,000 historical tariffs on file in the Department. There were approximately 100 formal proceedings brought during the year 1927 and several thousand informal actions. The most important formal proceedings involved the rates on dried fruits, lumber, grain, oil and crushed rock. Other proceedings involved refrigeration charges, joint fares between stage lines, warehouse rates and services, and innumerable proceedings dealing with the freight rates and passenger fares of automobile common carrier operators.

Suit for damages totaling \$55,259.58 has been filed at Martinez by C. W. Wooll against the J. S. Shea Co. for injuries sustained by him while measuring a pile driver hammer near Brentwood on the Mokelumne water project on Jan. 3, 1927. Wooll was the "driver" measuring when the apparatus was moved by Shea's employees causing him to fall, through their negligence, the complaint recites, and permanently injuring him.

UNION OIL COMPANY NAMES THREE SERVICE STATION WINNERS

Gasoline filling stations have become so numerous in the larger cities that their type of construction and general appearance are having a marked effect upon the architecture of their immediate surroundings. Standardization in design has been the keynote of the major marketing companies with the result that stations which might be in harmony in one district struck an inharmonious note in another. In the immense chain of service stations which have become so numerous throughout the length and breadth of the country that they are now a definite factor in the everyday life of the people, seldom is it found that the stations fit in or blend with the development of the neighborhood; quite frequently they offer a marked contrast to and detract from the architectural beauty of the adjoining buildings.

Recognizing this fact, The Union Oil Company is attempting to develop various types of stations so as to remedy this condition and mark the way for more harmonious settings. To this end it has recently carried on a contest for the purpose of securing designs of service stations which would be adaptable to the particular locations in which it operates and be of civic value to the various communities. In this the company has the co-operation of the National Institute of Architects.

Cash prizes were offered for the best three designs and honorable mention with a monetary consideration were also given to a number of other designs.

That the movement to combine beauty and utility in service station construction found favor not only among the architectural profession but also among civic bodies is indicated by the number of entries in the competition and also by commendatory editorial comment and ex-

pressions from various public officials. Over 100 entries from all sections of the Pacific Coast were received and passed upon by the jury of award.

The winning design was submitted by Lyle Reynolds Wheeler of Los Angeles. It is of purely modernistic architecture, and is of a type readily adaptable to all Pacific Coast localities. Several unusual architectural features, not ordinarily found in service station building, are incorporated. Lighting effects are utilized in a way that has never been approached before.

Harbin F. Hunter, also of Los Angeles, won second prize. His design was also of a modernistic type of architecture and it is distinctive in that only three materials are used in its construction, these being metal, marble and glass.

Modified Spanish was the motive used by Harry Sims Bent in his third prize conception.

The awards were made by a jury of three, Reginald D. Johnson, past president Southern California Chapter American Institute of Architects, and winner of the national award in 1925 for residential architecture; Stiles O. Clements, member of the national architectural body, and L. P. St. Clair, vice president of the Union Oil Company. In announcing the awards the jury stated that the quality of the designs submitted ranked very high.

It is not the intention of the Union Oil Company to standardize on the designs submitted in the construction of its service stations, neither will these be reproduced intact. They will merely be used as types from which the best features for operating stations will be adapted, keeping in mind that desire to create nothing that will conflict with neighborhood or city development.

LUMBER INDUSTRY OF U. S. IN PERIOD OF PAINFUL TRANSITION

"The lumber industry is one of the great industries of the United States that is in a period of painful transition," says President Kaul of the National Lumber Manufacturers Association, in his comment on the lumber industry for the year 1927. "This period has already lasted several years, and we feel that if there is to be any change in 1928 it must be for the better."

"Speaking broadly, the price tendency has been discouraging throughout 1927 and there is nothing to indicate that it will change much in the next few months, Kaul continued. "There is hope, however, that the lessening of production which necessity has been enforcing, may have some temporary effect; but in such a widely distributed and decentralized industry, the least encouragement in the way of favorable prices leads almost immediately to over-production. In view of the rapid growth of population and the almost universal use of lumber in building and industry, over-production appears to be an anomaly. Actually, the lumber produced is invariably consumed, but too frequently in a buyers' market. Production during 1927 was about ten per cent less than in 1926, and there was some unemployment and pressure to reduce wages."

"One way out of the lumber industry's troubles would be consolidation, especially of the operations whose financial necessities compel production without due regard to the market. Negotiations have been under way for many months looking to a consolidation of a number of companies in the Pacific Northwest,

where there is most need of having production in strong hands. Such consolidation would be in the public interest, as they would lead to stability of operation, reasonable return to capital, steadiness of employment, better manufacture, much elimination of waste, and the conservation of the best timber for the higher and more economical uses," Kaul continued.

"I am sure that it is only a question of time until economic pressure will rehabilitate the industry but it is regrettable that the rehabilitation has not been intelligently directed to a prompt conclusion. Steps in that direction are being taken by the National Lumber Trade Extension Campaign, a cooperative effort which will be in full swing during 1928. It seeks to raise the better manufactured lumber out of the general ruck and create a quality demand for it, which will not be subject to quantitative suppression," says Kaul.

SOME DISTINCTION!

The Calistoga High School at Calistoga, Calif., has a distinction which, it is claimed, is enjoyed by few, if any, other schools in California. A hot water well 125 feet in depth has recently been bored on the school grounds, and the water has been piped to the locker rooms of the school building in order to provide hot showers for the students. This is considered to be a great improvement and accommodation, as heretofore there has been no hot water showers at the school.

LUMBER OUTLOOK IN 1928

J. D. Tennant, president of the West Coast Lumber Bureau, in an exclusive interview with the Associated Press sums up the lumber industry situation for 1928 as follows:

Western lumbermen, like wheat farmers, have world markets where they compete with forest species from all lands, so that until the remote corners of the earth send their building permits we cannot predict whether our 1928 production will be large or small, more profitable or less profitable.

The United States during 1926 used approximately 36,000,000,000 board ft. of lumber, or enough to build 3,600,000 five room houses. It is believed that lumber consumption increased during 1927 over 1926 within the United States. We know that our production was greater and that practically all the lumber made by our mills has been sold. Stocks on hand are lower now than they were a year ago.

BRIDGE BONDS PROPOSED

A bill has been introduced into the Seattle city council seeking an election to vote bonds of \$500,000 to aid in the construction of a bridge across the north-west arm of Lake Union at or near Stone Way. The last Legislature appropriated \$500,000 toward such a bridge and the King County Commissioners have appropriated an equal amount, anticipating a total of \$1,500,000 from the three sources.

SITE IS OFFERED FOR STATE NARCOTIC HOSPITAL

SACRAMENTO, Cal.—A 1000-acre site for a state narcotic hospital, isolated and specially selected to permit the severance of all contacts with the outside world during the period of the addict's reformation, will be placed at the disposal of the state government, if the state will undertake erection of the necessary buildings, it is announced by Senator Sanborn Young of Los Gatos. It is estimated that such building would involve an expenditure of \$500,000.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1417-X-3900-CS ASSISTANT FIELD CONSTRUCTION ENGINEERS, to assist in supervision of field force of various classes of mechanics. Prefer those with oil refinery construction experience, who are now available or expect to be available shortly after January 1st. Apply by letter. Headquarters Middlewest.

R-1412-S MECHANICAL ENGINEER. Technical graduate with some practical shop experience to set up and operate an oxygen compression plant. Permanent opportunity for man with executive ability and willingness to work. Prefer married man not over 25. Salary \$160-\$200 to start. Location Northern California. Apply by letter for S. F. or L. A. interview.

R-1373-S MECHANICAL DRAFTSMAN. With good shop experience in tool production and several years in the drafting board for tool designing in an up-to-date manufacturing plant. Salary about \$175 a month to start, with steady employment for qualified man. Local.

R-1413-S SALES ENGINEER, preferably under 35, to develop the sales of oxygen gas. Should have some sales and industrial experience which would fit him for branch sales office management after factory training. Headquarters Los Angeles. Apply by letter. Salary open.

THE OBSERVER

What He Hears
and Sees
On His Rounds

Good morning fellows—and ladies—if any of you read this column. All of us have made our resolutions. Some made them to keep—others to break. If good resolutions—let's hope the former—if bad, let's hope the latter.

However, all of us have pledged ourselves to do something this year that we did not do last year. Pledges are easy to make—but easier to break.

All of us, no doubt, have pledged ourselves to do better than we did last year—and we will—provided, however, we strive to do so. If not successful in the earlier part of the year, let us continue striving until we see accomplishments. If we do this, we shall witness progress.

Industrial leaders throughout the United States predict a prosperous season for the construction industry. The newspapers have been carrying comments of big men in the industry and they all feel confident of a healthy construction program during the current year. That's big news for you.

Let your resolution be that you will be a big factor in the 1928 program—that you will get a big piece of the 1928 business.

Incorporate in your resolution the pledge that you will support your business organization—the Builders' Exchange—the organization that is ever striving to better conditions for you—the organization that is always seeking ways and means to promote harmony where industrial strife seeks to force an entry. Make it your business to meet members of the exchange on the exchange floor and do business at that location.

Considering the number who actually do business on the exchange floor—few apparently realize the value of such business transactions. It furnishes you with a location that those desiring to do business with you will know where to find you. It promotes greater business dealings among members—men who are organized to build up a bigger and better organization. It means that the more business you do on the exchange floor promotes the strength of the organization. It brings about new members—and the more members the greater the organization—the greater the business dealing among members. In brief, in Unity there is Strength. Think it over—it's serious—for yourself and those who do business with you.

Finally, via this column, the writer wishes you all there is to be had during 1928. May it be the opening year of a number of prosperous years in the future.

And now to proceed with the daily routine—we "observe" the following:

Reduction of cut due to the quiet condition of the lumber industry in the United States was the outstanding feature of the past year, according to information gathered from four big lumber companies operating within the San Joaquin valley by the Fresno Republican. The total cut for 1927 was approximately 325,000,000 feet. The four companies are the Pickering Lumber Co. of Standard City; the Yosemite Lumber Co. of Merced Falls; the Madera Sugar Pine Company of Madera, and the Sugar Pine Lumber Co. of Fresno. The reductions averaged between 15 and 20 per cent. The largest cut of any company in the valley was that of the Pickering Lumber Co. This amounted to approximately 125,000,000 feet as compared with 158,000,000 feet in 1926. The reduction, as in all other cases, was voluntary and was due to the quietness of the lumber market, it is reported. Approximately one-half of the cut of this company was from private holdings, a large portion being on the Burns and Gable tracts near Strawberry. The company cut approximately 58,000,000 feet from government land in the Stanislaus National forest.

Reports to the conference of the National Association of Building Trades Employers held in Chicago indicated that there is little likelihood of wage increase for building craftsmen being granted this year. A majority of employers reported that they expected about the same volume of construction next year as in 1927, while a number of sections expect to meet with a slight recession. The five-day week movement of the building crafts was condemned as "uneconomic" and a "camouflaged" effort to gain wage increases. The conference called upon the National Board of Jurisdictional Awards to continue to function and save the construction industry from the menace of jurisdictional strikes.

As a result of the sustained prosperity of business, office space has been absorbed on the whole, nearly as fast as it has been produced, leaving the amount of vacant space at 10.87 per cent which is only slightly above the normal figure. This is the finding of the National Association of Building Owners and Managers deduced from a survey made of office space conditions in the country. An improvement in space absorption is reported by many cities including Atlanta, Birmingham, Buffalo, Cincinnati, Denver, Oakland, Pittsburgh, St. Louis, Salt Lake City, San Antonio, Tex.; and Spokane, Wash.

In the building industry, a decline in construction of residential and other types of buildings has been offset by an increase in public works, so that the total amount of work begun during the year will probably be about equal to that of 1926. Contracts awarded in 37 states, as reported by the F. W. Dodge corporation, in the first 11 months of 1927 had a total value of \$5,825,691,300. This is less than one-half per cent below the corresponding figure a year ago. New work reported as contemplated last month was 31 per cent greater than in November, 1926.

U. S. Department of Commerce quoting figures from the Bureau of Census produces the fact that New York City has the lowest percentage of home ownership of its inhabitants. Des Moines, leads the list in cities of more than 100,000 population in 1920. Philadelphia, once known as a city of homes, is 20th on the list.

The International Federation of Trades Unions has a membership of \$13,145,533 drawn from 25 countries. Of this total 755,193 are building trades workers.

Examinations for posts of technical assistant sanitary engineer, assaiee educationist and traveling mechanic are announced by the United States Civil Service Commission. The first position, in the federal public health service pays \$2100 per year; the second, in the bureau of education, pays \$3000 and the third, in the postoffice departments, \$2400 per year. Details of the positions and examinations may be obtained from the Board of Civil Service Examiners at the San Francisco Post Office.

Classification of 1927 building operations in San Francisco according to type of construction, has been completed by Henry E. Shields, acting chief building inspector of the Department of Public Works. The 1927 operations are classified as follows:

Class	Permits	Est. cost
A	25	\$ 6,773,000
B	14	2,546,000
C	199	7,388,960
Frames	3664	22,784,423
Alterations	5260	5,284,172
Public	17	1,168,653
Harbor	10	962,640
State	1	125,000
Total	9190	\$47,032,845

The total volume of proposed construction announced in the United States during 1927 indicates comparatively little change has taken place in the trend on large operations. In the heavy construction field, work reached \$5,147,000,000 for the year compared with \$5,615,817,000 in 1926, the McGraw-Hill Construction Daily reports. Considering the large sum involved the decline in value of projects proposed, about eight per cent, is not regarded significant.

Henry Cowell Lime & Cement Co. of San Francisco having operated its entire plant for a full calendar year without a lost-time accident will receive the Portland Cement Association safety trophy. The eight-ton monument is awarded each year to mills running an entire year free from mishaps.

CALIFORNIA WILL PROGRESS IN 1928 SAYS WILL C. WOOD

California has made substantial progress during 1927 and will enter the new year with the foundation for continued prosperity well laid. This is in the opinion of Will C. Wood, state superintendent of banks. He said:

"While this state has some pressing economic problems to solve, particularly in the agricultural districts, I feel that conditions in general are very hopeful and the prospects for 1928 are bright. The great diversification of enterprises in California makes our state unique among her sister states.

"Because of her enviable economic situation, California has not suffered recessions in business and industry comparable to those suffered elsewhere. This state's prosperity is not tied to any one industry or enterprise. Agriculture, manufacturing, lumbering, commerce, mining—all these fundamental economic factors are found in California.

"A recession of prosperity in any one line does not affect the state's prosperity in any serious degree. While business may be slowed up for a time, the state's advance can not be greatly retarded for any considerable period."

TRADE NOTES

Roy Lemoin, Oakland contractor doing business as the Empire Construction Co., gives liabilities of \$3572 and assets of \$6200 of which \$4000 is in unliquidated claims, in a voluntary petition of bankruptcy on file in the Federal District Court at San Francisco.

G. Bianchini & Co., rock, sand, gravel and cement dealers, 552 Berry street, San Francisco, recently changed its name and will hereafter operate as the San Francisco Gravel Co. with no change in ownership. Plant operations will continue as heretofore at 552 Berry street.

The common brick manufactured in 1927 by more than 1200 plants is placed at 7,500,000,000 by the Common Brick Manufacturers' Association of America. Loading 20,000 bricks to a car, it would require 375,000 cars to carry the output, or 7500 trainloads if divided into trains of 50 cars each. Allowing that the 1927 production will sell for about the same as in 1926, the actual selling price will be \$4.69 a ton, about what the manufacturer pays for soft coal on contract price, the association says.

Wisconsin Iron & Wire Works of Milwaukee, Wis., announces change of the firm name to Wisconsin Ornamental Iron & Bronze Co. The change is made in order to have the company name and the products more closely related.

Beginning January 1, 1928, the standard grades of Oak Flooring will be named as follows: First Grade Quartered (old name—Clear); First Grade Sap Quartered (old name—Sap Clear); Second Grade Quartered (old name—Select); First Grade Plain (old name—Clear); Second Grade Plain (old name—Select); Third Grade (old name—No. 1 Common); Fourth Grade (old name—No. 2 Common). Oak flooring grading rules will be printed and distributed January 1st. For a copy write Oak Flooring Manufacturers Association of the United States, 228 North La Salle Street, Chicago.

Stuart S. Smith Co., 19th and Indiana Sts., San Francisco, has been appointed by the T. L. Smith Co. of Milwaukee as distributors of Smith mixers and pavers for the Northern California and western Nevada territories.

Paradon Manufacturing Co., Arlington, N. J., announces the appointment of the Pacific Water Works Supply Co., Inc., Seattle, Wash., as its representative in the Pacific Northwest. The Chemical Equipment Corp., of Los Angeles, has been appointed in a similar capacity for the States of California, Nevada and Arizona.

BILL WOULD ESTABLISH HYDRAULIC LABORATORY IN STANDARDS BUREAU

A bill has been introduced into the Senate by Senator Ransdell authorizing the establishment of a national hydraulic laboratory in the Bureau of Standards. The bill was drafted by John R. Freeman. The bill proposes a national hydraulic laboratory "for the determination of fundamental data useful in hydraulic research and engineering including laboratory research relating to the behavior and control of river and harbor waters, the study of hydraulic structures and water flow, the development and testing of hydraulic instruments and accessories, and including such co-operation with other government departments, the states, technical and scientific institutions and societies as may be deemed necessary."

ALONG THE LINE

Gywnn Officer, 2328 Warring street, Berkeley, won the first prize of \$1000 cash for the best design for a small house in a contest conducted by "House Beautiful," a Boston magazine. The home which won the contest now stands in Claremont Court, Berkeley. Factors entering the contest were excellence of design, skill in the use of materials, economy of space and convenience of plan.

Walter B. Hogan, city engineer of Stockton, heads a committee representing the Stockton Chapter, American Association of Engineers, to meet with the San Joaquin County Chamber of Commerce road committee which is preparing a unified program of road development which it will put before the State Highway Commission Jan. 13 when that body visits Stockton.

E. W. Alexander was elected president and Geo. B. Sullivan, secretary, of the Santa Barbara City Harbor Commission at a recent meeting of that body.

Jas. W. Smith, pioneer general contractor and a member of the San Francisco Builders' Exchange, died at his home in Alameda December 31. Mr. Smith was a native of St. Johns, New Brunswick, and a member of San Francisco Council, Knights of Columbus, and Alameda Lodge No. 1015, Benevolent and Protective Order of Elks.

H. C. Cutting, mining engineer, was the principal speaker at the Jan. 3 meeting of the Berkeley Builders' Exchange.

George N. Randle, city engineer of Oakland, has refused to accept the appointment of city manager of Sacramento.

B. L. McCoy, former county surveyor of Butte County, died in Oroville, Jan. 1. He served for six years at Oroville's first city engineer.

According to a letter recently set all engineering societies in the state of New York, the attorney general will proceed against all engineers who are not duly licensed to practice or who have failed to renew their certificates as provided by Article 55 of the Education Law. Up to this time it was considered expedient to refrain from pushing the matter of legal procedure against unlicensed engineers, thereby giving them ample time to become familiar with the law and its requirements. However, inasmuch as several years have elapsed since the passage of the act, the attorney general's office has been requested by the Education Department of the state of New York to proceed against all delinquents.

Clyde C. Kennedy, San Francisco consulting engineer, has been retained by the city of Eureka and the city of San Mateo as consulting engineer on the reconstruction of the storm water systems in those cities.

Six building inspectors in the Bureau of Building Inspection, San Francisco Department of Public Works, have been removed from the pay roll due to the so-called economy program of the Board of Supervisors which body failed to appropriate sufficient funds to pay their salaries.

Bayard Knock, county surveyor of Glenn County, was married to Miss Heloise Dahlgren of Willows, in Los Angeles, Jan. 2.

HERE — THERE —
EVERYWHERE

Frank W. Plane, former secretary-manager of the Los Angeles Builders' Exchange, has been appointed general manager of the Los Angeles Brick Exchange with offices at 634 Chamber of Commerce Building, Los Angeles.

Empire Steel Corp., a \$20,000,000 concern, representing a consolidation of six northern Ohio steel companies, was incorporated December 30, according to word from Cleveland, Ohio.

The Supreme Court of Massachusetts has decided that a boycott of non-union made building material in that state is illegal. The decision affects the carpenters who had refused to handle material that did not bear the label.

There were fifty-nine increases and eleven decreases in wage scales recorded by the Labor Bureau, Inc., during November. There were thirteen increases in the building trades.

Asserting that the proposed "shingle ordinance" of the San Francisco Board of Supervisors should not be passed until home owners have a chance to voice affirmation or disapproval of the proposed ordinance, Supervisor A. J. Gallagher has requested property owners and builders to request the Board to delay further action until a conference of home owners, home builders and others is called.

Contractors' Association of Petaluma, Calif., has been elected to membership in the National Association of Builders' Exchanges. H. P. Vogensen is secretary of the association. Pasadena Builders' Exchange has also been admitted to membership in the National Association. George Israel is secretary-manager of the Pasadena organization.

The Central Division of the National Lumber Manufacturers' Association is making a study of the objections of architects and builders to hardwood floors in large fireproof buildings.

Chas. Derleth Jr., chief engineer for the Carquinez bridge, addressed the Sacramento Chapter, American Association of Engineers, Jan. 5 on the Bridge Era of San Francisco Bay. Mr. Derleth is dean of the College of Civil Engineering at the University of California.

John Dupes, member of the Bay Cities Contracting Plasterers' Assn., and the Builders' Exchange of Santa Monica, has been appointed plastering inspector of Santa Monica. He commenced his duties November 15.

PAINT RETARDS WEATHERING

Painting is the best means known for protecting exposed wood from the deterioration known as weathering says the forest products laboratory of the Forest Service, United States Department of Agriculture.

Weathering is caused by the shrinkage of the surface layers of wood fibers with rapid moisture changes. Two softwood boards, one unpainted and one painted with three coats of ordinary house paint, were exposed to the weather for one year at the forest products laboratory. At the end of the year the edge grain of the unpainted board was considerably "washboarded" because of the permanent "set" resulting from differences in the swelling and shrinkage of spring wood and summer wood. The only irregularities on the surface of the painted board at the end of the year were the marks of the brush.

EXACT BASIS OF CONCRETE PROPORTIONING

BY JOS. A. KITTS

Consulting Concrete Technologist, Kitts & Tuthill, San Francisco

The basis of concrete porportioning outlined in the accompanying article was employed on the Exchequer Dam project of the Merced Irrigation District (457,000 cubic yards), on the Oakland-Alameda Estuary Sub-way (75,000 cubic yards), and other projects in California totaling 622,000 cubic yards. It is being used on other projects aggregating over 600,000 cubic yards and also by an enterprising dealer in "certified concrete" in San Francisco on such buildings as the Huckin's Hotel at Powell and Sutter streets. It is a Western development.

Aggregates for concrete mixtures are generally measured in arbitrary proportions by loose-moist volume, sometimes by munded volume and sometimes by weight. No one of these three methods of measurement in itself is exact or definite as a basis of proportioning, for the following reasons:

(1) Aggregates from the same source vary widely in specific gravity, average diameter of particles, graduation of sizes of particles, density (when compacted in a uniform manner), moisture content, absorption and bulking by loose measurement and moisture. The absolute volumes ("absolute volume" as used herein denotes "apparent volume" as generally termed by concrete physicists. It is the volume within the surface of the particle), and graduation of sizes of particles, the water required for workability and the cement required for the strength sought, are affected by these variations of the physical characteristics of the aggregates.

(2) Loose-moist measured volumes are affected by "bulking" or increase over the standard dry-rodded volumes. This bulking is affected by losseness of measure, moisture content and diameter of particles and varies from about 0 to 45 per cent. The absolute volume of particles in a given measure vary with this bulking and with other characteristics given in (1).

(3) Inundated volumes bulk from 0 to 8 per cent depending upon the average diameter of particles and the absolute volume of particles in a given measure vary likewise.

(4) the absolute volumes, corresponding to particular weight measurements, vary with the specific gravities and moisture contents of the aggregates.

(5) The standard dry-rodded volume varies in density from about 0.90 to 0.96 depending upon the shape, maximum size and graduation of sizes of particles and the absolute volume in a given measure varies directly with the density. A typical result is that the 1-2-4 mix, for example, varies in strength from 500 to 5000 pounds per square inch at ages of 28 days.

It can be seen from the foregoing that an exact basis of proportioning concrete mixtures must comprehend the absolute volume of aggregate particles. However, one absolute volume may contain particles all one size and others—two, three or an infinite number of sizes. They are not alike practically unless they have nearly the same graduation of sizes.

Experience shows that the strength, density, uniformity, impenmeability, workability and economy of a concrete mixture depends largely upon the maximum size, coarseness, and uniformity of grading of diameters of aggregate particles from fine to coarse. It also shows that silt or other inert particles, finer than the average cement particles, adulterates the cement and reduces the strength and density of the concrete.

These requirements of maximum and minimum size, coarseness and uniformity of grading of aggregate particles are expressed by the Kitts-Peugh grading equation

r = 1 - (d/D)m

in which r is the proportion by absolute volume retained on given screen opening of d inches, D is the maximum

size of the aggregate, m is the coarseness exponent and A is the minimum size of the aggregate, excluding silt. We have, then, absolute volumes of particles, of any size limitations, uniformly proportioned to a definite coarseness of graduation of particles. To this we must add cement and water.

The strength, density, impenmeability and economy of concrete depends also upon the absolute volume of cement to unit volume of concrete and upon the absolute volume of mixing water to unit volume of cement.

Assuming, then, that the materials are of standard quality, the exact basis of a concrete mix consists of: an aggregate, of a maximum and minimum size limitation, uniformly graded to a particular coarseness by diameters and absolute volumes of particles, proportioned with absolute volumes of cement and water; and, the mix may be specified as follows:

Basis of mix:

m = 0.5, D = 1.5", A = 0.00146"

Grading of aggregates, r = 1 - (d/D)m

Absolute volume of cement per cubic yard of concrete, (1.75 bbls.) 3.395 cu. ft. Water to cement ratio by absolute volume, 1.65.

Method of application: The theoretical percentages of the mixed aggregate retained on and passing the standard screens are determined from the equation to be as follows:

Sieve No.	d"	100 r	100-100 r	
A	.00146	100	0	} C.M.=5.24
200	.0029	99	1	
100	.0059	97	?	
50	.0117	94	6	
30	.0234	90	10	
16	.0469	85	15	
8	.0937	77	23	} C.M.=9.23
4	.187	67	(33)	
3/4"	.375	52	48	
3/4"	.75	30	70	
1 1/2"	1.50	0	100	

Sum/100 = 7.91 Coarseness Modulus

The summation (7.91) of the proportions retained on each screen is a function of the average diameter of particles and may be called a "coarseness modulus." It is of the same character as the well known "fineness modulus" excepting that it takes account of two sizes smaller than the No. 100 sieve and has a minimum limitation mathematically. Its practical value is that we are able to determine by an algebraic process the proportions of two, three or more sizes of aggregates so that their combination most nearly conforms in grading to the theoretical grading curve. The greater the number of sizes of aggregates (A—No. 200, No. 200—No. 100, No. 100—No. 4, No. 4—3/4", etc.), the more nearly we can approximate the theoretical grading by its use. It is much more expedient than the graphical cut and try method so long used.

Assuming that we have on the job two sands and two gravels whose practical limitations of sizes and coarseness moduli are

	Size No.	C.M.
Fine Sand	A—16	3.84
Coarse Sand	100—4	5.25
Fine Gravel	4—3/4"	8.55
Coarse Gravel	3/4"—1 1/2"	9.83

we then separate the theoretical grading

at the No. 4 sieve, corresponding to the pairs of job aggregates, and find the theoretical coarseness modulus of the sand to be 5.24 and that of the gravel 9.23. The coarseness modulus of the combined aggregate is 7.91.

We have then by simple proportion

100	(9.23-7.91) (9.23-5.24)	= 33% sand,
100-23		= 67% gravel, and the proportions of the job aggregates are
33	(5.55-5.24) (5.35-3.84)	= 3% fine sand
33-3		= 30% coarse sand
67	(9.83-9.23) (9.83-8.55)	= 31% fine gravel
67-31		= 36% coarse gravel
Total		100%

These are the proportions of dry aggregate by absolute volume. The coarseness modulus of the whole is (.03 x 3.84) plus (.70 x 5.35) plus (.31 x 8.55) plus (.36 x 9.83) = 7.91 which was the total sought.

The absolute volume of mixed aggregate in one cubic yard of concrete of the given specifications will be

cement water
27 — (3.395) — (3.395x1.65) = 18.005 cu.ft
YIELD

assuming the yield as unity. We have then

	Absolute volume cu.ft.
Cement, 1.75x4x.485 =	3.395
Water, 1.65x3.395 =	5.602
Fine sand, 18.005x.03 =	0.540
Coarse sand, 18.005x.30 =	5.401
Fine gravel, 18.005x.31 =	5.581
Coarse gravel, 18.005x.36 =	6.481
Total	27.0

Having determined the specific gravity, density, absorption, moisture content and bulking of the individual job aggregates, we can readily determine the proportions by weight, lose-measured, dry-rodded, or inundated volume—compensating for the moisture content and absorption of the moist aggregates as used. This is a matter of simple physics and mathematics.

One man-hour of systematized and co-ordinated laboratory control is required for every 10 to 50 cubic yards of concrete, depending upon the conditions, in order to effect the most economical results.

This basis of proportioning has been used with success on projects of 1000 to 400,000 cubic yards, with economy of cement of from 10 to 25 per cent of that required by the usual practice, and producing concrete of the required quality with a uniformity not possible to accomplish otherwise. Saving of the margin of excess cement, usually allowed in lieu of exact proportioning, pays the cost of this production control on small jobs and many times over on large projects and the quality of the concrete is insured.

\$2,110,600,000 LOANED TO BUILD HOMES IN 1927

Residence building in the United States was 4 per cent less in 1927 than in 1926, the annual statement of the United States League of Local Building and Loan Associations reveals. During the year the building and loan association provided funds for the construction of 600,000 homes. The mortgage loans made totaled \$2,110,600,000. The total loan investment of the associations was \$6,525,700,000, and the membership amounted to 11,305,000 persons.

BERKELEY BUILDING

Berkeley building operations during 1927 involved an expenditure of \$6,676,718 according to Building Inspector Stanley Koch. The year's business in new construction is less than that of 1926, when the total was \$7,337,076.

STABILITY IN BUILDING INDUSTRY PREDICTED BY S. W. STRAUS CO.

Sound stability in the building industry during the coming year is indicated by all the factors on which one must depend in any such forecast. It is doubtful if the total of new building construction in our Pacific Coast cities during 1928 will exceed that of 1927 by any substantial amount, but there is no probability of any reduction.

There exists at the opening of the new year a very evident demand for new buildings of various types which must be supplied, a demand sufficient to keep the volume of construction up to that of 1927, at least, in all of the West Coast centers. In certain cities it is obvious that there is a surplus of certain types of structures, but such excesses are quite balanced by shortages of other types.

The last two years have shown a steady slowing down of building activities throughout the country in general, although not to so great a degree in these western cities as elsewhere. The total of new construction for which building permits were issued in 94 Pacific Coast cities reported in the National "Monthly Building Survey" of S. W. Straus & Co. for 1925 was \$642,222,902, and for 1926 was \$495,690,832. The 1927 total is not yet compiled, but an estimate based on the records for the first 11 months indicates a figure of approximately \$465,000,000.

Analysts of the building industry have found official reports of building permits issued the most accurate index of pending operations, clearly and dependably forecasting labor employment and demand for financing and for materials. For the United States, as a whole, building activity has slowed down during 1927 by approximately 13 per cent, while the reduction along the Pacific Coast has been less than 7 per cent. This balances with the fact that there was much less danger from overbuilding in this area at the beginning of the year than was the case in eastern cities.

An analysis of building activity during 1927 shows that the reduction in

volume for this year is chiefly due to the lesser number of big building projects undertaken. This is also the case in the cities of the eastern states, probably to a greater extent than along the Pacific Coast. This reduction in this type of construction has re-established a proper balance as between supply and demand, which was threatened by the heavy building program of 1925 and still threatened at the end of 1926.

Students of the subject are well agreed that big building construction may now safely be resumed without jeopardy to existing buildings if proper precaution is exercised in the promotion of such enterprises. Constant growth in population, shifting centers of business activity, demands for increasingly better housing accommodations paralleling the general prosperity and the ambitions of the people, are factors constantly at work strengthening the demand for new buildings of all types and in all population centers.

While this two years' reduction in building operations has had the commensurate effect of curtailing employment in the building crafts, particularly evident during 1927, it has also effected an increased efficiency of production while maintaining wage schedules unimpaired. At the same time there has been a slight reduction in the cost schedules of building materials estimated in some cities as high as 5 per cent. This, however, is unimportant, since labor represents approximately 60 per cent of the cost of building construction and wage scales remain as before.

Building activity is considered an important and a fundamental index of business conditions generally. It distributes enormous sums in payrolls to construction workers and to those who produce building materials. It reflects growth in population and economic prosperity, and it provides sound investment for surplus funds. A continued stable building program for 1928 in our Pacific Coast cities promises a steady and dependable prosperity in all phases of business and industry.

\$123,027,239 IS LOS ANGELES BUILDING EXPENDITURE FOR YEAR 1927

Totals for building permits issued in Los Angeles during 1927 show a gain of \$21,024 in valuation and 1081 in number over those of 1926.

The total valuation for the building permits in 1927 is \$123,027,239 against \$123,006,215. The number of permits issued in 1927 is 38,559, compared with 37,478 in 1926.

Building records for December show a decided drop from the November figures, with 2483 permits valued at \$6,620,403 in December, compared with 3292 permits valued at \$17,464,327 issued in November. The high mark made in November is due principally to \$10,000,000 worth of permits issued to the county for the new general hospital, new museum unit and a sanitarium building.

November totals also show a decline from the figures of December, 1926, when 2324 permits were issued for buildings valued at \$7,366,308.

Permits for new dwellings lead December building with 617 buildings valued at \$2,626,722. Apartment buildings are second in valuation at \$1,617,800. There were 60 permits issued for apartments. Accommodation for 536 families will be provided by the new single family dwellings, 177 families in the apartment houses. Living quarters for a total of 1528 families are to be made possible by the December building.

M. G. BUGBEE, ARCHITECT, DEAD

Maxwell Greene Bugbee, 62, San Francisco architect, died at the home of his son, 410 Haight St., San Francisco, Dec. 29. He was a son of the late Superior Judge John S. Bugbee. He studied architecture in his grandfather's office in San Francisco and spent four years in New York before returning to California to work at his profession.

ROCK PLANT OPERATING

Plant of the Johnston Rock Company on Butte Creek at Chico has started operations. The plant, according to the owners, J. E. Johnston and Frank Dassel, will have a 1000-ton daily capacity and represents an expenditure of approximately \$250,000. The old plant on Sandy Gulch known as the Chico Sand, Rock & Gravel Company, will be abandoned. Mr. Dassel will handle sales in the Chico territory and F. C. Hewitt, formerly with the California State Highway Commission, will handle the outside territory. Territory between Davis and Redding will be served.

ENGINEERS PLAN STAG PARTY

Modesto Chapter, American Association of Engineers, has appointed a committee to arrange for the annual stag party to be held January 20 at Guild Hall, Modesto. Walter Good and Jack Wieland are members of the committee.

IN NEW QUARTERS

W. C. Ambrose and R. W. Jeans, architects, formerly with Reid Bros., are now occupying offices with Architect C. H. Jensen at 605 Market St., San Francisco.

MONTEREY BUILDERS' EXCHANGE ELECTS OFFICERS

A. Jacobsen, plasterer, was elected president of the Builders' Exchange of Monterey County at the annual meeting held Jan. 3. Fred Ruhl was elected first vice-president and M. W. Overhulse, secretary. G. M. Whitcomb was named treasurer and Herman S. Neilsen, sergeant-at-arms. M. J. Murphy was elected a delegate to the State Builders' Exchange Conference to be held in Fresno January 14.

1928 CONSTRUCTION OUTLOOK

Thos S. Holden, vice president, F. W. Dodge Corp., in an interview with the Associated Press sums up the construction industry outlook in 1928 as follows:

Construction activity has been passing through a period of readjustment. This has been proceeding so quietly and moderately that it has scarcely been realized. It has been evidenced principally in a gradual decline in residential work, particularly in low cost houses.

As a whole, building activity has been declining. At the same time engineering projects of the public works and utilities class have been steadily increasing. The net result has been that total construction expenditures have been maintained at remarkably steady levels during the past three years. Estimated totals for the entire country are \$6,600,000,000 in 1925, \$6,900,000,000 in 1926, and \$6,800,000,000 in 1927.

Underlying economic and financial conditions point to increased construction activity in 1928. The moderate decline in private construction work was halted several months ago and has been followed by a gradual rise in building volume. Improved conditions in agricultural districts and the stimulus that increased automotive production seems likely to give to general business should have an encouraging effect on construction activities.

IRRIGATION DEVELOPMENTS

Interesting figures showing the development of irrigation in California are contained in the December number of California Highways and Public Works.

In 1887 there were seven irrigation districts in California; in 1926 there were 110 irrigation districts.

In 1912 the State Bond Certification Commission began its work. In 1926 the accumulated value of the bonds issued by that commission was \$136,000,000.

In 1917 the duty of approving plans for dams and supervising their construction was vested in the Division of Engineering. In 1926 the accumulated cost of dams approved by the State Engineer was \$30,000,000.

STEEL MERGER RESUMED

Negotiations for the merger of Youngstown Sheet & Tube and Inland Steel Co., which were dropped about six weeks ago because of disagreement over the terms are reported to have been resumed. Youngstown preferred, which is callable at 105 and likely would be, in event of merger, dropped to 106½ bid against a recent high of 110, says New York News Bureau.

"Nothing has been done," said President J. A. Campbell, of the Youngstown Sheet & Tube, in reply to query as to the state of negotiations reported on between his company and Inland Steel.

BRIDGES

SEATTLE, Wash.—John E. Carroll, president of the city council, proposes election for March 12 to vote bonds of \$500,000 to aid in the const. of a bridge across the n.w. arm of Lake Union at or near Stony Way. The last legislature appropriated \$500,000 towards such construction and the county commissioners have appropriated a like amount, anticipating the bridge will cost \$1,500,000.

SAN FRANCISCO—Board of Supervisors has authorized Board of Public Works to prepare plans and ask bids for construction of pipe and tie rod anchors for Third street and Channel bridge. Work will be financed under Budget Item No. 25, 1926-27.

SAN FRANCISCO—Major John G. Little, consulting engineer, 251 Kearny St., has submitted a plan to the State Harbor Commission, proposing to use the foot of Market street as the San Francisco terminal for the proposed bridge over San Francisco Bay. Plans provide for a structure from the Ferry Building to Goat Island and from Goat Island to Oakland; 3,000 ft. of the structure bet. San Francisco and Goat Island would be 185 ft high. The bridge from Goat Island to the Oakland side would be a trestle with a lift span in the center. Bridge will provide for triple decking of the Ferry Building, the first deck being for automobile traffic, the second for street cars and the third for interurban trains.

VENTURA, Cal.—Until 11 a. m., Jan. 18, bids will be rec. by county to const. reinf. conc. culvert, 10x10x85-ft., with earth fill, corr. iron pipe gutter drains, and 772 ft. of conc lined gutter. Plans may be obtained from county surveyor, Chas. Petit. Cert check 10%. L. E. Hollowell, clerk.

BAKERSFIELD, Kern Co., Cal.—Weitzel & Larson, Bakersfield, at \$2806 awarded cont. by county to const. cem. culvert over Lower Canal in 18th St. Dean & Stroble, \$2993; E. W. Kranz, \$3480; Roy E. Meyers, \$34.50.

DREDGING, HARBOR WORKS AND EXCAVATIONS

PALO ALTO, Santa Clara Co., Cal.—City has \$4000 available for diking and dredging on city property adjacent to the bay. The work will be done by contract. Approx. 7000 lin. ft. will be diked. J. F. Bxybee, Jr., is city engineer.

21

LIGHTING SYSTEMS

SANTA ANA, Cal.—Walker Martin, 4251½ S Western Ave., Los Angeles, was awarded cont. by city at \$38,095 for ornamental street lighting system in Flower street and other streets, involving Marbelite standards.

SANTA ANA, Cal.—County supervisors authorize Nat H. Neff, co. supt. of highways, to prepare plans for \$20,000 lighting system for Westminster.

BERKELEY, Alameda Co., Cal.—City Eng. A. J. Eddy preparing plans for extension of electrolier system in Shattuck Ave., bet. Durant Ave. and Ward St., a distance of 8 blocks. Estimated cost, \$30,000. Emma M. Hann, city clerk.

SACRAMENTO, Cal.—Latourrette-Fical Co., 907 Front st., Sacramento, at \$26,975 awarded cont. by city to install or-

namental electrolier system in portions of Alhambra blvd., K, L, M sts., etc.

RAILROADS

SNYDER, Tex.—Capt. Ed Kennedy, promoter, has raised \$800,000 in money and property to complete short line railroad from Snyder, Tex., to Roswell, N. M. Upon completion this line is to be taken over by a main trunk railway.

FIRE ALARM SYSTEMS

SACRAMENTO, Cal.—City rejects bids for automatic traffic signals at various street intersections with the exception of an offer of one already installed at 21st and Y Sts. by the Acme Signal Co., at \$1631. The company offered to install five additional signals for \$10,365.32. Waterhouse Signal Co. bid \$9990 for six signals. City Engineer A. J. Wagner, however, favors installation of the Waterhouse type declaring them to be superior.

ORANGE, Cal.—Until 1 p.m., Feb. 7, bids will be rec. by city to fur. One 750-gallon Triple Combination Pumper, with 80-gallon water tank and 200-ft of ¾-in. chemical hose. One 12-ft 3-in flexible suction hose with proper reducers. One Siamese connect. 2½-in. to 1½-in., Two 1½-in. shut off nozzles with ½-in., ¾-in. and ¾-in. tips. One double male 2½-in. connect. One double female 2½-in. connection. Hose body for not less than 1200 ft 2½-in. hose, and 400 ft. 1½-in. hose. Specifications for said engine must accompany each bid. Cert check, 10%. Payment for above equipment will be made as follows: \$2000 plus allowance for old truck, balance divided into five yearly payments at the rate of 6%. Cal D. Lester, city clerk.

FIRE EQUIPMENT

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Seagrave Corp., San Francisco, at \$3950 awarded cont. by city to fur. and install 750-gal per min. pump on chemical engine and hose car now owned by city.

LARSEN'S ADVANCE CONSTRUCTION REPORTS—Prices on Application
BUILDING LAWS OF SAN FRANCISCO

What architects and all who build have learned to expect from Quandt craftsmen:

"Co-operation for Quality"

Materials applied efficiently and expeditiously by brush or spray application to achieve the best result at the minimum cost to the owner.

A. Quandt & Sons

Painters and Decorators

SINCE 1885

374 GUERRERO STREET, SAN FRANCISCO
Telephone Market 1711

Quandt-quality is available for the small job as well as the large. Pioneers and Specialists in the application of Lacquer in the architectural field. Complete decorative color schemes designed and furnished. Advice for technical painting requirements furnished. Our operations are state-wide.

RESERVOIRS AND DAMS

BURLINGAME, San Mateo Co., Cal.—Loveland Engineering Co., 445 California St., San Francisco, is preparing plans for reservoir in connection with municipal water system; capacity 1,500,000 gals. Work will be financed under bond issue already voted.

SEWAGE DISPOSAL PLANTS

SAN BERNARDINO, Cal.—Plans for new sewer system and sewage treatment plant will be ready for presentation to city and state board of health within three weeks, according to F. S. Currie, of the Currie Engineering Co. The new plant is designed to accommodate a population of 60,000. The plant has a capacity of 7,000,000 gallons of raw sewage a day. The sewage is pumped from the outfall lines into four 40-ft. circular Imhoff tanks where the gas is taken off and the solids separated from the liquid. The tanks are large enough to detain the maximum flow of sewage 45 minutes while the minimum detention period for the minimum flow is three hours and 30 minutes. From the Imhoff tanks, the liquids are passed to either of two pairs of dosing chambers. From there the liquids are sprayed over the trickling filter beds. There are two filtration beds, each 182x298 ft. in area and seven feet deep. No pumping is necessary because the sewage is handled by gravity. The sewage enters the Imhoff tanks at an elevation of 979.50 feet; the dosing tanks at 978.50; sprayed onto the trickling filter at 971 feet; leaves the trickling filter at 964; enters secondary clarifier at 962 feet, and is discharged into Warm creek at 958 feet. The bottom of the creek bed is 953.50 feet. From the start of the outfall line at Mill and E Sts., the sewage has a 14-ft. fall to the treatment plant which the city proposes to build on the George West property about a mile and a half south of Mill St. Three outfall lines are planned, a 15-in., 18-in., and 24-in. The outfall pipes as well as the few sewer connections in the city are designed to take care of a population of 130,000. Acting on a request of R. F. Goudey, state board of health resident engineer in Los Angeles, the board asked that the sewage be treated twice with chlorine, once before it entered the plant and once before it was dumped into Warm creek. The engineer's plans provide for the chlorine treatment as the board asked.

MISCELLANEOUS CONSTRUCTION

SAN BERNARDINO, Cal.—Bids will be opened in near future by Santa Fe Railway to const. tunnel to replace pedestrian viaduct over Santa Fe yards in San Bernardino from 3rd to shops. Est. cost, \$100,000.

WATER WORKS

Larsen's Advance Construction Reports

Your silent salesman—issued every business day in the year—featuring work projected, bids wanted, bids opened and contracts awarded for every class of building; bridges, dams and harbor works; irrigation projects; U. S. Government work and supplies, street, highway and sewer improvements; water works; miscellaneous supplies and equipment, etc., etc.

Larsen's Advance Construction Reports are compiled by a staff of trained correspondents located in the more important business centers in Central and Northern California. Each and every correspondent knows his territory thoroughly and the men most concerned in it, namely, the architects, contractors and material dealers—who keep him or her informed of the latest developments in the construction field in his particular territory.

Larsen's Advance Construction Report Service is a special service compiled at a tremendous cost and yet is sold for a price within the reach of all among which the information should circulate. Each and every report is a prospect for business.

Write for sample copies or have our representative call and explain this service.

Official Proposals

DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

Sealed proposals will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 414 Highway Building, Sacramento, California, until 2 o'clock P. M., on January 19th, 1928, at which time they will be publicly opened and read, for performing work as follows:

Amador County, constructing a timber bridge across Dry Creek 2.3 miles west of Ione (X-Ama-34-A), consisting of eight (8) nineteen foot (19) spans on creosoted pile bents.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the State Highway Engineer. Each bid must be accompanied by cash, or a certified check made payable to the "Director of Public Works," for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

R. M. MORTON,

State Highway Engineer.

By R. E. PIERCE,

Acting District Engineer, District X.
Dated Dec. 31, 1927.

(Jan. 4-9) 37

NOTICE TO CONTRACTORS ADVERTISEMENT

Milton, Oregon—December 30, 1927

Sealed proposals will be received at the office of the Business Manager, Milton, Oregon, until 7:30 P. M., January 23, 1928, for wood stave pipe, erected in place, or staves and bands, delivered, separately, the City to provide for construction thereof by separate contract, also trench excavation as follows:

19,300 linear feet of 48-inch I. D. creosoted Douglas fir, or untreated redwood, stave pipe, staves 1½ inches thick, constructed in place, with 12-6" C. I. saddles, and staves and bands for 400 ft. extra length.

Or delivering f. o. b. cars Milton, Oregon, 559,790 ft. B. M. of creosoted Douglas fir staves for 48-inch I. D. or untreated redwood staves, 1½ inches thick, also 11,600 ft. B. M. of untreated fir or redwood staves in addition thereto, also

41,200 one-half inch, one-piece, bands, with shoes, washers and nuts, complete, also.

Separate proposals for delivering material and erecting pipe; also for

Trench excavation, including approximately 26,000 cu. yds. of common excavation, 6000 of solid rock and 18,000 of back-fill,—all as more particularly set forth in general plans, specifications and proposal blanks, which can be had upon application to the undersigned, and all proposals shall conform thereto.

Each application for proposal blanks, plans and specifications shall be accompanied by a check for \$5.00, made out in the name of John H. Lewis, Engineer, which check will be held by the undersigned and returned if a bid in regular form is submitted within the time limit, otherwise to go to the Engineer to cover cost of plans.

By order of the City Council.

F. A. FULLERTON,
Business Manager,
Milton, Oregon.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Interior Equipment—Oakland Schools)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 17th day of January, 1928, at 10:45 a. m., at which time said bids will be opened for the furnishing and installing of INTERIOR EQUIPMENT for the LAKEVIEW JUNIOR HIGH SCHOOL, located on Harrison Street near 26th Street, and the OAKLAND HIGH SCHOOL, located on the southwest corner of Park Boulevard and Hopkins Street, for the Oakland High School District. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and plans shall be returned within seven (7) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) percent of the amount bid, provided, however, that in

no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 17th day of January, 1928, at 10:45 a. m., in the Board Room, 211 Second Floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO CONTRACTORS

(Gymnasium—Elk Grove Union High School District)

Notice is hereby given that sealed bids will be received by the Trustees of the Elk Grove Union High School District, situated in Sacramento County, for the erection of a Gymnasium Building at Elk Grove, California, in accordance with plans and specifications on file with the Clerk of the Board, at Elk Grove, Sacramento County, California, and also in the office of Dean & Dean, Architects, 1406 California State Life Building, Sacramento, California.

On deposit of \$15.00 with the Board of Trustees, or the Architects, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 15 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10% of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to Chas. H. Cooper, Clerk of the Board of Trustees of the Elk Grove Union High School District, said check to be forfeited to and retained by the School District should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for the erection of Gymnasium Building for the Elk Grove Union High School District."

All bids must be filed with Chas. H. Cooper, Clerk of the Board of Trustees of the Elk Grove Union High School District, Sacramento County, California, not later than 8:00 P. M., Monday, January 16th, 1928, and will be opened at the High School Building, Elk Grove.

The Board of Trustees of the Elk Grove Union High School District reserves the right to reject any and all bids received.

BOARD OF TRUSTEES, ELK GROVE UNION HIGH SCHOOL DISTRICT,
CHAS. H. COOPER,
Clerk.

NOTICE TO BIDDERS

(Pipe—Turlock, Calif.)

Pursuant to an order of the Board of County Commissioners of Washoe County, State of Nevada, made and entered on the Seventh day of December, 1927, sealed bids will be received by the undersigned, at the office of the County Clerk of Washoe County, in the City of Reno, County of Washoe, State of Nevada, not later than 10:00 o'clock A. M., Saturday, January 14, 1928, for the following, to-wit:

One Road Maintainer.

The Board of County Commissioners reserve the right to reject any and all bids and accept the bid best suited to the needs of Washoe County.

E. H. BEEMER,
Clerk.

M., Tuesday, January 24, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the General Work, Employees Building and Garage, Pacific Colony, Spadra, California, in accordance with plans and specifications therefor copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The Employees Building will be a two-story building with reinforced concrete exterior walls, tile roof and reinforced concrete and frame interior construction.

The Garage will be of reinforced concrete construction, with composition roof and wire partitions.

General Work will include all manner of work except Plumbing, Heating and Electrical Work. Bids must be submitted on Proposal Forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for General Work, Employees Building and Garage, Pacific Colony, Spadra, California." STATE DEPARTMENT OF PUBLIC

WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,
State Architect.B. B. MEEK,
Director of Public Works.

NOTICE TO CONTRACTORS

Mechanical Work

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, January 24, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the Mechanical Work, Employees Building and Garage, Pacific Colony, Spadra, California, in accordance with plans and specifications therefor copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Mechanical Work includes Plumbing, Heating and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing and Heating." Combined bids will also be received covering all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture Forum Building, Sacramento, California, and plainly marked on the envelope "Proposal for Mechanical Work, Employees Building and Garage, Pacific Colony, Spadra, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,
State Architect.B. B. MEEK,
Director of Public Works.

NOTICE TO BIDDERS

(Road Maintainer)

Notice is hereby given that sealed bids will be received by the undersigned on behalf of the City of Turlock up to the hour of 7:30 P. M., Tuesday, the 17th day of January, 1928, for furnishing 600 ft. 8-inch matheson joint pipe asphaltum dipped or its equal.

Alternative, 600 ft. of 8-inch class "B" Bell and Spigot cast iron pipe asphaltum dipped, to be American Water Works Association standard or its equal. The Board reserves the right to reject any and all bids. Ten per cent of the amount of bid will be required by a certified check accompanying each bid. Said bids will be opened and examined at 8:00 P. M. on the 17th day of January, 1928. Shipment to be f. o. b. Turlock, Calif.

By order of the Board of Trustees of the City of Turlock, dated this 6th day of December, 1927.

A. P. FERGUSON,
City Clerk and Ex-Officio Clerk of the Board of Trustees of the City of Turlock.

NOTICE TO BIDDERS

(Mission Union School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Mission Union School District, of Monterey County, at 2 o'clock P. M., on the 17th day of January, 1928, at the School Building in the above named District for the erection and completion of a reinforced concrete school building to be erected on the School site near Soledad, in said District, all as described and shown on the plans

and in the specifications made for the same by W. H. Weeks, Architect.

Plans may be seen at the office of the Clerk of the Board of Trustees in said district, or at the office of W. H. Weeks, Architect, Hunter Dulin Bldg., San Francisco.

Each bid must be accompanied by a certified check on some responsible California bank, in a sum not less than five per cent (5%) of the amount bid, made payable to A. L. Roddick, Clerk of the Board of Trustees of the Mission Union School District, as a guarantee that a contract will be signed within ten (10) days after date of opening of bids and approved surety bond furnished as required by law.

Each bid must be delivered in a sealed envelope and addressed to the Board of Trustees and endorsed, "Proposal for School Building," and must be in the hands of the Clerk of the Board on or before the above mentioned hour and date.

The Board reserves the right to reject any and all bids.

(Signed)

ABEL BIANCHI,
A. L. RODDICK,
LEO PINCINI,
S. P. ANDERSON,
ALFRED BINSACCA.

William M. Grant, of San Francisco. SWITCH MECHANISM. A further object of this invention is to provide a box with closures for the meteristics wherein the openings are retained in closed position, so long as the box cover is in closed position. Mr. Grant assigns his patent to Westinghouse Electric & Manufacturing Company.

Congress has been asked by Representative Edwards of Georgia to take steps to break what he alleges to be a foreign cement trust, which is maintaining a strangle hold upon highway construction in the United States. His views and desires as expressed in a bill referred to the house committee on roads. The measure would provide that American materials and equipment shall hereafter be given preference in highway construction a 1 that in the allocation of government funds to the various states the question of the use of American materials and equipment also shall be looked to, keep in mind that all allocations as well as the purchase of and contracts for highway materials and equipment shall be in the interest of the very greatest possible benefit and economy to the states and the government.

Builders Iron Works of Stockton will remain under its present ownership and direction in the belief of C. E. Kennedy, manager, who reports no bids have been received for its purchase but their own. The bids were asked by the trustees of the H. E. Heller Company, B. B. Starke, Langdon E. Boyle and Fred Hamilton.

The Empire Steel Corporation, a \$20,000,000 concern representing a consolidation of six Northern Ohio steel companies has been incorporated. The firms involved are the Mansfield Sheet and Tin Plate Company; the Waddell Steel Company, Niles, Ohio; the Thomas Sheet Steel Company of Niles, the Falcon Steel Company of Niles, the Ashtabula Steel Sheet Company, and the Empire Company of Cleveland, which is the hub of the amalgamation.

Supplementing previous requests to the State Department of Public Works, Division of Water Rights, for a flow of water for a power project in Trinity county, Robert Little of Los Angeles and George E. Waggoner of Stockton, have filed applications for 100 cubic feet of the flow of Stony Creek, Stuart's Fork and Deer Creek. The project will cost approximately \$5,000,000 and will be located near Weaverville. The applicants propose to generate electricity in connection with a mining project and make use of four power houses in all.

Sacramentans are faced with increased costs for electrical installation because of a city ordinance which became effective December 25 and which contains new regulations governing electrical work. The ordinance, according to Carl Benton, city electrician, while resulting in increased costs to those having work done, more than makes up the difference through providing for additional safety and smaller fire hazards. The cost of a license for electrical construction has been increased from \$30 to \$50 and the ordinance was designed to protect the house owner.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

LUMBER OUTLOOK IS PROMISING; NOTABLE PROGRESS IN REFORESTATION

By WILSON COMPTON

Secretary and Manager, National Lumber Manufacturers Association
(Special Correspondence)

In point of production, volume of sales and shipments, a review of 1927 finds the lumber industry, in common with many others, lagging by comparison with preceding years. Final figures for the last twelve months probably will place the total lumber cut of the country at about 34 billion feet, a decline of approximately 8 per cent from 1926. Shipments and orders also have fallen off correspondingly. Prices have not been encouraging.

Turning to the future, however, the industry as a whole finds solace in certain significant phases of its past performance. In the latter months of the closing year, the National Lumber Manufacturers Association launched a vigorous campaign to improve and extend markets. The industry long has felt the necessity for improved merchandising methods to meet the competition of other materials.

Progress in Reforestation

The past year was notable for its increased activity in commercial reforestation. Many large lumber companies and paper and pulp manufacturers have made encouraging advances in the business of growing trees to the end that the sources of their raw material may be perpetuated indefinitely. For the first time in the history of forestry in the United States leaders of the forest industries got together and discussed means and methods of maintaining the forests on a sustained yield basis. A survey presented at that conference revealed the significant fact that 21,000,000 acres of forest lands were under intensive reforestation, an area

equal to the entire forested lands of France.

Encouraging to this phase of the industry has been the co-operation of the various States. One of the most outstanding obstacles to commercial reforestation has been the archaic state tax laws. In the last year nine States enacted new laws or amendments to old statutes relating to the problems of forest taxation. In all, 130 laws were enacted pertaining to forestry, fire protection, reforestation and forestry taxation.

Improved Manufacture and Utilization

Considerable progress has been made toward a more intelligent and economical use of quality lumber through a greater public appreciation of American Standard Lumber. The industry has made notable headway, also, in the matter of sumption and the elimination of waste in manufacture.

These activities within the industry itself, together with probable improvement in the trend of business generally, give basis for the belief that 1928 will be a better lumber year. The end of a long period of depression in agriculture apparently is at hand and, with the farms consuming 40 per cent of the annual lumber output, it is evident that prosperity in the lumber industry in large measure follows agricultural prosperity. For several years farmers have been under-consumers of lumber. Stabilization of farm prices also will have a beneficial reaction on industry generally, in which the lumber industry will share.

early because of crop uncertainties, although declining again slightly in the autumn, while the slump in cotton prices in 1926, plus the Mississippi flood, brought about a corrective reduction in the acreage of that great staple and caused a virtual doubling of its price in a period of ten months. Reflection of this was had early in record consumption of cotton, while rayon and silk production were of record size, and wool consumption gained. Then, too, the price of beef cattle rose to the highest point in seven years. In fact, something like a reversal of the conditions of 1926 was shown, in that the agricultural producer rather than the industrial operative reaped the best results of this irregular year.

Wholesale trade fell below 1926, this partly owing to lower prices, while in retail trade the chain store and mail-order houses did better than did the department stores, which about held their own with 1926, while the ordinary small retailers probably sold less. In the security markets new flotations were enormous, and speculation, aided by easy money, swelled bank clearings and debits to new high records, while prices of stock and other exchange seats rose to unimagined prices. Export trade expanded slightly, while imports declined, but both were close to the highest since 1920. Price movements partook of the prevailing irregularity, but price index numbers finished the year higher than at the opening, with farm products or their derivatives showing more advances than did products of manufacture in general. Failures were the second largest on record, and liabilities the fourth largest, but bank failures were lessened considerably. Gold exports were very large, but had no apparent effect upon money or security markets, and the national debt was reduced by over \$1,000,000,000.

BUILDING INSPECTORS FOR SAN FRANCISCO ARE PASSED

The San Francisco Civil Service Commission announces a list of twenty candidates for jobs as city building inspectors who were successful in examinations held last October. William Gowans, 446 Thirty-ninth avenue; heads the list. Others are: Frank C. Miller, Frank L. Schultz, Ernest W. Beck, Herbert F. Manger, Roy A. Moon, Curtis W. Ottwell, Frank Robinson, Ernest W. Perry, Paul J. Erz, Frank R. Hemeon, Fred F. Eggers, Clifford N. Franklin, Guy F. Mason, Verne M. Trace, Henry J. Broderick, George M. Cantrell, Eugene J. McColligan, John R. Hand and William Anderson.

LUMBERING IN EUROPE BELOW U. S. STANDARDS

Primitive equipment is still used in manufacturing lumber in Europe and the quality of the lumber is much lower than that in the United States. This is the impression of E. M. Prescott, general manager of the Prescott Brick and Lumber Company of Fresno, who spoke on European Lumber at a meeting of the Fresno Optimist Club. Prescott, who toured Europe last summer, said the lack of the extensive use of lumber in Europe is noticeable.

CERTIFICATES GRANTED

Albert J. Evers, secretary, California State Board of Architecture, Northern District, announces certificates to practice architecture have been granted to Edmond H. Denke, 1317 Hyde St., San Francisco; Wm. J. Helm, 33 Marne Ave., San Francisco; B. J. S. Cahill, Webster Bldg., Oakland.

Santa Rosa building operations for the year 1927 will involve an expenditure exceeding \$25,000. April was the outstanding month in the year, the work undertaken during that period costing \$68,795.

LOOKING INTO THE PAST-1927; A LOOK BACKWARDS BY BRADSTREET'S

(As Reported By Bradstreet's)

It is, of course, too early to write with exactness of the results of 1927 in a business way, but enough is known of the trends of the year to allow of some things being definitely said. First of all, it may be stated that the year's happenings in trade and industry—not in finance or in the security markets—tended to justify the more conservative predictions at the year's beginning, a great many of which, by the way, were confined to the first half of the year. In trade generally—in the heavier industries certainly—the year after the first few months was one of halting progress or of actual recessions, whereas in financial lines and in the security markets, especially in speculative lines, new high records of volume and value were set up in many, not all, directions.

It will probably go without contradiction that trade and industry had a considerable burden to bear in the weather happenings, which included an excess of rainy weather, this resulting in high water or floods, not once, but several times, which reached a peak in the great Mississippi river flood, with smaller, but still very harmful, rises in rivers noted in the northeast, especially in Vermont. This excess of moisture with cold weather was a drawback from before Easter until the fall, when a long warm spell did much to repair lateness in crop growth, although at the same time retarding fall trade. Some other drawbacks of the year included the eight-months-long strike of bituminous coal miners, which was apparently foredoomed to failure;

the continuance of the slowing up in ordinary building, which was not apparently made up for by the large volume of heavy outdoor work, such as road building, hydro-electric work and kindred operations, and the quieting down in the automobile industry eventuating in the revolutionizing of one prominent maker's operations after a long shutdown. Heavy industries catering to the three lines above mentioned, but iron, steel, lumber and allied lines, especially, felt effects from one or more of these happenings. The excessive production of petroleum was a weight upon that important industry and its derivatives, mitigated by a big increase in consumption, due to low prices. All of these occurrences brought about sympathetic slowing in other lines, and employment and factory pay rolls fell to the lowest point in three years, with a perceptible effect upon ordinary trade buying. Electric power development, production of electricity and earnings of public utility companies were considerably ahead of 1926. Railway gross and net income fell off from 1926. Predictions made previous to 1927 that keen competition was to be a feature of the year's developments were abundantly justified by the vertiable snowstorm of mergers in trade lines, and to a still greater extent in manufacturing industry.

The year, however, had its bright features, some of the effects of which may have their repercussion in the year to come. Weather conditions alternately clouded and brightened the farmers' position, with the index of farm prices rising

ELECTRONIC TORNADO TO BE DEVELOPED COMMERCIALY

A further development of the electronic tornado has been announced by the Research Laboratories of the Lincoln Electric Company, of Cleveland, Ohio. Discovered some twelve months ago and regarded originally as of purely scientific interest the electronic tornado will undoubtedly revolutionize present methods of electric arc welding by greatly reducing the cost of welding and reducing all undesirable characteristics present in present processes.

The most remarkable characteristics of welds produced by the electronic tornado process is their extreme ductility. Sections cut from plates joined by this method of welding have been twisted cold and tied into knots in tests that amaze every one familiar with steel welding practice.

The cost of welding by the electronic tornado in $\frac{1}{2}$ " steel plates is estimated to be about 3c per foot, which is a very small fraction of present costs. This figure includes cost of the operator's time, cost of electric current and cost of carbon electrode. Furthermore welds produced by this process are of much smoother appearance than it is possible to obtain by present methods.

While only a small number of experimental machines have yet been built utilizing this new process, it is announced that commercial machines will soon be on the market. This development of a purely scientific phenomenon which was first regarded as an electrical curiosity is a striking example of the practical importance of pure research as its economic effect cannot be over estimated.

Prominent business men of Cali, Columbia, have undertaken with the aid of an American company which has a contract with the city, to erect modern sanitary homes for the exclusive use of the poorer working class.

WOOD UTILIZATION COMMITTEE TO EXHIBIT

At the invitation of the Associated General Contractors of America, Washington, D. C., the National Committee on Wood Utilization of the Department of Commerce is arranging for an exhibit of good practices in wood construction at the annual convention of the association at West Baden, Indiana, January 23-27, 1928. The exhibit which is prepared under the supervision of Dudley F. Holtman, assistant director, in charge of the committee's construction activities, will be composed of various models showing how lumber and other forest products should be used to best advantage in building and construction. The exhibit will demonstrate the practical application of the many of the committee's projects. It will cover a wide range of subjects of interest to the contractor and builder, from framing models to wood finishes. The object of the exhibit is to impress on the building industry the necessity for an efficient and wise use of our forest products in order to encourage commercial reforestation. It is interesting to notice that the exhibit will be arranged in cooperation with committee members who are called on to furnish such material in which each is chiefly interested.

COURTS GIVE AID TO BIG BUSINESS MERGERS

"Never in the history of the anti-trust laws has their interpretation by the Supreme Court and their administration by the Government been so sympathetic as now to the present and future needs of American business," asserted Gilbert H. Montague of the New York Bar in an address to the American Mining Congress in Washington.

"Business men," he said, "are only beginning to realize what a variety of new and effective methods for stabilizing business at home and for extending business abroad have become available in consequence of recent decisions and rulings by the Supreme Court, the Department of Justice and the Federal Trade Commission.

"More and bigger consolidations among producers, manufacturers and distributors, under proper conditions and with adequate legal safeguards, are permitted and indeed invited by the present attitude of the courts and the Government."

CONCRETE IN ARCHITECTURE IS NEW BOOKLET

W. E. Hart, manager of the structural and technical bureau of the Portland Cement Association, 33 West Grand Ave., Chicago, announces the issuance of a new book, "Concrete in Architecture," issued by the Portland Cement Association. The publication is being distributed to architects throughout the country with the thought of encouraging a frank use of concrete as a part of the architectural and decorative scheme of buildings. The method of decoration, according to Hart, has been used quite extensively on the Pacific Coast for the past five or six years and from observation no difficulty occurs. The procedure outlined in the book, the association says, if carefully followed, is entirely satisfactory and gives a painted surface that is acceptable, durable and reliable.

COLLEGE IRRIGATION MEN NAME OFFICERS

Organization of the Conference of Experiment Station Workers in Irrigation and Drainage was effected at the meeting of irrigationists from the agricultural colleges of the western states, held at the University of California, W. W. McLaughlin of Berkeley, associate chief of the division of agricultural engineer, United States Department of Agricultural, was elected chairman, and Dr. O. W. Israelsen, head of the department of irrigation and drainage in the Utah Agricultural College, was chosen as secretary. The next meeting will be held at the Utah Agricultural College, Logan, Utah, during the summer of 1929.

The conference, which just ended, was the second of this group and was called to perpetuate the work suggested at the first meeting, which was held in Berkeley two years ago. At this conference R. L. Parshall of the Colorado Experiment Station acted as chairman and George D. Clyde of the Utah station was secretary. Director C. P. Gillette of the Colorado station called the two meetings already held, but in the future the conference will act on its own initiative.

A program for research was outlined, in which the colleges will cooperate to avoid, as far as possible, duplication of effort.

SACRAMENTO BUILDERS' EXCH. MOVES TO NEW QUARTERS

The Sacramento Builders' Exchange, which has been in existence for the past 25 years and which had been located for ten years at 1015 Tenth street and later at 1508 J street, has expanded its scope and is now moved and open for business in new quarters at 1309 J street, Sacramento.

The new home is 40 by 80 feet in size with a parking lot of similar size in the rear. The building, which is of brick, is equipped with executive offices and a reception room in front, a large meeting hall, directors' room, estimating room and several private offices and enclosed desk space for contractors and material dealers making Sacramento their headquarters.

Large show windows in the new location are being used by members of the exchange for display of their materials and for advertising purposes.

The Sacramento Builders' Exchange as organized under its expanded scope is now composed of the old Builders' Exchange, the Master Builders' Association, the Sacramento chapter of the Associated General Contractors of America, the Master Plasterers' Association, the Master Painters Association, the Sheet Metal Dealers' Association and other crafts being organized to combine with the exchange at its new location.

Howard K. Johnson of the Sacramento County Board of Supervisors is the president of the Sacramento Builders' Exchange, while L. S. Patterson is secretary. Other directors are L. C. Hunter of the W. P. Fuller Co; Walter W. Campbell of the Campbell Construction Co; Thomas P. Scollan, material dealer; Harold Dixon, plumbing contractor; C. F. Vining, electrical contractor; L. F. Gould, general building contractor; W. E. Truesdals, general building contractor; H. C. Ferguson, Western Lumber Co; Harry Arnold, Pacific Lime & Plaster Co.; and Carrol Stephens, Golden Gate Atlas Materials Co.

INCREASED BUILDING HEIGHT REQUIRED AS LAND VALUES GROW

"The present tax structure and level of land values in the central business districts of our leading cities can be sustained only if the owners of sites in such localities are allowed to develop their holdings to their maximum economic intensity," says W. C. Clark, economist of S. W. Straus & Co., in an elaborate report on the various private and public aspects of the so-called skyscraper problem prepared for the American Institute of Steel Construction.

The findings are of far-reaching importance to all American cities because of their bearings on traffic problems and all the other aspects of current skyscraper controversies. While the studies brought out the fact that on a chosen plot of ground in New York City, 75 stories was the most profitable height, it may be assumed that the same theories would apply to all American cities, modified, of course, according to conditions in the locality such as street widths, size of plot, land values and zoning law restrictions. Where land values are lower at present than the typical site in New York lower heights, of course, would be in accordance with the principles of sound investments.

These studies also suggest that as property values increase in the future in various American cities, it may be necessary for building heights on certain strategic sites to grow in order that the owner may secure the maximum return from their investments. When the studies were begun, 75 stories was the height arbitrarily selected by Mr. Clark and his collaborators as beyond the probable maximum of height to secure the greatest economic efficiency for this specific site. Much to their surprise, however, the studies showed that at 75 stories the curve of economic efficiency was still mounting upward, and, had the survey continued, a height of 85 or 87 stories might have been found to be even more profitable than 75 stories.

Dangers of Flat Level Restriction

"Sane regulation of building heights in the interest of public health is of course to be desired but any attempt to put into effect a flat level restriction of 8 or 10 stories advocated by some zoning enthusiasts who profess to find the source of all human ills in the centralized city which is itself the natural product of powerful economic and social forces will result inevitably in a severe deflation of land values and a complete disorganization of the whole tax structure. Moreover, despite frequent claims to the contrary, the deflation of land values in the central business districts will not be offset by a corresponding appreciation of values in the outlying sections, for the decentralized city will be found to be not only a less efficient but also a more expensive mechanism for carrying on commercial and certain (though by no means all) types of industrial activity."

"In the case of certain plots of very large size and appropriate location the most economical development may involve rearing a structure skyward to the height of 75 or more stories. For the normal plot of moderate size, even in the central business section of New York, the principle of diminishing returns usually sets an economic limit considerably below this giddy height, while the average plot in the city as a whole will still probably find its most

economical utilization in a structure of perhaps 4 to 10 or 12 stories."

How Investigation Was Made

These were some of the conclusions derived from a recent exhaustive investigation involving the hypothetical development of a solid block in the vicinity of the Grand Central Terminal, New York City. A full city block was chosen, partly because under the New York zoning law the really tall building gets a fair chance only on a very late site and also because it was believed that the trend of the future is toward this type of development. Certainly this conviction was strengthened by the results of the study and particularly by the straight forward efficient and inexpensive design which the large lot made possible, by the permanent safeguarding of tenant's light and air and by the imposing mass and proportion of the logical improvement of such a site as evidenced by the accompanying architect's sketch of the suggested 75 story structure.

Detailed plans were drawn for the erection upon this site of eight different buildings varying in height from 8 to 75 stories each occupying the full block within the limitations imposed by the present New York zoning law. The cooperation of a large number of leading architects, consulting engineers, building contractors and building managers was obtained in checking plans and specifications and estimating cost of construction, operating expenses, gross and net income, etc., and it is believed that the study represents the most authoritative and most scientific determination of this particular problem that has ever been made.

Preliminary analysis of the data obtained indicate that on a plot of this large size—200 ft. by 405 ft.—with land value approximately \$200 per square foot, the most economical development was the 75-story building rising 917 feet 10 inches from the sub-basement floor and with a tall central tower representing in itself a large building of approximately ideal proportions. Increase cost of steel, elevators, mechanical equipment, etc., increasing wastage of net returnable area for the various building utilities (particularly the elevators, every added one of which wastes a considerable plot of otherwise rentable area on every floor) and the mounting burden of "carrying charges" upon the huge investment during the lengthening construction period brought what the economist are wont to call "diminishing returns" as the building soared. These increases, however, were less rapid than had been expected because of the large size of the building, and were also in part offset by the improved light and air and the superior efficiency of rentable space on the higher floors.

Return on Investment

The estimated net return upon the \$42,000,000 investment involved in the 75 story structure was 9.1 per cent as compared with 8.8 per cent for the 63 story building and 8.4 per cent for the 50 story building. The heavy burden of taxes and interest charges upon the land reduced the net income of the 8 and 15 story buildings to 2.8 per cent and 4.9 per cent respectively. The following table shows not only the net return upon the gross investment in the case of each building but also the percentage which the increased income resulting from the last addition of stories bears to the in-

creased cost necessary to add the additional stories.

Building	Net return upon gross investment Per cent	Net return upon increased cost of land addition of stories Per cent
8-story	2.8	
15-story	4.9	20.7
22-story	6.1	19.1
30-story	6.8	15.1
37-story	7.6	19.7
50-story	8.4	18.3
63-story	8.8	14.0
75-story	9.1	11.2

The figures given are preliminary and may be subject to some slight revision. The conclusion may also be drawn from the table that it has not been demonstrated that a building higher than 75 stories, (say 85 or 87 stories) would not give a better return than the 75-story building. This is true. When the study was begun, it was felt that 75 stories would represent a point somewhat beyond the true economic height and that the curve would turn down at, say, the 50 or 63-story height. When this supposition was proved erroneous, time was lacking to carry the investigation further.

Each City Plot an Individual Problem

It is obvious that on a smaller plot the economic limit would have been reached at a lower level. The smaller the plot, the more rapidly will the principle of diminishing returns accomplish its results and the sooner will the true economic height be reached. Each city plot presents an individual problem and its most economical development must be determined in each case by a careful consideration of all the governing factors. In addition to size of plot, numerous other factors bears upon the problem, such for instance, as the shape of the plot, character of the location, the type of improvement, the efficiency of the architectural and engineering plans, the value of the land, the level of construction costs, of rents and of interest rates, etc.

"This is by no means a blanket endorsement of tall buildings," says the report. "Some tall buildings, existing or proposed, are doubtless justly characterized as 'freak' structures, but the attempt to further height restriction legislation by the contention that the tall buildings is an economic fallacy should be roundly condemned."

"Zoning enthusiasts will find their soundest argument in the necessity of height regulation as a means of safeguarding community sunlight and air. Any flat level restriction is to be avoided whether based on this ground or the currently popular 'congestion' argument which to a large extent confuses the effect of mere growth with that of tall buildings and would seek to stultify growth and progress by accepting as permanent facts street capacities determined by our forefathers in the age of the horse-drawn vehicle. In the long run economic laws are inexorable and will not brook artificial restrictions."

A complete copy of those studies is now being prepared for publication in booklet form and gratuitous distribution by the American Institute of Steel Construction, 285 Madison avenue, New York City.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department

FRESNO SECRETARY TELLS VALUE OF BUILDERS' EXCHANGE MEMBERSHIP

BY THE OBSERVER

Harry Cayford, Secretary-manager of the Fresno Builders' Exchange is a real-honest-to-goodness worker in his position. Harry issues a monthly bulletin to exchange members, the current issue comprising three legal size mimeograph sheets chuck full of interest for the members of his exchange—and other exchanges as well. For instance, in the following article, clipped from the December Bulletin, Harry tells the membership of the "why" of a Builders' Exchange—what the exchange has to offer—and why one should be a member—if not already. Secretaries of other construction organizations will do well to follow in Harry's foot steps.—EDITOR.

A Builders' Exchange is to the Building Industry what a Chamber of Commerce is to the Community. It provides a meeting place for those in the Industry; where they can work out their own peculiar problems, where they can exchange ideas with one another, where they can broaden their knowledge and where, in times of trouble, they can pool their interests and fight their battles with a united front.

As to the Exchange facilities—we have a well equipped, centrally located office, available for conferences or private business transactions between members and their clients. Mail is received at Exchange Headquarters for members; telephone calls are recorded and the service of an experienced stenographer is always available. On the mezzanine floor, space is available as a plan room, where access to plans may be had and where the sub-contractor can take off his figures without the loss of time and money

running around here and there after them. Many of the latest trade magazines are on file for reference and information regarding prices and materials can be readily obtained.

From the Exchange can be secured data from the various Government, State and City and County Departments relating to building activities, commodity prices, production, wages and the trend of Labor.

On civic matters—The Exchange is in a position to do the most beneficial kind of good as it is in a splendid position to offer assistance and constructive criticism from a practical standpoint.

The Building Industry to a large extent, is a seasonal one, with intense activity during the Summer months and with stagnation and slack periods in the Winter months, it peaks and slumps cause some serious problems which can be eliminated to some extent at least, by the proper co-operation of the Exchange with the public.

We all need the close acquaintance-ship of one another as united efforts will do more for the benefit of our industries and the growth of our community than any individual can hope to accomplish in years of effort—and in times of trouble each one absolutely needs the help of the other. Those outside the organization, in a sense, are reaping the benefits that accrue from an Organization like the Builders' Exchange, while failing to do their share and if they are reputable and worthy they should join hands with the Organization that represents their interests.

We could continue on and on—as the Building Industry is the second largest in importance in the Country.

F. J. KOSTER ELECTED PRESIDENT OF S. F. INDUSTRIAL ASSN.

Frederick J. Koster, former president of the San Francisco Chamber of Commerce, has been elected president of the Industrial Association of San Francisco, succeeding Colbert Coldwell. Albert E. Boynton, who has been managing director of the organization since 1924, will continue in that capacity. Other officers elected are: S. S. Kauffman, vice-president; John Cushing, secretary, and Samuel Lillenthal, treasurer. A new Board of Directors, also chosen, includes Wallace M. Alexander, J. B. Brady, Colbert Coldwell, John Cushing, George S. Forreder, Robert B. Henderson, A. F. Hockenbeamer, S. S. Kauffman, George W. Kelham, Robert A. Kinzie, Frederick J. Koster, Samuel Lillenthal, J. W. Mailliard Jr., Atholl McBean and Richard S. Shalnwald.

1927 PIG IRON OUTPUT

Pig iron output for 1927 was about 36,400,000 tons, with charcoal iron estimated, compared with 39,373,000 tons in 1926. In production of steel, 1927, was fifth among the leading years. The estimate of 43,250,000 tons of ingots shows a drop of 3,700,000 tons from 1926, the high year, but 1927 exceeded the average of the four years that preceded it.

BRIDGE CONSTRUCTION IN DEMAND IN SAN FRANCISCO BAY

Great opportunity is seen for the engineers of the next two generations in bridge and tunnel construction in Central California by Charles Delreth Jr., chief engineer for the Carquinez Straits bridge and professor of structural engineering at the University of California.

Mr. Delreth told a joint meeting of the Sacramento chapters of the American Society of Civil Engineers and the American Association of Engineers future expansion about the San Francisco Bay will demand the construction of great bridges in years to come.

The speaker, however, said he doubted whether the time is ripe for bridging the Golden Gate, and he declared he believed the cost of an adequate structure would be \$100,000,000.

He declared he believed the proposed bridge across San Pablo Straits from Richmond to McNear's Point is justified by the automobile traffic, but needs at this time do not demand a railroad bridge there.

GAS TAX BOOSTED

Sixteen states have increased their gasoline taxes since January last year, in amounts from one-half to two cents. It is estimated that the increased revenue will amount to approximately \$38,000,000 as a result.

STOCKTON BUILDERS' EXCHANGE TOLD OF ZONING ORDINANCE

Hubert H. Briggs, chairman of the Stockton Zoning Commission, at a meeting of the Stockton Builders' Exchange, told the members that the aim of the zoning body is to perfect a zoning ordinance for Stockton to meet all the problems such an ordinance should solve and still be flexible enough so as not to retard the city's growth.

Briggs stated that the commission made up of citizens of Stockton, is making a thorough study of all questions concerned with the preparation of the ordinance, and that the work is progressing rapidly.

Wm. O'Keeffe, president of the exchange, presided at the meeting.

FRANCE'S STEEL OUTPUT

France's production of pig iron during the month of October, 1927, according to official figures transmitted to the Bankers Trust Co. of New York by its French Information Service, showed a marked increase over the preceding months, 795,991 metric tons, as against 761,389 in September and 773,483 in August. The output of steel has also increased considerably, 722,914 metric tons, as against 693,276 in September and 694,029 in August.

WOMAN ARCHITECT CHOSEN

According to newspaper dispatches from London, an English woman of 29 has been named architect of the new Shakespeare Memorial theatre at Stratford-on-Avon. The design of Elizabeth Scott, daughter of a Bournemouth doctor, was unanimously selected from more than 70 submitted to the Anglo-American selection committee.

FIREPROOF LUMBER

Lumber is now being dried and put through a new fire proofing process, according to reports from New York. Samples of maple, yellow pine, white pine, fir and white oak, fireproofed by this process, are already on the market for investigation. They have passed, it is said, the tests made by the engineering laboratories of Columbia University and also the requirements of the New York City Bureau of Buildings for fireproof wood to be used in skyscraper interiors. This advancement offers many new possibilities for fireproof wood in home interiors.

1927 UNFILED STEEL TONNAGE

Due to the increased demand for steel, unfilled tonnage of the U. S. Steel Corporation at the close of December is expected to show a gain of more than 200,000 tons, and probably may exceed 300,000 tons. Should this develop, it would be the largest increase in bookings since December, 1925. Unfilled orders at the close of November were 3,341,000 tons.

Lumber is growing to be one of the chief exports of the Philippine Islands and a large portion of the shipments to the United States are made through San Francisco, according to a report by the Bureau of Foreign and Domestic Commerce. During September the Philippines exported 9,836,800 board feet of lumber, of which the United States took 4,036,056 feet. During the corresponding month of 1926 exports were 3,431,008 feet. The United States is the largest market, while Japan, receiving 3,731,200 feet of lumber during September, is second.

Raymond Concrete Pile Co. of San Francisco which has the contract to construct a bridge over San Francisco Bay from Little Coyote Point, San Mateo County to Mt. Eden, Alameda County, has leased quarters from the Bethlehem Shipbuilding Corp. at Alameda for the manufacture of concrete piles to be used in the construction of the bridge, the estimated cost of which is \$5,000,000.

THE OBSERVER

What He Hears
and Sees
On His Rounds

San Benito County in 1927 expended \$100,700 for road work in its districts, the largest sum yet expended during any single year for road work.

The National Association of Real Estate Boards is to undertake an investigation as to the average useful life expectancy of all types of buildings. The work is being carried on at the request of the Internal Revenue Bureau for the purpose of setting a standard rate of depreciation and obsolescence allowable for income tax purposes.

The end of the year 1927 marks a period of comparative peace in the labor trades of the building industry, according to the American Bond and Mortgage Company, which goes on to state that there appears little possibility of any important strikes or wages controversies before spring.

Oakland school construction program in 1927 involved the erection of 25 structures cost \$2,970,960. Construction was financed under the \$9,600,000 bond issue voted in 1924. The building program under the bond issue is more than one-half completed.

According to word from Ventura, the General Petroleum Corp. plans to construct two 8-in. pipe lines from its Rincon oil field to the refineries at Los Angeles. The total length of the line will be 90 miles.

M. M. O'Shaughnessy, city engineer of San Francisco, recommends a \$24,000,000 bond issue to finance completion of the Hetch Hetchy water project. The itemized costs of construction follow: Coast Range Division—150,802 ft. (26.2 miles) at \$95 per foot (completed), \$14,326,190; 2650 ft. shafts, \$250 ft., \$662,500; underground working chambers, \$125,000; permanent concrete lining, shafts, \$132,500; 3200 ft. Alameda creek siphon, \$160,000; special portal construction, \$20,000; right-of-way, \$50,000; total, \$15,486,190. San Joaquin Division: 47.5 miles of 60-in. equivalent pipe, \$7,500,000; special structures, including San Joaquin River crossing, valves, fittings, remaining right-of-way, \$750,000; total, \$8,250,000. Connection Irvington portal to Dumbarton pipe, 1.38 miles, including trench, \$188,225; access-ories, fittings, rights-of-way, \$50,000; total, \$238,225. Administration, engineering and contingencies, \$1,130,130; grand total, \$24,874,395.

A favorable report on the McNary-Woodruff bill, S. 1181, providing for Federal expenditures of \$4,000,000 for the acquisition of forest lands was voted by the Senate Committee on Agriculture and Forestry Jan. 5. Following brief hearings in which lumbermen, foresters and others urged the early passage of the measure, the Committee also voted to report the bill with an amendment making the total appropriation available for an eight-year program, instead of a ten-year program as originally provided. \$1,000,000 of which is to be made available immediately upon enactment. C. W. B. Greeley, chief U. S. Forester, explained that the bill contemplated the purchase of 4,000,000 acres at the headwaters of navigable streams, two and one-half million acres in the Lake States and one million in the Southern pine region. He estimated the lands in the Lake States and in the South together at 3,000,000 acres, valued at \$5,000,000, while the lands in the West would cost about \$1,000,000.

A Veterans' hospital building program of \$10,500,000 has been recommended to Congress by Director Hines of the U. S. Veterans' Bureau. The program provides for 28.5 additional beds, with several new hospitals and extensions. Included are, Palo Alto, Calif., office and attendants' quarters, \$240,000; American Lake, Washington, 100 bed addition, \$220,000; Walla Walla, Wash., 150 beds for infirmary, \$250,000; Tucson, Ariz., Recreation Building, \$260,000.

United States Steel Corporation's unfilled tonnage as of December 31 increased 518,430 tons compared with November 30. The December 31 tonnage figure was 3,972,874 tons, against 3,454,444 tons on November 30. On October 31 last unfilled tonnage was 3,341,040; on September 30, 1927, 3,148,113 tons, and on December 31, 1926, it was 3,660,969 tons.

Kern County Board of Supervisors contemplate a \$500,000 road building program each year. It is proposed to finance the work under direct tax or via bond issues.

The Feather River Power Company of San Francisco is about to open on the Feather river, near the proposed route of the North Fork highway, at Storie, a new power house for power distribution to the Great Western Power Company. The plant, costing over \$9,000,000, will be one of the major electrical generating plants in the west, having a capacity of 70,000 horsepower per day, which means the problem of transmitting 165,000 volts across the north fork of the Feather river. Employment will be given to more than 25 electric experts. The power company in order to build this plant was forced to construct 24 miles of roadway in the north fork of the Feather River canyon.

Pacific Coast Steel Co. has received a permit from the state corporation commissioner to issue a stock dividend of 10 per cent to both preferred and common stockholders. The company will issue \$252,740 in preferred and a like amount of common, increasing its outstanding preferred to \$2,750,140 and common to \$2,750,140. Balance sheet of Oct. 31, 1927, gives assets \$9,918,296, liabilities, \$8,337,163, net worth \$1,581,133.

Construction of a series of eight powerhouses by the Pacific Gas & Electric Company on the Middle and South Forks of the Feather River, sometime within the next three years, is revealed in applications filed with the federal power commission. The applications are for rights to filings originally made through the Feather River Power Company and acquired by the Western States Gas & Electric Company. When the Pacific Gas & Electric Company purchased these holdings from the H. M. Byllesby Company, owner of the Western States Gas & Electric Company, it became necessary to file upon the applications again. The project is a long contemplated one, designed to develop 300,000 horsepower and to cost approximately \$45,000,000. It is understood that in order to keep the water rights active, construction work must be started upon the project within a period of three years.

The American Institute of Co-operation will hold its annual sessions in 1928 at the Berkeley campus of the University of California, July 20 to August 4.

Associated General Contractors of Santa Barbara will fight any further increase in wages in the building trades in that section, according to a decision reached at a recent meeting of that body. Recent request has been made by the common laborers for an increase of \$6 per day from the present scale of \$5, and the union plumbers, who requested an increase a year ago are said to be insisting on an increase from \$10 to \$11 per day. When the plumbers made their demands a year ago for more wages, the master plumbers are said to have promised that if conditions warranted it, they would grant the increase the first of this year—at least that is said to have been the understanding of most of the master plumbers. However, the union men are said to have an agreement from the committee that represented the master plumbers a year ago definitely promising the increase the first of the year.

Alleged failure of the contracting firm of W. G. McGinty & Sons of Fresno to complete the construction of the convent and parish house of the Church of Our Lady of Lourdes in San Francisco during 1923 and 1924 was made the basis of a suit instituted in the superior court at Fresno, Jan. 10 against the firm by the Globe Indemnity Company. The surety company is suing the co-partnership for \$12,653, claimed to have been paid by it to the Roman Catholic Archbishop of San Francisco because of alleged abandonment of the construction contract by the defendant.

Arguments favoring construction by the Federal Government at a cost of \$45,000,000 of a dam at Umatilla Rapids on the Columbia river, between the states of Oregon and Washington, were heard by the Senate Committee on Irrigation and Reclamation at Washington, D. C., Jan. 10.

New quarters are being occupied by the Sierra Planing Mill Co. at Second and V Sts., Sacramento. The firm, operated by E. W. McSwain, A. Gustafson and W. H. Gilbert, was formerly located at Twelfth and North B streets. A number of new machines have been installed in the plant, which is considerably larger than the old premises.

Annual meeting of the San Diego Lumber Co. will be held at 730 Merchants' Exchange Bldg., San Francisco, Feb. 6, according to Wm. G. Mugan, secretary.

Stockholders of the Russ Lumber & Mill Co., and L. W. Blinn Lumber Co., will hold their annual meeting Jan. 25 in Room 600, Marson Building, San Francisco, it is announced by Rudolph Boede, Secretary.

Orders received by General Electric Company in 1927 declined to \$369,784,623 from \$327,400,207 in 1926, a decrease of 5 per cent. Fourth quarter orders were \$76,708,532 against \$80,406,570 in the fourth quarter of 1926. Earnings for the year will be announced late in March.

Dr. Harald Norinder, chief of the Stockholm Research Bureau of the Royal Board of Waterfalls, arrived in San Francisco Jan. 11 as the guest of the Westinghouse Electric Company. He addressed the San Francisco Chapter, American Institute of Electrical Engineers at the Cliff Hotel Jan. 12.

TRADE NOTES

N. A. Becker, general manager of the Columbia Steel Corp. at Pittsburg, Calif., has been named consulting and efficiency engineer for all plants owned by the corporation. The announcement is made by I. F. Rains, vice-president and general manager from the San Francisco office of the company. William Cohn, who was assistant to Becker, will succeed him.

Construction has been started on a new structure at Woodland for the Davis Lumber Company. It will be 38 by 56 feet and will provide storage quarters for casings, window frames, doors and other mill work.

A change in management for the Western Pipe & Steel Company in Fresno, with Frank F. Dickey, manager for the past few months, being transferred to Los Angeles and J. W. Hall, formerly manager of the Fresno plant, returned to Fresno from San Francisco, has been announced. Hall requested that he be returned to Fresno.

C. V. Bradbury of Oakland has purchased the plumbing business of A. Nutter at 266 Twelfth St., Richmond, and will operate under the firm name of Richmond Plumbing & Heating Company.

Electric Salesman Manufacturing Co. of Portland, Ore., capitalized for \$200,000, has filed articles of incorporation at Oakland. Directors are: Eugene Blazier, Fred C. Powell and Eugene E. Blaizer.

A. S. Titus, well known in lumber traffic circles, has resigned as traffic manager for the California White and Sugar Pine Assn.

The Unica Lumber Co., Fort Bragg, heads the list of redwood producers with 105 million feet for 1927. The heaviest fir cut so far noted is the Long-Bell operations at Longview, Wash., with 421 million feet.

The Glidden Company is not involved in any negotiations which the Certain-teed Products Corp. is reported to be carrying on for acquisition of that company and the Beaver-Board Corp., Adrian D. Joyce, president of the Glidden Co. is quoted as saying in dispatches from Cleveland "that is probably a revival of the old rumor," he said.

Announcement of the completion of the consolidation of the San Joaquin Lumber Company and Falconbury Lumber Company is made by W. H. Falconbury, new head of the consolidated concern which will operate under the name of the San Joaquin Lumber Company with headquarters in Stockton. Investments of approximately \$350,000 are involved in the merger, which was decided upon December 17. Headquarters of the new concern will be in the San Joaquin Lumber Company offices at Scotts Ave. and Mormon channel, Stockton. The Falconbury yard on West Fremont Street will continue in operation as a branch yard. The announcement indicates that the entire personnel of the merging companies will be retained. Dan H. Schroebel will be assistant to Falconbury and Fred J. McKain will also continue with the company. Schroebel was manager of the San Joaquin Lumber Company before the consolidation and McKain was manager of the Falconbury Lumber Co.

United States Gypsum Company officially denies reports of the possibility of a merger with Certain-teed Products.

ALONG THE LINE

Robt. D. Dalton, architectural engineer in the Oakland City Building Department, has been given an increase in salary by the city council which fixed the amount at \$275 per month. The increase is automatic. Dalton's salary was \$250.

Richard C. Lewis has been appointed superintendent of the Mountain View Municipal water works plant, succeeding C. H. Close, resigned. Mr. Lewis will also serve as the town's building, plumbing and electrical inspector.

Frank J. Klimm, contracting plumber, has been re-elected president of the San Francisco Department of Public Health. This is Mr. Klimm's third term as president of the health body.

Calvin Miller, San Jose contractor, died in that city Jan. 5 following a brief illness. Mr. Miller was a former member of the San Jose Police and Fire Departments.

John A. McGilvray, director of the Department of Industrial Relations and a member of the State Industrial Accident Commission, has resigned. Will J. French, a member of the commission since its inception in 1911, until he resigned in March 1924, has been appointed by Governor Young to fill the vacancy.

T. H. Messer, building inspector of Coronado, has resigned. His successor is yet to be appointed.

Sacramento city council has reduced the salary of City Manager H. C. Bottorff from \$15,000 to \$10,000 a year. Geo. N. Randle, city engineer of Oakland, was recently offered the position of Sacramento city manager but refused to accept it.

The town of Hillsborough, San Mateo County, has adopted the city manager form of government. At a special election the voters recommended the appointment of a city manager by a vote of 53 to 11.

S. J. Hester, former assistant secretary of the San Francisco Department of Public Works, has been named secretary, succeeding Wm. J. Fitzgerald, who was recently elected to the office of sheriff of San Francisco.

Erle J. Osborne, San Francisco architect with offices in the Balboa Bldg., will leave February 1st for a tour of the Eastern states. The trip will be combined with both business and pleasure and will cover a period of about four months.

Alfred Dubbers, railroad construction engineer and for the past twenty-one years assistant engineer with the Southern Pacific Company, died in Santa Cruz recently. He was formerly with the U. S. Geological Survey and was instructor in mathematics at Selborne School, San Rafael.

Earl Grey Parks, Seattle architect, for twenty years associated with the architectural firm of Bebb & Gould of that city, died in Seattle recently.

The California Portland Cement Co. has authorized the expenditure of \$500,000 for improvements at the cement plant at Colton, San Bernardino County. The principal items will be replacement and installation of new kilns.

HERE — THERE — EVERYWHERE

Plastering, roofing and masonry will be inspected hereafter in San Leandro, according to an ordinance passed by the city council. In the past new buildings have been examined as to structure, sewerage, plumbing and electrical installation. The addition of the new requirements will raise the standards of buildings. Inspector Chris Hopper pointed out.

Arthur Kempston, manufacturer of electrical appliances and former chief of the San Francisco Department of Electricity, will address members of the Architects and Engineers Club at Sacramento, Jan. 23. The address will be part of an educational campaign sponsored this year by the Pacific Coast Electrical Association. Arrangements for the lecture are being completed by Earl L. Holman, secretary of the club.

Turlock city council contemplates the adoption of uniform building code as prepared by the Pacific Coast Building Official Conference. Copies of the code have been ordered purchased and these will be studied by members of the council.

Civil engineers of Orange county will hold a meeting January 20 at Santa Ana to form a permanent organization. Fifty-seven engineers attended a preliminary meeting called by W. K. Hilliard, who presided, at which a committee was appointed to arrange for another meeting for the purpose of forming an association.

Charles W. Pettifer was chosen president of the Long Beach Builders' Exchange for 1928. Other officers elected by the directors are: Roy W. Orris, vice-president; John W. Parsons, secretary, and Milton D. Moffitt, treasurer. E. A. Bradbury was re-elected manager. The other members of the board are Paul Maull, J. W. Bowman and B. S. Galleher.

The annual meeting of the Arizona Lumbermen's Club is scheduled for Phoenix, Feb. 17, 18 and 19, 1928.

Union carpenters in Bakersfield will begin working on a five-day week schedule in April, pursuant to action of Bakersfield local No. 743. The union members voted to place the five-day week into effect in Bakersfield in 90 days, and notices of the action will be sent to all contractors. Members of the union reported that "a majority of the contractors" favor the five-day working week schedule.

The annual meeting of the Allied Steel Interests Conferences is scheduled at Del Monte February 16, 17 and 18. Sessions will be held at the Hotel Del Monte.

Thos. C. Wishart, 24, plumbing contractor of Redwood City, accidentally shot and killed himself in Santa Rosa Jan. 8 while duck hunting.

Annual meeting of the Electrical Supply Jobbers and Plumbing Supply Jobbers will be held at the Hotel Del Monte, Monterey County, January 27, 28 and 29.

Pacific Coast Hardware Jobbers will hold their annual meeting at the Hotel Del Monte, February 9, 10 and 11.

Acme Concrete Co., formerly located at 6467 California St., has moved to 2254 Thirty-first Ave., San Francisco.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1428-S INDUSTRIAL ENGINEER. with experience in handling labor production problems and rate setting for employment with consulting engineer. Must have organizing ability, initiative, tact and abundant energy. Must be a salesman with technical training and ability along mathematical lines and a proven interest in the labor and production element in manufacturing problems. Apply by letter giving experience in detail, education, and general qualifications, with photo. Location Pacific Coast. Salary open.

R-1423-S ENGINEER, for company doing a general steel business in both structural shapes and reinforcing bars. Requires man with structural experience for a position combining estimating, designing, selling, supervising field work, and some occasional detailing. Location Arizona. Salary about \$300. Apply by letter.

K-3-X-3918-CS CIVIL ENGINEER, member of the Am. Soc. of C. E. engaged in coal mining in Colorado for 20 years, desires an associate in developing large coal property largely equipped; \$50,000 required. The Moffat Tunnel will be in operation in January 1928, removing a great obstacle to development. Apply by letter.

K-2-X-3915-CS ENGINEER, who has technical knowledge and practice in the manufacture of galvanized sheet and can be trusted as director of a steel sheet factory in Mexico. Apply by letter only. Headquarters, New York City.

X-2446-CS DESIGNERS, graduates, with structural steel and reinforced concrete experience for oil refining work. Salary \$250 a month. Apply by letter. Location South. Headquarters New York City.

R-1354-S SALES ENGINEER, to develop the sale of air and electric portable drills, air compressors and tools for use of contractors and machine shops. Commission only. Location East Bay.

R-1429-S ARCHITECTURAL AND STRUCTURAL DRAFTSMAN, familiar with concrete and frame construction to detail plans for contractor. Must be experienced. Salary open. Location San Francisco.

SAN RAFAEL DEMANDS FEE FOR BUILDING PERMITS

Issuance of building permits without the payment of fees in San Rafael has been discontinued by the city council, with the passage to print of an ordinance providing for a fee of from \$1 to \$10 on all buildings of from \$100 to \$1000 in value, and changing the amounts of fees for buildings of greater value. Heretofore no fee has been charged on permits for buildings under \$500 in value, and the same fee was charged for all buildings from \$2000 to \$4000, and from \$5000 to \$9000 in value, respectively.

Under the former scale of fees the total amount collected by the city on building permits in 1925 was \$2015. Under the scale provided for in the ordinance just passed would have netted the city a revenue of \$2665.

Under the provisions of the new ordinance the following scale of fees will be charged for building permits:

For buildings up to \$1000 in value, \$1 per \$100 valuation; from \$1001 to \$2000, 50 cents per \$100 valuation additional; from \$2001 to \$15,000, \$2 per \$1000 additional, and from \$15,000 up, \$1 per \$1000 additional.

PACIFIC COAST BUILDING IN 1927 SHOWS A 10 PER CENT REDUCTION - \$27,959,113 IS DECEMBER TOTAL

A commendable policy of conservatism on the part of builders, promoters of building projects and those who finance building operations has been an outstanding characteristic of this industry during 1927 throughout the United States.

It has affected the building program of Pacific Coast cities to the extent of a reduction of approximately 10 per cent from the total volume of construction in 1926. The first eleven months of the year registered an aggregate 7 per cent reduction, but a marked curtailing of activity in December greatly reduced the annual record.

A grand total of 153,482 building permits calling for \$452,339,617 in construction costs was issued during 1927 in 98 cities of the Pacific Coast reported in the National Monthly Building Survey of S. W. Straus & Co. In 1926 these cities issued 149,093 permits for buildings to cost \$509,620,078, and in 1925 the total was 181,950 permits for buildings to cost \$542,322,902.

The increase in population in practically all of the cities of the Western Coast area is relatively much greater than elsewhere in the United States. A building program for 1928 in this area comparable to that of 1927 or in some cities greater, may be expected without jeopardy to existing conditions.

Following are the official construction cost figures issued during December, 1927, and the year 1927, as reported by building department executives from 98 cities comprised in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.:

City—	December, 1927 No.	Cost	Dec. 1926	No.	Year, 1927 Cost	Year, 1926
CALIFORNIA						
Alameda	56	\$ 129,293	\$ 503,324	792	\$ 1,537,424	\$ 2,241,799
Albany	40	120,000	65,000	360	1,511,661	1,544,034

gineering." Thos. Hawthorne, director of irrigation in Haiti (1921-26), discusses the engineers in that section.

Harry A. Storrs, chief inspector for the East Bay municipal utility district, is featured in an article on the automatic electric welding of pipes for the Mokelumne water conduit. A treatise on cork is given by Frank E. Whittemore.

Time and the Old Mill Wheel is told by Rudolph E. Beiter. The Mercator Projection is discussed by Walter Landers and A. E. Zimmerman of the historical committee of the society tells of the Russian explorer in the Pacific Northwest. Albert J. Capron, secretary of the society, is featured under the caption, "Wanted: Men to Carry 'A Message to Garcia'."

Design and description of a modern manually operated telephone exchange is told by J. Wallace, a past vice president. Hans Graff tells of the quotation of Herbert Hoover, "Come out of your shell, you engineer." J. F. Beaman, a director of the society, is featured as a poet in "Jim Jackson."

"Ephraim Dyer II and Ebenezer Herriek Dyer," a biographical sketch compiled by Glenn B. Ashcroft, a member of the historical committee, and the evolution of fortifications around San Francisco Bay is told by Major O. W. Degen, C. E., Q. M. Corps at Fort Mason.

The cover design for the Year Book was furnished by the "Save the Redwoods League," through the courtesy of Newton B. Drury.

ARCHITECT'S COMPLAINT MAY CAUSE LOSS OF HIS PROPERTY

When E. L. Norberg, Burlingame architect and land owner, complained to the Burlingame City Council about a month ago that the City Hall overlapped property owned by him and he desired something done about it, he started something. At that time the matter was referred to City Attorney Fletcher L. Cutler for investigation. As a result Cutler announces that more than twenty years ago all of what is known as the Burlingame creek bed was deeded to the city by W. H. Howard. Somehow, this transfer was forgotten. There now stands on what Cutler says is city property, some \$150,000 worth of buildings. Incidentally, the creek goes through Norberg's lot. Cutler says it is probable that the city will take action to recover this property.

MATERIAL UP 73.4%

Comparing prices in 1926 with those prevailing in 1913, the group of commodities showing the largest increase was 79.9 per cent. Clothing materials came next with an increase of 75.9 per cent. Other increases were: Building materials, 73.4 per cent; house-furnishing goods, 61.8 per cent; foods, 52.9 per cent; farm products, 42.2 per cent; metals, 26.7 per cent; and miscellaneous commodities, 23.9 per cent. All commodities on an average were fifty-one (51) per cent higher in 1926 than in 1913.

GRADE CROSSING ACCIDENTS

The December issue of California Highways and Public Works reports an interesting analysis of grade crossing accidents on twenty-four railroads in California for the period from January 1, 1925, to May 10, 1927. The analysis was made by the State Railroad Commission.

The 2251 accidents analyzed were as follows: On crossings protected by crossing signs, 946; by wigwags, 654; by human flagmen, 290; by overhead crossing signs, 293; by gates, 34; by crossing bells, 34. These 2251 accidents resulted in 297 persons being killed and 1054 injured. Property damage only occurred in 1360 accidents.

TOPICS OF IMPORTANCE REVIEWED IN 1927 YEAR BOOK OF ENGINEERS

BY THE OBSERVER

The 1927 Year Book of the Society of Engineers, formerly the San Francisco Chapter, American Association of Engineers, an organization devoted to the interests of professional engineers, is off the press. The issue contains 70 pages of illustrated reading matter and four pages of advertising.

In addition to articles submitted by some of the leading engineers in the San Francisco Bay district, the issue contains a complete roster of the officers and committees and a complete listing of the membership together with the address of the member and the firm with which he is employed if not operating for himself.

An entire page "Foreword" prepared by George E. Tonney, president of the society, carries an important message to engineers throughout the world and particularly to those of the far West.

Prof. Chas. D. Marx, consulting engineer of Palo Alto, discusses the Stevenson Test Dam; G. Harold Porter, manager of the Pacific Division of the Radio Corporation of America, discusses Radio—in the past, present and future; C.

Dereleth Jr., chief engineer for the American Toll Bridge Co., and Dean of the College of Civil Engineering, University of California, writes on the three unique features of the Carquinez Bridge project.

C. C. Cottrell, manager of the highways bureau of the California State Automobile Association, is featured in an article on meeting traffic requirements in modern highway design. The discovery of aether waves as being the cause of universal gravitation is explained by Captain T. J. J. See, professor of mathematics, U. S. Navy and Government Astronomer at Mare Island. Ad Schuster, editor of the Oakland Tribune, comments upon the metropolitan destiny of the East Bay district. California State parks are featured in an article by Chas. B. Wing, executive head of the Department of Civil Engineering, Stanford University.

Development of the Oakland airport is outlined by D. R. Lane of the Oakland Chamber of Commerce, and Raymond E. Davis, professor of civil engineering at the University of California is featured in a topic "The Trend of En-

Building News Section

APARTMENTS

Completing Plans
APARTMENTS Cost \$—
SAN FRANCISCO, Mission District.
Six-story class C steel frame and concrete bldg., 50 apts, stores, offices and garage.

Owner—Withheld.
Architect—R. R. Irvine & L. Ebbets, Call Bldg.

Two stories of the structure will be devoted to garage. One story for stores and one floor for doctors' offices. Construction will be started as soon as bank loan is obtained.

Plans Complete
APARTMENTS Cost \$—
SAN FRANCISCO, Hayes Valley Dist.
Six-story class C concrete apt. bldg., 117 2, 3 and 4-room apts.

Owner and Builder—Withheld.
Architect—R. R. Irvine & L. Ebbets, Call Bldg.

Sub-bids will be taken by the owner in one week at which time name will be disclosed.

Sub-Contracts Awarded.
APARTMENTS Cost, \$90,000
SAN FRANCISCO. NE Haight and Broderick Streets.

Six-story and basement reinforced concrete apartment building (36 apts.)
Owner—Mrs. Bessie Cooley, 2090 Ninth Ave., San Francisco.

Architect—J. C. Hladik, Monadnock Bldg. San Francisco.

Sand Pratt

PETALUMA STARTS SHIPMENT OF CHICKS

PETALUMA, Jan. 7.—The shipping of baby chicks from Petaluma has started and the coming season promises to break all records, according to hatcherymen. During the present week more than 50,000 day-old chicks were shipped by express to points in California.

PERHAPS YOU.

ARE NOT aware.

BUT THE Pratt Building Material Co.

PRODUCE "CHICKEN grit."

EVERY FOWL in the world.

REQUIRES SMALL gravel.

OR CLEAN, sharp sand.

TO GRIND its food.

WHEN BABY chicks are hatched.

FROM THE eggs.

THERE IS no gravel.

OR SAND.

IN THEIR gizzards.

OR FOOD grinding cavity.

SO CLARENCE (Sandy) Pratt, President.

OF THE Pratt Building Material Co.

PRODUCER OF clean, sharp sand.

AND CLEAN, sharp gravel.

AT SACRAMENTO, Marysville.

PRATTROCK (near Folsom).

MAYHEW (SACRAMENTO County).

AND PRATTCO (Monterey County).

CENTRAL OFFICE—San Francisco.

SELLS SAND and gravel.

DIRECT TO poultry farmers.

AND DEALERS.

SO THE chickens and turkeys.

BOTH YOUNG and old.

CAN HAVE nice, clean sand.

AND NICE, clean gravel.

TO DIGEST their food.

"I THANK you."

The early bird not only gets the worm, but the bug or fly. Sandy Pratt's concern, the Pratt Building Material Company, is the "early bird" in the sand, rock and gravel business and is ready to supply chickens, canaries, parrots, turkeys, ducks and geese and mud hens with "grinding machines."

WASHINGTON, D. C.—Pacific Gas & Electric Co., 245 Market st., San Francisco, files application with Federal Power Comm. for rights to filings originally made through the Feather River Power Co. and acquired by the Western States Gas & Electric Co. The P. G. & E. plans to const. eight power plants on the Middle and South Forks of the Feather river sometime within the next three years. The project is designed to develop 360,000 hp. and to cost approx. \$45,000,000.

GRIDLEY, Butte Co., Cal.—J. L. Hall, 1022 Mills Bldg., San Francisco, awarded contract by city to fur. Western Red cedar poles, 40-ft., 8-in. top, AA treated, \$13.40 ea; B treated, \$14.20; 3/4 penetration treated, \$14.55; 35-ft. poles, AA, \$11.62; B treated, \$12.25; 3/4 penetration, \$12.50. Other bids were:

Neldenmeyer-Martin Lumber Co., Portland, Ore., 35-ft., AA, \$10.33; B treated, \$11.46; 3/4 penetration, \$11.73; 40-ft. AA, \$12.80 B, \$14.24; 3/4 penetration, \$14.59.
Naugle Pole & Tie Co., Spokane, Wash., 35-ft., B treated, \$14.40; 3/4 penetration, \$14.90; 40-ft. B, \$15.85; 3/4 penetration, \$16.40.

W. H. Lewis, Denver, Colo., 35-ft. B treated, \$14.80; 3/4 penetration, \$15.36; 40-ft. B treated, \$16.20; 3/4 penetration, \$16.75.

Forbes Supply Co., San Francisco, 40-ft. B treated, \$14.80; 3/4 penetration, \$15.15; 1/2 treatment, \$15.30; 35-ft. B treated, \$12.40; 3/4 penetration, \$12.70; 1/2 penetration, \$12.80.

Bid of Texas Creosoting Co. was not considered due to the fact that the company did not bid on Western Red cedar poles.

LOS ANGELES, Cal.—Superior Judge Clair S. Tappan has upheld the right of the City of Los Angeles to spend money appropriated from its power and light revenues during the present year to construct a steam stand-by plant on the harbor. However, the court ruled that approximately \$1,400,000 which the power and light department had appropriated to its \$5,000,000 construction program should be properly regarded as bond money rather than revenue money. The \$1,400,000 could not be spent legally for the building of the plant, the court ruled. Officials of the bureau state that the ruling on this item would not seriously effect the bureau's construction program. The amount budgeted this year for construction of the steam plant is \$3,230,000.

PUBLIC BUILDINGS

Sub-Contracts Awarded. COURTHOUSE ANNEX

UKIAH, Mendocino Co., Cal. Cost. Price, \$105,000
Two-story and basement steel frame and concrete courthouse annex.

The last of the retail businesses acquired by the United States Gypsum Co. in 1921 has been sold, according to an announcement from the Chicago headquarters of the company. The business is the Windsor Cement Co. of Boston, which was one in a string of retail establishments operated in the East by J. B. King & Co. The King company was purchased by the United States Gypsum Co. in 1921; since that time the Gypsum company has disposed of the retail establishments as rapidly as purchasers have been found. The purchaser of the Windsor Cement Co. of Boston is M. T. Ryan. It has been announced by Mr. Ryan that the offices of the company will be retained at 18 Tremont street, but that new warehouse space, adequate for the stocking of a full line of building materials, will be procured.

Bureau of Standards tests have demonstrated that wetting the bricks will not add to the compressive strength of brick walls. Clay brick walls will be as strong when aged in air for sixty days as they will be if kept damp for a period of about one week after construction, the tests reveal.

NOTICE TO CONTRACTORS

(Oakland High School Gymnasium)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211 City Hall, Oakland, California, until Tuesday, the 24th day of January, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the Oakland High School Gymnasium of the Oakland High School District, located on the Southwest corner of Park Boulevard and Hopkins Street, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars, but for all bids of less than Fifty Thousand (\$50,000.00) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 24th day of January, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of
Oakland, California.

NOTICE TO CONTRACTORS

(Oakland High School Shop Building)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211 City Hall, Oakland, California, until Tuesday, the 24th day of January, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the Oakland High School Shop Building of the Oakland High School District, located on the southwest corner of Park Blvd. and Hopkins St., in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Superintendent of Buildings, 337 17th St., Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars, but for all bids of less than Fifty Thousand (\$50,000.00) Dollars said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 24th day of January, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of
Oakland, California.

NOTICE TO CONTRACTORS

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 7, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erec-

tion and completion of the addition to Industrial Shop Building, Industrial Home, Adult Blind, Oakland, California, in accordance with plans and specifications therefor copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The Industrial Shop Building is now a one-story brick building with interior frame construction and composition roof. The new work consists of the addition of a second story of frame and stucco construction and tile roof and alterations to the existing work. Plumbing, Heating and Electrical work is included.

Bids must be submitted on Proposal Forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for addition to Industrial Shop Building, Industrial Home, Adult Blind, Oakland, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

Geo. B. McDougall,

State Architect.

B. B. MEEK,

Director of Public Works.

ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, University of California at 855 North Vermont Avenue, Los Angeles, California, at or before 10:00 A. M., February 2, 1928, for the general construction of the Chemistry Building and the Physics Building on the Westwood Campus at the University of California at Los Angeles.

Drawings and Specifications, Instructions to Bidders and Form of Proposal may be obtained by General Contractors at the Office of the Comptroller at 855 North Vermont Avenue, Los Angeles, California, on deposit of One Hundred and 00/100 (\$100.00) Dollars for each set of Drawings and Specifications. Deposits will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bid will be considered unless accompanied by a certified check or bid bond of an acceptable surety company in favor of the undersigned, equal to ten per cent (10%) of the bid, to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

GENERAL LISTING BUREAU

Costa County, California, according to plans and specifications prepared for the same by Coffman-Sahlgren-Stafford, the authorized architects.

Bids will be received for the work complete, with alternate propositions.

Plans and specifications can be seen during office hours at the office of the Clerk of said Board at Vine Hill, California, and may be seen at or obtained from the office of the Architects, 602 Plaza Building, Sacramento, California.

A cash deposit of \$25.00 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of the same.

All bids shall be presented on blank forms which may be procured from the office of the Architects.

Each bid shall be accompanied by a certified check on some responsible California bank for a sum not less than ten per centum (10%) of the amount of the bid, made payable to Miss E. S. Vance, Clerk of the Board of Trustees, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten days after the award is made enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work, and in case the bidder to whom the contract is awarded fails to, or refuses to enter into said agreement, or to furnish said bonds, said check shall be forfeited to the said School District, in the manner provided by law. The Board of Trustees will not accept a Bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to Miss E. S. Vance, Clerk of the Board of Trustees, Vine Hill School District, and endorsed "Proposal for Building School."

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received and to continue the award of the contract at the pleasure of the Board.

By order of the Board of Trustees, Vine Hill School District.

By MISS E. S. VANCE, Clerk.

NOTICE TO BIDDERS

(Street Sweeper—Santa Barbara)

Sealed proposals or bids will be received by the undersigned up to 11 o'clock A. M. on the 19th day of January, 1928, to be opened at 2:30 P. M. of said day in the Council Chamber of the City of Santa Barbara, for furnishing the said city with a Motor Street Sweeper.

Information and specifications may be obtained upon application to the undersigned in the City Hall of said city.

A certified check or bidder's bond, made payable to the Mayor of the City of Santa Barbara, in the sum of ten per cent of the total amount of the bid, must accompany each proposal as an evidence of good faith and a guarantee, if awarded contract, the bidder will execute a contract and give bond as required.

The right is reserved to reject any and all bids.

CARL E. HASSE, Purchasing Agent, City of Santa Barbara, California.

NOTICE TO CONTRACTORS

(C. I. Pipe—Corcoran, Calif.)

Notice is hereby given that sealed bids will be received by the City Clerk of the City of Corcoran, County of Kings, State of California, at the City Hall in the City of Corcoran, County and State above mentioned up to and until 8 o'clock P. M., January 16, 1928, for furnishing the said City of Corcoran the following described material:

1056 feet of 6 inch B. & S. Class "B" Cast Iron Pipe.

352 feet of 4 inch B. & S. Class "E" Cast Iron Pipe.

Each bid must be accompanied by a certified or cashier's check in a sum of not less than 10 per cent of the amount bid, payable to the City of Corcoran as evidence of good faith on the part of the bidder.

The City Council reserves the right to reject any or all bids, or to accept the bid considered by them best for the said City of Corcoran.

Corcoran, California, January 5, 1928.

JAS. C. CONDON, Clerk of the City of Corcoran, County of Kings, State of California.

NOTICE TO CONTRACTORS

(Lagunitas School District—Marin Co.)

Notice is hereby given that the board of trustees of Lagunitas School District will, on Monday January 23, 1928, at the hour of 8 o'clock p. m., at the school house of Lagunitas School District, at Lagunitas, Cal., receive and open bids for the construction of a school house, according to plans and specifications, rules and forms of bids prepared by A. A. Cantin, architect of said Lagunitas School District, all of which may be obtained at the office of said architect, Flatiron Bldg., Sutter and Market streets, San Francisco, Cal., on deposit of ten dollars, to be refunded on return of said plans and specifications.

All bids shall be accompanied by a certified check for ten per cent of the bid, which shall be forfeited if the successful bidder refuses to sign the contract or furnish a faithful performance bond, to be prepared by the district, for twenty-five per cent of the contract price, and the statutory public work bond for the benefit of laborers and materialmen.

All bids shall be submitted on forms of bids prepared by said A. A. Cantin, containing alternative bids and offers, any one of which for any part of the work may be rejected, and that part of the work eliminated from the contract.

The board reserves the right to reject any and all bids.

Dated January 7, 1928.

E. B. GARDNER, Clerk of the Board of Trustees of Lagunitas School District.

NOTICE TO CONTRACTORS

Dunsmuir Joint Union High School Dist.

Notice is hereby given that sealed bids will be received by the Trustees of Dunsmuir Joint Union High School, Dunsmuir, Siskiyou County, California, at the office of the principal of the high school, at Dunsmuir, California, until 7:30 P. M., February 3rd, 1928, for the erection of a Dunsmuir Joint Union High School building, to be built at Dunsmuir, California, according to the plans and specifications prepared by Starks & Flanders, the authorized architects.

Bids will be received for the various branches of the work, as follows: For the general work as one contract; for the electrical work, heating and plumbing as separate contracts.

Plans and specifications will be on file at the office of the Clerk of the Trustees of said Dunsmuir Joint Union High School, at the High School Building in Dunsmuir, and may be seen at or obtained from the office of the Architects, Starks & Flanders, Ochsner Bldg., Sacramento, California. A cash deposit of \$10.00 will be required from all prospective bidders on all copies of plans and specifications loaned out as a guarantee of the return of the same.

Each bid must be accompanied by a certified check for a sum not less than ten per centum of the amount of the bid, made payable to Clara J. Hanna, Clerk of the Board of Dunsmuir Joint Union High School Trustees, as a guarantee of good faith that the parties to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work; and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement or to furnish said bonds, said check will be forfeited to said Dunsmuir Joint Union High School District in the manner provided by law.

The Board of Trustees will not accept a bidders bond in lieu of a certified check; each bid must be enclosed in a sealed envelope and addressed to Clara J. Hanna, Clerk of the Board of Trustees of the Dunsmuir Joint Union High School, Dunsmuir, California, and endorsed: "Proposal for Building Dunsmuir Joint Union High School Building at Dunsmuir, California."

The Board of Trustees expressly reserves the right to reject any and all bids and to waive any informality in any bid received.

By order of the Board of Trustees of Dunsmuir Joint Union High School District, Siskiyou County, California.

Dated January 3, 1928.

GEO. M. TAYLOR, Chairman.

Attest: CLARA J. HANNA, Clerk.

NOTICE TO CONTRACTORS

GENERAL CONTRACTORS PLAN
MEET TO DISCUSS PROBLEMS

The record-breaking expenditure of more than eight billion dollars for all types of construction in the United States during 1927 is to be studied at a conference to be held at West Baden, Indiana, January 22-27, under the auspices of the Associated General Contractors of America. The analysis is prompted, it is claimed, by evidence that existing practices, in the construction industry last year wasted a large amount of money intended to finance actual construction work.

"The construction industry's administration is muddled, despite the remarkable strides made in developments of ingenious and productive mechanical methods," Gen. R. C. Marshall, head of the sponsoring organization, declared in making official announcement of the meeting.

"Under present conditions," the announcement continues, "men who know little more about construction work than they do about the sale of butter and eggs are able to secure contracts, materials and equipment with which to attempt building operations. Defaulted contracts, poor construction and delays in making projects ready for use are the inevitable results which in turn cause direct losses to the public and threaten the stability of the nation's second largest industry."

Representatives of many branches of the construction industry from all parts of the country are expected to attend the meeting; it was stated at headquarters of the contractors' national association.

A construction exposition exhibiting latest developments of machinery and materials also will be held at West Baden at the time of the conference.

BONDING COMPANIES BACK UN- STABLE CONTRACTORS IN UN- FAIR WAYS

While engineers and state board officials were painting rosy pictures of a new era in road building, contractors attending the American Road Builders' convention at Cleveland, Ohio, heard two experts from their own number decry the unhealthy conditions for the rural highway contractor, according to Associated Press dispatches.

"Rural highway construction has wrecked more contractors than preferred bonds have wrecked homes," A. R. Hirst, chief engineer of the American Vibrolithic Corp, declared in voicing the contractors' protests to the practices of bonding companies who back unstable contractors through unfair methods.

"The total money lost on rural contracts in the last decade far exceeds the total money made," Hirst said, "which means that our states and counties have more miles of roads than they have paid for. Prices and conditions in the rural highway field have been so unsatisfactory to contractors that energetic attempts have been made to find an appropriate goat. The goat usually elected has been the surety bonding companies, who are willing to bond unstable bidders whose bids are too low."

Allan Jay Parris, president of the Illinois Association of Highway and Municipal Contractors, Paris, Ill., declared the industry was in a "sick and precarious condition," from the contractors' point of view.

"The average price of all work has been taken at or below the cost of production," Parrish said. "Following the world war there was a period of prosperity in the highway industry because of few contractors in the field. Today many incompetent contractors have flooded the field."

"In Illinois we have investigated contractors whose outstanding bills and claims were far in excess of their total possessions."

Substantial discounts to contractors paying before the tenth of each month, with non-delivery of more goods if the bill is not paid by the first of the following month, was indorsed by Mr. Parrish as a partial solution to the "false credit" problem.

LUMBER SHIPS SEEK SPLIT OF McCORMICK CONTRACT

Pacific Coast shipping circles are watching the outcome of the "war" between rival carriers for the huge lumber contracts about to be given out by the Charles R. McCormick Lumber & Steamship Co.

The McCormick Co., it is said, has been awarded the largest intercoastal piling contract ever handed on the Pacific Coast.

This contract, calling for delivery of 12,000,000 feet of piling and 2,000,000 feet of wharf timber, must be delivered to the Merritt, Chapman & Scott Co. at Baltimore by May 1.

Although a large portion of the piling will be shipped aboard steamers of the McCormick line, outside tonnage will be secured.

Officials of the company declare that extra vessels will be chartered for the haul, but declined to reveal how much of the contract lumber will be handled in this way.

JOHNS-MANVILLE EMPLOYEES SUE FOR BEQUEATHED STOCK

Thirty-seven present and former employees of the Johns-Manville Corporation have brought suit for approximately \$7,000,000 against H. E. Manville, former president, in an effort to regain ownership of 40,000 shares of stock bequeathed to them by Thomas F. Manville, it was revealed in papers filed in surrogate's court, New York, Jan. 17.

The employees charge that they were induced to transfer their stock to H. E. Manville at \$150 a share upon his plea that it was needed to assure his control of the company, as banking groups were seeking to purchase the stock of other legatees. They claim that Manville, disregarding his promise to continue as president, reorganized the corporation, sold a controlling interest to bankers and retired from active management.

It is alleged that the stock sold by them to Manville for \$150 a share now has an equivalent market value of \$500 a share.

Thomas F. Manville, who died October 19, 1925, directed in his will that 40,000 shares of stock of the company, equivalent to \$120,000 shares of the present issue as a result of a subsequent three-for-one split up, be distributed among employees who had been with the company for at least five years and who had received \$10,000 or more in salary during the previous calendar year. These employees were to pay one-half of the then market value, the other half being a gift. Fifty-eight employees qualified under the provision, among them H. E. Manville.

NEVADA SEEKS TO DEVELOP NEW CLAY DEPOSITS

In order to develop new deposits of clay in the state of Nevada possessing oil bleaching properties, and thereby promote a phase of state development that appears to hold excellent possibilities, a series of tests are to be made at the Rare and Precious Metals station of the U. S. Bureau of Mines at the University of Nevada. These experiments are to be conducted in co-operation with the Mackay School of Mines, and will run over a period of two months.

Numerous samples have already been collected in the state, but there may be deposits of clay from which samples have not been received, and it is much desired that as complete a survey as possible be made. Director John Fulton, of the Mackay School of Mines, announces that those who own, or are aware of deposits of clay in the state of Nevada are invited to send samples to the Mining Experiment station, and they will be tested with those now on hand.

In taking samples, Director Fulton says for the benefit of those who may desire to have clay tests made, that volcanic ash or diatomite do not usually bleach oil, and material that feels gritty when moistened should be rejected in the field. Samples should be taken from below the grass roots, the lumps to weigh about one pound per sample.

One deposit of filtering clay being developed at Ash Meadows in southern Nye county is shipped to California oil refineries where it is in much demand.

These clay tests are made possible through the John Armstrong Challoner research fellowship at the Mackay School of Mines. The clay tests will be carried on by L. R. Messer, the Challoner fellow.

CALIFORNIA STATE HIGHWAY BOARD ADOPTS 2-YEAR CONSTRUCTION PROGRAM

The California Highway Commission at its meeting on January 12th adopted the budget for highway construction, reconstruction and widening for the biennial period extending from July 1, 1927, to June 30, 1929.

The estimated total of highway expenditures for the biennium (July 1, 1927, to June 30, 1929), from all funds and including all purposes accordingly is \$47,169,512.

The Commission has allotted the \$15,100,000 that it is estimated the one-cent gasoline tax will raise during the biennium, to new construction projects, in northern and southern counties under the percentage terms prescribed in the Breed bill as follows:

Northern Counties

For Primary road projects (51.7% of 75% of money raised under bill) \$6,194,775
For secondary road projects (50% of 25% of money raised under bill) 1,887,500

Total for north

\$8,082,275

Southern Counties

For Primary road projects (15.3% of 75% of money raised under bill) \$5,130,225
For secondary roads (50% of 25% of money raised under bill) 1,887,500

Total for south

\$7,017,225

Trestle over Santa Fe Creek, \$60,000.

SAN LUIS OBISPO AND SANTA BARBARA COUNTIES—Arroyo Grande to Zaca, macadam shoulders, 1.5 miles, \$135,000. Line changes, grading and surfacing, \$30,000.

VENTURA COUNTY—Rincon Creek bridge, \$40,000. Paving on Conejo grade, \$10,000.

VENTURA COUNTY—Paving on Conejo grade, \$10,000. Benham subway (state's share), \$10,000.

SANTA BARBARA COUNTY—Rincon Hill, realignment, grading and resurfacing 1 mile, \$110,000. Between Ellwood and Goleta, widening and resurfacing 3.44 miles, \$110,000. Montecito to Summerland, realignment, grading and paving 1.8 miles, \$100,000. Superelevating 33 curves, \$45,000.

ORANGE COUNTY—Fullerton to Anaheim, (co-operative paving) 0.8 mile (state's share), \$55,000. Galivan line change, grading and paving, 0.3 mile, \$30,000. Galivan, northerly, widening and second story, 5 miles, \$175,000. Santa Ana to Garden Grove avenue, widening and second story, 2.2 miles, \$100,000. Garden Grove avenue, to Anaheim, widening and second story, 2.8 miles, \$120,000. Galivan overhead, Santa Fe R. R., \$45,000. Irvine subway (state's share), \$75,000. Widening Aliso Creek bridge, \$25,000. Widening two bridges on Irvine ranch, \$15,000. Line change north of Serra, grading and paving, \$30,000. Sacramento to Oregon Line via Marysville.

THEAMA AND SHASTA COUNTIES—Stockton and Cottonwood bridges and approaches, \$140,000.

SHASTA COUNTY—LaMoine northerly, grading and standard surfacing, 10 miles, \$650,000. Pollards Gulch bridge, \$11,000. Boulder Creek bridge, \$10,000. Shotgun Creek bridge, \$14,000.

SISKIYOU COUNTY—End of present pavement to Gazelle, widening 7.7 miles, \$100,000. Four short line improvements, \$25,000. Bailey Hill subway under S. P. (state's share), \$50,000.

SACRAMENTO COUNTY—North Sacramento to Ben Ali station, second story pavement, 1.8 miles, \$75,000. Small bridges and line changes between Ben Ali and Sylvan school, \$35,000. Paving curve at Sylvan School, 0.3 mile, \$10,000.

SACRAMENTO AND PLACER COUNTIES—Sylvan school to Roseville, second story pavement, 2.3 miles, \$95,000.

PLACER COUNTY—Between Roseville and Lincoln, second story or resurfacing, 2.9 miles, \$95,000.

Improving reverse curves at railroad stations, (this also includes like work on Tehama to Benicia highway), \$35,000.

Sacramento to Los Angeles

FRESNO AND MADERA COUNTIES—Herdon bridge, \$220,000.

LOS ANGELES COUNTY—San Fernando to Castaic, grading and paving, \$350,000. Through Newhall (co-operative paving) 0.6 miles (state's share), \$26,500. Ridge Route realignment, grading, \$150,000. Ridge Route paving, \$165,000. Bituminous resurfacing, 3.5 miles, \$37,000. Realignment near Newhall tunnel, \$30,000.

MADERA COUNTY—Tharsa to Borden, widening and resurfacing, 6.9 miles, \$145,000. Madera to Fairmead, widening and resurfacing, 10 miles, \$240,000. Berenda grade separation (state's share), \$40,000.

MERCED COUNTY—Widening culverts, \$30,000.

TULARE COUNTY—Southerly boundary to Earlimart, widening and resurfacing, 8.5 miles, \$190,000. Two 20-foot bridges, \$20,000.

SAN JOAQUIN COUNTY—Cherokee crossing to Stockton, grading and surfacing, 2.4 miles, \$45,000. Cherokee crossing to Live Oak, widening and crushed

rock shoulders, 7.6 miles, \$50,000. Bridge across the diverting canal, \$45,000. Cherokee crossing to Stockton, grading and surfacing, 2.4 miles, \$45,000.

SACRAMENTO COUNTY—Arno line change, grading and surfacing, 1.8 miles, \$32,500. McConnelly Station to Sacramento, crushed rock shoulder, 13.2 miles, \$30,000. Bridges between Gaat and Arno, \$70,000. Bridge near Arno, \$20,000. Gaat to McConnelly, grading and second story, 5.5 miles, \$190,000.

STANISLAUS COUNTY—Approaches to Turlock, grading and paving 1.2 miles, \$35,000. Realignment north of Ceres, grading and paving 0.2 mile, \$9000. Stanislaus River bridge, south approach, \$20,000. Hatch subway, near Modesto, Southern Pacific Railroad (state's share), \$50,000. Widening two irrigation canal bridges, \$10,000. Widening four irrigation canal bridges, \$15,000. Turlock overhead crossing, Southern Pacific Railroad (state's share), \$75,000.

KERN COUNTY—Between Bakersfield and Delano, widening, surfacing with asphaltic concrete, \$450,000 (contracts already let and work in progress).

Stockton to Santa Cruz via Oakland

SAN JOAQUIN COUNTY—French Camp to Mossdale, grading and second story, 7 miles, \$195,000.

ALAMEDA COUNTY—Dublin to Hayward, realignment, grading, asphaltic macadam, 7.8 miles, \$330,000. Palomares Creek bridge, \$30,000. Alamo Creek bridge, \$12,500. Hollis Creek bridge, \$21,000. Cull Creek bridge, \$40,000.

ALAMEDA AND SANTA CLARA COUNTIES—Warm Springs to Milpitas, widening, resurfacing and paving, 3.7 miles, \$160,000.

Sacramento to Woodland Junction

YOLO COUNTY—East and west of causeway, rock shoulders, second story, 3 miles, \$50,000. M street bridge, widening roadway, \$30,000.

Tehama Junction to Benicia

SOLANO COUNTY—Southwest to Vacaville, realignment, grading, paving, 1.5 miles, \$45,000.

COLUSA COUNTY—Arbuckle to northerly boundary, rock shoulders, 26.8 miles \$80,000. Stone Corral bridge, \$10,000. Funk Slough bridge, \$8000.

GLENN COUNTY—Willows southerly, widening and resurfacing 3.05 miles, \$60,000. Wilson Creek bridge, \$8000.

Ignacio to Cordelia via Napa

SONOMA COUNTY—Black Point cut-off, surfacing and oiling, 8.5 miles, \$75,000. Line changes, grading and surfacing, \$50,000.

SOLANO COUNTY—North of Cordelia to Napa County line, grading and surfacing, 3.5 miles, \$110,000.

San Fernando to San Bernardino

LOS ANGELES COUNTY—La Canada to Pasadena, bridges, grading and surfacing (portions), 8.5 miles, \$157,500. Pasadena to Monrovia, grading and paving (portions), 3.6 miles, \$2000,000. San Dimas line change, grading and surfacing, 1 mile, \$55,000. Monrovia to Azusa, realignment, widening and paving, 2.5 miles, \$150,000. San Dimas to Claremont, widening and resurfacing, 3 miles, \$150,000. Glendora to San Dimas avenue, realignment, grading and paving, \$150,000.

SAN BERNARDINO COUNTY—San Bernardino to westerly boundary, widening and resurfacing, 20 miles, \$425,000. Pacific Electric subway near Upland (state's share), \$50,000.

San Diego to El Centro

SAN DIEGO COUNTY—Viejas Valley, easterly, realignment, grading, paving, \$425,000. Euclid avenue to east city limits of San Diego, co-operative paving, 1.5 miles (state's share), \$45,000. Disintegrated granite surfacing, \$25,000. Between Buckman's Springs and Tecate Summit, realignment, grading and surfacing, \$55,000. San Diego to La Mesa, realignment, widening and resurfacing, 2.5 miles, \$80,000.

IMPERIAL COUNTY—Grade separation and approaches (San Diego and Arizona Railroad), \$40,000. El Centro to Dixie Land, widening and resurfacing,

12.2 miles, \$225,000. New River bridge, Bullhead Slough bridge, West Main Canal bridge, \$55,000.
SACRAMENTO TO NEVADA, line via Placerville
EL DORADO COUNTY—Slippery Ford, grading and surfacing (co-operative), 4.2 miles, \$75,000. Sportsman's Hall to Riverton, realignment, grading and resurfacing (portions), \$60,000.
SACRAMENTO COUNTY—Brighton subway under Southern Pacific railroad, \$45,000.

Salida to Alpine Highway at Junction
TUOLUMNE COUNTY—Keystone to Jamestown, surfacing and oiling, 9 miles, \$60,000. Sonora, easterly, grading, surfacing and oiling (portions), (Big Oak Flat road), \$75,000.

Albany to Martinez
CONTRA COSTA COUNTY—Rodeo to Albany, grading, surfacing, and structures (portions), 3.4 miles, \$250,000. El Cerrito to Albany, widening and resurfacing (co-operative with El Cerrito and Albany), 0.8 miles, \$35,000. Wild Cat Creek bridge, approaches, realignment, grading and surfacing, 0.3 miles, \$25,000. Wild Cat bridge, \$30,000. Richmond to San Pablo, widening and resurfacing, 14 miles, \$75,000.

Tahoe-Ukiah Highway
COLUSA AND LAKE COUNTIES—Grading and surfacing (portions), \$260,000.

Roseville to Nevada City
PLACER COUNTY—Between Roseville and Rocklin, second story or resurfacing, realignment, 1.5 miles, \$60,000. Antelope Creek bridge, \$7500.

Merced to Point near Sequoia
MARIPOSA COUNTY—Westerly boundary to Cathay, realignment, grading and surfacing 9.6 miles, \$275,000. Cathay to Mariposa, realignment and grading 14.3 miles, \$50,000. Mormon Bar to Briceburg, rock surfacing 15 miles, \$65,000; widening culverts, \$40,000.

MERCED COUNTY—Santa Fe grade separation (state's share), \$60,000.
West of Claremont to Riverside
SAN BERNARDINO COUNTY—Ontario to Pomona, realignment, grading and paving, 2.6 miles, \$100,000.

Redding to Redwood Highway, near Arcate via Weaverville
TRINITY COUNTY—Indian Creek and Grass Valley Creek bridges, \$35,000.

Salinas to Alpine Junction
KERN AND INYO COUNTIES—Mojave to Bishop, grading, surfacing and oiling (portions), 30 miles, \$300,000.

KERN COUNTY—Between Mojave and Ricardo, pavement of dips, \$15,000.

INYO COUNTY—Cowan's Station to Olancha, grading 17 miles, \$50,000. End of present concrete pavement to Fish Springs, grading 2.4 miles, \$7000. Realignment, grading and surfacing 1 1/4 mile, \$1000. Between Lone Pine and Manzanar, grading and surfacing 8 miles, \$60,000. Olancha to Cottonwood Creek, grading and surfacing 3.4 miles, \$30,000. Cottonwood Creek to Diaz, grading and surfacing 10 miles, \$40,000. Diaz to Lone Pine, grading and surfacing 6 miles, \$36,000.

MONO COUNTY—Between Sonora Junction and Coleville (widening and realignment, \$50,000. Guard rail, 2000 feet, \$2000. Dogtown to Point Ranch, realignment, grading and surfacing, 3.65 miles, \$20,000. Realignment at Hilton Creek 1.6 miles, \$10,000. North and south of Tioga Junction widening and surfacing 6 miles, \$40,000. McGee Creek to Convict Creek, surfacing 3 miles, \$12,000. Small bridges, \$10,000.

Valley Route to Point Near Silver Creek
CALAVERAS COUNTY—Widening existing underpass near Valley Springs, \$10,900.

San Bernardino to El Centro
IMPERIAL COUNTY—Brawley to El Centro, surfacing and oiling (portions, including town of Imperial), \$50,000. Tri-folium Canal to Salada Wash, widening and resurfacing 21 miles, \$353,000.

SAN BERNARDINO COUNTY—Redlands to southerly boundary, realignment, widening and resurfacing 7.2 miles, \$200,000. Mission Drain bridge, Santa Ana River bridge, San Timoto bridge, Warm Creek bridge, \$85,000.

El Centro to Yuma
IMPERIAL COUNTY—Aras underpass, San Diego and Arizona Railroad (state's share), \$25,000.

Redding to Nevada Line via Alturas
SHASTA AND MODOC COUNTIES—Redding to Alturas, grading, surfacing and oiling (portions), \$250,000.

Red Bluff to Nevada Line Near Purdy
TEHAMA, PLUMAS AND LASSEN COUNTIES—Red Bluff to Susanville, grading, surfacing and oiling (portions, co-operative project, \$250,000.

PLUMAS COUNTY—Bailey and Rock Creek bridges, \$25,000.

LASSEN COUNTY—Grade separation between Susanville and Purdy (state's share), \$25,000.

San Bernardino to Nevada Line Near Jean

SAN BERNARDINO COUNTY—Daggett to Jean, grading, surfacing and oiling (portions), 30 miles, \$300,000. Daggett to state line near Jean (Nevada), realignment, grading and surfacing, \$50,000.

Califa to Gilroy (Pacheco Pass)
MERCED COUNTY—Ten miles east of Los Banos to easterly boundary, crushed rock shoulders, 9.8 miles, \$30,000.

Valley Route Near Bakersfield to Paso Robles (Cholame Pass)

KERN COUNTY—Wasco to Route 4 (Valley route), grading, surfacing, oiling and structures, 9 miles, \$150,000.

CHOLAME PASS—Realignment, surfacing, oiling (portions), \$200,000.

Valley Route Near Arno to Pickett's Junction

AMADOR COUNTY—Jackson to Pine Grove, realignment, grading and surfacing 3 miles, \$9500. Widening underpass east of Ione, \$5000.

Auburn to Nevada Line Near Verdi
PLACER AND NEVADA COUNTIES—Cisco to Soda Springs, grading, surfacing, oiling, structures (portions), 10.65 miles, \$350,000.

PLACER COUNTY—Six railroad separations and approaches (state's share), \$250,000.

NEVADA COUNTY—Donner Monument to Tahoe Junction, grading, surfacing, oiling, \$25,000.

Meyers to Nevada Line via Truckee River

PLACER COUNTY—Truckee River bridge and approaches, \$20,000.

EL DORADO AND PLACER COUNTIES—Emerald Bay to Tahoe City, realignment, grading, surfacing, \$175,000. San Bernardino, end of County Pavement, to Bear Lake.

SAN BERNARDINO COUNTY—Crest Route, grading and surfacing (co-operative project), \$500,000. Crest Drive, grading, \$150,000.

Willows to Highway Near Biggs (Orville-Willows Lateral)

BUTTE AND GLENN COUNTIES—Cutte City to Biggs, grading and surfacing 7 miles, \$70,000.

Orland to Chico
GLENN COUNTY—Hamilton City bridge approaches, surfacing and oiling (portions), \$50,000.

McDonald to Navarro
MENDOCINO COUNTY—Bridges and approaches, \$60,000.

San Francisco to Point Near Glennwood (Skyline Boulevard)

SAN MATEO COUNTY—Lo Honda road to Saratoga Gap, grading, surfacing and oiling (portions), 7.5 miles, \$300,000. Santa Maria to Freeman via Bakersfield

And Walker Pass

KERN COUNTY—Maricopa to Valley route, grading, surfacing, oiling (portions), 12.5 miles, \$1000,000. Bakersfield to Freeman, grading, surfacing and oiling (portions), 12.5 miles, \$100,000. Freeman to Walker Pass, grading, \$15,000.

o ave to Arizona Line Near Topock via Barstow

SAN BERNARDINO COUNTY—Daggett to Topock, grading, surfacing and oiling (portions), 45 miles, \$425,000. Daggett to Topock (Needles road), realignment, grading and surfacing, \$50,000.

El Rio to San Juan Capistrano

LOS ANGELES AND VENTURA COUNTIES—Santa Monica to Oxnard, surfacing and oiling, paving (portions), 25 miles, \$900,000.

LOS ANGELES COUNTY—Riprap protection along ocean shore, \$40,000.

VENTURA COUNTY—Rip rap protections along ocean shore, \$40,000.

La Canada to Mount Wilson Road via Arroyo Seco

LOS ANGELES COUNTY—Flood protection walls, Arroyo Seco, \$25,000. La Canada via Arroyo Seco to Mt. Wilson road, grade and surfacing portions, \$200,000.

Mecca to Blythe

RIVERSIDE COUNTY—Grading, surfacing and oiling (portions), 22.5 miles, \$235,000. Mecca to Blythe, realignment, grading and surfacing, \$50,000.

Auburn to Sonora (Mother Load Highway)

CALAVERAS COUNTY—Mokelumne Hill to Angels, grading, surfacing, oiling (portions), 5 miles, \$100,000.

AMADOR COUNTY—Drytown to Martell, grading, surfacing and oiling (portions), 4 miles, \$75,000.

TUOLUMNE COUNTY—Shaws Flat to Sonora, grading, surfacing and oiling (portions), 1.5 miles, \$20,000.

Manteca to Point Near Mossdale Store
SAN JOAQUIN COUNTY—Mossdale to Manteca, grading, surfacing and oiling, 2 miles, \$50,000.

San Francisco to San Jose (Bay Shore Highway)

SAN MATEO COUNTY—Grading, surfacing and oiling, San Francisco to South San Francisco, 4.8 miles, \$625,500. Surfacing and oiling, South San Francisco to Broadway Station, 5.2 miles, \$150,000. Grading and surfacing, Broadway Station to San Mateo, 3 miles, \$180,000. Visitation Valley to South Francisco, crushed rock shoulders, \$15,000.

San Rafael to San Quentin

MARIN COUNTY—Grading, surfacing and oiling, 3.1 miles, \$120,000.

Sierra-to-the-Sea

FRESNO AND MONTEREY COUNTIES—Work on Mustang Grade, \$51,000.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1354-S SALES ENGINEER, to develop the sale of air and electric portable drills, air compressors and tools for use of contractors and machine shops. Commission only. Location East Bay.
R-1145-S SALES ENGINEER, to handle a line of oil well supplies in California territory. Must be experienced salesman and a good producer. Salary and expenses. Headquarters San Francisco or Los Angeles.

R-1440-S JUNIOR ENGINEER, preferably mining or civil graduate with some practical experience for a position in Colombia, S. A., with dredging company, requiring surveying, mapping and estimating. Apply by letter with references. Salary \$150-\$200, plus expenses on two year contract. Headquarters, San Francisco.

R-1431-S SALES MEN, to sell electrical appliances for public utility company. Some positions for gas appliances and heating men. Technical graduates preferred for advancement based upon sales record. Northern California territory involves traveling and men with cars preferred. Small salary and commission. Headquarters, San Francisco.

N-2575-S SALES ENGINEER, must be graduate of mechanical engineering school of high standing. Selling experience in machine tool field desirable. Should have recommendations from reliable concerns as to character, integrity, truthfulness and initiative. Should have attractive personality and be good mixer. Traveling part of the time. Apply by letter, with photograph. Headquarters Ohio.

CITY OF L. A. MAY BUILD BIG STEAM PLANT

The right of Los Angeles to spend money appropriated from its power and light revenues during the present year for the construction of a steam standby plant at the harbor, was upheld by Superior Judge Clair S. Tappan.

However, the court ruled that approximately \$1,100,000 which the power and light department had appropriated to its \$5,000,000 construction program should be properly regarded as bond money rather than revenue money.

The \$1,400,000 could not be spent legally for the building of the plant, Judge Tappan decided.

Power bureau officials said that the ruling on this item would not seriously effect the bureau's construction program. The amount budgeted this year for construction of the steam plant is approximately \$2,230,000.

THE OBSERVER

What He Hears
and Sees
On His Rounds

New Homes were provided 31,447 persons in San Francisco during 1927, according to a report compiled by Leonora C. Willems, manager of the Information & Statistical Department of the Chamber of Commerce, recently. Some 2912 families were accommodated in new single dwellings, 423 families in new flats and 5480 in new apartments, according to the report. These figures were arrived at by estimating 4.5 persons to a family in homes and flats and three persons per family in apartments.

The report shows a close race in the construction of homes and apartment houses in the matter of value as recorded on the building permits issued for building of same. The construction table accompanying the report, is as follows:

Type of Bldg	No.	Cost
Single dwellings	2912	\$13,006,351
Flats	247	1,926,069
Apartment houses	385	13,776,928
Com'l. Buildings (including public garages, stores, offices and service stations)	139	1,722,530
Industrial Bldgs. (including industrial plants, shops, lofts, warehouses, sheds)	121	2,365,175
Miscellaneous (including private garages, schools, hotels, churches, clubs, theatres)	182	6,724,718

The above table does not include number of permits issued for alterations, reconstruction, etc., which brought the total number of permits issued during 1927 up to 9190 with total cost of \$47,932,848 for the year.

Construction of commercial buildings comprised the bulk of heavy engineering operations carried on in the United States during the past year. Engineering News-Record has reported that during 1927 a total of \$1,632,338,000 went into this type of work alone. Total contracts on engineering projects for the year amounted to \$2,253,766,000 as against \$2,853,842,000 in 1926. The totals by classification for the year follow:

Waterworks	\$ 53,189,000
Sewers	118,032,000
Bridges	143,645,000
Excavations, drainage, etc.	42,005,000
Streets and roads	525,069,000
Industrial buildings	321,315,000
Commercial buildings	1,632,338,000
Federal government	50,768,000
Unclassified	367,410,000

Total \$3,253,766,000
The Engineering News-Record's construction cost index number on January 1 stood at 203.90, showing no change compared with a month ago. Compared with a year ago, however, the index number shows a drop of 3.5 per cent. The decline reflects a slight easing in materials prices. Skilled labor rates, taking the country as a whole, moved to higher levels. The construction volume index number rose to 319 for December, averaging 263 for the year, which is 35 points above the 1926 level.

The city council of Los Angeles has reduced electric rates of its municipal system, according to word received by Attorney John J. Daily, chief legal advisor of the city of San Francisco in the valuation proceedings being conducted against the Pacific Gas and Electric and Great Western Power companies. Daily said the action is bound to have effect in the fixing rates in California by private corporations. Top lighting rate was cut to 4½ cents per kilowatt hour and the top rate for power to 4 cents per kilowatt hour. The top lighting rate will be 1½ cents below the rate of companies in San Francisco. Some months ago Los Angeles reduced electric rates and privately-owned companies were compelled to reduce their rates, Daily said.

America's favorable balance of trade in 1927 was \$681,707,000, the Department of Commerce announces. Exports for the year totaled \$4,866,160,000, while imports were \$4,420,800,000.

Selection of the American Committee of the World Congress of Engineers, to be held in Tokyo in November, 1929, is announced. The appointments were made by Secretary Herbert Hoover, as honorary chairman, and include Thomas A. Edison, John Hays Hammond, Samuel Insull, William B. Mayo and Charles M. Schwab. Those named from this state are: William F. Durant and Charles D. Marx, Stanford University; Carl E. Grunsky, San Francisco, and Robert A. Milliken, Pasadena. Promotion of international co-operation in the study of engineering are announced purposes of the congress. The enterprise is sponsored by the Japanese government.

Although a large volume of building is in progress throughout the State, there was a surplus of building craftsmen in December, according to the United States Employment Service. Workers seeking employment are continuing to arrive in Southern California in unusually large numbers from practically every State in the Union, the report says. Outdoor industries in Oregon are employing fewer men and there are virtually no demands for help from agricultural or general construction sources in Washington, it is reported.

Suit to obtain judgment of \$1500, plus \$300 attorney's fees and costs, has been filed in superior court at Oroville by the Henry Gervais Co. against Charles S. Mabrey Construction Co., the Globe Indemnity Co., and the county of Butte. The amount of damages asked is for work done on the Chico Memorial Hall, the complaint recites. The Mabrey Construction Co. was awarded contract for the building on December 6, 1926, and has been paid \$41,428.10 of the total contract price, the complaint alleges. A total of \$22,858.65 due Mabrey is held by the county because notices of withhold have been filed by the plaintiff and other claimants, the action sets forth.

The Construction of an elaborate system of superhighways, greatly enlarging the Federal aid highway program, which provides for 182,000 miles of Federal-aid road, has been asked in a bill just introduced in Congress by Senator H. Moses of New Hampshire. The measure, actively supported by the American Motorists Association, provides for a highway as direct as practicable between the Atlantic and Pacific Coasts and for cross highways, which would connect the entire United States.

A representative of the General Electric Company will arrive at the Santa Clara University Jan. 26 to interview professors of engineering and senior students in that branch of collegiate training with the purpose of making a selection of one of the members of the graduating class for work and further study with the General Electric Company next year. Each year the General Electric Company selects a student from the university, employs him at a fair salary, and fits him for further work and advancement in the corporation. The men chosen must stand high in their chosen field of engineering work. The Westinghouse Company has likewise chosen Santa Clara students for similar work.

American Iron & Steel Institute, speaking before the Lawyers' Club in New York, declared he would attempt to have the institute adopt a resolution embodying the principle of commercial arbitration throughout the steel industry. He explained that by this plan disputes arising in the trade would be settled before an arbitration board instead of being carried to the courts.

Oakland building activities in 1927 totaled \$20,794,669, according to figures compiled by A. S. Holmes, city building inspector. During the year 7770 permits were issued. August was the heaviest month of the year with a total of \$2,157,881. June was next with \$2,141,720. December was low month of the year, only \$756,549 in permits being issued. Frame construction led the type of structures erected, with \$10,509,844 in permits issued. Concrete construction was next with \$6,389,133, brick third with \$3,142,699.

Albert Mansfield, police judge and attorney of Redwood City, will seek a franchise from the San Mateo County Supervisors for a toll bridge over San Francisco Bay. The proposed bridge would extend a distance of 45,000 feet from Sunnyvale Ave. and State St., Redwood City, to the foot of Webster St., Alameda. It would be 40 feet wide and so constructed to permit doubling the width. Eastern capital will finance the project, Mansfield says.

A bill, fostered by the American Motorists Association, and allied automobile organizations, for the construction of a nation-wide system of hard surfaced roads has been introduced in Congress by Rep. William P. Holaday. The roads range in width from 20 to 60 feet. The measure provides that all highways, radiating out of cities over 200,000 population, must be 50 feet wide for 25 miles out from the city.

December sales of the General Fireproofing Co., according to word from Youngstown, Ohio, were 70 per cent larger than in any previous December and 20 per cent larger than in any previous month in the company's history. President W. H. Foster stated. The company is a metal furniture and office equipment producer. The situation is regarded as reflecting good oncoming business and a continuation of the building movement.

San Francisco Playground Commission proposes bond issue for \$5,000,000 to finance purchase of playground sites and improvement of present playgrounds in various sections of city.

TRADE NOTES

Gilmore Iron & Steel Co., of San Francisco, capitalized for \$50,000, has been incorporated. Directors are: W. G. Gilmore, C. G. Calussen and W. F. Postel.

"Newsom Bros., architects, announce removal of their offices about Feb. 1 from 14 New Montgomery St., San Francisco, to the Federal Realty Bldg., Broadway and Telegraph Ave., Oakland.

Canyon Lumber Co., of Santa Ana, capitalized for \$10,000, has been incorporated. Directors are: John L. Bricks, Laguna Beach; R. C. Mize and A. W. Rutan of Santa Ana.

T. Hemi and A. W. Pape, general partners, and Sam Senkovich and J. W. Lanigan as special partners, comprise the business interests in the Alta Roofing Co. of San Francisco. A special partnership notice has been filed with the county clerk.

Kenneth Smith has been appointed secretary-manager of the reorganized Lumber Dealers Association of Los Angeles, with headquarters in the Western Pacific Building. He was formerly general sales manager of the E. K. Wood Lumber Co.

Pacific Coast Steel Co., Raymond Concrete Pile Co. and Coast Rock & Gravel Company have leased offices in the recently completed Hunter-Dulin Building, 111 Sutter St., San Francisco.

Austin-Western Road Machinery Company has let contracts in connection with a new plant to be erected in the manufacturing district at Los Angeles. The plant will cover a ground area of 150 by 100 feet.

General Water Heater Corp. will start construction shortly on a new plant at Burbank, Calif. It will be of steel frame construction with brick and corrugated iron exterior walls and will cover an area of 80 by 600 feet.

W. A. Bechtel, San Francisco highway contractor, associated with the Kaiser Rock Company of Livermore, will construct a \$200,000 rock crushing plant on the Oroville-Marysville road, near Power House Hill, according to word from Oroville. The plant will have a capacity of 4000 tons a day. Two miles of railroad and spur tracks will be constructed in connection with the project. The plant merical crushed rock field in the Butte ls. being built primarily to produce approximately 1,000,000 tons of ballast rock for the Western Pacific Company's lines between Portola, Plumas County, and Oakland, a distance of approximately 3000 miles. According to reports, Bechtel is said to be planning to enter the community section.

Gladding, McBean & Co., with main offices in San Francisco and with investments of \$12,000,000 on the Pacific Coast, plan to expend at least \$200,000 during 1928 for machinery and equipment for the Seattle plant, in a program of general expansion entered upon because of the company's faith in the business prosperity in the Pacific Northwest, it is announced by Atholl McBean, president of the company. Mc. McBean also announces the purchase of 1300 acres of new white burning clay properties in the Northwest which will permit the company to manufacture face brick tile in many new colors. The company manufactures all types of brick tile, terra cotta work and clay products.

ALONG THE LINE

Prof. C. W. Cook, civil engineer, recently addressed the Architect's League of Hollywood on earthquake construction.

Ernest Flores, Richmond architect, has opened an office at 101 Franklin St., Oakland, and will be associated with Ralph E. Wood.

Arthur S. Dudley, secretary-manager of the Sacramento Chamber of Commerce, has been informed of his appointment as Pacific Coast director of the National Rivers and Harbors Congress. The aim of the congress is to advocate policies for the improvement of transportation, rivers and harbors, the work being of a national scope. The congress has nine directors and the appointment of Dudley is recognized as important in the development of the Sacramento river.

The Engineering Society of the University of Santa Clara will hold its annual card party in Seifer gymnasium, February 17.

John H. DeLange and Allen C. Collins, architects, have formed a partnership and will maintain offices in the Pajaro Valley Bank Bldg., Watsonville. Mr. Collins formerly operated in Santa Cruz.

Edward Hyatt, Jr., state engineer and chief of the Division of Engineering and Irrigation, has received an invitation from Hubert Work, Secretary of the Interior, to attend a conference of all state engineers in Washington, D. C., Feb. 14 and 15.

Edward McLaughlin has been appointed city electrical inspector of Richmond, Contra Costa County. The position pays a salary of \$200 per month and was formerly combined with that of city building inspector.

George Calder, vice-president of the American Toll Bridge Co., has been elected president of the general contracting firm of Duncanson-Harrelson Co. of San Francisco.

San Leandro, Alameda county, will vote in April on the proposed adoption of the city manager form of government.

San Francisco Civic League of Improvement Clubs suggests that the city adopt as its slogan "a tunnel a year" as a means of permanently solving the congested traffic problem. The first tunnel project proposed is that in Broadway between Mason and Larkin streets.

Johns-Manville Co., has taken over the asbestos mining claims owned jointly by Benjamin C. Jones, Lake County district attorney and Arthur Copey of Lower Lake, which are located in the district north of Big Canyon and about two miles from Adams Springs. The deal was closed last week by C. H. Shoemaker of New York and N. A. Nelson of Canada, representing the company.

The annual banquet of the San Francisco Mason and Builders' Association will be held January 28 at the Richelieu Hotel, Van Ness Ave. and Geary St., San Francisco, it is announced by Walter N. Reed, Secretary, who is arranging a program of entertainment. A good time coupled with the usual good fellowship displayed at the association socials will prevail, Reed declares.

HERE — THERE — EVERYWHERE

Henry C. Cutting addressed the Berkeley Builders' Exchange January 17 on the banking system and its effect on business in general.

General meeting of Pasadena Builders' Exchange will be held Jan. 27, it is announced by Geo. W. Israel, secretary. This will be Ladies' Night and dinner will be served with the material dealers in charge of the menu.

P. M. Sanford, president of the Richmond Builders' Exchange, has been re-elected president of the Richmond Chamber of Commerce. Mr. Sanford is now serving his third term as president of the body.

Forty-eight master plumbers have petitioned the Oakland City Council to modify the plumbing ordinance which requires the posting of a cash bond of \$200. They asked that this bond be reduced and that permit fees be lowered. Attorney Peter J. Crosby was spokesman for the plumbers. The matter was referred to the department of public health and safety.

No action was taken at the Jan. 12 meeting of the Master Plumbers' Association of Santa Barbara on the demand of the local plumbers' union for an immediate increase of \$1 a day. The plumbers are now getting \$10 a day and claim the increased cost of living demands the additional one dollar a day.

*Fred Goodcell, manager of the publicity department of the Los Angeles Builders' Exchange, has been appointed acting secretary of the exchange. He will also have charge of the publication of the Builders' Exchange Bulletin, formerly conducted by Lyle Eveland. C. W. McLeod, advertising manager of the Bulletin, will be associated with Goodcell.

Uniform building regulations were discussed by M. C. Poulsen, office engineer in the Fresno Department of Public Works, at the weekly meeting of the Fresno 20-30 Club held at the California Hotel, Fresno, Jan. 10. "Uniform building codes tend to reduce building costs," said Poulsen. "They benefit the city and increase the standards of buildings so far as fire protection and other standards are concerned."

Showing the various processes of making white lead into paint a film of the National Lead Company was exhibited at the Sacramento Builders' Exchange under the auspices of the Master Painters Association. The film was presented under the direction of A. W. Scott, assistant Pacific Coast manager of the company; Dave M. Schindler, sales manager; Vane Files, architectural representative, and W. D. Herman, Sacramento field representative.

Greater support of California payrolls, adoption of the Uniform Building Code, and extension of marketing territory in Western States, are some of the objectives of the annual State Conference of the iron, steel and allied interests meeting at Del Monte, scheduled for February 16, 17 and 18. These are selected by the Executive Committee of the Northern Steel Committee of the California Development Association. Other objectives are a greater effort towards centralization of leadership, and standard specifications and practices for increased efficiency in production and distribution.

MARINE PILING STUDY REPORT READY FOR DISTRIBUTION BY U. OF C.

A final and complete report of the investigations of the San Francisco Bay Marine Piling Committee, which for a number of years has been seeking a method of overcoming the menace of marine boring organisms, has just been published and made ready for distribution by the University of California Press.

The editors of the publication are Dr. Charles A. Kofoid, chairman of the Department of Zoology of the University, and C. L. Hill of the United States Forest Service, stationed on the Berkeley campus of the University. The work of the committee with which they have been connected is sponsored by the National Research Council and the American Wood Preservers' Association.

In the announcement of the purpose of the work the editors state: "This is the final report of a committee of engineers, of corporations interested in marine structures, representatives of the United States Forestry Service, and chemists and biologists of the University of California, dealing with the disastrous and spectacular attack of marine borers upon marine structures in San Francisco Bay and adjacent waters. It contains the history of this event and scientific analysis of the hydrographic conditions in which the outbreak occurred."

The work includes the results of tests of piling of practically every description, which started in 1920. Various local

and foreign woods have been tried and every known method of protecting the wood has been used. The service records of many thousands of piles of various types treated with various methods of protection against borers are tabulated and conclusions drawn as to the value of the various methods of production.

An extensive chapter of marine structures is concerned with the economic life, the cost of installation of piling of various types, the annual cost, the installation and construction practice with reference to substrata, mudline, bottom penetration, relative depth of stresses, handling piles, driving, bracing, cutting and framing, flooring system, fender piles, fire hazard, inspection, workmanship, repair, harbor sanitation and records.

The chapter on marine substructure materials is concerned with the use of different woods and the protection of piling by bark, metal, paint, paint and battens and combinations of these and with certain miscellaneous protective devices. Cressed piling, concrete piling, concrete and timber piling and concrete jackets of various kinds are also dealt with. The volume contains 357 pages, 45 tables and 143 illustrations.

About one-half of the report is devoted to the various kinds of marine borers, including the notorious shipworm, *Teredo navalis*.

"A plentiful supply of local agricultural labor is anticipated for 1928, with the addition of fruit pickers and packers that travel through the fruit regions of the state.

Lumber Industry

"Lumber production was less in 1927 than in 1926, particularly in the pine region, and no marked improvement is looked for in 1928."

Of the other Pacific Coast states, the forecast for Washington is even more optimistic, with much big construction work planned, but for Oregon, the decline in the demand for lumber brings the prediction that there is no present indications that there will be an increase in employment in industries in that state during the year. Building and general construction work, on the whole, will not be as great as during the past year, reports from Oregon indicate.

FRED L. DICKEY NAMED RECEIVER FOR UNITED CLAY PRODUCTS CORPORATION

Fred L. Dickey of Kansas City, Mo., has been appointed receiver of the United Clay Products Corp., a corporation operating 32 brick plants in Missouri, Iowa, Arkansas, Kansas and Oklahoma. Attorneys representing creditors with specific claims of \$616,357 filed an involuntary bankruptcy proceedings on December 21.

Rehabilitation of the corporation under the receivership of Mr. Dickey, brother of N. A. Dickey, general manager of the W. S. Dickey Clay Manufacturing Co. of San Francisco, will be started immediately, as the creditors desire no liquidation if it is avoidable.

Maurice H. Winger of Kansas City has been appointed counsel for the receiver.

M. L. Friedman, representing the creditors, said at the time the involuntary petition was filed that he also represented creditors with a total of \$300,000 in claims.

Mr. Fred L. Dickey was selected receiver due to his qualifications, he being general manager of the W. S. Dickey Clay Manufacturing Co. in Kansas City and thoroughly familiar with the brick manufacturing industry—also that he had previous experience as a receiver of other companies. The appointment of Mr. Dickey was acceptable to the creditors, none of whom raised an objection.

When the consolidation of the 32 brick plants was effected in January, 1926, the organization was conceded to be the largest brick manufacturing concern in the country. Annual output of the plants scattered over Missouri, Iowa, Kansas and Oklahoma was placed at more than 500,000,000 brick. The merger represented an \$8,000,000 project, with headquarters in the Lee Building, Kansas City.

The United Clay Products Corp. was incorporated January 15, 1926, under the laws of Delaware, with a capitalization of \$3,625,000.

Details of the merger were planned by the New York engineering firm of Flint & Co., which promoted the project. The merger represented more than half the brick manufacturing units in the Middle West.

Harry Allyn of New York was selected as president of the corporation. He had been active in promoting the project. Other officers are: Clarence R. Obrien, New York, secretary-treasurer; John H. Atwood, Kansas City, general counsel; F. R. Moulton, secretary, and Fred C. La Fountain, Kansas City.

The most complete grass garden in the United States, located in Berkeley at the University of California, is being moved to permit expansion of the research along this line.

FEDERAL LABOR DEPARTMENT PREDICTS HIGH BUSINESS LEVELS

The fact that this is a presidential year will have no deterrent effect upon the country's business prospects, but on the contrary the year 1928 will see American industry and business touch new high levels, is the optimistic forecast contained in the annual report on national business and employment conditions, issued by the federal department of labor.

High forecast to his annual report Francis I. Jones, director-general of the federal employment bureau, says:

See New High Levels

"Contrary to precedent established in former presidential election years, when the business world stood by awaiting results before charting their programs, the opposite is true at this time. Instead industry and business will mark new high levels in 1928.

"The pessimists, doubting Thomases and the iconoclasts will be obliged to revise their opinions with respect to the nation's industrial future.

"All signs point to the biggest year in the history of the automotive industry. Iron and steel point to marked increases over 1927. The position of agriculture shows improvement. Railroads will undoubtedly enjoy normal business."

The report adds, however:

"owing to the increased introduction of labor-saving machinery, considerable labor will be displaced but the volume of business is expected to register a new high level."

California Conditions

"Of conditions in California, the report says in part:

"Industrial activity in California was below normal from April to September,

of 1927, but more recently has increased, and forecasts indicate that business in general will increase during the first six months of 1928 to a point near or above the normal trend.

"Manufacturing will undoubtedly pick up, especially in the San Francisco Bay region and Los Angeles. There should be more work for skilled labor in 1928 as compared with 1927. It is anticipated, however, that the local labor supply will be adequate to take care of a demand. There is always a surplus of unskilled laborers throughout the state, notably in southern California.

"Little increase and in some instances decrease in the building program of the various cities of the state for 1928 is indicated, with building trades men in excess of demands.

"Public improvements by municipalities should be about the same or larger. Due to bond election of several boulevard units and municipal railroad extension, together with school building program, there will be more public work in 1928 in San Francisco.

Highway Building

"Highway construction will be increased considerably in 1928. The state highway commission will have available \$15,000,000 in new funds for construction, in addition to the regular budget.

"Prospects for agriculture, horticulture and livestock are generally favorable, with water tables in irrigable districts higher than last year and growing conditions good. New fruit and grape acreage should come into bearing in 1928 and increase the output and labor demands. Increased acreage may be expected in cotton, lettuce, sugar beets and grains.

PITTSBURG, Contra Costa Co., Cal.— Michael Junta, former fish dealer of Pittsburg and more recently of Oakland, announces he is forming a corporation to finance erection of a \$200,000 sardine packing plant in York st. bordering on the waterfront.

GRIDLEY, Butte Co., Cal.—Associated Canneries, financed by Oakland capitalists, is conferring with local growers regarding the erection of a fruit packing plant. A. J. Gilstrap, representative of the company, is promoting the project at Gridley.

STOCKTON, San Joaquin Co., Cal.—Atkinson Construction Co., Ray Bldg., Oakland, plans immediate construction of a rock products plant in Stockton with a branch yard at Lodi. The company has the contract for the Pardee Dam for the East Bay Municipal Utility District. Approximately \$40,000 will be expended in the Stockton plant.

REDWOOD CITY, San Mateo Co., Cal. California Rubber Products Co., manufacturers of golf balls and the refining of gutta percha, has leased the plant formerly occupied by the Silver Gate Poultry Co. and will install new equipment. Installation of steam machinery will be started at once.

YUBA CITY, Sutter Co., Cal.—C. B. Harter & Sons, Yuba City packers, will have plans prepared at once for peach packing plant to be erected on Tahoe-Ukiah highway west of Yuba City; first unit will have capacity of from 2000 to 3000 tons per season with an ultimate capacity of 5000 tons.

GERBER, Tehama Co., Cal.—Frank Germain and Chas. Nickels of Gerber, will erect a plant for the manufacture of iceless refrigerators, they having been granted manufacturing rights by J. Ed-

wards, the inventor of the refrigerator. Agencies will be established throughout the northwest shortly.

YUBA CITY, Sutter Co., Cal.—Cutler-Lohengier Packing Co., Ontario, Cal., seeks to promote stock sales in this section to finance construction of a 5000-ton tannery in Yuba City. Buildings and equipment planned will involve an expenditure of \$200,000.

VALLEJO, Solano Co., Cal.—Wm. Croall, 1418 Sonoma st., at \$10,000 awarded contract to erect one-story brick and concrete dyeing and cleaning plant for Bodell & Grennan at 25 Tennessee st.

SAN JOAQUIN COUNTY, Cal.—Directors of the Auburn Fruit Exchange are considering the erection of a \$100,000 pre-cooling plant for deciduous fruits. It is contended the exchange would save \$15,300 a year on the usual ice bill.

ELVERTA, Sacramento Co., Cal.—C. M. Basler, real estate operator and secretary of the Elverta Chamber of Commerce, is conferring with interests planning the erection of a vegetable products plant on a site near Elverta. The project is fully financed, according to Basler.

WILLOWS, Glenn Co., Cal.—Thos. Ajax has purchased 3 lots at Butte and Laurel Sts. and will erect a dyeing and cleaning plant; will contain 4 separate compartments; reinforced concrete construction. Some new equipment will be installed.

TURLOCK, Stanislaus Co., Cal.—Chapman Construction Co. has contract to erect dehydrator for Harry Arakelian & Son of Turlock; will be erected adjoining two units now in operation in South Center Street.

SACRAMENTO, Cal.—H. D. Wagon, 1035 E-10th St., N., Portland, Ore., president of the Sacramento Pulp & Paper Co., has been authorized by State Corporation Department to issue stock to finance erection of a \$500,000 pulp mill in vicinity of Sacramento. Raw material will be obtained from cuttings in grape vineyards in the vicinity. Plant will have a capacity of 25 tons a day. B. F. McLeod, 2712 21st St., Sacramento, is secretary of the company.

OROVILLE, Butte Co., Cal.—S. J. Norris, consulting engineer, Oroville, has completed plans and construction will be started shortly on \$200,000 rock crushing plant on the Oroville-Marysville highway near Power House Hill, for W. A. Bechtel, general contractor, 625 Market st., San Francisco, associated with the Kaiser Rock Co. of Livermore. The plant will have a capacity of 4000 tons a day, and is being built primarily to produce 1,000,000 tons of ballast rock for the Western Pacific Company's lines between Portola, Plumas county, and Oakland, a distance of approx. 300 miles.

OROVILLE, Butte Co., Cal.—M. G. Parker, Oroville, will erect fireproof dyeing and cleaning plant in Montgomery st.; estimated cost \$10,000 including equipment. Will be brick or reinforced concrete construction.

GARAGES

Plans Being Prepared
GARAGE Cost \$60,000
SAN FRANCISCO, Sacramento st. W Davis.
Two-story reinforced concrete garage bldg.
Owner—J. Pasqualetti, 785 Market st.
Engineer—C. W. Zollner, 785 Market st.

Plans Being Prepared
ADDITION Cost \$12,990
BERKELEY, Alameda Co., Cal., Addison street.
One-story concrete and brick veneer addition to present garage bldg.
Owner—Withheld.
Architect—B. Reede Hardman, First National Bank Bldg., Berkeley.

Sub-contracts Awarded
GARAGE Cost \$30,000
OAKLAND, Alameda Co., Cal., N E-12th st. 109 E 18th ave.
Two-story concrete garage building.
Owner—J. Cattucci, 1212 18th ave., Oakland.
Architect—P. LaVerone, 3121 San Pablo ave., Oakland.
Contractor—F. Younger, 2115 Fruitvale ave., Oakland.
Lumber—Sunset Lumber Co., 2057 Webster st., Oakland.
Concrete—J. H. Fitzmaurice, 754 Hobart st., Oakland.
Structural steel—Judson Manufacturing Co., 1007 Park ave., Oakland.
Reinforcing steel—Frederick Steel Co., 150 California st., S. F.
Brick work—Victor Devight, 354 Hobart st., Oakland.
Plumbing—A. R. Cranston, 2124 San Jose ave., Alameda.
Electrical work—W. G. Hopkins, 210 E-11th st., Oakland.

Contract Awarded
GARAGE Cost \$19,000
OAKLAND, Cal., NW E-12th st. and 31st ave.
One-story concrete garage bldg.
Owner—Derby Estate Co., 815 Central Bank Bldg., Oakland.
Architect—None.
Contractor—J. B. Petersen, 4021 Agua Vista ave., Oakland.

GOVERNMENT WORK AND SUPPLIES

SAN FRANCISCO—Until Feb. 13, 11 a. m., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Petaluma Creek. Specifications obtainable from above office.

Architect, Forum Bldg., Sacramento.
Bids will be called for in one month.

PRATT'S CONCRETE MIX

Clarence
by Sand
Pratt

The inner half of every cloud
Is bright and shining.
I therefore turn my clouds about
And always wear them inside out
To show the lining.

A well-known stanza.

HOW MANY of us.
WORRY ABOUT things.
THAT NEVER happens.
MOST OF us forget.
THAT EVERY cloud.
NO MATTER how black.
HAS A silver lining.
CLARENCE (SANDY) Pratt, President.
OF THE Pratt Building Material Co.
PRODUCER OF clean, sharp sand.
AND CLEAN, sharp rock.
AND CLEAN, hard gravel.
AND WELL-GRADED concrete mix.
HAS SEEN poor fellows.
WHOSE BACKS were bent.
CARRY LOADS of sad things.
THAT NEVER happened.
PESSIMISTS NEVER see the sunshine.
WHILE ON the same day.
AN OPTIMIST will be,
OUT IN the sunshine.

ADMIRING THE beautiful flowers.
AND ENJOYING himself.
SO WHY not.
GO DOWN the road.
THROUGH SUNSHINE and flowers.
INSTEAD OF taking a path.
WHERE YOU can't see.
ALL THESE beautiful things.
"I THANK you."

You might just as well look for the
sunshine and flowers and forget the
shadows and black clouds. Clarence
Sandy Pratt, President of the Pratt
Building Material Co., suggests that if
you always face the sun you will never
see the shadows.

PETALUMA, Sonoma Co., Cal.—Oscar Johnson, Petaluma, has contract to erect three frame and stucco bungalows for M. S. Tunzi at Upham and Baker Sts. Plans were prepared by the contractor. Work will be started at once.

Portions of Balboa st. bet. 31st and 32nd ave., etc., involy. art. stone walks.

Howth st. bet. Geneva ave. and Mt. Vernon ave., involy. art. stone walks.

Spec. obtainable from Bureau of Engineering, 3rd floor, City Hall.

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

Otto Alfred Koenig of San Francisco. Surfacing Machine. This relates particularly to that type of such machines which is adaptable to be hand manipulated and by which the surfacing is accomplished with a rotary motion, or a rotary motion plus a reciprocatory motion hand applied.

Milton J. Trumble of Los Angeles. Removable Cover Construction. This invention is particularly adapted for use as a removable cover construction for boilers or other apparatus which are subjected to high pressures.

Hermanus A. Hansen of San Francisco. Screen Door. This invention relates to improvements in screen doors and the like wherein a movable panel is arranged to be moved to cover or uncover a screened opening to obtain an open screen or solid door as desired.

Andrew Smith of San Mateo. Resistance Regulating Apparatus for Electric Welding. This relates to resistance regulators for the circuits supplying current to electric arc welding apparatus, this application being a continuation in part of this application, which eventuated into Patent No. 1,534,288.

Caswell D. Swett of San Francisco. Washing Machine. This provides an improved mechanism which is adapted to be secured directly upon a wall adjacent an ordinary wash tray whereby clothes and the like may be washed in said tray without requiring a separate tub or the like.

NOTICE TO BIDDERS

(Pumping Plant—Coalinga)

The council of the City of Coalinga hereby give notice to prospective bidders for the placing in practical operation and supplying the said City of Coalinga a turbine centrifugal pump to be located at the gas plant property of said city.

Said pump to be of the deep well turbine centrifugal type operating against a head of approximately 230 feet, and a volume capacity of 750 G. M. P. The power of said pump to be a direct connected motor supplied with automatic control.

All surface discharge and connections to be furnished by the city.

Each bidder is respectively requested to survey the premises personally and determine the best and most economical means of connection of pump and motor and present to the council a drawing or diagram of his proposed plant or pump for the aforesaid purpose.

The council assumes the right to accept or reject any or all bids. Complete specifications may be seen or obtained at the City Hall after the date of January 16, 1928.

Bids will be received at the City Hall until 5 P. M., Monday, January 30, 1928, and said bids will be opened at the meeting of January 30th. All bidders must enclose a certified check of 10% of the amount of the bid.

Prospective bidders are invited to attend the meeting of the council to be held at the City Hall, January 16, 1928, at 7:30 o'clock P. M.

L. A. BUCHANAN,
City Clerk, City of Coalinga.

NOTICE TO BIDDERS

(East Palo Alto Water Works District—San Mateo County)

Sealed bids will be received by the Clerk of the Board of Supervisors of San Mateo County, at her office until 10 o'clock A. M., Monday, February 6, 1928, for construction of a domestic water supply system for the East Palo Alto Water Works District, San Mateo County, California.

Plans and specifications for this work are on file in the office of said Clerk of said Board, to which bidders are hereby referred.

All bids must conform to the proposal sheets to be obtained from the office of the County Surveyor of said County, at Redwood City, must give the prices proposed, both in writing and figures, and must be signed by the bidder with his address.

The bid is to be accompanied with a certified check or bidder's bond, equal to ten (10%) per cent of the total of the bid upon the condition that if said bid shall be accepted, the party bidding will duly enter into the contract and faithfully perform his contract in accordance with his bid and the specifications. Such check shall be made payable to the County of San Mateo.

A common law bond will be required for the faithful performance of the contract in such sum as shall be fixed by the said Board of Supervisors after the bids are opened, said sum shall not be less than one-fourth ($\frac{1}{4}$) and not more than one-half ($\frac{1}{2}$) of the estimated amount of the contract; and a further bond in a sum equal to one-half ($\frac{1}{2}$) of the estimated amount of the contract must be furnished as required by the terms of an Act entitled, "An Act to secure the payment of claims of material men, mechanics, or laborers employed by contractors upon state, municipal, or other public work," approved March 27, 1897, and acts amendatory thereof.

The contractor to whom the contract may be awarded, will be required to appear at the office of the County Surveyor with the sureties offered by him, and execute the contract within ten (10) days from the date of the mailing of a notice from the County Surveyor to him that the contract is ready for signature.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

and in case of failure or neglect so to do, he will be considered as having abandoned it and the check shall be forfeited to the said County of San Mateo.

Bids must be enclosed in a sealed envelope addressed to the Clerk of the Board of Supervisors and must be endorsed, "Bids for construction of a Domestic Water Supply System for the East Palo Alto Water Works District, San Mateo County, California."

The Board of Supervisors reserves the right to reject any and all bids.

ELIZABETH M. KNEESE,
Clerk of the Board of Supervisors of San Mateo County, California.
Dated January 9, 1928.

NOTICE TO CONTRACTORS

TREASURY DEPARTMENT, office of the Supervising Architect, Washington, D. C., January 13, 1928—Sealed Bids will be opened in this office at 3 p. m., February 1, 1928, for furnishing all labor and material necessary for installing one electric freight elevator in the U. S. post office at Pasadena, Calif. Drawings and specifications may be obtained from the custodian at the U. S. post office building, Pasadena, Calif., or at this office in the discretion of the supervising architect.

JAS. A. WETMORE,
Acting Supervising Architect.

NOTICE TO BIDDERS

(Pump—City of Turlock)

Bids will be received by the city clerk of the City of Turlock for a Deep Well Turbine Pump at the City Council's office, 108 North Broadway, up to the hour of 8 o'clock p. m., February 7, 1928, and will be opened as soon thereafter as the same may be reached.

Specifications for the said pump can be obtained upon application.

All bids must be accompanied by a certified check of 10 per cent of the amount of the bid.

The City Council reserves the right to reject any and all bids.

By order of the Board of Trustees of the City of Turlock. Dated this, the 3rd day of January, 1928.

Attest, A. P. FERGUSON,
City Clerk.

NOTICE TO CONTRACTORS

(Pumping Plants—El Camino Irrigation District)

Sealed proposals will be received by the Board of Directors of El Camino Irrigation District, at the district office, three miles south of Proberta, Tehama County, California, up to 8 o'clock P. M., February 7, 1928, for furnishing and installing six deep well pumping plants, including all wiring, switches and other accessories necessary to a complete plant.

At the said time and place such proposals will be opened in public and a contract will be awarded to the lowest responsible bidder. Plans, specifications and contracts are on file at the district office, where they may be inspected, or full sets thereof may be obtained by depositing \$5.00 for each set, which will be repaid if the set is returned in good condition on or before February 15, 1928.

Each proposal shall be accompanied by a certified check or bid bond in the amount of at least five per cent of the total amount of the bid submitted, payable to El Camino Irrigation District. Certified checks or bid bonds accompanying rejected bids will be returned. They will be returned to the successful bidder upon executing the contract and furnishing the contract bond specified, within the time stipulated in the proposal. In case of failure of the successful bidder to execute the contract and furnish the required bond within the stipulated time, the certified check or bid bond and the proceeds thereof will become and remain the property of El Camino Irrigation District.

The district reserves the right to reject any or all bids.

By order of the Board of Directors.
O. R. SMITH, Secretary.

NOTICE TO CONTRACTORS

(National Guard Buildings—San Luis Obispo)

BIDS FOR CONSTRUCTION—Office of the United States Property and Disbursing Officer for California, room 1021 Forum building, Sacramento, Cal. Sealed proposals in triplicate will be received here until 12 m. February 10, 1928, and then opened, for furnishing all materials and labor required for construction of 17 officers' and enlisted men's kitchens and mess halls, 3 enlisted men's lavatories, 2 officers' laboratories, 1 regimental warehouse, 1 artillery warehouse, 5 watering troughs, 100 tent floors, small wall, 10 ten floors, large wall, 1 sewage disposal tent floors, large wall, 1 sewage disposal and chlorine control building; installation of complete electrical, water and sewage systems at National Guard Training Camp, 40th Division, San Luis Obispo, Cal. Further information on application.

NOTICE INVITING BIDS

(San Joaquin and Stanislaus Counties—Bridge)

NOTICE IS HEREBY GIVEN that sealed bids will be received by the Clerk of the Board of Supervisors of San Joaquin County, California, at the office of said Board in the City of Stockton, until 11:00 o'clock A. M., Tuesday, February 14, 1928, for the construction of a steel and timber bridge over the Stanislaus River. The bridge to be constructed under these plans and specifications is situated at the site of the Burneyville Ferry in Section 24, T. 2 S., R. 9 E., M. D. B. & M., and just north of Riverbank, California. The bridge is a joint bridge between Stanislaus County and San Joaquin County, California, each county to pay for one-half of the cost of construction.

All in accordance with the plans and specifications prepared by F. E. Smith, County Surveyor of San Joaquin County, and approved by J. H. Hoskins, County Surveyor of Stanislaus County, and

adopted and filed by the Boards of Supervisors of San Joaquin and Stanislaus Counties on January 9, 1928, and to which bidders are more particularly referred.

All bids must be made on forms to be obtained from the County Surveyor's office in San Joaquin and Stanislaus Counties and presented in sealed envelopes marked to indicate the contents and addressed to the Clerk of the Board of Supervisors at Stockton, California.

All proposals must be accompanied by United States currency or certified check, or cashier's check made payable to the Chairman of the Board of Supervisors of San Joaquin County in the sum of 5% of the amount of the bid.

A bond of 25% of the contract price will be required of the successful bidder to guarantee the faithful performance of said contract, and a like bond to guarantee the faithful payment and satisfaction of the lawful claims of all persons for labor and material furnished in the prosecution of said contract.

A deposit of \$10.00 will be required on all sets of plans taken out.

The Board reserves the right to reject any or all bids.

By order of said Board of Supervisors of San Joaquin County made January 9, 1928.

EUGENE D. GRAHAM,
County Clerk and Ex-Officio Clerk of the
Board of Supervisors of San Joaquin
County.

By F. L. STRONG,
Deputy County Clerk.

NOTICE TO BIDDERS

(Gridley Union High School District)

Notice is hereby given that the Board of Trustees of the Gridley Union High School District will receive sealed proposals to erect and build a High School Building in accordance with the plans and specifications on file at the office of the Secretary, Mrs. C. W. Chase, located at 830 Hazel Street, Gridley, Calif., and also in the office of the Architects, Davis-Pearce Co., Builders' Bldg., Stockton, Calif. Said proposals will be received up to 1:30 P. M. on Monday, February 6th, 1928, at the office of the Principal of the Gridley Union High School in the High School Building, and opened immediately thereafter.

All bids shall be submitted in accordance with the instructions as outlined in the specifications. Reference is hereby made to plans and specifications.

The Board of Trustees reserves the right to reject any and all bids.

A certified check or bid bond for 10% of the amount of the bid must accompany said bid.

(Signed) C. W. THRESHER,
Clerk of Board of Trustees of Gridley
Union High School District.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICES TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Strub Building, Sacramento, California, until 2 o'clock P. M., on February 14, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications thereto, to which special reference is made, of portions of Strub Highway as follows:

Sutter County, a causeway on the Yuba City to Knight's Landing Highway across the Sutter By-Pass in township thirteen north, range three east, consisting of four 15 foot removable timber truss spans and two hundred thirty-seven 21 foot timber trestle spans.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the

location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

R. M. MORTON,
State Highway Engineer.
Dated: January 16, 1928.

NOTICE TO BIDDERS

(Pipe Line—Paradise Irrigation Dist.)

Sealed proposals will be received by the Board of Directors of the Paradise Irrigation District at their office at Paradise, California, until 10:00 A. M., Tuesday, the 7th day of February, 1928, there to be publicly opened and read, for furnishing material and performing work as specified below. Contract will be let to the lowest responsible bidder for:

1. Furnishing approximately 6800 feet of 5-in. dipped or soil-proofed steel pipe or equal.

2. Furnishing approximately 1800 feet of 1-in. dipped or soil-proofed steel pipe or equal.

3. Hauling of pipe and fittings.

4. Digging of approximately 5830 feet of 12x24-in. trench.

5. Backfilling 8590 feet of trench.

Plans and specifications may be obtained from the office of said Board.

The right is reserved to reject any and all bids, to waive any informality in the bid received, and to accept any bid which is deemed to be the most favorable to the interests of the District.

By order of the Board of Directors of the Paradise Irrigation District, dated January 3, 1928.

J. E. ALLEY,
Secretary and Engineer.

NOTICE TO CONTRACTORS

(Santa Barbara County Courthouse)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the 16th day of January, 1928, notice is hereby given that sealed bids will be received until 11 o'clock A. M. on the 6th day of February, 1928, by the Board of Supervisors of the County of Santa Barbara, in the City of Santa Barbara, County of Santa Barbara, State of California, said bids, then and there will be publicly opened and read for the furnishing of all plant and labor and material and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail Building on the Court House site in the City of Santa Barbara, State of California, and all in accordance with the plans and specifications thereto, made by William Mooser Co., Architects, Nevada Bank Bldg., San Francisco, California, such bids will be received for the work as follows separately:

ONE BID—No. 1—For Jail Cells complete.

ONE BID—No. 2—For all work in Hall of Records.

ONE BID—No. 3—For all Tile.

ONE BID—No. 4—All cement or other floor work as called for in specification pages 10 to 21, inclusive.

and other works as called for in specification pages 1 to 9, inclusive.

Each proposal must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Co., Nevada Bank Bldg., San Francisco, California.

Cash, a bidders' bond, or a certified check, in the sum of at least ten percentum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Bar-

bara, as a guarantee that the bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said cash or bidder's bond, or certified check will be forfeited to the County of Santa Barbara.

Plans and specifications for above work may be seen at the Field Office of the Architects, Court House Site, Santa Barbara.

Sets of plans and specifications will be loaned out to bidders upon deposit of fifty (\$50.00) Dollars, coin or certified check; said deposit to be refunded to bidder when the set of plans and specifications are returned in good condition accompanied by bid; each deposit shall be forfeited to the Architects, provided the set of plans and specifications are not returned in good condition and within five (5) days from the time the same are taken out, unless a bid is to be submitted on or before date set for receiving bids.

Application for plans and specifications must be made to the Architects William Mooser Company, Nevada Bank Bldg., San Francisco, California.
RIGHTS RESERVED:

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award the contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternate or separate parts of the work, under this provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to, omissions from, changes in, or substitution for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under that particular item and without notice to the sureties on the bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of Santa Barbara, in the City of Santa Barbara, State of California, and have endorsed thereon:

Proposals for Court House, Hall of Records and Jail Building for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.

D. F. HUNT,
County clerk and Ex-Officio Clerk of the Board of Supervisors of the County of Santa Barbara.

SACRAMENTO ENGINEERS ELECT OFFICERS FOR 1928

Newly elected officers of the Sacramento Section, American Society of Civil Engineers, were installed at a dinner held Jan. 12 in the Hotel Senator.

The section's new president is J. Burdette Brown, extension specialist in irrigation of the University of California. Fred Grumm, an engineer with the division of highways, is first vice president; Walter E. Stoddard, hydraulic engineer for the division of water rights, second vice president; Norwood Sillsbee, engineer for the Natomas Co., secretary-treasurer.

Mr. Brown announced the appointment of his committee for the forthcoming year. One body, named for the purpose of extending efforts to bring the 1930 national convention of the American Society of Civil Engineers to Sacramento, was named to be composed of T. E. Stanton, chairman; Drury Butler, Joseph C. Boyd, Joseph E. Gross, Edward Hyatt, Jr., Albert Givan and Charles S. Pope.

Everett N. Bryan was named chairman of the public relations committee; Albert Givan, memorial committee; R. T. St. John, committee on local sections; S. H. Searnacke, entertainment committee; Mark E. Edson, biographies, and J. Burdette Brown, T. E. Stanton and Norwood Sillsbee as delegates to the Sacramento Technical Council.

ARCHITECTS AND ENGINEERS OF SACRAMENTO ELECT

J. O. Tobey was named president of the Architects' and Engineers' Club of Sacramento at the annual election of officers held last week. Jens C. Peterson was named vice president, Earl L. Holman secretary, and Harry W. De Haven treasurer.

The new board of directors consists of P. T. Poage, Fred Ruckh and C. E. Berg.

It was announced at the meeting that the annual banquet of the club will be held in February, the arrangements to be announced later.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

PACIFIC ROLLING MILL AND JUDSON
IN MERGER

E. B. Noble, president of the Pacific Rolling Mill Company, and Charles J. Maas, president of the Judson Manufacturing Company, announce that these concerns will operate after February 1, under the name of the Judson-Pacific Company.

A new company will be formed to take over the properties involved, which include approximately eight acres at Emeryville, and about three acres at Seventeenth and Mississippi Sts., San Francisco.

The combined capacity of the plant will approximate 25,000 tons per year, and will constitute the largest steel fabricating concern in this district, if not in the West.

About \$2,000,000 of property and equipment values are involved in the transaction.

This consolidation is interesting from the standpoint that it will combine the activities of two of the oldest industrial plants on the Pacific Coast.

Officers of the new company will be: Carlos J. Maas, president; E. B. Noble, vice-president and treasurer; A. E. Wilkens, vice-president and general manager; P. F. Gillespie, vice-president in charge of sales, and H. F. Hedricks, general superintendent.

ROAD CHIEF ELECTED

Col. R. Keith Compton, director of public works in Richmond, Val., is the new president of the American Road Builders' Association. He supervised the building of roads during the World War as a lieutenant-colonel of engineers, and was director of public works in Baltimore before assuming his present post in Richmond. He was a director of the road builders' association at the time of his election to the presidency. He succeeds Charles M. Babcock, Minnesota's state commissioner of highways, as head of the association.

SLATE SALES IN 1927 SHOW 12% LOSS AS COMPARED WITH 1926

The value of the slate sold at the quarries of the United States in 1927 was \$10,873,000, according to estimates furnished by producers to the United States Bureau of Mines, Department of Commerce. This was 12 per cent less than the value reported for 1926. Decrease in demand, especially during the last six months of the year, and lower prices due to keen competition, were general in the slate industry during 1927. Quarries were reported idle, and several firms discontinued business. Consolidation among active firms was also noted.

The roofing slate sold, estimated at 450,000 squares, valued at \$4,510,000, decreased 3 per cent in quantity and 11 per cent in value. This represents a decrease of 8 cents in the average value per square.

The total sales of mill stock, estimated at 8,856,000 square feet, valued at \$3,508,000, decreased 14 per cent in quantity and 16 per cent in value.

Mill stock for structural slate—2,350,000 square feet, valued at \$880,000—decreased 9 per cent in quantity and 11 per cent in value. Electrical slate—1,627,000 square feet, valued at \$1,292,000—decreased 12 per cent in quantity and 16 per cent in value.

Mill stock for blackboards and bulletin boards—3,440,000 square feet, valued at \$1,070,000—decreased 14 per cent in quantity and 21 per cent in value in 1927. Slate for school slates and billiard-table tops also showed decrease in both quantity and value. Slate for vaults and covers was the only slate product that showed increased sales in 1927. The output was estimated at 540,000 square feet, valued at \$146,000, and represents an increase of 10 per cent in quantity and 12 per cent in value.

The sales of crushed slate for roofing granules and flour in 1927 was estimated at 456,600 short tons, valued at \$2,775,000. This represents a decrease of 8 per cent in both quantity and value.

\$5,000,000 BOND ISSUE FOR S. F. HOSPITALS CONTEMPLATED

A \$5,000,000 bond issue to finance construction of a new building for the Board of Health in the Civic Center and the erection of additional facilities at various hospitals operated by the City and County of San Francisco, is contemplated. It is proposed to submit the proposal to the voters at the May primary election.

Subject to the approval of the Finance Committee of the Board of Supervisors the propositions to be voted upon are summarized as follows:

\$2,500,000 to finance the purchase of additional lands and the erection of a new building in the Civic Center for the Board of Health.

\$500,000 to finance erection of a nurses' home at the San Francisco Hospital to accommodate 250 nurses and 250 institutions.

\$250,000 for an additional unit at the Relief Home in Laguna Honda district.

\$1,750,000 for creation of a 150-bed cancer institute at the San Francisco Hospital and a 500-bed tubercular hospital at Pulga Canyon in addition to another 50-bed wing for the present hospital at that location.

SACRAMENTO BUILDERS EXCHANGE ELECTS DIRECTORS

Opening of new quarters at 1309 J St., election of eleven directors and a buffet luncheon features of the reorganization meeting of the Sacramento Builders' Exchange, January 17.

Speakers for the evening included Harry Johnson, retiring president who introduced S. A. Hart, assistant city engineer of Sacramento, who spoke on the Sacramento building program for the past six years. He also spoken on Sacramento's new building code.

Thos. F. Scollan gave a brief talk on the history of the Sacramento Builders' Exchange—what the organization has accomplished and what it hopes to do. W. W. Campbell spoke on Sacramento's new building code.

The exchange elected the following directors: W. B. Scollan, W. W. Campbell, Jos. Shephard, W. L. Triplett, L. F. Gould, L. C. Hunter, H. W. Robertson, Frank Maloney, Cliff Prudhomme, Harold Dixon and Harry Johnson. L. S. Patterson was elected secretary.

Following the election of directors, new members were introduced and a buffet luncheon was served.

CALIF. LANDSCAPE ARCHITECTS RE-ELECTS OFFICERS

Professor John W. Gregg of the Division of Landscape Design of the University of California College of Agriculture has just been re-elected to the office of secretary of the Pacific Coast chapter of the American Society of Landscape Architects, according to work received in Berkeley from Los Angeles, where the annual meeting was held.

The entire list of officers, President Stephen Child of San Francisco, Vice President Emanuel T. Mische of Los Angeles, Treasurer Edward H. Trout of Los Angeles and Secretary Gregg of the University, served the organization during 1927 and was unanimously re-elected.

Among matters of importance which were discussed was the appointment of a committee to arrange for the annual exhibition of the chapter, to be held some time during the month of February in Los Angeles, and, if satisfactory arrangements can be made, the exhibition will be later transferred to San Francisco for display.

The meeting on the Pacific Coast in May of the National Conference on State Parks was discussed and a committee appointed to extend the courtesies of the chapter to this organization in whatever way may be possible and assist in making the annual meeting pleasant and profitable for those present and for the State of California as a whole.

BUILDING CODE TO BE AMENDED AT LOS ANGELES

In accordance with the recommendation of the building and safety commission, the city council of Los Angeles has instructed the city attorney to prepare draft of an ordinance amending section 55 of the building ordinance covering heights of hotels and apartment houses. The amendment provides for the exact height limit of the various classes of buildings, which are as follows: Class A, 13 stories, Class B, 5 stories, Class C, 4 stories, and Class D 3 stories. The amendment to the ordinance will be effective on and after June 1st, 1928.

TARIFF PROTECTION ESSENTIAL TO AMERICAN PROSPERITY - THE REASONS

"One of the underlying principles of our prosperity today is high wages. High wages can be paid because of a large volume of production." This statement in a letter from W. H. Pouch, president of the Concrete Steel Co., New York, serves to emphasize what this paper has for many years been insistently preaching.

We believe in high wages, but we cannot in this country maintain high wages if our business interests permit national, state or municipal officials to purchase important building materials from foreign lands merely because they can secure foreign goods at a possible slightly lower price than American goods. It is only a repetition of the old saying attributed to Lincoln, that when we buy rails abroad, Europe has the money and we have the rails; but when we buy rails in America, we have both the rails and the money.

Protective Tariff Necessary

Every class of people in this country, whether they realize it or not, is vitally interested in the maintenance of our prosperity based so largely on high wages, and high wages cannot be maintained except through a protective tariff. The old fetish of free trade should no longer be worshiped by any political party. The tariff is pre-eminently an economic measure, and where the tariff is high enough to protect us against heavy importations of foreign goods made by pauper and near pauper labor, high wages can be maintained, but not otherwise.

The vegetable growers of Florida and Texas are appealing for protection against the importations of foreign tomatoes and other vegetables. The peanut growers are eager for a tariff against the peanuts of the Orient. And so, one by one, the farm interests of the country are coming to realize the need of a protective tariff on their interests, and in this respect are standing side by side with the other industrial interests which need a protective tariff. But in many things our tariff is not high enough. On some things there is no tariff protection. We are flooding our country with foreign made cement and steel, to the serious disadvantage of American made cement.

Foreign Cement on Public Work

Against this movement there is developing a very active opposition in some Southern States where highway commissioners have unwisely bought foreign cement for public work. Steel products also are being poured into this country in an increasing quantity. Especially is this true of Gulf ports, where vessels coming for cotton and other export products bring foreign materials at a very low freight rate, and sometimes almost as ballast. Our railroads thus lose the traffic they should have and our laborers are forced out of employment; and to maintain our prosperity we must be able to employ our people fully at high wages.

Our farmers are as vitally interested in a protective tariff as are our manufacturers. The laboring men have no assurance of employment or of good wages except through a protective tariff, and the great consuming population of the country is as much interested as are the farmers, the laboring men and the manufacturers themselves, because lessened prosperity and lower wages would mean not prosperity, but increasing pov-

erty for all the consuming population of the country.

Mr. Pouch Says:

Mr. Pouch, in writing to the Manufacturers Record, discusses the whole situation very forcibly. In the course of his letter, he says:

"Undoubtedly, the tariff question is going to be brought to the attention of the American public very forcibly in the next few years. There is a close connection between the foreign debt and the tariff question and, as the foreign debt has not been definitely settled, the tariff question has not been definitely settled. Some people may think that the foreign debt question is a closed book, but I am led to believe that many other people are convinced that this question will have to be reopened when the full payments come due from Germany. If the foreign debt to the United States is to be paid, it must of necessity be paid in merchandise and not in gold. Therefore, we must determine whether we will sacrifice the foreign debt and protect American merchandise. I hope the day will not come when American citizens forget to protect prosperity in America for a few million dollars that they might collect annually from some of the foreign countries.

Exports Growing Larger

"Even with the high tariff duty that we have today on steel products, the steel mills of France, Germany and Belgium are exporting considerable steel to the South and the Atlantic Coast cities. This tonnage is growing larger from month to month and, while it is not very large at the present time, its continued increase will in a year or so be a serious menace to the American steel mills supplying the Gulf cities and the Atlantic seaboard cities. There is no chance of the American steel mills meeting foreign competition.

"Shortly after the war closed the foreign mills sent representatives over to this country to investigate the great strides we had made in manufacturing steel. They returned to their respective countries and, I am told, installed the latest labor saving devices in their plants and with cheap labor, in addition to up-to-date machinery, they are producing steel cheaper than it can be manufactured by our own wonderfully equipped steel mills. Of course, cheap transportation must be supplied between Europe and the Atlantic seaboard cities, and with the advantage of cheap ocean transportation rates, there is no doubt that steel can be, and is being, shipped from Europe to our Atlantic Coast cities cheaper than it is being shipped from the Pittsburgh district to such cities. On account of these factors, many steel products can today be bought cheaper in certain localities of our country than the American mills can afford to sell them for and maintain the present high standard of American living.

Contractors Tempted to Buy

"Many of our engineers and large contractors are being confronted with the temptation of buying foreign steel. Some of them feel that they have no obligation to purchase American products if a foreign product can be bought cheaper. Personally, I cannot see this argument, because I believe there are other things to be considered than price. One of the underlying principles of our prosperity today is high wages. High wages can

be paid because of large volume of production. Conversely, if our cities, counties and states are going to use foreign steel in their subways, road construction and municipal buildings and our large engineers are going to advise owners to use foreign steel in their large engineering projects, then the domestic volume is going to decrease, the manufacturer is not going to be able to employ as many men and the American workman is not going to have as much money to spend, all of which will have a tendency to decrease our prosperity. Therefore, I believe it is the duty of everyone who is purchasing merchandise in reasonably large quantities, to use the merchandise close at hand and not patronize foreign markets.

"Leaders in the steel industry were recently quoted as saying that this industry was not earning for its capital invested more than that which could be earned on a Government bond, which means, of course, that profits in the steel business are very small. If the importation of foreign steel is allowed to increase from year to year, these profits will get smaller before they get bigger. Today foreign steel is a serious factor in Texas, New Orleans and the large cities of the Atlantic seaboard. Something should be done to stem this tide. I believe that if our leading magazines, such as the Manufacturers Record, could only bring the entire question and its consequences before the American public we will be able to remedy the evil before it brings on dire consequences."

EIGHTY-FOUR-YEAR BRICKLAYER IS STILL LAYING THE BRICK

All unmindful of the displeasure he is causing the gentleman with the hour glass and scythe, Robert Rippetoe, a Civil War veteran and veteran bricklayer as well, celebrated his eighty-fourth birthday at Rushville, Ill., by starting work with the rest of the boys on the addition being built to the Presbyterian church.

Sixty years of experience has given him uncanny skill as a brick mason.

"I am not happy unless I keep at my work," he said. "Moreover, it doesn't look as though I could retire if I wished. There doesn't seem to be any young brick masons taking up the trade here, and the jobs must be done," he philosophized.

Six months after taking up bricklaying, he responded to President Lincoln's call for volunteers and served with Troop B, Seventh Missouri Cavalry, for four years and 28 days.

On his return he resumed his trade and is still at it. There were only two brick buildings in Rushville then and he claims to have worked on virtually all that have since been constructed.

Rippetoe keeps a record of his daily work and is often called on to verify construction dates.

PLATE GLASS PRODUCTION

Plate glass production has shown further declines, according to word from Pittsburgh. Output of polished plate glass Manufacturers of America was 8,572,744 square feet, against 8,703,214 square feet in October and 9,703,214 square feet in November, 1926. In the first 11 months of 1927, production was 103,944,648 square feet, against 121,513,511 in the corresponding period of 1926.

H. J. BRUNNIER, STRUCTURAL ENGINEER, NAMED CHIEF OF AUTOMOBILE ASS'N.

H. J. Brunner, consulting structural engineer of San Francisco and a leading figure in California good roads activities for many years, is the new president of the California State Automobile Association. Announcement was made of his election to leadership of the 76,000 or-

H. J. BRUNNIER

ganized motorists of Northern and Central California at the annual meeting of the association's board of directors, last week.

For the past 8 years Brunner has been a director and an active worker in the State Automobile Association. During that time he has been continuously chairman of the association's highways

committee and in that capacity has directed the destinies of the organization's Highway Bureau, the driving force behind California's highway development. He has also been a member of the organization's executive and finance committees and has been a vice president of the association for the past four years. Brunner succeeds Burton A. Towne of Lodi, who retired from the association presidency after two successive terms during which the organization set a remarkable record of progress.

Other officers of the Automobile Association elected for 1928 are: R. I. Bentley of San Francisco, president of the California Packing Corp., first vice president; D. H. Lafferty of Santa Rosa, mortician and civic leader, second vice president; E. B. De Golia of San Francisco, vice president of Marsh & McLennan, third vice president; George S. Forderer of San Francisco, president of the Forderer Cornice Works, treasurer. D. E. Watkins was again named secretary and general manager of the association. He is now in his fifteenth year in this position.

Brunner is prominent in civic, commercial, fraternal and industrial affairs of the bay region and in his professional capacity is one of the builders of San Francisco's new skyline. He was structural engineer for four of San Francisco's newest skyscrapers—the Russ, the Hunter-Dulin, the Standard Oil and the Commercial Union buildings—in addition to many other structures.

The new chief or organized motordom in Northern and Central California is vice chairman of the San Francisco Traffic Survey Committee, a director of the American Automobile Association, a past president of the Pacific Association of Consulting Engineers and is prominent in Rotary affairs. He is an active good roads advocate and has taken a leading part in state highway bond campaigns and other campaigns, state and local, for the improvement and extension of highway system in California.

NEW YORK WOULD BUILD HIGHER — SETTING 75 STORIES AS AN IDEAL

New York's buildings are becoming larger, according to a survey just completed by Dr. Lewis H. Haney, director of the Bureau of Business Research of Columbia University. Coincidentally, it was learned that a movement is under way to alter the building code so Manhattan's skyscrapers may be raised to new heights.

In the mid-Manhattan district the increased size of the buildings nearly trebled the investment in each new construction project over what it was in 1922, according to Dr. Haney's statistics. In 1927 the average building in this area cost \$970,000, as compared with \$620,000 in 1926 and \$330,000 in 1922. The increase he emphasized, was found to be due to the construction of larger buildings rather than costlier building operations.

Spent \$271,000,000

The mid-Manhattan district covered by the survey embraces the territory from Thirtieth to Sixtieth streets, between the Hudson and East Rivers. During the

period between Jan. 1, 1922, and Oct. 1, 1927, a total of \$271,000,000 was spent in building construction, the report shows. This does not include \$131,000,000 in construction under way Oct. 1, but not completed.

Architects and builders, it was said, in informed circles, have presented a strong appeal for higher buildings to the State Legislative Committee, which is preparing a report to the Legislature on changes in the building laws. Extension of maximum height regulations in some parts of the city where property values are high and the space for new construction is small has been asked of the committee. One argument which is advanced in favor of taller residential structures is that cheaper housing can be provided through larger apartments which, because of their size, could be operated at a lower unit rental basis.

75 Stories Called Ideal

A detailed economic study of high buildings, recently completed by a New York economist for the American Insti-

tute of Steel Construction, fixed 75 stories as the most profitable size for buildings on the expensive property of midtown and lower Manhattan.

When the institute's study was undertaken, the 75-story building was arbitrarily taken as being beyond the maximum height to effect the greatest economic efficiency of a specific site. As all of the aspects surrounding construction and operation were investigated, the report says, it was found at 75 stories the curve of economic efficiency was still mounting upward, and, had the survey continued, a height of 85 or 87 stories might have been found even more profitable.

Office Buildings First

In studying the construction in the mid-Manhattan district, Dr. Haney reported office buildings formed "the largest single class, both in number completed and in total construction cost.

"Hotel and apartments form the next largest class in terms of cost and construction," he continued. "The construction of store and loft buildings has not been marked by as rapid an increase as that of office buildings, hotel and apartments. In number completed for the period, however, they rank second among all classes of buildings.

"In order of their total construction cost since Jan. 1, 1922, the remaining classes of buildings are: Factories, public buildings (including theatres), tenements, miscellaneous buildings, stables and garages."

NEW STEEL PROCESS WAITS ON PATENT

Prospects for the establishment of a steel industry in Alameda are being brightened by the prospects of the General Steel Products Co., and Alameda concern headed by George H. Noble, city councilman of Alameda, as president, which controls a process for making high grade steels from Pacific Coast beach sands, especially the sands of Monterey and Aptos beaches.

The process has been carried forward to where a patent has been applied for through the inventor, E. F. Waldner, Alameda resident and metallurgist, who carried his experiments through to a successful result in a laboratory at Webster street and Pacific avenues, Alameda, where an electric furnace and batteries of electro-magnetic plates have been installed.

The new process provides for making chrome, magnesite and other steels of highest grade in a single operation, the process being carried on from the initial product without interruption or change of operation. The process eliminates heavy expense of dual processes now in use.

The use of beach sand from which to extract the iron provides a limitless supply of material at little or no expense. Noble said that as soon as a patent was secured, the company will undertake manufacture on a commercial scale.

CALIFORNIA MINERAL PRODUCTION DURING 1927

Total value of the mineral production of California for the year 1927 is conservatively estimated to have been approximately \$377,205,000, State Mineralogist Lloyd L. Root reports. The estimated quantities and values for 1927 as affects the construction industry follows: \$3,475,000 (26,800,000 lbs.) copper; \$172,000 (2,540,000 lbs.) lead; \$518,000 (8,250,000 lbs.) zinc; \$350,000 other metals, including antimony, iron, manganese, platinum, tungsten; \$24,000,000 (13,000,000 bbls.) cement; \$18,500,000 crush rock, sand and gravel; \$6,500,000 brick and hollow building tile; \$464,000 (40,000 tons, crude) magnesite; \$1,250,000 other structural materials, including granite, et al.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

U. S. Steel Corporation on Jan. 19 advanced prices \$1 a ton on bars, plates and shapes for first quarter delivery only. New quotations are \$1.85 per 100 lbs., Pittsburgh and \$1.95 (Chicago).

Roadwood production for 1927 was \$191,068,000 ft., shipments were 421,296,000 ft., and sales 428,556,000 ft. California absorbed 263,016,000 ft., 80,843,000 ft. went to Eastern destinations and 75,677,000 ft. went foreign.

The Washington supreme court sustained a lower court verdict for \$28,441 damages against a Seattle contractor, who used green lumber for laminated flooring, which was attacked by dry rot.

Foundries in Sacramento and Stockton seek to have the city council ask for bids on "open specifications" when undertaking the installation of electrolier systems.

Leaving more than \$1,000,000 to his wife and five children, the will of Chas. Webster Doe, pioneer San Francisco lumberman, has been filed for probate. All real property and his stock in the California Door Co., of which he was vice president, is bequeathed to the widow, Laura Mitchell Doe. The balance of the estate goes to the children.

Electric light and power companies in the United States plan to spend a total of \$900,363,000 on new construction in 1928. The budget for the new year is one of the largest new facilities indicated in the history of the industry. "Electrical World" reports. While all sections of the country show gains, contrasted with actual expenditures in 1927, the southern states and north central states lead in the rate of growth of proposed capital expenditures.

A \$2,250,000 reserve fund from which to pay the operating expenses of California's prison camps, including the three now in operation and the several others proposed when road work is launched on a wide scale in the spring, has been created by the state highway commission. The reserve was set up from federal aid funds. Allocation of the funds among the several road camps will not be attempted until a future date.

Acting in three capacities, George B. Hegardt, was the principal speaker at the meeting of the Oakland Engineers' Luncheon Club, Jan. 20. As president of the American Association of Port Authorities, Mr. Hegardt spoke on gulf, Atlantic and lake ports. As vice-president of the National Airport Association, he told of aviation fields in the south, mid-west and east. Finally, as manager of the Oakland City Port Commission, he told of Oakland's new harbor.

An article in the January issue of the Monthly Labor Review on the provisions by trade-unions for their sick, aged, and disabled members and their dependents shows that labor organizations are expending large sums for this purpose. The expenditures of 61 national and international organizations which reported on this point amounted to about ten and one-half million dollars last year, while payments for insurance of various kinds amounted altogether to more than twelve millions. Disbursements since these unions began paying benefits and insurance total more than \$200,000,000.

The National Committee on Wood Utilization of the Department of Commerce, is now publishing its own news bulletin, under the title of "Wood Utilization News." This publication, in mimeographed form, is available to the readers of the monthly news bulletin of the Division of Simplified Practice, without cost. A request addressed to the National Committee on Wood Utilization, Department of Commerce, Washington, D. C., will be sufficient to cause one to be placed on the mailing list.

Bankers, water and power interests and others concerned will meet in San Francisco with the legislative committee on investigation of water resources, its conservation and uses. The meeting will be held Feb. 2, it is announced by Assemblyman Bradford Crittenden, chairman and Assemblyman E. G. Adams, secretary of the committee. Crittenden said that the committee would present as an example of the possibilities of state action the building of the Kennet dam in Shasta County.

Folsom Prison convicts who will work on the state highway rock crusher being installed at the prison will be paid from convict road camp funds if the law will permit. This announcement is made by B. B. Meek, state director of public works, who believes that as the rock will be used for highway construction the convicts who labor on the crusher may be classed legally as road workers. Most of the convicts employed on the highways are first offenders recruited from San Quentin Prison. If the Folsom convicts could be paid for work on the rock crusher it would help the more deserving ones to reclaim themselves.

"The test of the efficiency of any organization is going to be measured not only by its service and the quality of products but by its continual and progressive reduction in the prices of its products to the public," recently said Gerard Swope, President of the General Electric Company, in an address before the annual dinner of the Associated Business Papers, Inc. Continuing, he said: "That doesn't mean a cut-throat policy but it means the application of intelligence and of science to the problems before us; of better methods being introduced in industry, so that without reducing the earnings of labor we can still reduce the selling prices to the public. Simplification is one of the better methods now being adopted by industries in a program for better service to the public."

California's \$47,000,000 highway program, authorized by the state highway commission recently when it adopted a budget for expenditure of the new construction and maintenance funds, will shortly be launched and will proceed with all expediency consistent with good engineering. B. B. Meek, state director of public works, announces. Meek's announcement followed a conference with Governor Young on the possibility of providing early employment for laborers through highway construction activities. Six million of the \$15,100,000 anticipated revenue from the 1 cent gasoline tax increase, will be under contract within the first six months of the current year. The highway department engineering forces have been instructed to proceed with plans and specifications for contemplated work with all rapidity consistent with efficient work.

Plans for a seventy-five-story "temple of peace" in honor of Benjamin Franklin, which would stand in midtown New York and would surpass in height any building yet erected were announced at the fifth annual meeting of the International Benjamin Franklin Society in New York, Jan. 23. The preliminary plans considered were drawn up by Lieutenant Commander Franklin Bache Huntington, a descendant of Franklin. They call for a granite structure 850 feet in height, costing approximately \$8,000,000. A thirty-story office building would be surmounted by a forty-five-story tower, 100 feet square surmounted by an illuminated dome. The structure would be encircled by thirteen columns representing the original colonies, with panels; statues and bas reliefs symbolizing the more important achievements and interests of Franklin's life.

Successful demonstration of the permanency of expanded metal or metal lath and its resistance to earthquake shock is said to have caused a sharp increase in the use of such building material in Chile the past few years, reports Assistant Commercial Attache Robert G. Glover, Santiago, Chile, to the Department of Commerce. Importations of expanded metal (metal lath) into Chile have increased from a total of 229,917 kilos brought in during 1924 to 636,917 kilos received in 1926, a three-fold increase. Over this period it is estimated that the United States has furnished about 85 per cent of all of this product received, with the remaining 15 per cent being divided between Great Britain, Germany and Belgium, in the order named.

Payroll holdups in Chicago within the past few months have led indirectly to a trial of the five-day week in the Chicago building trades. The Plasterers' Union has negotiated an agreement with the Plasterers' Employment Association for a three months trial of the shorter working time. Twelve of the city's largest plaster contractors who have had their payrolls taken in holdups, have started to pay by check. Union rules provide payment must be made in currency. The dispute over the methods of payment led to a compromise which called for trial of the five-day week. Under the experiment the plasterers will be paid at the same rate as at present—\$13 a day. Thomas Dowling, head of the Journeyman Plasterers' Union, said that if the plan is proved not feasible by April 1, the men will return to the old arrangement.

Another activity arising out of the World War—the claims of contractors for reimbursement of losses alleged to be due to war condition—virtually has been closed by the government. At the Treasury it was learned that there still are pending but 57 claims awaiting audit by experts of the various departments and two claims awaiting court decision, out of a total of 340 claims originally filed. Contractors and others in all have demanded reimbursement of \$3,292,831, of which something over \$2,640,000 has been paid. Congress has appropriated a total of \$2,650,000 for reimbursement of contractors, the sum virtually being exhausted. Additional appropriation possibly will be necessary. Ninety-two claims involved \$529,848. Those awaiting audit aggregate \$109,359 and the two in court \$22,931.

Competitive bids on state highway work during the last three months of the calendar year 1927 saved California \$225,203 or 13 per cent of the contract prices, the State Department of Public Works reports. During the three months the highway division offered 32 projects for bids. Low bids of the 211 submitted on all projects aggregated 1,439,616 against \$1,664,819 estimated by the highway department engineers as the cost of the work.

A plan to reduce the high cost of school designing and construction in San Francisco is proposed. The plan will be included in the final report of the special committee appointed a year ago to investigate the cost of school designing. Suggestions expected to be made in the report to the Board of Supervisors are: Reorganization of the present bureau of architecture and the enlargement of its sphere of activity to include architectural designing of all schools and inspection while under construction. Standardization of classroom design. Provision for inspection by architects responsible for building, instead of by the city. Supervisor Marks, chairman of special committee, named to study the architectural cost of school.

According to newspaper dispatches from Washington, D.C., unmistakable evidence of a stiffening of European competition was reported to the House Subcommittee on Appropriations by Dr. Julius Klein, director of the Bureau of Foreign and Domestic Commerce. He said that he had found on the Pacific Coast the greatest alarm regarding the steel situation, because of competitive difficulties. Recently there has been a marked increase in European exports of steel to the Pacific Coast by way of Panama Canal. Importations of German and Belgian steel to certain Pacific Coast points have jumped in cases nearly 100 per cent in the past twelve months. He declared these developments typical of what may be expected in certain lines of industries affected by the development of European cartels or international trusts.

Despite the handicap of an unfavorable market, total pine timber cut in the Klamath Basin, Ore., during 1927 was only slightly under that of the preceding year, it is revealed in a comprehensive survey of the activity of twenty-six operations. Total cut for 1927 was 435,700,000 feet, a production figure contributed by twenty Klamath County sawmills and six plants north of Weed, Calif., considered part of the Klamath Basin lumber territory. The Pelican Bay Lumber Company led all other mills with an aggregate cut of 65,000,000 feet. Ewauna Box Company was second, with 63,000,000 feet, and Forest Lumber Company, Pine Ridge, third with 40,000,000.

The art of plumbing, once a neglected subject, is receiving an increasing amount of attention. Significant of this growing interest is the holding of a two-day Heating and Plumbing Institute this month at the University of North Carolina. The School of Engineering of that institution working in co-operation with the North Carolina Association of Plumbing and Heating Contractors, has invited architects, health officers, waterworks officials, plumbers and others, to come together for the purpose of hearing discussions by qualified experts. The program is comprehensive, including such topics as the relation of plumbing to public health, chemistry and physics of plumbing, hydraulics of plumbing systems, and a discussion of a model plumbing code by William C. Groeninger, member of the Sub-committee on Plumbing of the Department of Commerce and chairman of the Research Committee of the American Society of Sanitary Engineering. Heating and Insulation will also be taken up at the meeting.

TRADE NOTES

M. J. Enos and M. A. Dominick will operate from 1450 Lincoln street, Santa Clara, under the firm name of Santa Clara Lumber Co.

V. E. Burch, 629 Hillsborough St., Oakland, will operate from 1137 E-Fourteenth St., Oakland, under the firm name of Acme Builders.

Brown & Pengilly announce change of firm name and will hereafter operate as the Diamond Electrical Manufacturing Company with headquarters at 1264 Folsom street, San Francisco.

John M. Mace, formerly of Camino and Oroville, has leased timber lands of the Forest Service, and will erect a box factory and mill about 5 miles east of Georgetown in the El Dorado National Forest.

Reardon Co. of Calif., manufacturers of cold water paints, has been incorporated in Los Angeles with a capital stock of \$100,000. Directors are: W. W. Cadwallader, Arthur J. Lynch and Leslie A. McLean.

Superior Culvert & Flume Manufacturing Co., marketing all type of corrugated iron culverts and flumes, has leased quarters in Union street near Nineteenth St., Oakland, and will shortly commence operations. John A. Lambie of Los Angeles will manage the plant.

Coast Rock & Gravel Co., Grant Rock & Gravel Co., and E. C. Martin of the Martin Construction Co., have been admitted to membership in the Fresno Builders' Exchange, it is announced by Harry Cayford, secretary of that body.

A. Y. Sarony, waterproofing expert of New York City, for 14 years with Toch Bros., has joined the forces of J. E. Dwan, Inc., Los Angeles, building specialty contractor. He will have charge of the waterproofing department.

Will Dresbach, planing mill operator and lumber dealer, B and Third Sts., Petaluma, has leased lands and buildings in Lower Third St. of that city, and will shortly dismantle equipment and move stocks to the new location.

Klinch-Lock Lath & Steel Studding Corp., plaster lath manufacturers, of Los Angeles, capitalized for \$1,000,000 has been incorporated in Los Angeles. Directors are: O. J. Boos, Jos. Strand and Hans Westberg. Headquarters will be maintained at 3005 East 25th St., Los Angeles.

Rural Electric Co., Ray Cound, manager, has opened offices and shop quarters at Elk Grove, Calif., and will specialize in motor and electrical repairs, motor winding, etc. Cound was formerly with the Pacific Gas & Electric Co., and the Western States Gas & Electric Co.

Fairbanks, Morse & Co., Chicago, have recently acquired complete sales rights to the Price turbine pump manufactured and marketed for many years by the G. W. Price Pump & Engine Company, San Francisco. Activities of the Price organization have been confined largely to California and the Pacific Coast territory so that the new arrangement will make the pump available in all territories reached by Fairbanks, Morse. The pump is for deep well pumping service and is available in any number of stages, depending upon the working head and the amount of water desired.

ALONG THE LINE

Coast Highway Association will hold its annual meeting in Santa Barbara February 18.

Rollin S. Tuttle, architect, announces removal of offices from 363 Seventeenth St. to 505 California Bldg., Oakland.

R. De Chenne, formerly associated with Jas. W. Plachek, Berkeley architect, has opened quarters at 4128 Gilbert St., Oakland, for the practice of architecture.

John C. Nowell, retired executive of the Pacific Telephone & Telegraph Co., has been appointed city manager of Hillsborough, San Mateo County, at a salary of \$5000 a year.

Godfrey Edwards, 54, general contractor of Los Angeles, died in that city Jan. 23. Among the more notable construction projects completed by Mr. Edwards was the Coliseum and the Shrine Auditorium in Los Angeles.

A. E. Doyle, 51, noted architect of Portland, Ore., died in that city Jan. 24 after an extended illness. Mr. Doyle designed plans for many of Portland's skyscrapers.

Harry McClelland, Stockton attorney, has been named right-of-way agent of the legal department of the California State Highway Department, succeeding Frank B. Durkee, who leaves the state service February 1 to engage in private practice.

George M. Whitaker, 84, pioneer building contractor of Bakersfield, died in that city January 15, following a long illness. Whitaker retired from active business more than ten years ago as the result of poor health.

P. J. Parker of the contracting firm of Parker & Banfield, Portland, Ore., was killed in an airplane accident near Montpelier, Ohio, recently. His partner, C. H. Banfield, was seriously injured at the same time.

B. C. Viney has opened an office in the Land Title Bldg., Santa Cruz, and will engage in designing and supervising of buildings. Previous to entering business for himself, Mr. Viney was associated with Allen C. Collins, Santa Cruz architect.

Walter Rice addressed the Stockton Chapter, American Association of Engineers at the Jan. 20 meeting. His topic was "Present Day Fiction and Philosophy." J. B. Terrell presided in the absence of C. L. White, president of the chapter.

William Starrett Dinwiddie Jr., of Berkeley, son of W. S. Dinwiddie, engineer, died in a San Francisco hospital Jan. 21, following an operation and lingering illness. He was born in Plaquemine, Louisiana, June 18, 1896, and was graduated from the University of Michigan with high honors as a civil engineer.

Frederick L. Olmstead, Los Angeles city and park planner, has been appointed by the State Park Commission to survey California lands suitable for state parks. Olmstead will start his surveys in the South and then in the Northern section of the state. His report will be used as a basis for seeking a proposed \$6,000,000 state park bond issue. The last Legislature appropriated \$15,000 for making the survey.

STATE BUILDERS' EXCHANGE TO CONVENE IN STOCKTON IN APRIL

About 100 representatives of Exchanges in various parts of the state attended the meeting of the State Builders' Exchange at Fresno Jan. 14. Sessions were held morning and afternoon and the meeting closed with a banquet in the evening. The next meeting will be held at Stockton in April, and the fall meeting will be held at Santa Barbara in September.

The uniform building code prepared by the Pacific Coast Building Officials' Conference was discussed. It was brought out that Los Angeles and San Francisco are proceeding to draft their own codes, and it was the consensus of opinion that as building regulations must fit local conditions a standard code, rather than a uniform code, should be set up for guidance of municipalities.

Uniform Wage Scale

San Jose Exchange brought up the question of a uniform wage scale for the state. It was pointed out that the wages of 19 building trades in San Francisco were higher than in Los Angeles, while wages of three crafts in Los Angeles were higher than in San Francisco. Further consideration of the matter was referred to the committee on industrial relations composed of H. M. Sweeney of Santa Barbara; George T. Bowen, San Francisco; W. T. Loesch, Pasadena; R. O. Summers, San Jose, and J. M. Burke, Stockton.

It was decided to appoint two committees on organization, one for the northern and one for the southern district, to promote the organization of Exchanges in cities where none have been established. These committees will be appointed by the president, J. M. Sanford of Richmond.

A resolution was adopted commending the state board of education for expanding the vocational education work in the public schools of the state.

Appreciation Expressed

Among resolutions of appreciation passed by the delegates the following were included:

"That this meeting looks with appreciation on the work being done and proposed by the State Board of Education for the promotion of vocational education and we strongly recommend and will do everything we can to support the development of this phase of education among the youth of the state."

"That this meeting wishes to express sincere and hearty appreciation to the San Joaquin Light & Power Co. for the foresight and interest it has shown in realizing the value this organization should be to the whole construction industry of the state and given expression to that idea in the very practical and helpful way of putting this beautiful auditorium and its furnishings at our disposal for these meetings."

"This meeting desires to express its great appreciation of the generous way in which the Fresno Builders' Exchange has given of its time and money in order to encourage this latest organization of the building industry, believing that in doing so they are making worth while history for California."

Meet Goes To Stockton

The Stockton delegation, headed by Wm. F. O'Keefe, president of the Stockton Builders' Exchange, made a grand fight for the next meeting of the state organization. Santa Barbara had a big

backing for the meeting but due to the booster spirit of the San Joaquin Valley organization the Santa Barbara boys admitted Stockton was the place for the next session.

Banquet tables at the evening session were covered with ship designs featuring the deep water project for Stockton harbor.

Those In Attendance

Fresno — T. M. Robinson, Harry R. Cayford, E. R. Beatty, J. G. Teeple, James Anton, M. C. Poulsen, L. L. Ellis, A. Segel, C. E. McMullin, E. H. Mellenkamp, Otto W. Baty.

Stockton — Wm. F. O'Keefe, President; L. S. Peletz, Treasurer; E. M. Lewis, Secretary; E. L. Seiler, U. J. Lanen, J. F. Ecker, H. Reynolds, J. M. Burke, chas. Scott.

San Jose — J. A. Wagner, Treasurer; Wm. Loos, President; R. O. Summers, L. D. Canfield, B. Gallichotte, W. L. Howe, G. M. Latta, W. M. Hermen, Wm. F. Serpa.

Pasadena — Wm. F. Loesch, President; Geo. W. Israel, Secty.-Mgr.; H. O. Clarke, Geo. L. Throop, John B. Dodge.

San Francisco — W. H. George, President; A. H. Wilhelm, Geo. T. Bowen, D. B. Farquharson.

San Pedro-Wilmington — S. M. Cope, President; Henry F. Lembke, Mgr.; R. E. Britton, Wm. B. Oakes.

Santa Barbara — A. J. Nolder, J. A. Clarey, R. L. Richardson, H. L. Sweeney.

Richmond — P. H. Sanford, J. K. Eakle, Carl Overaa, E. H. Higgins.

Long Beach — J. W. Bowman, Chas. W. Pettifer, J. E. Mackie.

Los Angeles — Ralph E. Homann, Fred Goccell.

Miscellaneous — Oakland, E. W. Shaw; Santa Ana, Morris Shelton; Santo Monica, Robt. E. Peterson; Carmel, M. J. Murphy; Monterey, A. B. Jacobsen; Berkeley, Robt. Greig.

INVENTOR CANNOT STOP HIS PERPETUAL MOTION MACHINE

According to newspaper dispatches from Belgrade, a claim to have invented a perpetual motion machine has been put forth by a young Serb, Asim Hajdarovitch. A Bosnian Mohammedan by religion, he confesses to total ignorance of physics. Having invented his perpetual motion machine, his chief problem now is how to stop the contraption once it has been started. The machine comprises a number of wheels with certain weights, so related that when the first wheel is started the others gradually assume a terrific speed so that various devices are necessary to stop them. Young Hajdarovitch does not claim his machine is perfect, but he does argue it is practical. He says the idea came to him when he saw a wheel pumping water out of a well.

WELOED BRIDGE PLANNED

An electric arc-welded, rivetless steel railroad bridge, 175 feet long, is to be built across the water-power canal at Chicopee Falls, Massachusetts. Of this structure, the first of its kind, Gilbert D. Fish, consulting structural engineer, says: "The bridge will be virtually a one-piece structure; every joint will be solid and immovable. Only 80 tons of steel are needed for the welded job; 120 tons would be necessary if it were riveted."

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 718, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1440-S JUNIOR ENGINEER, preferably mining or civil graduate with some practical experience for a position in Columbia, S. A., with dredging company, requiring surveying, mapping and estimating. Apply by letter with references. Salary, \$150-200 plus expenses on two year contract. Headquarters San Francisco.

R-1447-S ASSISTANT CONSTRUCTION SUPERINTENDENT, preferably with technical training and some general construction experience which includes work on wet ground and water. Must be familiar with timber structures and pile foundations. Salary about \$180 a month. Temporary but may lead to extended engagement. Location Alameda County. Apply by letter.

K-6-X-3992-CS SHOP SUPERINTENDENT, for company manufacturing auto headlights. Must be experienced in illumination along this line and be able to redesign lamp so that it will possess all state requirements. Apply by letter. Location Colorado.

R-1431-S SALES MEN, to sell electrical appliances for public utility company. Some positions for gas appliances and heating men. Technical graduates preferred for advancement based upon sales record. Northern California territory involves traveling and men with cars preferred. Small salary and commission. Headquarters San Francisco.

R-1443-S MILL SHIFT BOSS, to erect and operate Oliver continuous filters for mining company in West Africa (Gold Coast). Must be experienced on this equipment. Salary open, 6 months contract with option of extending to 12 months. Headquarters San Francisco and London. Apply by letter with statement of experience and references.

IRON ORE SHIPMENTS

The iron ore mined in the United States in 1927, exclusive of ore that contained 5 per cent or more of manganese in the natural state, is estimated by the United States Bureau of Mines, Department of Commerce, at 61,778,000 gross tons, a decrease of 9 per cent as compared with that mined in 1926. The ore shipped from the mines in 1927 is estimated at 61,325,000 gross tons, valued at \$153,641,000, a decrease of 11 per cent in quantity and of 12 per cent in total value as compared with the figures for 1926. The average value of the ore per gross ton at the mines in 1927 is estimated at \$2.51; in 1926 it was also \$2.51. The stocks of iron ore at the mines, mainly in Michigan and Minnesota, apparently increased from 9,565,880 gross tons in 1926 to 10,444,000 tons in 1927.

1927 PIG IRON PRODUCTION

Pig iron production in 1927 amounted to 36,232,306 tons, or 8 per cent below the output of 39,373,000 tons in 1926. On January 1 there were 169 furnaces in blast with estimated daily capacity of 86,825 tons, against 170 on December 1, with daily capacity of 87,700 tons.

FOREST ROAD FUNDS PROVIDED

Apportionment of \$7,500,000 for road improvement in National Forests has been approved by Secretary of Agriculture Jardine. The fund was authorized by congress in 1926, and will be disbursed during the fiscal year beginning July 1, 1928. Forest roads in Idaho will receive \$1,151,000 and in California \$1,112,155. Other large allotments are Oregon, \$1,074,899; Montana, \$608,151; Washington, \$633,879, and Alaska, \$490,844.

COWELL CEMENT PLANT AMONG THOSE TO WIN 8-TON SAFETY TROPHY

(By J. ALTON REITZEL)

Ten cement mills operated throughout 1927 without a lost time accident. This record has never been equalled in the entire history of safety work in the cement industry. In 1926 only tow mills were successful in completing a year's work free from accidents; two plans similarly free from mishaps in 1925 and one in 1924.

Each of these ten plants will receive the Portland Cement Association concrete safety trophy. The award takes the form of an eight-ton sculptured monument, appropriately inscribed, testifying to the mill's record. These awards become permanent possessions of mills winning them; in case a mill repeats its records, additional inscriptions are placed on the trophy already in its possession.

Cement mills winning safety awards for 1927 are: Martins Creek, Pa., and Ironton, O., plants of the Alpha Portland Cement Co.; Belleville, Ont., and Hull, Que., plants of the Canada Cement Co.; Bonner Springs, Kan., mill of the Kansas Portland Cement Co.; Cowell, Cal., plant of the Cowell Portland Cement Co.; New Castle, Pa., and Iola, Kan., plants of the Lehigh Portland Cement Co.; San Antonio mill of the San Antonio Portland Cement Co.; and the Duluth, Minn., mill of the Universal Portland Cement Co.

Among these are two organizations which have won trophies in previous years—the San Antonio plant in 1923 and the Duluth Universal plant in 1925.

A study of the accident chart showing the record for the past three years will indicate how intense the safety work has been during 1927. Every month during the past year shows a drop in accidents over the corresponding month in either of the preceding years.

As will also be noticed by the diagram, the lowest accident figure is in June. This is the month of the concentrated drive against mishaps, sponsored in both 1925 and 1927. In 1926, when the June campaign was not conducted, mishaps numbered 204. In 1925 the June figure was 92 and last year it was reduced to 68.

Here are some of the high-lights in the record for 1927:

133 mills operated during the entire month of June without a lost time accident.

50 plants of the above number had never attained a clear record during any previous month.

30 plants operated throughout January, February and March without an accident.

26 plants suffered no accidents during the first six months of 1927.

17 plants had no accidents in 10 months.

13 plants were without mishaps in 11 months.

10 mills completed the year to win trophies.

All member plants, then in operation, completed the month of September without a fatal accident, the first month without a fatality in the history of the Portland Cement Association.

These plants completed the month of June with but one fatal accident, which established a record for June and for all months up to September.

The following facts are noteworthy in connection with the association's June no-accident campaign:

Eighty-five company executives supported the June campaign with their personal written pledges.

Two thousand two hundred superintendents, foremen and safety committee men supported this executive action by

making similar pledges and actively prosecuting the campaign.

Thirty-three thousand workmen signed and returned individual pledge cards, promising to work without injury to themselves or others.

Sixty-eight accidents were suffered—only 68 pledges out of a total of 33,000 were forgotten or disregarded, these amounting to about one-fifth of one per cent of the total. This record shows cement mill workers about 99.83 per cent alert and loyal—undoubtedly one of the best showings attained in any industry.

With nearly all of December accident figures reported to the association it is estimated 1633 lost time accidents were suffered by the industry in 1927 and 30 fatalities. In 1926, 2221 lost time mishaps were recorded with 24 fatalities.

While this reduction is startling in itself another factor enters which makes figures even more significant. The 1927 safety record represents the experience of 142 mills with a far greater hazard than is represented by the 1926 figures, covering only 124 plants.

Indications are that 154 mills will report their accidents to the Portland Cement Association during 1928. The association keeps a fine statistical record of accidents—by the use of these figures a definite check can be kept on mishaps and steps can be taken for their elimination. For example, screw conveyor accidents recur each year at a certain period. But a study of the permanent record, efforts can be placed directly on this problem and effective safety work realized.

Plans for 1928 are already getting under way. No radical departures are to be inaugurated from methods used in last year's safety work. Two types of drives will be used—the co-operative and the competitive.

The June no-accident campaign will be staged again this year. This type of co-operative scheme showed excellent results in 1927 and will be further developed this coming June. Under this plan every man co-operates with all his fellow workers—the record depends on the best efforts of every man in order that his mill may keep the safety banner waving from the flag staff.

Already bulletins and posters have been mailed plants enlisting them in the 1928 trophy contest. By this method every plant is in direct competition with every other to win the coveted safety award betokening a year of safe operation.

Although 1927 has been a banner safety year, A. J. R. Curtis, assistant to the general manager, Portland Cement Association, in charge of accident prevention, has this to say about the cement industry's accident effort: "We have had a good year—but zero is the limit with us; we will not be satisfied until every man in every mill is a safe worker."

MAJOR GENERAL GOETHALS DEAD

Major General George W. Goethals, U. S. A., retired, builder of the Panama Canal, died in his seventieth year at New York Jan. 21. General Goethals was chief engineer in charge of Muscle Shoals and the Panama Canal construction. He retired in 1916 but was recalled in 1917 as acting quartermaster general. He was later appointed director in charge of all war department purchases of railroad oversea shipments and all troop supplies.

HERE — THERE — EVERYWHERE

Albert E. Boynton, managing director of the Industrial Association of San Francisco, left Jan. 19 for a tour of the United States and thence to Jacksonville, Fla., where he will attend the Twelfth Semi-Annual American Plan Open Shop Conference, to be held in that city Feb. 2, 3 and 4.

In response to a request by the painters of Redwood City, the Sequoia Evening School in that city, has started a course for painters which will include mixing of colors, color effect, interior decorating and other practical painters' problems. Classes are held in the machine shop lecture room of the high school mechanical arts building.

Six hundred Frigidaire supervisors, dealers and salesmen will meet in San Francisco February 11, at Scottish Rite Hall to discuss electric refrigeration problems of 1928. This meeting is one of a series of eight regional conventions to be conducted throughout the United States in February.

A conference of all international labor unions to further organized labor's campaign for legislation to prohibit the use of injunction as strike breaking measures has been called by the executive council of the American Federation of Labor to meet in Washington on February 7. On the hope of obtaining favorable action at the present session of congress, the conference, which was authorized by the federation at its last convention in Los Angeles, will meet simultaneously with congressional committee hearings on bills dealing with the subject already introduced.

Plans for the adoption of a uniform plumbing ordinance by cities of San Mateo County were discussed in San Mateo, January 18, at a meeting of building inspectors, contracting plumbers and representatives of the Journeymen Plumbers' and Steam Fitters' Union of San Mateo. Another meeting will be held Jan. 31 in the office of Building Inspector Maurice Powers, San Mateo, for further discussion. It is proposed to call a meeting of all city attorneys in the county to pass on the legality of the proposed code.

"Bank Policy and Business" was the topic of an address delivered by Henry C. Cutting, banker, at the Jan. 17 meeting of the Berkeley Builders' Exchange. He urged the placing of bank credit under public control like other public utilities and described the present system of bank loans, criticizing its many flaws. He told of the non-political organization, the Federated Tribes of Pic-a-owish, which will co-operate with and political party that will support the public control of bank credit.

Architect Joseph J. Blick of Pasadena, accompanied by his wife and daughter, recently sailed on the Dollar Line steamer President Wilson, on a trip around the world. They will be gone six months, visiting the Orient, India, Egypt, the Holy Land and Europe.

Carl W. Cook, San Jose building contractor, fell forty feet to his death while inspecting a building in course of construction in S-First St., San Jose. Mr. Cook was a native of Michigan, aged 44 years and was in the general contracting business in San Jose for the past fourteen years. His widow, one daughter and a son survive.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department

ENGINEERS ELECT

Phil Schulyer was chosen president of the Society of Engineers at the regular monthly meeting in the Blue Room, Palace Hotel, San Francisco, Jan. 10. Glenn B. Ashcroft was elected vice president, Wm. G. Rawles, treasurer, and Albert J. Capron, secretary. Hans Graff and A. A. Robish were elected directors. With these officers the Society of Engineers, having a membership of 503 in the San Francisco Bay District, is planning on a profitable and big year in 1928.

LOS ANGELES ARCHITECTS ELECT

Pierpont Davis was installed as president of the Southern California Chapter of the American Institution of Architects at the thirty-third annual dinner meeting of the chapter, Jan. 10. Other officers elected were: vice-president, Edgar H. Cline; secretary, A. S. Nibecker, Jr.; treasurer, Fitch H. Haskell; director, William Richards. Alfred W. Rea and Sumner M. Spaulding are the two hold-over directors. Retiring president David J. Witmer presided at the dinner meeting and Sumner Hunt was host of the evening.

W. W. CAMPBELL ELECTED CHIEF OF SACRAMENTO BUILDERS

Walter W. Campbell, president of the Campbell Construction Co., has been elected president of the Sacramento Builders' Exchange. W. B. Scollan was elected vice president, L. F. Gould, treasurer, and L. S. Patterson, secretary. The other directors who will serve during 1928 are L. C. Hunter, Frank P. Maloney, H. W. Robertson, C. Prudhomme, Harold Dixon, Harry Johnson, Joseph Shepard, W. L. Triplett.

WASHINGTON STATE ARCHITECTS ELECT OFFICERS

Sherwood D. Ford of Seattle was named president of the Washington State Chapter, American Institute of Architects, at the closing session of the annual interscholastic conference and convention held Jan. 13 and 14 at Olympia. Mr. Ford succeeds Architect Harlan Thomas. Other officers named include: F. A. Naramore, first vice-president; Herbert A. Bell, of Tacoma, second vice-president; G. Albin Pehrson, Spokane, third vice-president; J. Lister Holmes, secretary; A. M. Allen, treasurer, and Clyde Granger, on the board.

SACRAMENTO MATERIAL DEALERS ELECT OFFICERS

Martin C. Bolts, assistant cashier of the Bank of Italy in Sacramento, is the new president of the Material Dealers' Credit Association of Sacramento for the term ending January, 1929.

O. A. Close of the Golden Gate Atlas Cement Company was elected vice president, and J. S. Spellman of the Superior Building & Loan Association was chosen secretary-treasurer. The Board of Directors includes Allyn L. Burr and Curtis H. Cutter, in addition to the officers. G. H. Bate is manager of the association.

Although in existence for only three years, the association, which is composed of leading material dealers, bankers and building and loan associations, has accomplished much, Bolts said, in ridding the city of irresponsible contractors and making it easier for material dealers and loan associations to extend credit.

SAN JOSE ENGINEERS ORGANIZE AMERICAN ASS'N. CHAPTER

With thirty members signed up, the San Jose Chapter, American Association of Engineers, was organized in that city January 19. W. H. Ball was named president; John S. Ross, vice president, and Michael Antonacci, secretary-treasurer. The chapter will hold weekly luncheon meetings at the Commercial Club. The meeting closed with a lecture on hydro-electric power development in California by Capt. George B. Baldwin.

VENTURA EXCHANGE ELECTS

Annual election of officers of the Ventura Builders' Exchange resulted as follows: A. H. Stovall, president; O. R. Brown, vice-president; R. Hawthorne, (re-elected) treasurer and Walter J. Biehl, secretary. Directors are: Roy Meyers, E. L. Vehlou, Joe Noyes, G. E. Penn, R. Hawthorne, A. H. Stovall, Hal Albro, O. R. Brown, M. A. Hall, W. H. Bruin and C. A. Markley.

SAN JOSE BUILDERS' EXCHANGE ELECTS OFFICERS

William Loos was elected president of the San Jose Builders' Exchange at the annual meeting of that body. T. H. Price was chosen vice president; Roy M. Butcher, secretary; J. A. Wagner, treasurer, and L. D. Canfield, sergeant-at-arms. William Howe is manager of the Exchange.

Members of the Exchange reported a fair business year in 1927 and were exceedingly optimistic in their outlook for the present year. A particularly good year was forecast for the Exchange which will move into new quarters fitted especially for its needs on South Third street. The exchange has already leased the second floor of the structure. Offices, renting spaces, blue-print department, lobby, assembly room and estimating room will be provided.

Meetings of the Exchange are held the first and third Wednesday of each month.

EAST BAY PROGRESS VIA THE AMERICAN PLAN

The close of 1927 marks the seventh year in the East Bay District—years almost completely free from industrial disputes and years of unprecedented industrial development, according to L. E. Crawford, secretary of the East Bay Industrial Association.

During the year the free employment bureau of the association placed more than 9200 men, making a total of over 80,000 men placed since its establishment in 1921. The bureau is in a position to provide skilled workers in any line and is a very important adjunct to the American Plan in that it removes the job control from the walking delegate and enables the men to secure employment irrespective of their affiliations, according to Crawford. The service is free to employer and employee.

Prospects in the East Bay District for the year 1928 are exceedingly bright, Crawford says. No labor difficulties are in sight and an extensive building program is now under way with many large projects to start in the near future. Over \$31,000,000 worth of American Plan building construction and more than 125 new industries is part of the 1927 record.

HERE — THERE —
EVERYWHERE

Electrical inspectors of Southern California will hold a meeting in Santa Barbara March 14.

The next regular meeting of the Orange County Builders' Exchange with headquarters in Santa Ana, will be held Feb. 7 at Newport Beach. Refreshment will be served at the meeting.

The Inglewood city council has voted to eliminate from the new plumbing ordinance a provision permitting the use of cement sewer pipe for house connections with main lines of the streets.

Fresno Chapter, American Association of Engineers, at the February 8 meeting will discuss a proposal to change the organization to permit affiliation of all engineers, regardless of other organizations to which they might belong.

Wm. H. Feigenson, general contractor, has been elected president of the Portland, Ore., Builders' Exchange. Harry Huer was elected vice president; R. F. Arndt, secretary, and Fred Shearer, treasurer.

California Certified Boiler & Elevator Inspectors will hold the 1929 convention in San Francisco. An invitation to hold the meet in San Francisco was extended to the organization by Jas. Rolph Jr., Mayor of San Francisco.

The National Brick Manufacturers Association will hold its annual convention at the Ambassador Hotel, Atlantic City, N. J., Feb. 6, 7 and 8. The Common Brick Manufacturers Association of America will hold its annual meeting at the Washington Hotel, Washington, D. C., Feb. 13 to 17, inclusive.

Next regular quarterly meeting of the California State Association of Concrete Pipe Manufacturers will be held in Visalia on a date to be set in April. The meeting will be attended by about one hundred and fifty members from every section of the state.

A proposed amendment changing the method of installation of officers was discussed at a recent meeting of the Modesto Chapter, American Association of Engineers. It will be acted upon later. The amendment would make nomination of officers by letter instead of by a committee.

In order to clear up obsolete sections of the city building code relative to seating in theatres and public buildings, the Sacramento city council has adopted a number of amendments. The changes pertain chiefly to cross aisles, but do not decrease the seating capacity of any public building. The need of changes came to the attention of the authorities in checking plans of the proposed Orpheum Theatre.

Bakersfield city council has amended the license ordinance to eliminate the license of \$100 per annum levied upon business houses selling electrical appliances. Under the unamended ordinance the license fee was assessed on "all businesses constructing, installing, altering or repairing electrical wiring and on all businesses selling or offering for sale electrical appliances." The change eliminated the latter classification and did not stipulate the fee to be charged under the first classification. According to members of the council the license fee of the first classification is stipulated elsewhere in the ordinance.

HALLS AND SOCIETY BUILDINGS

Plans Being Prepared
CLUB BLDG.

Cost \$15,000

MADERA, Madera Co., Cal.
Remodel present 1-story and basement church bldg for club, 1-story frame and stucco.

Owner—American Legion Bldg.
Architect—Swartz & Ryland, Rowell Bldg., Fresno.

NOTE:—The following near-comedy appeared in these columns on January 27, 1927. Some say it is worth repeating.

CLAUSS AND Kraus are butchers.

IN SACRAMENTO.

NEAR SANDY Pratts plants.

THAT PRODUCE clean, sharp sand.

AND CLEAN, hard rock.

AND CLEAN, washed gravel.

ALSO CLEAN concrete mix.

(SAND, ROCK and gravel mixed).

AND BETWEEN five and six.

OR JUST before dinner.

THEY ARE busy butcher boys.

BECAUSE EVERYBODY is phoning.

FOR THEIR dinner meat.

CLARENCE (SANDY) Pratt, President.

OF THE Pratt Building Material Co.

DROPPED INTO this butcher shop.

AND HEARD some of the talk.

MRS. A. Vacuum phoned.

FOR HER brains.

CLAUSS REPLIED.

"THEY ARE in the wagon."

WHEN MISS Venus De Milo phoned.

KRAUS SAID: "Tell Miss De Milo.

I'LL CUT off her leg.

IN A few minutes."

SANDY DIDN'T know.

HE MEANT her lamb's leg.

THEY WEIGHED Mrs. Jones' liver.

TIED UP Mrs. Bacon's pigs' feet.

THE PHONE rang again.

JOHNNY SAID, "How about.

MRS. NEVERPAY'S rib.

AND KRAUS told about Adam.

GIVING A rib to Eve.

SANDY THOUGHT she needed "Liver-wurst."

(GET IT? liver worse).

THIS TOOK the "heart."

OUT OF Mrs. Mutton.

AND YOU could see.

MR. HOL Stein's "tongue" wag.

MRS. R. U. Tenderloin asked.

FOR A "spare" rib.

MR. HOGG only grunted.

B. A. SWEETBREAD offered a "steer."

ON THE "stock" market.

BUT JOHNNY Clauss thought.

THAT IT was the "bull."

AND SANDY is afraid.

IF THE women.

DO NOT stop.

WEARING "UNBORN calf" skin coats.

THERE WILL be no beef.

IN A few years.

"I THANK you."

MISS N. O. Beef, that Johnny Clauss, St., tried to buy years ago. Miss N. O. Beef know how to reduce (girls take notice) and was never sold to the cruel butchers. However, she uses Sandy's sand, rock and gravel, enjoys life—you can do the same.

Plans Ready For Bids In One Week.
CLUB BLDG. Cost, \$125,000
SAN FRANCISCO, Broderick and Baker Streets, 200x300 feet.
 Two-story frame and stucco yacht club building.

Owner—St. Francis Yacht Club (Hiram W. Johnson).
 Architect—Willis Polk Co., 277 Pine St., San Francisco.

Bids will be taken for a general contract.

As previously reported, pile driving awarded to Renner Foundation Co., 628 Montgomery St., San Francisco.

Officials of the Club include: Commodore, J. M. Punnett; vice-commodore and chairman of Board of Directors, Hiram W. Johnson Jr.; rear-commodore, Hart L. Weaver and H. W. A. Dinning, Leon de Fremery, Jerome B. White, Leon E. Walker, Wilfred Page and Austin Moore as members of the directorate.

TURLOCK, Stanislaus Co., Cal.—Father Heslin Council, No. 2557 Knights of Columbus, has appointed committee to secure estimates of cost for a two-story store and lodge building.

SACRAMENTO, Cal.—George D. Hudnutt, Inc., 1915 S st., Sacramento, at \$90,000 awarded contract to erect three-story and basement brick hotel and (2) stores at 231 J st. for Chas. H. Crocker, San Francisco capitalist, represented in Sacramento by the Klein Realty Service, Inc., 1009 8th st. Structure will be leased to W. Idemoto for ten years. Will contain 70 rooms and two stores. Cooling system, steam heat.

Preliminary Plans Being Prepared
CLUB BLDG. Cost \$—
SAN JOSE, Santa Clara Co.
 Two-story frame and stucco club bldg. Owner—Hill View Country Club.
 Architect—Ralph Wyckoff, Growers Bk. Bldg., San Jose.

MERCED, Merced Co., Cal.—Local Post of American Legion will hold a series of socials to secure funds to finance purchase of furniture for club quarters. J. E. McNamara is commander of the post.

TURLOCK, Stanislaus Co., Cal.—Organization of Turlock Lodge, I. O. O. F., Building Association has been completed with A. P. Ferguson, as president. The purpose of the association is to finance erection of \$20,000 lodge building in South Broadway.

SEBASTOPOL, Sonoma Co., Cal.—City trustees will co-operate with Sebastopol Post, American Legion, in securing site and erecting modern clubhouse.

HOSPITALS

MADERA, Madera Co., Cal.—County supervisors appoint committee of six men and six women to investigate conditions at the county hospital grounds with a view to recommending construction of a new county hospital.

SAN FRANCISCO—Board of Health recommends to Supervisors a bond election for approximately \$5,000,000 for hospitals and hospital additions. Recommendations are summarized as follows: purchase of additional lands and erection of new health building in civic center, \$2,500,000; construction of nurses' home at San Francisco Hospital to accommodate 250 nurses and 250 institutionals, \$500,000; completion of additional unit at Relief Home at Laguna Honda, \$250,000; construction of 500-bed tuber-

cular hospital at Pulga Canyon and addition of 50-bed wing to present hospital at that location, and creation of a 150-bed cancer institute at the San Francisco Hospital (combined estimate) \$1,750,000.

TALMADGE, Mendocino Co., Cal.—California Pottery Co. and Gladding, McBean & Co., both of San Francisco, submitted identical (informal) bids to State Department of Public Works, Division of Architecture, at \$2352.14 to furnish tile roofing for special custodial building at state hospital. Whether the work will be readvertised or the companies invited to flip coin to secure the contract has not been determined. C. R. Frost of Monterey was low for placement of the tile at \$2084.

SANTA ROSA, Sonoma Co., Cal.—County Grand Jury will recommend to supervisors that county purchase an interest in the Weimer Sanitarium in Placer County instead of erecting its own tubercular hospital.

OROVILLE, Butte Co., Cal.—Architects Cole & Brouhard, Chico, have presented plans to county supervisors for maternity wards and surgical ward at county hospital; maternity ward addition will provide accommodations for 30 persons. The surgical ward will comprise a separate unit to the hospital. C. F. Belding is county clerk.

HOTELS

LOS ANGELES, Cal.—Architect Richard M. Bates Jr., 660 S. Vermont Ave., will complete plans and will be ready to take bids on general contract after February 7th for erecting height limit Class A hotel building at northeast corner of 7th and Berendo Sts., for Jean Morehouse, 692 S. Berendo St. It will contain 250 rooms, large lobby, cafe and a number of shops; 61x145 feet, reinforced concrete construction. Cost, \$650,000.

Preliminary Plans Approved
HOTEL Cost \$—

Official Proposals

NOTICE TO BIDDERS

(Furniture & Equipment—Sanger Union High School District)

Pursuant to an order of the Board of Trustees of the Sanger Union High School District, County of Fresno, State of California, given the undersigned at a regular meeting of the Board, notice is hereby given that the said Board will receive sealed bids or proposals for the following equipment and furniture for the high school building.

- (1) Electric Program Clocks.
- (2) Electric Lighting Fixtures.
- (3) Metal Lockers.
- (4) Stage Curtains and Fittings.
- (5) Auditorium Seats.
- (6) School Desks.
- (7) Laboratory Furniture.
- (8) General Office Furniture.

Bidders may submit figures on segregated items. All bids must be on forms supplied by the architects.

Specifications and bid forms are on file with the Clerk of the Board. Copies may be obtained at the office of W. D. Coates Jr., Company, Architects, 626 Rowell Building, Fresno.

All bids or proposals must be in the hands of the Clerk of the Board, on or before **February 6, 1928**, at the high school building, at which time and place they will be opened. All bids must be on forms prepared by the architects. They must be placed in sealed envelopes and the name of the bidder and the branch bid upon, must be clearly noted thereon.

A certified check, made payable to the Clerk of the Board, in an amount equal to at least 10% of the total amount of the bid submitted, must accompany each proposal.

The Board reserves the right to reject any or all bids received or to waive any informality in the same.

Dated at Sanger, California, January 19, 1928.

(Signed) **MILO W. BACON,**
Clerk of the Board of Trustees of the
Sanger Union High School District.

NOTICE TO BIDDERS

(Modesto Irrigation District—Stanislaus County)

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, Cal., until two o'clock p. m., on the 20th day of February, 1928, for furnishing and delivering to the Modesto Irrigation District supplies designated herein under Items No. E-8, E-9 and E-10. Bids will be received on any or all of the following items:

ITEM: No. E-8: Proposal for furnishing and delivering Electric Water Meters to the Electric Department of the Modesto Irrigation District, Modesto, Cal.

ITEM: No. E-9: Proposal for furnishing and delivering Distribution and small transformers to the Electric Department of the Modesto Irrigation District, Modesto, Cal.

ITEM: No. E-10: Proposal for furnishing and delivering Petroleum Products to the Modesto Irrigation District, Modesto, Cal.

Proposal blanks and detail specifications can be obtained from the secretary of the Modesto Irrigation District.

Contract will be let to the lowest responsible bidder, but the Board of Directors reserves the right to reject any or all bids.

Each proposal must be accompanied by a certified check or bidder's bond for 5 per cent of the amount of the bid, payable to the Modesto Irrigation District, as a guaranty that the bidder will, if successful, execute a contract within 10 days of notice of award and furnish a satisfactory bond of not less than 25 per cent of the contract price for the faithful performance of the work in accordance with the specifications, and a bond for 50 per cent, as provided in Chapter 302 of the Statutes of 1919 of the State of California, said bonds to be approved by said board.

The proposal must be marked "as directed in each separate specification,"

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

rected in each separate specification," and addressed to "Secretary, Modesto Irrigation District, Modesto, Cal."

Done in pursuance of an order of said Board of Directors of the Modesto Irrigation District, this 16th day of January, 1928.

MODESTO IRRIGATION DISTRICT.
By H. G. Jacobsen, president.
By C. S. Abbott, secretary.

NOTICE TO CONTRACTORS

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11:00 A. M., January 30, 1928, for gasoline storage plant at Crissy Field, California. Information on application.

NOTICE TO CONTRACTORS

(Distribution Line)

Notice is hereby given that sealed bids for rebuilding a Secondary distribution line for the Tri-County Tubercular Hospital located at Ahwahnee, Madera County, California, will be received by the Tri-County Hospital Committee at their office in the Tri-County Tubercular Hospital at Ahwahnee, Madera County, California, up to the hour of 1 o'clock P. M. of Saturday, February 11, 1928.

According to plans and specifications approved and adopted by said Committee on November 12, 1927, and are on file at the offices of the County Clerks of Madera, Merced and Stanislaus Counties and also at the Office of the Tri-County Tubercular Hospital Committee at Ahwahnee, Madera County, California, to which bidders are hereby referred.

The Committee reserves the right to reject any and all bids.

Dated: January 14th, 1928.

V. D. WHITMORE,
Chairman, Tri-County Tubercular Hospital Committee.

NOTICE TO BIDDERS

(C. I. Pipe—Eureka, Calif.)

Sealed proposals or bids are hereby invited by the Council of the City of Eureka, California, for the use of the Water Department, for furnishing Five Thousand (5000) lineal feet of eight (8) inch Class "B" Cast Iron Pipe with Bell

and Spigot joints, f. o. b. wharf, Eureka, California, delivery to be made not sooner than sixty days or later than ninety days after award of contract.

The said bids will be received in sealed envelopes marked Bids for Cast Iron Pipe, at the office of the Superintendent of Public Works of the City of Eureka, at 524 D Street, Eureka, California, up to hour of 5 o'clock P. M., Tuesday, February 7th, 1928.

Bids will be opened by the City Council of the City of Eureka at eight o'clock P. M., on Tuesday, February 7th, 1928. The right is reserved to reject any or all bids.

JOHN GRIFFITH,
Superintendent of Public Works.

NOTICE TO BIDDERS

For the shaping and concrete lining of approximately 2 miles of existing ditches and installing structures for improvement District No. 1, in the Turlock Irrigation District, Turlock, Calif.

Maze and Wren Ditch Improvement District

Notice is hereby given that sealed proposals for the doing of the work described in the schedule hereinafter set forth will be received by the Board of Directors of Turlock Irrigation District acting for Improvement District No. 1, at its office in the city of Turlock, state of California, at any time up to 10 o'clock a. m. of Saturday, February 11, 1928, at which time and place all bids so received will be opened in public by said board. Thereafter said board will let said work as indicated in the schedules below as a whole, to the lowest responsible bidder or bidders, but said board reserves the right to reject any or all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

The work for which proposals are hereby invited is divided into 2 schedules as follows:

Schedule No. 1—Consisting of approximately 105,600 square feet of 2-inch thick concrete canal lining.

Schedule No. 2—Consisting of approximately 5 structures, a total of 9 cu. yds. of concrete and 900 ft. B. M. bridge timber.

Said work is more particularly described in the plans and specifications therefor, which may be seen at said office of said Turlock Irrigation District.

A bidder to whom a contract for doing said work may be awarded must furnish bonds as required by law, to-wit: A bond in the sum of at least one-half of the estimated contract price to secure the payment of claims of material men, mechanics, and laborers, and a bond in the sum of at least one-fourth of the estimated contract price conditioned upon the faithful performance of the contract.

Each bid must be accompanied with cash or a cashier's or a certified check, made payable to the Turlock Irrigation District, for an amount equal to at least 5 per cent of the amount of the bid as guaranty that if the bid is accepted, the bidder will, within five days after notice of its acceptance, enter into a contract with the district in the form attached to said specifications and furnish the bonds aforesaid.

The quantities given in the aforesaid schedules are approximations only but will be used in computing the amounts of the deposit and the bonds hereinbefore required.

The contractor will be paid for the work bid, with warrants issued by the directors of the Turlock Irrigation District as provided in Senate Bill No. 5, "An act to provide for the organization and creation of improvement districts within irrigation districts organized under the 'California Irrigation District Act'; to provide for the construction of improvements therein, and for the levy of assessments on the lands of such improve-

ment districts." (Approved by the Governor May 25, 1927.)

Bids must be on the proposal forms attached to the specifications and must be in sealed envelopes addressed to the Board of Directors of the Turlock Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Turlock, Cal., January 18, 1928

By order of said Board of Directors,

ANNA SORENSEN,

Secretary of Board of Directors, of Turlock Irrigation District.

NOTICE TO BIDDERS

Construction Work for Improvement District No. 2

(The.. McPherson Ditch Improvement District)

IN THE TURLOCK IRRIGATION DISTRICT, TURLOCK, CALIF.

Notice is hereby given that sealed proposals for the doing of the work described in the schedules hereinafter set forth will be received by the Board of Directors of the Turlock Irrigation District acting for Improvement District No. 2, at its office in the City of Turlock, State of California, at any time up to 10:00 o'clock A. M. of Friday, February 10th, 1928, at which time and place all bids so received will be opened in public by said Board. Thereafter said Board will let said work as indicated in the schedules below, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and re-advertise for proposals or proceed to construct the work under their own superintendence.

The work for which proposals are hereby invited is divided into 5 schedules, as follows:

- SCHEDULE NO. 1.**
10,250 lineal feet of concrete lined ditch with perimeter of 13½ feet complete, with gates and bridges.
- SCHEDULE NO. 2.**
3300 lineal feet of concrete lined ditch with perimeter of 11.55 feet complete, with gates and bridges.
- SCHEDULE NO. 3.**
1200 lineal feet of concrete lined ditch with perimeter of 9.22 feet complete with gates and bridges.
- SCHEDULE NO. 4.**
2850 lineal feet of concrete lined ditch with perimeter of 9.22 feet complete with gates and bridges.
- SCHEDULE NO. 5.**
3300 lineal feet of concrete lined ditch with perimeter of 9.22 feet complete with gates and bridges.

Said work is more particularly described in the plans and specifications therefor, which may be seen at said office of said Irrigation District.

A bidder to whom a contract for doing said work may be awarded must furnish bonds as required by law, to-wit: A bond in the sum of at least one-fourth of the estimated contract price to secure the payment of the claims of material men, mechanics, and laborers, and a bond in the sum of at least one-fourth of the estimated contract price conditioned upon the faithful performance of the contract.

Each bid must be accompanied with cash or a cashier's or a certified check, made payable to the Turlock Irrigation District, for an amount equal to at least five per cent of the amount of the bid as guaranty that if the bid is accepted, the bidder will, within five days after notice of its acceptance, enter into a contract with the District in the form attached to said specifications and furnish the bonds aforesaid.

The quantities given in the aforesaid schedules are approximations only, but will be used in computing the amounts of the deposit and the bonds hereinbefore required.

The contractor may be paid for the work bid, with warrants issued by the Directors of the Turlock Irrigation District as provided in Senate Bill No. 5, "An act to provide for the organization and creation of improvement districts within irrigation districts organized under the 'California Irrigation District Act'; to provide for the construction of improvements therein, and for the levy of assessments on the lands of such improvement districts." (Approved by the Governor May 25, 1927).

Bids must be on the proposal forms attached to the specifications and must be in sealed envelopes addressed to the Board of Directors of the Turlock Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Turlock, California, January 17th, 1928.

By order of said Board of Directors,

ANNA SORENSEN,

Secretary of Board of Directors of Turlock Irrigation District.

NOTICE INVITING BIDS

(San Joaquin and Stanislaus Counties—Bridge)

NOTICE IS HEREBY GIVEN that sealed bids will be received by the Clerk of the Board of Supervisors of San Joaquin County, California, at the office of said Board in the City of Stockton, until 11:00 o'clock A. M., Tuesday, February 14, 1928, for the construction of a steel and timber bridge over the Stanislaus River. The bridge to be constructed under these plans and specifications is situated at the site of the Burneyville Ferry in Section 24, T. 2 S., R. 9 E., M. D. E. & M., and just north of Riverbank, California. The bridge is a joint bridge between Stanislaus County and San Joaquin County, California, each county to pay for one-half of the cost of construction.

All in accordance with the plans and specifications prepared by F. E. Smith, County Surveyor of San Joaquin County, and approved by J. H. Hoskins, County Surveyor of Stanislaus County, and adopted and filed by the Boards of Supervisors of San Joaquin and Stanislaus Counties on January 9, 1928, and to which bidders are more particularly referred.

All bids must be made on forms to be obtained from the County Surveyor's office in San Joaquin and Stanislaus Counties and presented in sealed envelopes marked to indicate the contents and addressed to the Clerk of the Board of Supervisors at Stockton, California.

All proposals must be accompanied by United States currency or certified check, or cashier's check made payable to the Chairman of the Board of Supervisors of San Joaquin County in the sum of 5% of the amount of the bid.

A bond of 25% of the contract price will be required of the successful bidder to guarantee the faithful performance of said contract, and a like bond to guarantee the faithful payment and satisfaction of the lawful claims of all persons for labor and material furnished in the prosecution of said contract.

A deposit of \$10.00 will be required on all sets of plans taken out.

The Board reserves the right to reject any or all bids.

By order of said Board of Supervisors of San Joaquin County made January 9, 1928.

EUGENE D. GRAHAM,
County Clerk and Ex-Officio Clerk of the Board of Supervisors of San Joaquin County.

By F. L. STRONG,
Deputy County Clerk.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICES TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Strub Building, Sacramento,

California, until 2 o'clock P. M., on February 14, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications thereto, to which special reference is made, of portions of State Highway as follows:

Sutter County, a causeway on the Yuba City to Knight's Landing Highway across the Sutter By-Pass in township thirteen north, range three east, consisting of four 45 foot removable timber truss spans and two hundred thirty-seven 21 foot timber trestle spans.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
R. M. MORTON,
State Highway Engineer.
Dated: January 16, 1928.

NOTICE TO BIDDERS

(Gridley Union High School District)

Notice is hereby given that the Board of Trustees of the Gridley Union High School District will receive sealed proposals to erect and build a High School Building in accordance with the plans and specifications on file at the office of the Secretary, Mrs. C. W. Chase, located at 830 Hazel Street, Gridley, Calif., and also in the office of the Architects, Davis-Pearce Co., Builders' Bldg., Stockton, Calif. Said proposals will be received up to 1:30 P. M. on Monday, February 6th, 1928, at the office of the Principal of the Gridley Union High School in the High School Building, and opened immediately thereafter.

All bids shall be submitted in accordance with the instructions as outlined in the specifications. Reference is hereby made to plans and specifications. The Board of Trustees reserves the right to reject any and all bids.

A certified check or bid bond for 10% of the amount of the bid must accompany said bid.

(Signed) C. W. THRESHER,
Clerk of Board of Trustees of Gridley Union High School District.

Congress of March 3, 1879.

S. F. BUILDING IN JANUARY TOTALS \$3,710,925

Private building construction under-
taken in San Francisco during the month
of January, 1928, involved an expendi-
ture of \$3,710,925, according to Henry
Shields, acting chief building inspector
of the Department of Public Works.
During the month 611 building permits
were granted.

January, 1927, activities involved an
expenditure of \$3,403,955 with 691 permits
issued. December, 1927 construction in-
volved the issuance of 611 permits for
improvements valued at \$2,582,015.

Following is a segregated report of the
January, 1928, activities, as compiled by
the Department of Public Works:

Class	No. of Permits	Est. Cost
A	4	\$ 835,000
B	1	200,000
C	17	1,028,475
Frames	243	1,443,770
Alterations	346	203,680
TOTAL	611	\$3,710,925

GLASS BLACKBOARDS EXPERIMENT

Experiments looking toward an im-
proved visibility of blackboards in public
schools have brought forth the translu-
cent blackboards on whose surface writ-
ing are plainly visible from all part of a
room.

The effect is obtained by abandoning
the usual opaque board and substituting
therefor a ground glass surface uniform-
ly illuminated from the rear. With the
customary room illumination, part day-
light and part electric, everything on this
blackboard is visible from all part of the
room.

Incidental advantages gained are: ease
of erasure, ability to use the surface as
a translucent screen for projecting lan-
tern slides with the possibility of adding
chalk lines to projected diagrams; ability
to intersperse chalk talks with lantern
slides without changing the general room
illumination.

PURCELL SUCCEEDS MORTON AS STATE HIGHWAY ENGINEER

C. H. Purcell of Portland, an engineer
of the United States Department of Pub-
lic Roads, has been named State High-
way Engineer to succeed Robert M. Mor-
ton, resigned.

Morton was appointed in 1923 by For-
mer Governor Richardson to succeed Ogden
B. Fletcher.

Announcement of Purcell's appointment
to the \$10,000 a year state portfolio was
made by E. B. Meek, director of the
State Department of Public Works. Meek
stated that the appointment is a part of
the plan of organization of the new de-
partment.

Purcell's appointment becomes effective
immediately.

Director Meek also announced the ap-
pointment of C. C. Carleton of Los An-
geles as chief of the division of contracts
and rights of way in his department.

Carleton formerly was attorney for the
State Highway Commission and is re-
garded as an expert in laws pertaining
to rights of way. Harry Encell of Oak-
land, present attorney for the commis-
sion, will work under his direction.

Purcell, who originally came from Los
Angeles, attended Stanford University for
a time and later graduated from the en-
gineering department of the University
of Nebraska. He has had twenty-two
years of civil engineering experience.

For the last fifteen years he has de-
voted his time exclusively to highway
engineering. He has served the Federal
Government for seven years in the Bu-
reau of Public Roads in the district com-
prising Oregon, Washington, Idaho and
Montana, with headquarters at Portland.
Purcell recently declined a position as
State Highway Engineer for Oregon.

Morton, upon announcement that his
resignation had been accepted, left for
Los Angeles.

BULLETIN ON HOME FINANCING NOW AVAILABLE

"Present Home Financing Methods" is
designed to assist those who must bor-
row in order to buy, build, or re-finance
their homes, and to present pertinent
information for those interested in im-
proving the home financing facilities of
their communities.

This publication, issued by the Build-
ing and Housing Division of the Depart-
ment of Commerce, considers home buy-
ers and builders in three groups accord-
ing to the percentage of the cost they
can give as an initial payment, and dis-
cusses the policies and methods of lend-
ing agencies available to each group.
Second and third mortgages and the
land contract method of purchases are
also described. The section "Choosing
a Home Finance Agency" guides pros-
pective borrowers in determining the
merits of various loan plans, and indi-
cates some of the pitfalls to be avoided.
Possible improvements in present facili-
ties and suggestions for their realization
are discussed in the conclusion.

This publication has been submitted
to experts in the home financing field
throughout the country, and has been
highly recommended as of distinct value
to prospective home buyers and build-
ers. Copies of the 15-page mimeograph
preliminary edition may be obtained from
the Division of Building and Housing
of the Department of Commerce on re-
quest.

WET LUMBER INCURS CRITICISM ON PACIFIC COAST

The difficulty in obtaining seasoned
lumber and the frequently deplorable re-
sults when green lumber is used are
causing considerable dissatisfaction with
wood construction on the Pacific Coast.
It is reported by the National Lumber
Manufacturers' Association. The Trade
Extension engineers of the association's
Western Division offices, confirm the re-
port after interviewing architects, con-
tractors and specifying buyers.

As the Trade Extension Department
feels that the matter of furnishing
properly seasoned lumber is of much im-
portance to the industry, in that it af-
fects the public's attitude toward lum-
ber as a whole, it is believed that ser-
ious study should be given the dissat-
isfaction which results from the inabil-
ity to procure dry lumber.

Many architects in Portland are reluc-
tant to recommend wood construction
because of the shrinkage which results
from green timber, according to William
D. Smith, of the Portland district of-
fice.

One architect reports abandoning
frame buildings because of the crack-
ing of plaster, and trouble with fitting
doors and sash, which, he says, is caused
by the use of green lumber.

Another states that while steel frame
costs more and has to be fireproofed
he thinks that the extra expense is
well justified on account of the lack of
shrinkage. It is alleged by several Port-
land architects that mills are furnish-
ing wet lumber, which has a shrinkage
of as high as 5 per cent.

Many like complaints have also come
from San Francisco and Los Angeles.

Reuben W. Smith, of the San Fran-
cisco office, reports that one engineer
who has had considerable difficulty be-
cause of the necessity of using partly
seasoned timbers is contemplating a
switch to steel.

STRESS ON STEEL REVEALED IN COLOR

Problems too intricate for the skilled
mathematician can now be solved with
colors.

A machine in the research laboratory of
the Westinghouse Electric and Manufac-
turing Company analyzes into beautiful
browns, yellows and green the stress ex-
erted on parts of complicated electrical
apparatus. Until the invention of this
device engineers could only guess at the
distribution of stress on vital units of
machines. Now the whole story is un-
folded to them in color on a screen.

R. V. Baud, research engineer who
built the analyzer, made it a practical
application of photo-elasticity, a phe-
nomenon known to physicists for some
time. A celluloid model of the metal part
to be studied is subjected to a light beam
which, after passage through a series of
lenses and crystals, casts a colored re-
flection of the unit.

When the model is at rest it appears
on the screen in shades of gray. As soon
as stress is applied, however, these som-
bre colors resolve into browns, yellows
and greens that vary with the force ex-
erted. Points of greatest stress, such as
the contracts, of moving gear teeth, ap-
pear in dark greens, which quickly dis-
solve into light greens, yellows, browns
and finally grays as the stress is relieved.

TECHNOLOGICAL CONTROL OF THE QUALITY OF CONCRETE - BY J. A. KITTS

BY JOSEPH A. KITTS, CONSULTING CONCRETE TECHNOLOGIST, KITTS & TUTTILL, SAN FRANCISCO, CALIF.

Concrete production is a manufacturing process. The manufacture of concrete of quality requires thorough, constant and understanding technical and practical control of proportioning, measuring, mixing, placing and curing, in co-ordination with and supported by, cement, aggregate and concrete testing as a daily routine part of such production control.

Qualities Demanded

Considering the various classes of structures for which concrete is suitable, the qualities demanded and to which attention should be given are: (1) Economy, (2) Durability, (3) Strength, (4) Density, (5) Imperviousness, (6) Weight, (7) Resistance to fire, ice, wear, chemicals, etc., and (very important) (8) Essential workability, flowability and cohesion of the fresh mix. The relative importance of each depends upon the purpose but, economy is always important. These qualities should be known with practical certainty before the concrete is placed instead of after, or not at all, as is the prevailing situation.

There is evidence that these qualities depend upon some or all of the following items of the composition and manufacture:

- Cement quality.
- Cement content.
- Cement to space occupied.
- Water-cement ratio.
- Quality of aggregates.
- Shape of aggregates.
- Maximum size of aggregates.
- Coarseness or fineness modulus of aggregates.
- Surface area of aggregates.
- Uniformity of grading of mixed aggregate.
- Character of uniformity of grading of mixed aggregate.
- Cement to voids in mixed aggregate.
- Cement to voids in fine aggregate.
- Sand to voids in coarse aggregate.
- Mortar to voids in coarse aggregate.
- Accuracy of measurement of aggregates, cement and water.
- Mixing time and efficiency of mixer.
- Temperature of curing.
- Moisture of curing.
- Efficiency of placing plant, and workmanship in mixing, placing and curing.

Economical Mixture

Economical mixtures, of the required quality in other respects, depend upon the utilization to the fullest possible extent of these conditions which economically benefit that quality, likewise, the best quality within the limitations of the requirements. The various empirical formulas for strength are apparently only of general significance, insure only an approximation of the strength expected and have no definite bearing on the other qualities. Any value of the one variable of the particular formula gives widely different results. It seems evident that the time is not ripe to predict the strength or other quality of concrete by formula, and formulas involving only one variable cannot possibly account for the many variables which affect any particular quality. More research and more complete data of concrete mixtures are required before we can accurately differentiate the various elements which affect the qualities.

Producing Concrete of Quality

The solution of the problem of producing concrete of quality, then, is not in empirical formulas but in thorough technological control of the manufacture, utilizing such knowledge as we have of the physics of concrete, necessarily con-

ducting concrete research as a normal operation of such control, and, in the development of a comprehensive concrete technology. Results on California projects of 1000 to 457,000 cubic yards have shown that this is the solution of the problem of producing concrete of quality with economy, and the requirements of these projects have brought forth many new developments in concrete technology.

These developments and their application are quite pertinent to the subject and will be outlined briefly. They are founded on the new conception of concrete production, for quality, as a manufacturing process requiring constant technological control. They are designed for manufacturing concrete to economical and definite standards of strength, density, impermeability, weight, durability, and of essential workability, flowability and cohesion of the fresh mix. They make concrete research a normal operation of construction with savings in cost over empirical control, with results sought and with greater uniformity in the required quality of the product. These developments and their application constitute the first economic concrete technology. They are enumerated as follows:

Concrete Materials and Mixtures

(1) A comprehensive physico-mathematics of concrete materials and mixtures:

This is the foundation of the testing, proportioning and measuring procedure. It is an application of fundamental physics and mathematics to the measurement and interpretation of the physical properties, relations and characteristics (a) of rock particles,—specific gravity, absorption, hardness, fusibility, solubility, etc.; (b) of mixtures of particles,—density, gradation of sizes, fineness modulus, surface area, silt, moisture, bulking by loose measure and moisture, and relations of absolute, dry-rodded, loose-measured and inundated volumes and of weights; (c) of mortar and concrete mixtures,—density, weight, water-cement ratio, consistency, yield, cement content, cement to voids in the mixed aggregate, cement to space occupied, sand to voids and mortar to voids in the coarse aggregate, permeability, predetermined strength at any age, etc.

(2) Co-ordination of the tests for the various physical characteristics of aggregates:

By this co-ordination, the tests of aggregates for density, specific gravity, absorption, moisture, silt, bulking, etc., are made with the least number of operations. It is neither expedient nor economical to test for density, then for specific gravity, then for weight per cubic foot, etc., as the time and labor of handling measurement and of calculation are increased a number of times over that actually required by a co-ordinated test procedure.

(3) Co-ordination of aggregate tests and aggregate mixture tests:

This reduces the number of test operations required.

(4) Co-ordination and systematization of aggregate, aggregate mixture, mortar and concrete mixture tests:

Test Operations Reduced

This greatly reduces the test operations required for the determination of the characteristics of a concrete mix,—weight, density, water-cement, cement-space, yield, cement content, granular

structure, voids relations, consistency, predetermined strength, etc., and expedites concrete testing with economy. It facilitates the maintenance of quality by the expedition with which a complete concrete test may be made.

(5) Co-ordination of field and laboratory measurements by actual dry-rodded, loose-measured and inundated volume, and by weight:

This makes it possible and practicable to accurately duplicate laboratory measurements in the field by weight or volume. It is essential, in laboratory maintenance of quality, that the field measurements of aggregates by loose-moist volume and the corresponding laboratory measurements by weight are identical in absolute volume of particles, likewise by other methods of measurement.

(6) An algebraic method of combining any number of sizes of aggregates for any uniform grading:

Accuracy Obtained

This makes it possible to calculate in a few minutes time the proportion of three, four or any number of sizes of aggregates to fit a grading curve or equation, and is more accurate, and much faster than the old graphical cut-and-try method. It is accomplished by employing the fineness modulus principle in connection with a grading equation such as the Talbot-Richart equation

$$p = (d/D)^n$$

(see "The Strength of Concrete, Its Relation to Cement, Aggregate and Water," by A. N. Talbot and F. E. Richart, Bulletin No. 137, Engineering Experiment Station, University of Illinois).

(7) The Kitts-Peugh grading equation, for grading of sizes of particles in a mixed aggregate,

$$r = \frac{1 - (d/D)^m}{1 - (a/D)^m}$$

in which (r) is proportion by absolute volume retained on screen opening of (d) inches, (D) and (a) are maximum and minimum sizes, respectively, and (m) is an exponent:

Uniform Grading

This provides for uniform grading of any fineness modulus and surface area. It is similar to the Talbot-Richart equation excepting that it limits the minimum size of the aggregate, excluding silt. A particular value of (m) provides the mixture of the required quality with the greatest possible economy under the fixed conditions.

(8) Proportioning aggregates for uniform grading by sizes and absolute volume of particles.

This is equivalent to grading by size and weight when the specific gravities of the individual aggregates are the same. It is a measure for maintenance of quality based on the idea that the physical character of a concrete mix (of a particular aggregate and cement) is fixed by the absolute volume and size gradation of the aggregate particles and the absolute volumes of cement and water. (See "Exact Basis of Concrete Proportioning," Building and Engineering News, January 7, 1928).

(9) Co-ordination of the fundamentals of the various theories of proportioning concrete mixtures:

This takes into consideration the voids theories, that the water-cement ratio, cement to space occupied, cement content, density; and, of density, surface area, fineness modulus, and uniformity of grading of the mixed aggregate. It

has many advantages over any one-theory proportioning method as it takes advantage of every established element which benefits quality and effects economy.

(10) Establishment of technological control as a daily routine of concrete production:

Maintenance of Quality

The man-hours of control are arranged to keep up with the changes in density, specific gravity, moisture and bulking of the individual aggregates, and the modifications of proportions, for maintenance of quality, required by these changes. By this technological control, the physical characteristics of a proposed concrete mix, density, weight, water-cement, workability, minimum probable strength, etc., are determined before the concrete is placed, thus insuring quality and effecting economy. The effectiveness of this control in the maintenance of quality depends upon items (1) to (9) and also upon scientific insight into the laws of concrete mixtures and practical "concrete sense." One man-hour of laboratory control is required for every 50 yards as a maximum under favorable conditions. Control costs vary from 3 cents to 40 cents per cubic yard, depending upon the production rate and other conditions.

(11) Co-ordination of aggregate and concrete production control on major projects:

Technical production control of the aggregates serves to maintain the uniformity and other qualities of the product and the quality of the concrete may, by this co-ordination of production, be maintained with better uniformity and with greater economy than possible by control of concrete production alone.

(12) Other practical and scientific elements of aggregate and concrete manufacturing control, specifications, plant layout, apparatus, etc., to maintain the uniformity of quality and reduce the margin of excess cement required.

Aggregate and Concrete Production Control

The system of aggregate and concrete production control, applying these developments, consists of:

(1) Maintenance of a central cement, aggregate and concrete testing laboratory at the major structure of the project; field laboratories for moisture tests of aggregates, slump tests of concrete and the making and preliminary curing of test specimens; and an aggregate test-

ing laboratory at the aggregate plant.

(2) Preliminary research tests of cements, aggregates, and of aggregate, mortar and concrete mixtures,—varying grading, fineness modulus, cement and water content, to determine the most economical mixtures of the required physical properties and workability; determination of strength, density, weight, water-cement, cement-space, consistency, yield, cement per cubic yard, economy factors, diagrammatic analysis of test results, etc.

(3) Maintenance of one man-hour laboratory control for every ten to fifty cubic yards of concrete depending upon the conditions.

(4) Routine tests of aggregates as received, for specific gravity, density, fineness modulus, grading, moisture, bulking, and absorption, in connection with silt and organic matter tests at the aggregate plant.

(5) Calculation and readjustment of proportions of aggregates and water as required by changes in grading, density, specific gravity, moisture and bulking of the individual aggregates.

(6) Laboratory duplication of each change of proportions to check the physical characteristics expected for that grading, cement and water content.

(7) Routine slump tests and making and breaking periodical test specimens.

(8) Organization and systematization of laboratory control with measuring, mixing, placing and curing, maintenance of chronological records of quality, development of research data, etc.

Local Projects Cited

The quality of concrete has been maintained by this system of control on the Exchequer Dam and Yosemite Valley Railroad relocation of the Merced Irrigation District (457,000 cubic yards), on the Melones Dam of the Oakdale and South San Joaquin Irrigation Districts (90,000), on the Oakland-Alameda Estuary Subway (75,000), and on other projects, all in California. An enterprising distributor of ready-mixed concrete in San Francisco has installed this system of laboratory control and supplies "certified concrete," certifying strength, water-cement ratio, barrels of cement per cubic yard, grading, fineness modulus, weight, density, etc., as required. Unprecedented results in strength, weight, density, economy and other qualities have been obtained and maintained with uniformity.

HANDWRITING ON THE WALL

The following communication is contributed for publication in these columns by Art. Strong, 2004 Market street, San Francisco, who furnishes the caption—above—HAND WRITING ON THE WALL.—Editor.

About 30 years ago, when reinforced concrete was yet in the experimental stage, Mr. George W. Percy, a prominent San Francisco architect, since passed away, wrote a remarkable article on "Coming, The Age Of Reinforced Concrete."

Were he alive today, he would see such an age that would surpass his fondest dreams. The use of natural stone, brick, cast iron supports, etc. In all engineering work is passe, and with few, trifling exceptions, all building construction in and about San Francisco is of reinforced concrete.

Better and more scientific methods of testing materials, more efficient methods of making the forms and placing the reinforcing, with more up-to-date methods of handling the aggregate have brought concrete construction to a science.

The land owner in the country whose land contains much sand and gravel, sells these materials or leases his acres to the building supply man, and at a profit in excess of returns from his most fertile land. Meanwhile the building industry is slowly but surely coming to the

time when there will be a shortage of sand, gravel, etc.

During the late World War concrete ships were a demonstrable fact, and at that time the first light, strong durable aggregate was tried and tested, and declared fit for the best concrete work, but after the armistice the use of concrete ships was discontinued.

The use of specially burned clay as a substitute for rock, gravel and sand is destined to replace the heavier aggregates wherever lightness, strength and durability are required, as this material has the following points in its favor:

Fireproof, easily cut, non-conductivity, soundproof, heat, cold and damp resistant and vermin proof, light in weight, perfect in adhesion and easily handled, with high crushing strength, lower building cost, availability, etc.

In steel structures, the weight of steel can be materially reduced and the shoring and temporary supports made lighter.

Burned clay used for light concrete must not be confused with brick clay, as concrete aggregate is made of special clay by a special process and produces a lighter and harder concrete than crushed, burned clay brick.

Coming: The Age of Light Durable Concrete.

HERE — THERE — EVERYWHERE

Between 450 and 500 delegates from all parts of California will attend the annual convention of the California Building Trades Council to be held in Petaluma next March.

The Architects' League of Hollywood has decided to hold its annual architectural exhibition at the California Art Club on Olive Hill, March 13 to 18, inclusive.

Next regular meeting of the Orange County Builders' Exchange will be held Feb. 10 at the Southern Seas Club, Newport Beach, it is announced by Morris Shelton, secretary of the organization.

According to reports from Los Angeles, the Mexican Federation of Labor is understood to be cooperating with the American Federation of Labor this year in a drive to enroll from 6000 to 8000 Mexicans in Los Angeles and Southern California as members of the federation.

The annual convention of the Arizona Lumbermen's Club will be held March 16, 17 and 18, instead of during February as originally announced.

H. A. Setter, Santa Barbara city plumbing inspector, has prepared an amendment to the plumbing ordinance providing for inspection of all gas heater installations, both new and old heaters, when repaired by plumbers. City inspectors will require installations with proper vents and protection against the danger of fire.

Annual election of officers of the Hayward (Alameda County) Builders' Exchange will be held Feb. 7, it is announced by E. P. Whitman, secretary.

Coast Counties Master Plumbers' Association held a meeting in Watsonville, Jan. 25 with representatives from Salinas, Monterey, Pacific Grove, Santa Cruz, Gilroy and Hollister in attendance. Topics of importance to the trade were discussed.

A. A. Wesendunk, 57, retired building contractor of San Francisco, was found dead on his yacht at Vallejo, Jan. 24. Death was due to a heart attack. Two sons and a daughter survive.

Lewis H. Greenwalt, 56, died in Sacramento Jan. 29, following an illness of more than a year. Greenwalt's contribution to Sacramento's progress included superintendence of construction on the Forum Building and the Union Stage Depot. He was also superintendent of construction on the more important projects undertaken in the Northern California district. A widow, daughter and four sons survive.

W. S. Kendall of Stockton, capitalized for \$50,000, has been incorporated, to deal in office fixtures and furniture, including safes and bank vaults. Directors are: W. S. Kendall and C. C. Williams of Stockton, V. E. Kohler, Robert A. Gardiner and W. B. Steiger, Sacramento. Headquarters of the company will be located in Stockton.

Quigley Furnace Specialties Co., 26 Cortlandt St., New York, is marketing the Quigley Bitumen Gun which carries the "spray" idea of applying liquids into a new field—that of applying bituminous products as protective coatings to foundations, walls, roofs, dams, bridge piers and abutments, pipe lines, penstocks, vats, vaults, etc.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

The Los Angeles Board of Education has discontinued the practice of allowing a bond to accompany bids for construction work, and in the future will accept only a certified or cashier's check as a guarantee.

Michael Murphy, sewer and water workworks contract or of Berkeley, has applied for a patent on a rapid and simple method for jointing and laying vitrified-clay sewer pipe with flexible jointing mediums.

Eighteenth annual convention of the County Supervisors Association of California will be held in San Francisco, March 6-7-8. Following the close of the convention the members will go by special train to Los Angeles to attend the Western Road & Equipment Exposition.

On Jan. 15 there were 50 strikes before the U. S. Department of Labor for settlement and in addition 10 controversies which had not reached the strike stage. The total number of cases pending was 60 of which five were new. The new cases involve miners, printers, electrical workers, electric railway works and metal polishers.

Three cargoes of Russian spruce arrived at New York during the fall of 1927, some 7,000,000 feet in all. To the middle of December shippers' agents had been unable to dispose of it. A Swedish cargo of 3,000,000 feet is also in difficulties, boards being cut five-eighths scant.

Pioneer Lumber & Box Co. of Mt. Shasta has been sold and will hereafter be operated as the Mt. Shasta Pine Manufacturing Co. The Pioneer concern was one of the first plants in Siskiyou county and operated continuously for a number of years. The sales includes all lands of the company with about ten thousand acres of standing timber. Frank Ball has been elected president of the new company and E. W. Spaulding of Grants Pass, Ore., secretary. Directors of the company are: Wm. Geisendorfer, Louis Solari and S. W. Morrison.

Raymond P. McIntosh, hydraulic engineer, formerly connected with the Department of Engineering of the City and County of San Francisco, died suddenly at Banning, Cal., while on a vacation trip. Death occurred Jan. 28. Mr. McIntosh was a graduate of the University of California. He assisted in the construction of the O'Shaughnessy Dam and other important units of the Hetch Hetchy project for the city of San Francisco. A widow and son survive.

The 1927 construction volume was the second highest in the history of the country, according to F. W. Dodge Corporation. For the entire country, total 1927 construction volume was estimated a little over \$6,800,000,000, being a loss of 3 per cent from 1926.

Dr. Wm. F. Durand, member of the Federal Fact Finding Commission, addressed the membership of the American Society of Mechanical Engineers, Jan. 26. He discussed the Boulder Creek dam and the All-American Canal projects. Dr. Durand advocated the dam as a means of controlling the Colorado river and estimated the total cost of a dam 550 feet high capable of impounding 26,000,000 acre feet of water at \$125,000,000.

Redwood producers start the year 1928 with 5,986,000 ft. cut, 4,985,000 ft. shipped and 5,652,000 ft. sold for the week ending Jan. 7, while 29,676,000 ft. ordered was unshipped, some 20 million ft. less than normal. The 16 mills reporting also cut 1,540,000 ft. of whitewood, shipped 982,000 ft., sold 2,864,000 ft., and had 5,848,000 ft. of unfilled orders on the books.

San Francisco's imports were \$160,134,000 and her exports \$126,211,000 during the first nine months of 1927, according to the San Francisco Chamber of Commerce which organization bases its estimate on U. S. Chamber of Commerce statistics. The same figures placed Los Angeles' exports for the same period at \$88,847,000, and her imports at \$36,105,000; Seattle's exports at \$93,334,000 and her imports at \$185,192,000. The total exports for the United States during the nine months were announced as \$3,508,730,000 and the imports \$3,153,080,000. United States exports showed an increase of 3 per cent over the corresponding period of 1926, while the imports showed a decrease of 5 per cent.

Governor C. C. Young has requested B. B. Meek, state director of public works, and Alexander R. Heron, state director of finance, to investigate the advisability of setting up a state owned and operated plant. Such a move was proposed at the 1927 legislature by a bill sponsored by Senator J. M. Inman, of Sacramento.

Declaring that the highway construction program can be adequately financed, by the present gas tax, B. B. Meek, director of the Department of Public Works, is on record against the principal of toll bridges as a California policy. Meek also urged against the proposed \$40,000,000 bond issue to build a new "high speed" highway from San Francisco to Los Angeles, and voiced opposition to the Fellom \$10,000,000 grade crossing measure, on which California will be asked to vote next November. The grade crossing bond proposition, Meek said, is unnecessary inasmuch as the Highway Commission can take care of the problem.

TRADE NOTES

Thomas Albert Work Jr. and Stuart Albert Work will operate from Light-house and Davis Aves., Monterey, under the firm name of Work Lumber Company.

Oakland Harbor Construction Co., Inc., of Oakland, capitalized for \$100,000, has been incorporated and will engage in general harbor and ship construction. Directors are: A. J. Mervy, Oakland, and J. L. Semorile and Kathryn Donovan of San Francisco.

Copper and Brass Research Association of New York announces the opening of Pacific Coast offices at 909 Architects' Building, Los Angeles. The branch will be under the direction of Timothy G. Turner. The Pacific Coast office is at the service of architects, contractors and owners who desire information connected with the application of copper, brass or bronze in building, electrical or other fields.

E. E. Bowe has been assigned to the Los Angeles district in connection with the trade extension activities of the National Lumber Manufacturers' Assn.

Mount Shasta Pine Co., capitalized for \$300,000, has been incorporated. Directors are: Frank Ball, E. W. Spaulding and other businessmen of Mount Shasta. The company will engage in a general logging and lumber manufacturing business.

Monolith Portland Cement Co., with headquarters in Los Angeles, will expend \$350,000 in enlarging the plant in the Tehachapi Valley, 50 miles east of Bakersfield. The company is now operating with a payroll of 300 employees.

Directors of the Pacific Coast Steel Co., have approved a \$500,000 appropriation to finance erection of an additional unit to the South San Francisco plant for the manufacture of bolts, nuts, rivets and various types of hardware. The additional quarters will have an output of approximately 3000 tons a month.

Jas. E. Butler, formerly associated with the Columbia Steel Co. of Pittsburg and San Francisco, has been named assistant to H. H. Whiting, president of the Best Steel Casting Co., Oakland, manufacturers of steel and iron castings.

Everlastone Products Corp., 1400 Moreland ave., Baltimore, Md., is marketing the Everlastone Incinerator for homes. According to A. F. Rankin, general manager of the company, the incinerator can be purchased for less than \$100 for a new job and for approximately \$180 in a ready-built house.

E. Earl Glass, manager of the Southern California Rock Products Association, has established new quarters in the Hibernian Bldg., Los Angeles. Glass will continue to manage the affairs of the Southern California Rock Products Association. In addition he will organize and manager other associations.

Winfield Scott has been appointed director of public relations of the Western division of the National Lumber Manufacturers' Association. His jurisdiction extends over California, Oregon, Washington, Arizona, Nevada, Utah, Idaho and Montana and also to British Columbia. His headquarters will be in San Francisco. Scott is known in California both as a writer and as a speaker on forest topics.

The Bradford Machinery Co. is the name of a new company organized in Terra Bella (Tulare county) to do a general pump and machinery business. The company will combine the equipment of the N. T. Bradford Machine Co. of Terra Bella with the equipment of the Ulmer Machinery Corp. of Porterville. Headquarters will be maintained at Porterville, the Terra Bella shop being discontinued. The company will cover machinery contracts in Tulare, Kern, Kings and Fresno counties. The Bradford Co. is composed of N. T. Bradford of Terra Bella; T. A. Alexander, Guy Knapp and Allan F. Bullard of Porterville, and Chester Dowell of Lindsay. The company will continue to handle Western pumps in addition to Ulmer pumps which have been manufactured both at Porterville and Santa Ana.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department

WATER WORKS MEET SET

The next meeting of the California Section of the American Water Works Association will be held in San Francisco, the week of June 11th, 1928, in conjunction with the annual convention of the American Water Works Association. Wm. W. Hurlbut, 207 South Broadway, Los Angeles, is secretary.

ENGINEERS TO INSPECT DAM

Stockton Chapter, American Association of Engineers, will visit the Lancha Plana dam project, now in course of construction, of the East Bay Municipal Utility District. The inspection will take place Feb. 5. Luncheon will be served after the inspection tour.

RICHMOND BUILDERS' EXCHANGE FEATURES ORIENTAL NIGHT

"Oriental Night" was celebrated by members of the Contra Costa County Builders' Exchange at Richmond January 26. About 100 members and their friends attended the social. Walls of the exchange quarters were covered with Chinese hangings and flowers and incense bowls decorated the tables. A four-course Chinese dinner was served. Music and entertainment were features of the evening.

OAKLAND-ALAMEDA ESTUARY TUBE MARVEL OF ENGINEERS

The new Oakland-Alameda tube beneath the estuary is described as "a marvel of engineering skill" by George E. Tonney, president of the San Francisco Bay Region Society of Engineers.

Mr. Tonney's testimonial followed an inspection trip of 300 engineers. They were taken through the tube by Lochiel King, resident construction engineer.

Engineering leaders of the society said that the tube construction could well be classified with the big engineering feats of the country as a "masterpiece of workmanship."

They spoken admirably of the fine work done by George A. Posey, Alameda county surveyor, and chief engineer of the tube job, King, the construction engineer, and their staffs.

BERKELEY TRADE EXTENSIONS CLASSES SUCCESSFUL

More than two hundred tradesmen who are actually engaged in the trades in which they are receiving instruction are enrolled in the trade extension classes which are being conducted at the Berkeley Evening Trade School under the direction of the vocational department of Berkeley public school, according to G. C. Mann, director of vocational education. The classes are under the immediate supervision of D. G. Young, head of the industrial department of Berkeley High School, and are held in the Berkeley high school shops, Grove St. and Allston Way, Monday, Tuesday, Wednesday and Thursday evenings. The classes in electricity, steel square and trade science and concrete construction, are proving especially popular. A new class in sheet metal work which was opened for the first time this semester was practically filled by the second session. Other courses which are being offered are listing and estimating, plan-reading and drawing, slide rule and engineering mathematics, alternating current electricity, and installation of motors. A limited number of new enrollments will be accepted in these classes and those interested should enter at once.

S. F. MASONS AND BUILDERS HOLD ANNUAL BANQUET

The annual banquet of the San Francisco Masons and Builders' Association was held at the Hotel Richelieu, Jan. 28.

Emil Hogberg, president of the association, opened the affair with a brief address of welcome following which he introduced John Gwynn of N. Clark & Sons, who catered to the ladies present with a poetical poem.

W. S. Dickey Clay Manufacturing Company played host to the ladies in the way of a clothes brush and Henry Cowell Lime & Cement Company treated the men folks to cigars.

Following the banquet dancing was enjoyed until midnight.

Credit for the success of the event is due to Walter N. Reed, secretary of the association, who carried the program out on schedule.

CONTRACTORS COMPLETE MERGER FOR \$100,000,000 CONSTRUCTION PROGRAM

Formation of the largest engineering and construction firm in this country is announced by Arthur W. Thompson, president of the United Gas Improvement Co. in Philadelphia.

Four companies outstanding in the field of general engineering construction and public utilities have combined their interests to form a new organization, to be known as United Engineers and Constructors, Inc.

The firms involved are the U. G. I. Contracting Co. of Philadelphia; Public Service Production Co. of Newark; Dwight P. Robinson & Co., New York; and the Day & Zimmerman Engineering & Construction Co., Philadelphia.

The new company is launched with contracts in hand amounting to more than \$100,000,000.

Dwight P. Robinson, head of the company which bears his name, is president of the new organization. A. W. Thompson, who announced the new corporation, is chairman of the board. The other directors are Thomas N. McCarter, president of the Public Service Corp. of New Jersey, Samuel T. Bodine, chairman of the board of the United Gas Improvement Co., Paul Thompson, a vice president of the United Gas Improvement Co. and president of the Philadelphia Gas Works Co., and John E. Zimmerman, president of Day & Zimmerman, Philadelphia.

General offices of the United Engineers & Constructors, Inc., will be in Philadelphia. Offices also will be located in Chicago, Atlanta, New York, Los Angeles, Houston, Newark, Pittsburgh, Buenos Aires, and Rio de Janeiro.

Outstanding contracts to be completed by the new company include the construction of large dams on the Ohio river for the United States Government, extensive hydro-electric development on the Housatonic river, Connecticut, important construction operations in Argentina, large office and apartment buildings in New York and other cities, and construction of a Consulate building in Seville, Spain, for the United States Government.

Wm. Bear of the San Francisco office of the Pacific Gas & Electric Co., addressed the Sacramento Valley Electrical Society in the Elks' Building, Sacramento, Jan. 11. His topic was "Radio Interferences—Its Causes and Its Cures." H. E. Brillhart, president of the society, presided at the dinner served in connection with the address.

ALONG THE LINE

A. A. Clark has been appointed electrical inspector of Newman (Stanislaus county) succeeding G. A. McIntosh, resigned.

Sidney B. Noble and T. Newsom, architects, formerly located in the Nevada Bank Bldg., San Francisco, announced removal of offices to 1615 Broadway, Oakland.

M. J. Tierney has been appointed superintendent of public buildings by the San Francisco Department of Public Works. Tierney succeeds C. W. Meehan, who retired because of disability. Tierney's duties commence Feb. 1.

Howard F. Cozzens, county surveyor of Monterey, is recovering following an operation for appendicitis. He will return to his office in about six weeks, according to his physician.

J. Emil Petersen, manager of the Port Cost Lumber Co., at Vallejo Junction, died at his home in Oakland, Jan. 22, at the age of 65 years.

J. Emmett Olmstead, editor of the Petaluma Argus, has resigned as a member of the California State Industrial Accident Commission. His successor is yet to be appointed.

The facilitate building in the country club area, the Del Monte Properties Co., has developed an architectural department under the supervision of William Otis Raiguel with headquarters at the Hotel Del Monte. The department will prepare and supervise construction of homes for country club members.

W. A. Richmond, civil engineer, has opened offices at 261 Davis St., San Leandro, and will engage in the practice of civil engineering and surveying. Previous to coming to San Leandro, Mr. Richmond was associated for ten years as assistant city engineer of Salt Lake City and for four years with the Utah State Engineering Department, in addition to five years with the American Smelting & Refining Company as construction engineer.

Chas. H. Lee, San Francisco consulting engineer, has been retained by the Berkeley city council as consultant on the \$500,000 storm sewer program about to be launched in that city. Mr. Lee for the past year has been a member of a board of three engineers studying the sanitary and storm sewer problems of Oakland.

M. G. Riggs, city plumbing inspector of Hayward (Alameda County) is making changes in the city plumbing code and these will be presented to the city trustees shortly for adoption. The present ordinance is not entirely satisfactory, it is said, due to the fact that it applies to old-fashioned plumbing methods and materials.

W. A. Bechtel, San Francisco contractor, was elected president of the Associated General Contractors of America, at the annual convention of that organization in West Baden, Ind., Jan. 27. E. J. Thomas of Memphis, Tenn., elected vice-president, died suddenly after assuming the position of vice-president. Death was due to a heart attack. Mr. Bechtel, as president, succeeds Sumner Solitt of Chicago and Los Angeles. Vice-presidents elected with jurisdiction over states in their territory included W. H. Wattis, Ogden, Utah.

STEWART INSO BOARD COMPANY NOW OPERATING AT FULL CAPACITY

BY SIDNEY D. WELLS, DIRECTOR, PAPER MILLS LABORATORIES, INC.,
FORMERLY OF FOREST PRODUCTS LABORATORIES
OPERATED BY U. S. DEPT. OF AGRICULTURE

Completion of the mill of the Stewart Inso Board Company of St. Joseph, Mo., is announced. The mill was completed last August and since that time the company has been engaged in overcoming and working out several technical "bugs" that have shown up in the process of manufacture. These difficulties have now been entirely eliminated and from now on rapid progress toward quantity production will be made. The story of tests made from mill-run samples by the Armour Institute of Technology, published herewith, gives one a complete summary of the Stewart product—the process of manufacture, etc.—EDITOR.

From the earliest beginnings of civilization straw has played an important part in the habitation of both man and beast and while other types of building have come and gone we find straw still used to a large degree on account of its great warmth retaining properties and general distribution. Until recently, however, straw has been used largely without much fabrication, whether it has been for covering the cattle shed on the western ranch or the thatched roof of the English country cottage. In its natural state it has wonderful properties for preventing the escape or passage of heat and is unexcelled in this respect by any natural vegetable materials. The fabrication of structures designed to take advantage of the insulating properties of straw, however, has always been a problem which has confined it to primitive uses.

Product a Heat Insulator

Modern manufacturing methods and scientific investigation have at last overcome all obstacles and the advantages of straw as a heat insulator are available to the builder in a form that can be easily handled while at the same time it is free from the disadvantages of unfabricated straw. In addition the product possesses the strength needed for walls or roof and it is capable of supporting plaster, stucco or roofing materials as well as for use as sheathing and interior finish. It can also be used for deadening sound in buildings and for general structural and decorative purposes wherever required.

Process of Manufacture

The process for fabricating this straw pulp product consists of first softening the straw by digestion in rotary globe shaped vessels under steam pressure with a solution of suitable chemical. This treatment loosens the bonds between the millions of individual fibers and cells in the straw and converts the glutinous and siliceous compounds into an excellent adhesive which later in the process serves to bind the fibers together and renders the board waterproof.

The cooked straw is dumped from the rotaries and shredded and beaten by suitable machinery to separate the material into its elementary fibers and cells. In this operation it is partly washed and thoroughly sterilized—but care is exercised to preserve the binding and water proofing material in the mass. This material is then set upon the fibers by use of the proper reagent and the mass run over a special board machine in which it is formed into a continuous board and the excess of water squeezed out. The board is then passed through a tunnel drier 1000 feet in length by means of live rolls and is subjected to a heat of 500 degrees F. It emerges at the other end a continuous board 12 feet wide and one-half inch thick which is then cut to marketable size.

Value of Straw

Insulating materials are made from numerous waste materials but none of them have the fine fibrous structure characteristic of straw or as high an insulating value or in other words as low heat conductivity and at the same time equal strength. Tests which have been made on the straw pulp board give the lowest heat conduction value of any tests made on similar material now on the market. In addition to its physical properties, the cooking and water-proofing process used in its manufacture renders the board vermin and insect proof. We thus have available a new material which should prove an important factor in building construction and conservation of material.

This board as now made has a density of between 16 and 17 pounds per cubic foot and is 7/16 of an inch thick. It is cut into panels four feet wide and any length that can be conveniently shipped. Its weight per thousand square feet will run from 580 to 620 pounds. Its heat conductivity is such that one inch thickness of this board is the equivalent of three inches of ordinary wood sheathing, or 18 inches of brick, or 32 inches of concrete. In other words one layer of this material is equal to three thicknesses of ordinary sheathing lumber with building paper in between to prevent the passage of air through cracks and knotholes. The structural strength of this insulating board with its long, tough, interlaced fibers and its millions of concealed dead air cells is such that it builds a wall of much greater resistance than that of ordinary building materials. Forces exceeding 800 lbs. per square foot are necessary to pull apart the bond between the fibers. Strips of the board 6 inches wide without plaster with supports 12 inches apart are capable of sustaining a concentrated load of the middle of 35 pounds with a deflection of only one inch. With plaster the stiffness of the board is materially increased. On account of the fact that the straw pulp board is made in panels 4 feet wide, walls constructed with standard studding on 16 inch centers are more rigid and need less bracing than walls constructed of joists and ordinary wood sheathing in the usual manner.

Tests Are Cited

In view of these tests it is evident that this new product is a substantial building material and the opportunity for its use in building construction is almost unlimited. In comparing the relative merits of various types of building material it is essential that the insulating value should be considered in conjunction with its weight per cubic foot and its strength. Taking all these factors into consideration the straw pulp product is unexcelled.

In summarizing the merits of Inso Board the following characteristics stand

out prominently: (1) It is composed of straw material fabricated in such a manner that the fine fibrous structure always characteristic of straw is retained and on account of the thorough intermeshing of these long tough fibers a board of unusual strength results. (2) On account of the fine cellular fibers each carrying quantities of minute cells and securely interlaced, the board is composed of millions of small air cavities which give it a higher insulating value than is possible with other fibers. (3) The process used in manufacture takes advantage of the natural bonding and water proofing substances always characteristic of straw and a moisture proof board of well bonded fibers is obtained. (4) On account of the fine, long, characteristic fibers or straw it is capable of withstanding greater stress and deflection than would be possible if made of coarser and shorter fibrous material. (5) On account of its unusual strength and rigidity as well as its greater insulating value it serves as a multiple purpose board. In other words it gives greater resistance to the passage of heat, cold and sound, and at the same time adds greater structural strength to any form of construction than the materials it replaces.

Production Unlimited

The Structural Insulating Board, the manufacture of which is above described, can, due to availability and annual reproduction of its raw material, be produced in unlimited quantities and at a cost which may result in an economic revision of present day building construction.

Reports of all statistical agencies indicate that the coming year will see as great or greater building activities than any time heretofore. Then, too, due to its economic uses and fuel saving properties, there is an ever increasing interest in and demand for insulation in buildings, as evidenced by magazines and current literature everywhere. A recent bulletin issued by the United States Bureau of Standards, states that a series of tests on various materials showed that insulation in dwelling houses results in from 20 to 60 per cent saving in fuel. In this day of high priced fuel, unnecessary heat losses are a serious matter and insulation therefore becomes an important item to all property owners. In view of all this, considerable attention will likely be attracted by the new straw pulp structural insulating board, as it ranks exceedingly high, both in insulating properties and structural uses.

The product referred to is known as Inso Board and is manufactured in a newly constructed mill at St. Joseph, Mo. In deciding upon the manufacture of Inso Board the source of the raw material was of prime importance. By locating at St. Joseph, in the center of the world's largest wheat growing section, with six railroad system radiating in all directions, an ideal location was realized. There are also ample supplies of labor, water and fuel and a better location for the distribution of the product could not be found.

\$4,000,000 POWER PLANT IS PLAN OF GREAT WESTERN POWER

Construction of a \$4,000,000 power plant on a 40-acre tract facing the Indian Basin is planned by the Great Western Power Company, it is announced by A. Emory Wishon, general manager of the company. Plans for the plant are being completed by McClellan & Junkersfeld, consulting engineers of New York, who will supervise all construction. The plant will generate 35,000 kilowatts and will be the first unit in a gigantic steam installation that will eventually generate hundreds of thousands of horsepower of electrical energy.

STATE MASTER PAINTERS TO SEEK LICENSE LAW — CONVENTION NOTES

With the closing of its Twenty-fourth Annual Convention the California State Master Painters' and Decorators Association held January 19, 20 and 21 at the Palace Hotel, San Francisco, set a new high record for attendance, work done, and entertainment. It marked the close of a most successful year of cooperative efforts on the part of the various groups in the organization and laid out policies which go far in building up the association and the industry which it represents.

State License Urged

Of the resolutions which were passed, the outstanding were, the state licensing which is to be urged at the next session of the legislature; the resolution to back the compulsory insurance law which already exists; and the appointment of a committee to work toward the inclusion of the spray machine in the safety ordinance.

Three hundred and sixty-one persons sat at the banquet Saturday evening. Of this number over 200 were delegates and members of the association. Delegates from Los Angeles, Orange belt counties, Santa Ana, Long Beach, the Peninsula, San Jose, Sacramento, Reno, Alameda county and San Francisco were in attendance.

In previous years it has been the practice for manufacturers to have exhibits at the conventions. This year the practice was discontinued. The only exhibit was that of the San Francisco Apprentice school. This included extremely attractive specimens of wall and wood finishes.

Officers Elected

At the final session of the convention the following officers were elected: President, O. F. Tallman, Los Angeles; first vice president, A. Van Heerden, Oakland; second vice president, F. Kiesel, San Francisco; secretary, Arthur Graff, Los Angeles; treasurer, Max Cohn, San Francisco, were unanimously elected for the coming year.

For the executive board the following were elected: Alameda county—C. Sparwasser, U. S. Gardner, Bert Johnson, John Heritage and Wm. Chalmers; Burlingame, Chas. Leis; Palo Alto, W. T. Von Hacht; Sacramento, E. J. Brickell, C. V. Brown and W. Triplett; San Jose, Wm. Loos, Chas. Scarper and G. E. Lenzen; Pasadena, P. Schwenzfeier; Los Angeles, Horace Mann, W. S. Kline, A. S. Grant, J. L. Kelly and R. O. Tuttle; San Francisco, Frank Dixon, J. F. Provoo, R. Postler, A. D. Sutherland, C. B. Sovig and Louis Taddeucci; San Diego, A. Pearson and W. O. Maler; Reno, W. H. Curtin and O. R. McGinty; Santa Ana, W. F. Sorensen; Long Beach, L. C. Riley; San Bernardino, Tim Shenan.

Credit for the successful management of the convention is due to the convention committees which were headed by S. F. Cohn of San Francisco with Frank La Torres, secretary, and H. E. Brace, president of the Master Painters and Decorators Association of San Francisco. F. Kiesel, reception; A. D. Sutherland, press; L. J. Neal, hotel; F. Dixon, banquet; J. G. Exley, registration, and R. Postler, bus ride.

Convention Efficiently Managed

The Master Painters and Decorators Association of San Francisco is to be congratulated upon the efficiently managed convention which has just become history and the way in which they lived up to the traditional hospitality which

San Francisco shows to its visitors.

Opening on Thursday morning routine business was followed by the appointment of committees. At the afternoon session H. E. Brace, president of the San Francisco association, gave an inspiring address of welcome. C. A. Boren of San Diego, president of the State Association, gave the high lights of the past year. Vice Presidents O. F. Tallman and A. Van Heerden followed with short talks.

Wm. Woolley, who has been secretary of the association for the past eight years, gave his report. Mr. Woolley, during the convention, was made an honorary president of the association in recognition of his long and faithful service.

Max Cohn's report on the financial condition showed them in good shape. Mr. Cohn, one of the early members of the association, has held the post of treasurer for many years.

Further reports were given by Harry McManus, Alameda county, on Legislation; E. C. Thomas, Alameda county, on Insurance; W. J. Curtin, Reno, Nev., on Insurance in Nevada.

Conditions Favorable

Reports on local conditions indicated that the past year had generally been successful. The following presidents of the various local groups also made their reports: W. Van Wye of Alameda county; L. C. Riley of Long Beach; A. Graff of Los Angeles; J. L. Kelley, Los Angeles; W. F. Sorensen, Orange county; P. Schwenzfeier, Pasadena; L. B. Whinigar of the Peninsula; C. Simmonds, Sacramento; W. Pearson, San Diego; F. Kiesel, San Francisco; W. McGinley, San Jose; W. Hickox, Stockton, and O. R. McGinty, Reno.

To License Painters

The important business on hand Friday morning was the reports of the Resolution Committee. It was decided that the necessary steps be taken to put before the next session of the State legislature a measure making the licensing of painters a compulsory measure. This, it was agreed, would prove highly beneficial in many ways.

A compensation insurance statute already exists upon the state laws making the carrying of insurance by employers a compulsory matter. It was shown that this has not been thoroughly enforced and the association voted to back up the State Insurance Board in its efforts to make the measure 100 per cent effective.

It was further resolved to take the necessary steps to have operators of spray machines included in the benefits of the safety ordinance.

One of the papers read during the convention was an able outline of conditions in the Northwest from J. W. Sorensen of Portland.

Wm. Woolley, the secretary, choose as his subject, "New Competition," and presented some very interesting and worth-while suggestions.

Trophy for Membership

Last year the California association was the winner of the second prize at the National convention. With this money the State association purchased a trophy which it is planned shall be held for a year by the local group showing the largest percentage of increase in membership during the preceding year.

For 1928 the trophy, a beautiful bronze

palatte with bushes, goes to San Jose. The name of the winner of the trophy is to be inscribed on the back each year.

Saturday morning at the final session, gifts were presented to the retiring president, C. A. Boren of San Diego; Wm. Woolley of Burlingame, and Max Cohn of San Francisco. The gift in each case was an arm chair.

L. A. Gets Next Meeting

Los Angeles was chosen as the convention city for 1929 and the new president, O. F. Tallman, was elected delegate to the International Convention, which will be held in Houston in 1928.

The entertainment during the convention was most successful. For the visiting ladies the Ladies Auxiliary, with Mrs. H. E. Brace, chairman; Mrs. F. Kiesel, Mrs. C. E. Gordon, Mrs. A. D. Sutherland, Mrs. R. E. Cavanaugh, Mrs. Russell Hinton, Mrs. L. J. Neal, Mrs. T. La Torres and Mrs. B. T. Collins, held a reception to the visitors at the Palace Hotel from 2 to 4 on Thursday. On Friday a luncheon in their honor was held at the Aladdin Studio Tiffin Room followed by a trip through Chinatown.

Theatre Party

Thursday evening a theatre party was given for the visitors and their wives at the Alcazar Theatre.

Friday evening the Golden Gate Paint Co., Oil and Varnish Club was the host at a buffet dance in the Palace Hotel Ball Room. Chas. B. Woodruff, past president of the club, gave the official greeting.

Saturday evening a banquet was given in the ball room of the Palace Hotel, which taxed its seating capacity. At this time the officers for the coming year were installed in a novel fashion.

Entertainment Is Feature

Aa fantasy consisting of a prologue and one act, called "The Dreamers," was a feature of the entertainment program. The playlet featured four friends of the association spending their annual vacation at Yosemite Park. In addition to this feature the entertainment program provided 19 additional numbers.

STATE CIVIL SERVICE EXAMS

California State Civil Service Commission with offices in San Francisco, Sacramento and Los Angeles, announces examinations will be held in the immediate future for the following positions:

Junior Designing Engineer, Bridges, Grade 3 and Assistant Designing Engineer, Bridges, Grade 4, the former position paying from \$170 to \$250 a month and the latter \$235 to \$280 a month.

Junior Structural Engineer, Buildings and Harbor, Grade 3 and Assistant Structural Engineer, Buildings and Harbor, Grade 4, the former paying \$170 to \$230 and the latter \$235 to \$280 a month.

Junior Construction Engineer, Bridges, Grade 3 and Assistant Construction Engineer, Bridges, Grade 4, paying from \$170 to \$230 and \$235 to \$280 a month, respectively.

Applications for the above positions must be filed with the commission before March 3. Additional information together with application blanks are obtainable from the commission offices at Room 116, State Building, San Francisco; Room 331, Forum Building, Sacramento and Room 1015 Sun Finance Bldg., Los Angeles.

MUNY ELECTRIC PLANTS QUIT

One hundred and eighty-one municipality owner electric light and power generating plants or distributing systems were sold during 1927 to privately operated companies to be absorbed in more economically operated interconnected systems, Electrical World reports. Twenty two plans were sold in Nebraska, 18 in North Carolina, 15 in Oklahoma, 12 in Georgia and 10 in Kansas.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-144-X-3873-CS GENERAL MANAGER, with broad commercial experience who can put the customers view point into his company's product, i. e. heavy machinery. Plant is large, modern, well manned, equipped and financed. Company's product leads competition in quality; well recognized in certain fields but possesses equally greater advantages in others not yet developed. Requires a well known engineer with executive and administrative experience who can co-ordinate and direct sales, engineering, and production, opportunity for leader probably now employed. Salary \$10,000-\$20,000 a year. Permanent. Location, East. Confidential.

K-10-X-4007-CS SALES ENGINEER, young, to sell recording instruments and automatic temperature control equipment to dairy and ice cream industry for long established manufacturer. Must have highest character references and be free for unlimited travel in U. S. Single man pref. with operating or engineering experience in dairy industry. Apply by letter, stating age, education, experience, and salary desired. Headquarters New York City.

R-1431-S SALES MEN, to sell electrical appliances for public utility company. Some positions for gas appliances and heating men. Technical graduates preferred for advancement based upon sales record. Northern California territory involves traveling and men with cars preferred. Small salary and commission. Headquarters San Francisco.

R-1421-S SHOP SUPERINTENDENT, for small shop producing metal air planes. Requires a man with considerable practical experience both as sheet metal mechanic and foreman or superintendent. Salary open. Opportunity to connect with new and growing business. Local.

MUNY WATER PLANT PAYS

Turlock's municipally-owned and operated city water plant is an economical success according to the report of H. W. Rickenbacher, city treasurer. The report shows a balance of \$21,504.80 on hand January 1 in the water fund, a net increase of \$7000 over 1926, after making payments totaling \$5000 from the fund for fire fighting equipment. According to the report, cash on hand January 1st amounted to \$94,631.66, an increase of \$8000 over 1926. Of this amount, \$21,-877.98 represented the general fund and \$21,504.80 the water fund. The balance, \$51,248.88, is in bond funds, including street and electrical assessment funds, which are collected and paid out on January 2nd and July 2nd of each year. The street and electroler assessment funds total \$22,553.11.

PAINTER BANKRUPT

William Blauert, San Francisco painter, has filed a petition in the federal court to be declared a voluntary bankrupt. He lists liabilities at \$7102.08 and assets as \$1831.44.

SEEKS POWER PERMIT

L. B. Rouse of Pine Grove, Amador County, seeks authority of the Federal Power Commission at Washington, D. C., to build a dam, power house and transmission line on the middle fork of the Mokelumne river in Calaveras county. The applicant contemplates development of 240-horse-power to be used for mining and milling purposes.

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

Thomas M. Holland, of Bakersfield PROCESS FOR PRESERVING POLES. An object of this invention is to so construct this jacket that it may include an inner section constituting a preservative for the wood from which the pole is formed and an outer section constituting a reinforcing section.

Joseph C. Straub, of Berkeley. PACKING JOINT. It is a further object of this invention to provide an improved housing box for use with internal combustion engines or the like, which box has improved packing joint incorporated in its. Mr. Straub assigns his patent to Hall-Scott Motor Car Co.

John C. Schelling, of East Orange. ELECTRIC WAVE SIGNALING SYSTEM. The invention relates to electric wave signaling and more particularly to transmission and reception of signals by means of waves modulated in frequency. Mr. Schelling assigns his patent to Western Electric Company.

Harold S. Black, of East Orange. MODULATED CARRIER WAVE SIGNALING SYSTEM. This is related to modulated carrier wave signaling systems, and to spare discharge modulators, oscillators and combination oscillator modulators adapted to be used therein. Mr. Black assigns his patent to Western Electric Company, Incorporated.

Alfred E. Hague, of East Orange. AUTOMATIC ELECTRIC CUT OUT. The object of this present invention is the automatic removal of an apparatus unit from service in response to standard conditions. Mr. Hague assigns his patent to Western Electric Company, Inc.

David E. Branson, of Bloomfield. APPARATUS AND METHOD FOR MEASURING TRANSMITTED LIGHT. The principal object of this invention is to provide a new and improved method and appropriate apparatus for measuring the intensity of a beam of light. Mr. Branson assigns his patent to American Telephone and Telegraph Company.

L. A. CONTRACTORS TO PARTICIPATE IN SAFETY SCHOOL

Southern California Chapter, Associated General Contractors, will co-operate with the Los Angeles Chamber of Commerce in its annual safety school which will comprise six sessions, starting March 7, and continuing six weeks, with a session every Wednesday. The first and last sessions will be general meetings, but at other sessions the representatives of the different industries will meet in sections. At the regular meeting of the Chapter, Jan. 20, the president was authorized to appoint a committee to arrange programs for the construction section of the safety school and to co-operate with the Chamber of Commerce Committee.

RATES FOR IRRIGATION WATER

The following table from the recently issued report of the Water Department of Pasadena, shows the rates charged by the department for water furnished for irrigation purposes:

5/8 in. meters	\$.45
3/4 in. meters50
1 in. meters60
1 1/2 in. meters85
2 in. meters	1.10
3 in. meters	1.85
1 in. meters	2.35

Rate for irrigation service is \$0.06 per 100 cu. ft. plus the above monthly service charge.

LONG BELL LUMBER COMPANY TO OPERATE ON "CROP BASIS"

Definite plans have been put into effect by the Long Bell Lumber Co. to place its 150,000 acres of timber land in Siskiyou county, California, on a permanent "crop basis." The company needs logs in quantity to produce 500,000 feet of lumber every day at its mill at Weed, Cal. To attain this end many changes have been made in forestry and logging practices, the underlying principle being that lumber is a crop.

Hereafter no trees will be cut that are less than 18 inches in diameter, breast high. No trees will be cut unless marked for felling by a forester who has been engaged since last June in this "selective logging" practice.

Logs will be brought in by a caterpillar-tractor operation instead of by steam skidder, thus saving many young trees from being destroyed or broken down.

A nursery for growing the valuable pines of the Sierras will be established at once at Tennant, Cal. No one has yet succeeded commercially in growing the vast number of pine seedlings that would be needed in California were the pine operators of the Sierra Nevada to embark in a general re-forestation policy like that now successfully carried forward by the redwood operators of the Coast Range.

Every precaution will be taken to prevent forest fires from starting in the cut-over land and to extinguish those that get under way.

Thorough tests are to be given to what is called "direct seeding"—that is to sow tree seed in places now bare of trees, or where trees have been cut. The United States Forestry Service tried this method in California some years ago, but without marked success because the seeds were picked up by squirrels, chipmunks and other wild things, before the seeds could germinate. In its experiments the government did not try rodent control before seeding.

The Long Bell Company already has a big nursery for Douglas fir and other trees of the Pacific Northwest, located at Rydewood, a few miles distant from Longview, Wash., where its largest mills are located.

Re-forestation practices in the way of proper care of slash, left after logging, and in keeping fire out of the cut-over land so as to give the second growth a chance to live and grow, are now followed by practically all of the large pine producers of California. The redwood forest owner depend for second crop on the growth of young trees from the roots of the trees that are felled, and also on seedlings that are raised by the millions every year in nurseries, and are set out among the stumps in the cut-over land.

PERMITS FOR SNOW MOUNTAIN POWER PROJECT GRANTED

California State Department of Public Works, Division of Water Rights, has granted permit to Snow Mountain Water & Power Company for the partial development of a hydraulic mining power project on the South Fork of Eel River and other improvements, involving an expenditure of \$3,754,910. This will be one of the largest power and irrigation projects yet conceived for the Redwood belt. New work will entail an expenditure of approximately \$2,300,000 in the vicinities of Potter Valley, Mendocino County, and Hullyville, Lake County. Two permits, one for 400 cubic feet per second of flow from the South Fork of the Eel and another of 4500-acre feet of water for extension of irrigation projects now being carried out in the Potter valley district, were granted. The latter grant will provide water for nearly 5000 acres at a cost of about \$100,000.

SAN FRANCISCO—According to Major Deagan, constructing quartermaster, Fort Mason, the House has passed at \$26,000 appropriation for the construction of roads at Fort Baker and Fort Barry in addition to \$54,000 for roads at Baker's Beach.

Congress has approved of the expenditure of \$10,000 in surplus funds from other sources for the improvement of roads in the Presidio and Fort Mason.

A \$26,000 appropriation is available for the construction of a bulkhead at Crissy Field and efforts are being made to secure a \$600,000 fund to finance the reclaiming of a large area of waterfront lands at Crissy Field including a bulkhead.

Bids for these improvements will be taken by the Constructing Quartermaster's Office, Fort Mason, when the money is available.

PEARL HARBOR, T. H.—Austin Engineering Co., 566 Southern blvd., New York, N. Y., at \$174,775 awarded contract by Bureau of Yards and Docks, Navy Department, under Spec. No. 5338, to erect quarters, laboratory and animal house at naval operating base (hospital), Pearl Harbor. The work consists of four frame quarters on concrete foundation; frame garage and store house; quarters for nurses, with concrete frame and tile walls; laboratory and animal house, each of concrete and tile construction. This work includes plain and reinf. concrete, asbestos shingle roofing, stucco, marble and tile work, wood framing and trim, and plumbing and electrical systems.

SAN DIEGO, Cal.—Until March 3, under Specification No. 5528, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to construct pier at foot of E st., San Diego; will be 65x430 ft., in addition to constructing bulkhead 185 ft. long; also 8000 cu. yds. dredging and filling. Pier construction will involve 350 reinf. conc. pipes, 20x20 in., 46 to 62 ft. long; 1500 cu. yds. reinf. conc; 100 tons reinf. steel; 2600 ft. 8x24-in. reinf. conc. sheet piling; 3600 sq. ft. timber (relieving platform); 100 crosstied fender piles; 140 untreated piles. Tracks, water and electrical supply system, bitts, timber work, etc., also included in project. Est. cost \$250,000.

SAN FRANCISCO—The following bids following bid 4 were received by the Constructing Quartermaster, Fort Mason, to erect gasoline storage plant at Crissy Field:

Roth Constr. Co., 447 Broderick St., San Francisco, \$4090; Adam Ariss Co., Oakland, \$4175; L. D. Armstrong, \$4274; Acme Constr. Co., S. F., \$4437; E. G. Hart S. F., \$4898; Eastman & Edeling, \$5270.

MARE ISLAND, Cal.—Bids are being received by Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 5525, for equipment for refrigerating plant at Mare Island Navy Yard (Marine Barracks). The work includes motor driven compressor, motor driven brine pump, motor for existing agitator, automatic thermostatic control equipment, switchboard, wiring and piping to complete refrigerating system. See notice under official proposal column in this issue.

Stockton, San Joaquin Co., Cal.—According to word from Washington, D. C., \$320,000 is provided for improvements and \$20,000 for maintenance in connection with Stockton deep water project for the fiscal year beginning July 1, 1928.

WASHINGTON, D. C.—Until Feb. 11, 10:30 A. M., under Circular No. 2154, bids will be received by Purchasing Officer, Panama Canal, to fur, and del. Balboa (Pacific Port). Tile, circular saws, elec-

tric brazer, jacks, pipe bends, valves, twist drills, boiler punches, bolts, rivets, washers, gauge glasses, iron or steel cement, liquid bronze, Bismarck brown, white lead, dry vermilion, varnish, pipe coveying, asbestos gaskets, packing, hair felt, lacing leather, friction-covered belting, electric lighting fixtures, and fusible plugs. Further information obtainable from Assistant Purchasing Agent, Fort Mason, San Francisco.

HALLS AND SOCIETY BUILDINGS

Plans Being Figured by Selected List of Contractors.

CLUB BLDG. Cost \$125,000
SAN FRANCISCO, Broderick and Baker sts., 200x300 ft.
 Two-story frame and stucco yacht club building.
 Owner—St. Francis Yacht Club (Hiram W. Johnson).

Plans Being Figured.

ALTERATIONS Cost, \$20,000
NAPA, Napa Co., Cal. No. 1033 Main Street.

Alterations and additions to present two-story brick lodge building (add two stories).

Owner—Odd Fellows Lodge, Napa.
 Architect—W. H. Corlett, 507 Jefferson St., Napa.

WHEN SANDY Pratt.

WAS A small country boy.

DOWN AT Tulare City.

FEW PEOPLE ate out.

AT HOTELS and restaurants.

AND IF a child.

EVER MADE the dining room.

OF ONE of these places.

IT WAS an event.

TALKED ABOUT by the child.

FOR DAYS and days.

SANDY, NOW producer of rock.

AND SAND and gravel.

OFTEN WENT to Visalia.

SOME TWELVE miles away.

WITH SANDY'S dad.

AND AT noon.

ATE A big 25¢ dinner.

(NOW WE say noonday lunch).

AT THE Chinese restaurant.

ON MAIN Street.

WHAT SANDY enjoyed most.

ABOUT THESE "outings."

WAS THE privilege.

OF A choice.

OF FOUR kinds of meat.

FOR THE waiter each time.

YEAR IN and year out.

SAID "ROAST Mutton.

ROAST BEEF, Roast Pork.

STEWED BEEF Spanish."

WHILE AT home.

ONE KIND of meat only.

WAS SERVED at each meal.

AND A poor kid.

HAD NO choice.

YOU COULD eat it.

OR LEAVE it.

BUT HERE.

IN THIS Chinese restaurant.

YOU HAD four choices.

THEN WHEN dessert time came.

SANDY HAD a choice.

OF APPLE or peach pie.

OR PLUM or custard pie.

BESIDES A pudding.

AND SANDY'S great problem.

WAS TO choose.

OF ALL these desserts.

FOR BOY-LIKE.

SANDY WANTED them all.

AND THE waiter stood around.

WHILE SANDY was wondering.

HOW HE could eat.

ALL FIVE kinds of desserts.

"I THANK you."

When Clarence (Sandy) Pratt, President of the Pratt Building Material Company, producer of clean sand, clean rock and clean gravel at Sacramento, Marysville, Prattrock (near Folsom), Prattco (Monterey County) and Mayhew (Sacramento County), (Central offices—San Francisco), was a small boy he would discard his horse, riding habit, etc., to go to a restaurant to eat because you had your choice of four kinds of meat, and five kinds of dessert.

CLUB BLDG. Cost, Approx. \$300,000
OAKLAND, Alameda Co., Cal. Bellview Ave., bet. Ellita and Staten Sts.
 Six-story reinforced concrete club bldg.
 Owner—Women's Athletic Club, Great Western Power Bldg., Oakland.
 Architect—Roeth & Bangs, 1404 Franklin St., Oakland.
 Contractor—William C. Keating, Central Bank Bldg., Oakland.

DOUGLAS, Ariz.—Architect Carleton M. Winslow, 1001 Architects Bldg., Los Angeles, has had working drawings approved by the Douglas Community Hotel Association for the first unit of the new hotel to be erected at Douglas, Ariz. Plans will be put out to a selected list of contractors next week and bids will be submitted to E. W. Graves, at Douglas, on or before 2 P. M., February 25th. The structure will be two stories in height and will contain 60 guest rooms with 90 per cent private baths. Cost, \$115,000.

GRASS VALLEY, Nevada Co., Cal.—Management of Bret Harte Inn contemplates immediate remodel and additions to present structure involving an expenditure of \$10,000. Chas. R. Fraser of Sacramento is president of the syndicate operating the hotel.

SACRAMENTO, Cal.—George D. Hudnutt, Inc., 1916 S St., Sacramento, awarded following sub-contracts in connection with the construction of a three-story and basement brick hotel and (2) stores at 231 J St. for Chas. H. Crocker, San Francisco, capitalist, represented in Sacramento by the Klein Realty Service, Inc., 1009 8th St. Structure will be leased to W. Idemoto for ten years. Will contain 70 rooms and two stores. Cooling system, steam heat.

Plumbing and Heating—Scott Plumbing & Electrical Co., 1900 M St., Sacramento.
Electric Wiring—Sam Poroshin, 2519 21st St., Sacramento.

TERRA BELLA, Tulare Co., Cal.—J. O. Chapin (Chapin Construction Co.) Los Angeles, plans erection of 50-room hotel building to be erected in business section; estimated cost \$50,000.

CORONADO, San Diego Co., Cal.—Construction is expected to be started shortly on the 13-story class A hotel building to be erected on Orange ave. near Ada pl. The house on the site is being moved. The project is being promoted by Carrington & Woodman.

ICE AND COLD STORAGE PLANTS

Plans Being Prepared

COLD STORAGE PLANT Cost \$250,000
WATSONVILLE, Santa Cruz Co., Cal.
(Beach road (150,000 sq. ft.))

One-story reinforced concrete cold storage plant, 300x500 ft.
Owner—Apple Growers Cold Storage Co. Engineers—Utley & Kleindinst, 351 Hobart st., Oakland.

The cooling system will be circulating brine, while each storage chamber will be 16 feet high and the temperature will be controlled automatically with recording thermometers in each storage chamber recording the temperature every minute of the time the chamber is in use. Special truckage facilities will be built through the center of the property by the Southern Pacific Company, with great platforms for unloading fruit trucks on one side and still larger canopied platforms on the rail side for car loadings.

The personnel of the temporary organization is: Carrol Rodgers, president; Tony Scurich, vice-president; Elmer Faul, secretary. The temporary board of directors is composed of Louis Kusolich, Jack Dicklich, John Braykovich, Jack Scampavin, Mitchell Pista, Jasper Simunovich, Nicholas Alaga, M. S. Travers and John W. Lukrich.

MARE ISLAND, Cal.—See "Government Work and Supplies," this issue. Bureau of Yards and Docks wants bids for equipment for refrigerating plant, under Specification No. 5523.

POWER PLANTS

CALAVERAS COUNTY, Cal.—L. B. Rouse, Pine Grove, (Amador County), seeks authorization of Federal Power Commission, Washington, D. C., to build dam, power house and transmission line on middle fork of Mokelumne river in Calaveras county. Applicant contemplates development of 200 h. p. to be used for mining and milling purposes.

LOS ANGELES, Cal.—Until 3 P. M., Feb. 7, bids will be rec. by water and power commission for street lighting transformers, Adv. No. P-483. Jas. P. Vroman, secretary.

LAKEPORT, Lake Co., Cal.—Northern California Telephone Co. has started reconstruction of phone lines in Lake, Napa, Sonoma and other adjoining counties, installing new poles with copper wire replacing iron wires. Est. cost, \$40,000. J. P. Nobles, manager of company.

SANTA PAULA, Cal.—Southern California Edison Co., 306 W-3rd St., Los Angeles, is purchasing rights-of-way for 120,000-volt high tension line, 44 mi. in length, from Satcoy to Castaic sub-station; est. cost, \$10,000 per mile.

SALINAS, Monterey Co., Cal.—W. J. Burke, 200 Davis St., San Francisco, awarded contract for the William Concrete Form Clamps by the Pacific Gas & Electric Co., in connection with the construction of a sub-station being erected at Salinas.

GLENDALE, Cal.—Until Feb. 16, 10 A. M., bids will be rec. by A. J. Van Wie, city clerk, to fur. f. o. b. cars, Glendale: 1 three pole, single throw, 2000 ampere, 7500 volt oil circuit breakers; electrically operated, remote control, non-automatic. Indoor type, cell mounting, solenoid for 125 volts, direct current, equipped with emergency closing handle, closing mechanism to be mounted beneath breaker. Breakers to be installed in concrete cells 2-ft. 8-in. wide, 3-ft. 5-in. deep, 6-ft. 3-in. high.

15 three pole, single throw, 600 amp., 7500 volt oil circuit breakers, capable of interrupting 11,000 amps. at 4150 volts. Breakers to be electrically operated, remote control, full automatic with trip free relay. Indoor type, cell mounting. Solenoid for 125 volts, direct current, equipped with emergency handle. Breakers are to be installed in conc. cells, 2-ft. 5-in. wide, 3-ft. 5-in. deep, 5-ft. 10-in. high.

15 250-amp., 3-phase, 50-cycle reactors, designed to give approx. 3% reactive drop when connected in series in a 1440 KVA 3-phase, 4150 volt circ.

Alt. bids will be received on 15 500 amp., 3-phase, 50-cycle, reactors, designed to give approx. 3% reactive drop when connected in series in a 2875 KVA 3-phase, 4150 volt circuit. Alt. bids will be received on above reactors having shunt resistors. Reactors to be installed in reinforced conc. cells, 5-ft. 2-in. wide, 4-ft. 6-in. deep, 10-ft. 2-in. high.

33 3000 amp., 7500 volt, single pole, single throw disconnect switches.

6 600 amp., 6000 vit, single pole, single throw disconnect switches.

LOS ANGELES, Cal.—Dept. of Water and Power, Bureau of Power and Light, 297 S Broadway, applied for building permit to erect a 23-room, 2-story and basement sub-station, 74x103 ft. at 5735 S Figueroa st; steel frame; cost \$130,000.

SAN FRANCISCO—McClellan & Junkersfeld, consulting engineers, New York, are completing plans for \$4,000,000 power plant to be erected for Great Western Power Co., 530 Bush St. on waterfront lands facing Indian Basin; will be 35,000 kilowatt turbine, first unit of gigantic steam installation that will eventually generate hundreds of thousands of horsepower of electrical energy. The engineers will supervise all construction.

BENBOW, Humboldt Co., Cal.—Benbow Power Co., recently incorporated, has applied to State Railroad Comm. for authority to engage in the distribution of electric light and power in Humboldt and Mendocino counties. Applicant proposes to construct a dam across the south fork of the Eel river at a point approx. 2600 feet westerly from the highway running through Benbow, and to construct a hydro-electric power plant, but pending construction of said plant to operate a Diesel engine power plant.

PUBLIC BUILDINGS

SAN FRANCISCO—M. J. Tierney has been appointed Superintendent of Public Buildings by the Board of Public Works, succeeding C. W. Meehan, who retired because of disability. Tierney's duties commence Feb. 1.

Additional Sub-Contracts Awarded.
COURTHOUSE ANNEX

Cont. Price, \$105,000
UKIAH, Mendocino Co., Cal.
Two-story and basement steel frame and concrete courthouse annex.

Owner—County of Mendocino.
Architect—W. H. Ratcliff, Chamber of Commerce Bldg., Berkeley.

Contractor—E. T. Leiter & Son, 3601 West St., Oakland.

Stone—California Cut Stone Co., 403 De Haro St., San Francisco.

Brick and Tile Work—T. Beebe, 1650 Tyler St., Oakland.

As previously reported, concrete awarded to J. H. Fitzmaurice, 2857 Hannah St., Oakland; reinforcing steel to Soule Steel Co., Rialto Bldg., S. F.; steel sash to U. S. Metal Products Co., 330 10th St., S. F.; structural steel to Judson Mfg. Co., Foot of Parker Ave., Oakland.

Sub-bids on other parts of the work are now being taken.

NORTH SACRAMENTO, Cal.—Architects Dean & Dean, California State Life Bldg., Sacramento, are preparing preliminary plans and estimates of cost for a combined city hall and firehouse. Estimates will be submitted to the city trustees shortly who propose to finance the structure through a bond issue.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—R. C. Stickle, 304 Linden st., South San Francisco, submitted the only bid at \$3297 to G MacSweeney, city clerk, for the construction of a 1-story concrete fire house for housing fire alarm system. The contract will be awarded Feb. 6.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., on February 23, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

San Diego County, between three miles southeast of Pine Valley and Buckman Springs (VII S.D.-12-E), about two (2) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangement for joint field inspection be made as far in advance as possible. Detailed information concerning work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Secretary.

GEORGE F. JONES,
Attorney for Drainage District No. 100 of Butte County.

NOTICE TO CONTRACTORS

(Finish Hardware—Kern General Hospital)

Notice is hereby given that sealed bids will be received by the Board of Supervisors, County of Kern, Bakersfield, California, up to 11 o'clock A. M., February 20, 1928, for furnishing of finish hardware for the addition to the Kern General Hospital, Bakersfield, California, in accordance with the plans and specifications prepared by and under the supervision of Charles H. Biggar, Architect, Bakersfield, California.

Plans and specifications for same may be obtained at the office of the Architect upon deposit of Twenty Dollars, which

will be returned upon receipts of the said plans and specifications in good order at the time designated by the Architect.

A certified check or bidder's bond in the amount of ten per cent of amount bid is to be to the order of the Clerk of the Board of Supervisors as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Supervisors, and in addition thereto will furnish good and sufficient surety bonds with an approved surety company, therefor.

Board reserves the right to reject any and all bids not deemed advantageous to the County and to waive any informality in any bid received.

By order of the Board of Supervisors of the County of Kern, State of California, adopted January 23rd, 1928.

F. E. SMITH,
County Clerk and ex-Officio Clerk of the Board of Supervisors.

NOTICE TO CONTRACTORS

(Refrigerating Plant Equipment — Mare Island Navy Yard)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals in the near future on Specification No. 5523, "Equipment for Refrigerating Plant, Navy Yard (Marine Barracks), Mare Island, California." The work includes motor driven compressor, motor driven brine pump, motor for existing agitator, automatic thermostatic control equipment, switchboard, wiring and piping to complete refrigerating system.

Any firms to whom this work is of interest should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification, which will be forwarded to them as soon as available.

Prospective bidders on the west coast should make application for the bidding data to the Navy Yard, Mare Island, California.

NOTICE TO CONTRACTORS

(Distribution Line)

Notice is hereby given that sealed bids for rebuilding a Secondary distribution line for the Tri-County Tubercular Hospital located at Ahwahnee, Madera County, California, will be received by the Tri-County Hospital Committee at their office in the Tri-County Tubercular Hospital at Ahwahnee, Madera County, California, up to the hour of 1 o'clock P. M. of Saturday, February 11, 1928.

According to plans and specifications approved and adopted by said Committee on November 12, 1927, and are on file at the offices of the County Clerks of Madera, Merced and Stanislaus Counties and also at the Office of the Tri-County Tubercular Hospital Committee at Ahwahnee, Madera County, California, to which bidders are hereby referred.

The Committee reserves the right to reject any and all bids.

Dated: January 14th, 1928.
V. D. WHITMORE,
Chairman, Tri-County Tubercular Hospital Committee.

NOTICE TO BIDDERS

(Modesto Irrigation District—Stanislaus County)

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, Cal., until two o'clock p. m., on the 20th day of February, 1928, for furnishing and delivering to the Modesto Irrigation District supplies designated herein under Items No. E-8, E-9 and E-10. Bids will be received on any or all of the following items:

ITEM: No. E-8: Proposal for furnishing and delivering Electric Water Meters to the Electric Department of the Modesto Irrigation District, Modesto, Cal.

ITEM: No. E-9: Proposal for furnishing and delivering Distribution and small transformers to the Electric Department of the Modesto Irrigation District, Modesto, Cal.

ITEM: No. E-10: Proposal for furnishing and delivering Petroleum Products to the Modesto Irrigation District, Modesto, Cal.

Proposal blanks and detail specifica-

tions can be obtained from the secretary of the Modesto Irrigation District.

Contract will be let to the lowest responsible bidder, but the Board of Directors reserves the right to reject any or all bids.

Each proposal must be accompanied by a certified check or bidder's bond for 5 per cent of the amount of the bid, payable to the Modesto Irrigation District, as a guaranty that the bidder will, if successful, execute a contract within 10 days of notice of award and furnish a satisfactory bond of not less than 20 per cent of the contract price for the faithful performance of the work in accordance with the specifications, and a bond for 50 per cent, as provided in Chapter 303 of the Statutes of 1919 of the State of California, said bonds to be approved by said board.

The proposal must be marked "as directed in each separate specification," and addressed to "Secretary, Modesto Irrigation District, Modesto, Cal."

Done in pursuance of an order of said Board of Directors of the Modesto Irrigation District, this 16th day of January, 1928.

MODESTO IRRIGATION DISTRICT,
By H. G. Jacobsen, president.
By C. S. Abbott, secretary.

NOTICE INVITING BIDS

(San Joaquin and Stanislaus Counties—Bridge)

NOTICE IS HEREBY GIVEN that sealed bids will be received by the Clerk of the Board of Supervisors of San Joaquin County, California, at the office of said Board in the City of Stockton, until 11:00 o'clock A. M., Tuesday, February 14, 1928, for the construction of a steel and timber bridge over the Stanislaus River. The bridge to be constructed under these plans and specifications is situated at the site of the Burneyville Ferry in Section 24, T. 2 S., R. 9 E., M. D. B. & M., and just north of Riverbank, California. The bridge is a joint bridge between Stanislaus County and San Joaquin County, California, each county to pay for one-half of the cost of construction.

All in accordance with the plans and specifications prepared by F. E. Smith, County Surveyor of San Joaquin County, and approved by J. H. Hoskins, County Surveyor of Stanislaus County, and adopted and filed by the Boards of Supervisors of San Joaquin and Stanislaus Counties on January 9, 1928, and to which bidders are more particularly referred.

All bids must be made on forms to be obtained from the County Surveyor's office in San Joaquin and Stanislaus Counties and presented in sealed envelopes marked to indicate the contents and addressed to the Clerk of the Board of Supervisors at Stockton, California.

All proposals must be accompanied by United States currency or certified check, or cashier's check made payable to the Chairman of the Board of Supervisors of San Joaquin County in the sum of 5% of the amount of the bid.

A bond of 25% of the contract price will be required of the successful bidder to guarantee the faithful performance of said contract, and a like bond to guarantee the faithful payment and satisfaction of the lawful claims of all persons for labor and material furnished in the prosecution of said contract.

A deposit of \$10.00 will be required on all sets of plans taken out.

The Board reserves the right to reject any or all bids.

By order of said Board of Supervisors of San Joaquin County made January 9, 1928.

EUGENE D. GRAHAM,
County Clerk and Ex-Officio Clerk of the Board of Supervisors of San Joaquin County.

By F. L. STRONG,
Deputy County Clerk.

NOTICE TO BIDDERS

(C. I. Pipe—Eureka, Calif.)

Sealed proposals or bids are hereby invited by the Council of the City of Eureka, California, for the use of the Water Department, for furnishing Five Thousand (5000) lineal feet of eight (8) inch Class "B" Cast Iron Pipe with Bell and Spigot joints, f. o. b. wharf, Eureka, California, delivery to be made not

sooner than sixty days or later than ninety days after award of contract.

The said bids will be received in sealed envelopes marked Bids for Cast Iron Pipe, at the office of the Superintendent of Public Works of the City of Eureka, at 524 D Street, Eureka, California, up to hour of 5 o'clock P. M., Tuesday, February 7th, 1928.

Bids will be opened by the City Council of the City of Eureka at eight o'clock P. M., on Tuesday, February 7th, 1928. The right is reserved to reject any or all bids.

JOHN GRIFFITH,
Superintendent of Public Works.

BUSINESS OPPORTUNITIES

(Continued from page 18)

national reputation, offers a very complete line of four-cycle full Diesel engines for both stationary and marine services, and is interested in securing adequate sales representation on the Pacific Coast. INTERNATIONAL HOUSE PLANS TO
BE STUDIED BY U. OF C.

To study plans for the International House which is to be built at the University of California by John D. Rockefeller Jr., Robert G. Sproul, vice president and comptroller of the University has left Berkeley on a trip to New York and other eastern states.

Sproul plans to study the plans from the point of view of construction, business management and the handling of its activities. The International House in New York, also given by Rockefeller, is a residence for students attending several universities and colleges, but its operation from a business standpoint, in which Sproul's interest lies, will give information that will be of much assistance in the problems that will arise at the Berkeley International House, it is believed.

While in New York, Sproul will speak before the students in the International House there, at the invitation of Rockefeller, on Sunday, February 19.

During his trip East, Sproul also will make a study of dormitory management, in view of the fact that the Bowles Dormitory now is under construction and will be ready for occupancy next year.

George W. Kelham, supervising architect of the University of California, will accompany Sproul to assist in the study of construction problems.

ENGINEERS INSPECT DAM

Members and friends of the Stockton Chapter, American Association of Engineers, visited the Lancha Plana dam site of the East Bay Municipal Utility District, Feb. 5, as guests of Guy Atkinson, general contractor on the project. All phases of the work, including the gravel quarry and the four-mile tramway for conveying the gravel to the giant concrete mixer at the site, were inspected. The party of more than 50 were guests of the construction company at a dinner served in the camp mess hall. The committee in charge of the trip was composed of W. B. Hogan, city engineer of Stockton; R. W. Evans and Fred R. Beerman.

METHOD TO DETERMINE STRESS IN CURVED FLEXURAL MEMBERS

Curved members subjected to bending are important elements in many engineering machines and structures. Although the ordinary flexure formula, which gives reliable values for the primary stresses in straight beams or flexural members, is still widely used in design of curved flexural members, it gives values for stress that may be much too small when applied to such members.

The Winkler-Bach formula, commonly used, has been shown to give results that agree well with the stresses found from experimental measurements of curved beams made of steel. The equation also satisfies the limiting condition of reducing to the ordinary flexure formula when the radius of curvature becomes very large. It has, however, a serious disadvantage because of its difficulty of application, the difficulty being in evaluating the property Z of the cross-section. The evaluation of this property of the area by an analytical method is complicated for all sections except for the circle and the rectangle; and even for the simpler ordinary composite sections, as for instance the I or T sections, the expression becomes too complicated for quick or accurate solution.

The use of the straight-beam flexure formula with a correction factor has frequently been suggested, but up to the present time no values for the correction factor, K , have been available, except for circular and rectangular sections.

It was the object of the investigation reported in Circular No. 16 of the Engineering Experiment Station of the University of Illinois, therefore, to determine accurate values of the correction factor K for variously shaped sections and for degrees of curvature commonly found in curved flexural members; and thus to make available the results of the curved-beam theory with out involving the usual difficulties and errors encountered in determining the value of Z and in using the more involved curved-beam formula. The location of a neutral axis in a curved beam, a knowledge of which is sometimes of real value, is also given for various cross-sections and degrees of curvature.

Copies of Circular No. 16 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

BIDS FOR HERNDON BRIDGE TO BE ASKED SHORTLY

Bids will be asked shortly by the California State Highway Commission to construct the \$220,000 bridge over the San Joaquin river west of Herndon. The proposed bridge which will eliminate two railroad crossings, shows that it will consist of four 162-foot deck steel truss spans and one 66-foot deck girder span supported by concrete piers which in turn rest on a pile foundation. The deck and curbs and end posts are to be constructed of reinforced concrete. The structure will provide a thirty-foot clear width of roadway, the tress being designed so that a ten-foot width of roadway may be added as traffic conditions demand. A re-location of the state highway west of the Southern Pacific railroad tracks will be necessary.

PORTLAND CONTRACTORS HONOR STATE ENGINEER PURCELL

The executive board of the Associated General Contractors of America, Portland Chapter, when informed of the resignation of Charles H. Purcell, district engineer, U. S. Bureau of Public Roads, to accept service as State Highway Engineer of California, and spread on its minutes the following testimonial:

Whereas, Chas. H. Purcell has been for many years District Engineer of the U. S. Bureau of Public Roads in the territory comprised within Washington, Oregon, Idaho and Montana with headquarters at Portland, Ore., and

Whereas, Mr. Purcell has resigned this position to accept service as State Highway Engineer of California, and

Whereas, he has endeared himself to the construction industry by his resolute character, four square, staunch and fearless fairness, by his stalwart principles and the administrative excellence of his methods of handling the responsibilities entrusted to him, and

Whereas, his skill as an engineer, his breadth of view and broad vision of the arterial highway developments in this vast thinly populated region have been made manifest to all of the public as well as to all those most concerned in highway development, construction and use,

Therefore, be it resolved, that this resolution be spread on our minutes, be transmitted to Mr. Purcell, to the California chapters of the Associated General Contractors, to the chief of the U. S. Bureau of Public Roads, to the State Highway Commission of California, and others interested, as a feeling of our lasting esteem, as a token of our congratulation to the State of California in its selection of Mr. Purcell as a token of our well wishing to a warm friend and sage counselor as a further mark of our regret at his leaving this vicinity, as a token of our appreciation of his endeavors to raise standards of business in the construction industry, as an assurance of appreciation of the manly and brilliant manner of a man who has grown to the highest place in our respect and esteem through the years of our contact ever increasing, as a mark of our earnest good wishes which will follow him in his new field of endeavor.

Done February 1, 1928, by the Executive Board.

Associated General Contractors of America, Portland Chapter.
Attest: G. B. HERRINGTON,
Executive Secretary.

F. R. REIMERS, OAKLAND ARCHITECT, SUED BY EX-PARTNER

Charging that Frederick H. Reimers, Oakland architect, had collected money in excess of \$6500 and had refused an accounting, James V. Short, his former business partner, has filed suit in the Alameda County Superior Court for a receiver.

On September 1, 1924, Reimers and Short entered into a partnership to design and construct buildings, Reimer to handle the architectural end of the business and Short to handle construction and office management end of the business.

Short's complaint recites that Reimers has collected in excess of \$54,000 and paid out \$46,634, leaving a balance of \$6550 which has not been accounted for.

In addition to this Short asks judgment for an additional \$8000, alleging that Reimers is indebted to him in this sum and that it has never been paid. He asks a receiver be appointed and that an accounting be rendered him.

BUILDING MONEY DISTRIBUTED WITH CAUTION—RENTAL SITUATION IS BETTER

"A survey of building activity for the first month of 1928 brings much satisfaction to the conservative mortgage banker," according to the Economic Research Bureau of the American Bond and Mortgage Co. The report continues:

"The present optimism among realty bond houses is due to several basic factors. First, the problem of over-speculation in the supplying of housing has taken care of itself. Today there is probably less speculative building of housing than there has been since 1919, because the speculative builder is finding it difficult to secure funds for the financing of his projects. This is encouraging to all the conservative forces in the industry.

Banks Watch Progress

"Banks especially, being more interested in the building industry than they have ever been before, are watching building progress closely, and extending accommodations to builders with the greatest care and forethought; thus giving an even greater stability to the building problem, than has been known for a number of years.

"Again, the total volume of building during 1928 it is thought will be as great if not greater than that of 1927, but the character of a much larger percentage of buildings produced will be of a public or quasi-public nature instead of housing projects which made up so large a percentage of the building program for the past few years.

"Some months ago when wages in the building trades ceased to advance it was felt that a period of stabilization of costs had arrived. Consequently, the plans for public works and industrial buildings which had been held in abeyance for some time gathered headway and have now attained considerable momentum.

Rental Reductions Seen

"Looking further into the situation it would seem that there is nothing that would give encouragement to the belief that a substantial reduction in rentals will come about in 1928. The de-

cline in rentals which has been going forward for the past six months is now practically checked.

"Rents depend upon the cost of producing buildings, and this cost has a large percentage of labor in it. At present labor is resisting any downward movement in wages; thus the only reduction that can be hoped for in the cost of buildings is in the supplying of materials. Material men are at the present time endeavoring to stop losses and to hold firm on material prices by the strengthening of credits and by reducing the cost of their distribution.

Competition Is Keen

"However, competition is becoming keener due to a slowing up in the production of new housing and some realty bond houses are adopting the policy of offering bonds almost exclusively on completed structures. Therefore, it is felt that a reasonable reduction in the cost of building materials may be looked for during the next few months.

"This reduction in the production of new housing is tending, slowly but surely, to fill up those apartments, hotels and office buildings which have been completed during the past year or so.

Over-Judge Vacancies

"It is apparent that there has been a tendency to over-judge the amount of vacancies in offices and apartments, throughout the country. This has been due to the fact that not enough consideration has been given to the dates when buildings have been completed and ready for occupancy. It being a vital factor to have them ready for occupancy at the commencement of the rental season.

"Vacancies are found to occur in larger quantities in those buildings which could not be made ready for occupancy before October 1. Such structures will have to wait until the next renting season to arrive at a normal state of occupancy. These buildings are by no means an indication of the rental situation although they may appear so upon superficial examination."

EXCELLENT PROSPECTS PREDICTED FOR BRICK INDUSTRY

The monthly digest of the Common Brick Manufacturers' Association of America, declares the prospect of the common brick industry for the current year are excellent—for two principal reasons, as follows:

All forecasts of building volume for the coming year indicate an activity at least equaling that of 1927 and probably exceeding it. Such forecasts as those of the P. W. Dodge Co., Babson's, S. W. Straus and that hitherto accurate one prepared by C. Stanley Taylor for Architectural Forum, all indicate a slight upward trend in volume. Hence, the demand may be assumed as satisfactory.

From studies made by this association, and more especially by local group secretaries, more accurate information regarding local and seasonal demands is available, thus permitting production to more nearly coincide with consumption and so obviating the evils of stagnant stocks. So-called "hand-to-mouth" buying prevails to a greater extent in the brick industry than in many others. Unlimited production, with its attendant results, might adversely affect the brick industry in the same manner as others, which effect we are just now hearing so much about. When consumption can be accurately anticipated, production can be partly regulated to keep in step with it and so prevent the waste and loss of stored yard stocks.

BERKELEY PROPOSED BUILDING CODE REVISIONS

Stanley P. Koch, building inspector of Berkeley, has recommended to the city council three important changes in the city's building regulations.

The first suggests the repeal of the building code on the grounds that it is entirely superceded by provisions contained in the State building code. The second recommendation includes provisions to regulate the size of side yards in the city with regard to materials used in side wall construction. This recommendation also asks for an amendment to the State building code if applied to Berkeley.

The third recommendation placed before the council suggests the provision for the inspection of all hotels and apartment houses at least once each year. Owners of property inspected are to pay for the services of the inspectors, which charges are not to exceed \$5 nor be less than \$1.50.

ELEVEN ELECTRIC SLAVES FOR EACH AMERICAN FAMILY

The estimated output of nearly 80,000,000,000 kilowatt-hours of electric power for the United States in 1927, if it could be converted into equivalent man power, would provide the average family of about four persons in the United States with the services of eleven able-bodied mechanical laborers working eight hours daily, including Sundays and holidays, at a total cost for the eleven of about \$75 a year.

The total production of electricity by public-utility power plants in 1927 is estimated by the Department of the Interior, through the Geological Survey, at about 79,700,000,000 kilowatt-hours, an increase of about 8 per cent over the output for 1926, which was 73,791,000,000 kilowatt-hours. The estimate for 1927 is based on reports of monthly output of electricity by public-utility power plants for the 11 months, January to November, and estimated figures of output for December. The latest monthly report, released January 4, contains the figures of monthly output for September, October and November.

ALAMEDA-MARIN COUNTY BRIDGE IS LATEST S. F. BAY BRIDGE PROPOSAL

Plans for the construction of a 6½-mile, \$18,000,000 vehicular bridge spanning San Francisco bay from Albany in Alameda county to Tiburon in Marin county, have been filed with the Alameda County Board of Supervisors by T. A. Tomasini, bay capitalist.

The bridge proposed is to have a clearance above high tide of 150 feet for practically its entire length of six and a half miles. Two large spans, one 1000 feet and one 800 feet in length, will leave the shipping channels of the bay clear for travel.

Through the two channels all but five of the largest vessels afloat may pass beneath the span of the bridge. The wider channel is used by boats traveling to Richmond and Vallejo and the narrower channel chiefly by ferries to Berkeley and Richmond.

The Marin county terminal of the bridge will be situated upon a hill near Tiburon, and the approach to the bridge

will be built from the hill to the bridge-head at a height of 150 feet above high tide. The Alameda county terminal at Albany will be constructed at grade level but will climb almost immediately to the 150-foot height of the general bridge level.

If Tomasini is granted a permit to construct the bridge by the Alameda county supervisors he then will have to apply to the United States War Department at Washington for approval of his plans. Tomasini originally planned to construct a \$20,000,000 bridge from Point San Pablo in Contra Costa county to San Pedro Hill in Marin county, but abandoned this project in favor of the Albany location which makes possible, he contends, a saving of \$2,000,000.

Two other projects for spanning San Francisco bay in that locality are being considered now, one by the Richmond-San Rafael Ferry Co. and one by the Richmond-San Rafael Bridge, Inc.

McCLINTIC-MARSHALL COMPANY TAKES OVER PLANT OF CENTRAL IRON WORKS

McClintic-Marshall Company of Pittsburgh, Pa., announces the purchase of the Central Iron Works of San Francisco and will enlarge its present output of fabricated structural steel.

The Central Iron Works was organized by A. A. Devoto about 28 years ago and has been one of the important factors in the building of San Francisco. Effective February 1, the plant will operate under the name of McClintic-Marshall Company Central Works.

The new company takes over in its entirety the Central organization, including Mr. Devoto as general manager, and Mr. Charlton as manager of works. In addition, Harry Mortenson becomes a part of the new organization in the capacity of secretary.

McClintic-Marshall Company is said to be the largest independent manufac-

turer of structural steel work in the world. The company operates shops at Pittsburgh, Pa.; Pottstown, Pa.; Chicago, Ill., and Los Angeles, Cal.

McClintic-Marshall Company has constructed some of the largest bridges and steel structures in the world. They are now engaged in building the Detroit-Windsor bridge over the Detroit river at Detroit, a \$25,000,000 project. They are also constructing the Fort Lee bridge over the Hudson river at New York City. The latter bridge will be by far the largest bridge in the world, being almost exactly twice the clear span of the Philadelphia-Camden bridge. McClintic-Marshall Company was the builder of the bridge over the Hudson river for the New York Central Railroad at Castleton, New York, and similar heavy construction projects throughout the world.

STANDARD HANDBOOK OF STEEL CONSTRUCTION OFF PRESS.

The Standard Handbook of steel construction as compiled by the American Institute of Steel Construction, 285 Madison ave., New York, is off the press. The handbook contains 384 pages of data indispensable to the designer and specification writer. Its contents include the A. I. S. C. Standard Specification for Structural Steel for Buildings, the A. I. S. C. Standard Specification for Fireproofing Structural Steel Buildings, and the A. I. S. C. Code of Standard Practice.

There will also be found in the handbook a large amount of additional information previously unobtainable in printed form, or obtainable only from widely scattered sources. Data regarding the new shapes recently produced by various rolling mills is complete up to date of issue.

Copies of the handbook may be obtained from any of the members of the American Institute of Steel Construction. Copies may also be obtained from the Institute direct at a cost of \$1.50 a copy.

LACK OF INSPECTION ON CITY WORK CHARGED TO BOARD OF PUBLIC WORKS

The San Francisco Board of Public Works is under fire from two angles.

Timothy Reardon, head of the board, scarcely had finished denying charges of graft by city contractors when Albert Evers, secretary of the Northern California Chapter of the American Institute of Architects, declared that "building inspection in San Francisco is deplorably lax."

The assertions of the architects were made at a recent meeting. They tempered the harshness of the charges, though, by adopting a resolution complimenting the board of public works on its action in appointing an advisory committee to look into the situation.

Mr. Evers declared that at least 50 per cent of applicants for building permits are giving false low estimates of cost.

"They are charged so much per \$1000 on the cost of the proposed building for the permit," he said. The law says that this cost-estimate must be made when the permit is issued.

"In almost every case the estimate is made by the applicant and not by the city, and it is far too low. If the building costs more than the stated estimate,

the builder does not pay an additional fee."

Mr. Evers asserted that all permits should be thoroughly examined by a competent engineer. He recommended a complete revision of the building code and the employment of more engineers and inspectors.

The other current difficulty of the Board of Public Works arose out of a charge made Thursday by Walter D. Jackson, a member of the Bricklayers' Union, at a meeting of the street committee of the Board of Supervisors. Jackson asserted that contractors on street and sewer work were grafting. Reardon denied these charges flatly.

His denial was supplemented by one from City Engineer M. M. O'Shaughnessy.

Supervisor Andrew Gallagher of the street committee, however, declared that the committee was going to "get to the bottom of the matter."

"The street committee has a well-founded opinion," he said, "that the public is not getting its money's worth out of work done for the city by private contract."

INDUSTRIAL ACTIVITY DECLINES IN TWELFTH FEDERAL DISTRICT

In the Twelfth Federal Reserve District the year 1927 witnessed a decline in industrial activity, the maintenance of trade at active levels, improvement in the economic position of agriculture, and a slight downward movement of the general price level.

Changes in banking and credit conditions during the year have reflected, with considerable accuracy, seasonal and other changes in the general business situation. The usual spring, autumn, and holiday or year-end peaks of credit demand were experienced, but in the latter half of the year changes in the pace of business served to modify seasonal movements in demand for funds. Over the year period commercial loans of reporting member banks declined 11 million dollars while loans on securities and other collateral increased by twice that amount. Both time and demand deposits at these banks increased during 1927, but the increase in time deposits was greater, both actually and relatively, than the increase in demand deposits. Member banks have used these additional funds to liquidate their indebtedness at the Reserve Bank, and to increase their investment holdings. Condition statements of the Federal Reserve Bank of San Francisco, at the opening of 1928, showed little change from similar statements issued at the beginning of 1927. Interest rates ranged generally lower during the first weeks of January, 1928, than during January, 1927.

Decreased activity in building, lumbering, and food products industries were principally responsible for the lower level of industrial activity prevailing during 1927 as compared with 1926. Industrial production decreased during the last three-quarters of the year and employment in industry declined. An unusually large migration of workers into the district during the last months of the year added to the volume of seasonal mid-winter unemployment.

HYDRAULICKING LANDSLIDES OFF OF HIGHWAYS

How the monitor of hydraulic mining days is being utilized for the purpose of removing landslides from state highways is told in the January number of California Highways and Public Works, the official journal of the State Department of Public Works. District Engineer T. A. Bedford tells of the success that has met this method of combating landslides on the Redwood Highway in Humboldt county. He reports dirt moved rapidly at a cost of 10 cents a cubic yard.

STEADY DECLINE NOTED IN STEEL OPERATIONS—U. S. STEEL REPORT SHOWS

The United States Steel Corporation reports total earnings of \$31,247,529 in the final quarter of 1927, bringing the aggregate for the year to \$164,246,545. This compared with total earnings of \$199,058,869 for 1926 while the figures for the last quarter of that year was placed at \$53,502,525.

Giving further evidence of the steady decline in steel operations during the year, net income in the final quarter fell to \$17,682,602, nearly 10 millions under the previous quarter and more than twenty-two millions below the corresponding period of 1926. Net income for the full year amounted to \$105,366,988 compared with \$134,837,957 in the year before.

Because of the increase in the number of shares outstanding due to the 40 per cent stock dividend last year, the corporation's earnings on the com-

mon stock dropped to \$1.05 a share. This apparently was less than a quarter of the \$4.88 a share earned in the final period of 1926. Earnings for the year likewise showed a wide discrepancy, declining to \$8.80 a share against \$17.99 in 1926. Last year's earnings were computed on a basis of 7,116,235 shares of common against 5,083,025 at the end of the foregoing year.

Last quarter earnings per share were insufficient to pay the regularly quarterly dividend of \$1.75 a share on the common stock and a deficit of \$4,963,499 resulted after dividends were deducted. A like dividend was declared on the preferred, maintaining the year's disbursements on both issues at the rate of \$7 annually after deducting the last quarter deficit, the corporation showed a surplus for the year of \$12,812,134. This compared with surplus at the close of 1926 of \$25,866,552.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

That the job of the present State Highway Commission is to push along the work of constructing the state road system to completion, is the opinion voiced by Commissioner J. P. Baumgartner of Santa Ana, in the January issue of California Highways and Public Works, the official journal of the State Department of Public Works.

Here are the things that Mr. Baumgartner lists that the Commission should do and should not do:

1. It will exert every effort, consistent with good engineering and construction principles to "begin to finish" the state highway system as originally planned.

2. It will build state roads only and will not add or sanction the addition of other roads to the state system until those now in the system have been built.

3. Precedence in road building will be governed by present and prospective traffic requirements and necessities.

4. No state road will be built on inadequate right-of-way.

Mr. Baumgartner's article is a plea for state-wide vision upon the part of the people in regard to its state highway system. He concludes his article with these paragraphs:

"Between the northern and southern parts of the state there can be no sensible or justifiable conflict of interests in highway construction. An equitable division of funds has been affected by both law and policy, and the average character of development in all parts of the state is essentially the same. Time was when recreational and tourist business was largely confined to southern California, and it is still more prominent and extensive in that part of the state than in the central and northern parts; but its development in the latter parts during recent years has been tremendous and the unquestionable attractions and resources of these parts are such as to give assurance of the continuance of such development on an ever increasing scale. Every mile of good roads built in northern California will benefit southern California almost if not quite equally with every county in which it is built, and the same is true with respect to the benefits that will accrue to northern California by the building of good roads anywhere south of the Tehachaplast.

"So, with all interests and all sections of our great and beautiful state catching the vision of its ultimate beauty and greatness, let us move forward toward our shining goal."

Foreign trade while brisk in the first nine months of 1927, gaining volume in a number of products, also fell off considerably in other items. The chief export gains were in lumber, asphalt, paints and varnishes. Rails totaled 137,000 gross tons, a gain of 4.8 per cent. Rail production in all 1926 totaled 3,217,000 tons, of which 5.8 per cent was exported. Cement exports amounted to 0.5 per cent of production in the first nine months, a decline of 18 per cent; imports, though amounting to 1,230,000 bbl., declined 44.6 per cent from 1926. Other noteworthy declines were in structural steel exports (14 per cent), and railway track materials except rails (22 per cent). Imports gained chiefly in iron and steel products; bars and ingots declined 23 per cent.

Lumber exports of \$155,235,000 in 1927 surpassed the value of every past year except 1920, which was an abnormal year, the commerce department announces. The gain over 1926 was 8 per cent.

One of the leading architects of France, M. Le Corbusier, has a plan to make Paris a city of skyscrapers, with avenues 20 yards wide and cross streets at intervals of 350 or 450 yards. An immense structure of 60 floors would be built in the center of each of the enormous blocks. In the heart of the new capital M. Le Corbusier would have a subterranean railroad terminal feeding all lines running out of the city and an overhead airport for aircraft, the street surface being reserved for automobile traffic. In this manner, the architect contends in his book "Urbanism" Paris would consist of two cities, one devoted to business, the other a residential district, separated by a main avenue running from east to west. He believes that the initial outlay in condemnation proceeding and rebuilding, estimated at a billion dollars, would be amply repaid by the increased efficiency and real estate income.

First mortgage real estate financing in the United States during 1927 established a new high record, the total volume of new offerings aggregating \$1,016,289,600, according to statistics compiled by the Building Economic Research Bureau of the American Bond and Mortgage Company. This is an increase of 12 per cent over 1926, the previous record year for real estate investment issues. The bureau's figures which covered realty offerings of \$100,000 upwards, showed that more than 54 per cent of the 1927 financing was secured by first mortgages on properties in the New York metropolitan district and Chicago. Thirty-seven per cent or \$376,248,350, of the issues were used for financing construction in New York, while in Chicago, where heavy apartment and office building financing has been in progress, the volume of new offerings reached \$173,245,000.

Organization of Willapa Pulp & Paper Mills, an Oregon corporation with assets of \$2,130,000, is announced. The company has acquired all the physical properties, free of all indebtedness, of the Columbia Box & Lumber Co., comprising the plant site of approximately 80 acres on Willapa harbor, Wash. Under the supervision of R. A. Swain, president, and one of the foremost industrialists of the Pacific Northwest, a pulp mill of 50 to 60 tons daily minimum production is to be constructed on the property and is expected to be in operation before September 15. It was stated that the entire sulphate pulp output of the company has been contracted for a market prices over a period of 10 years by the Bulkley Dunton Co., New York City, one of the largest pulp and paper factories in the business.

Burns & McDonnell Engineering Co., consulting engineers, Kansas, Mo., and Los Angeles, Calif., have issued a 32-page booklet being the story both in text and illustrations of some of the important projects undertaken by this company in all parts of the United States in the field of water purification. The booklet's purpose as conceived by its authors is to "further encourage municipalities to better domestic and industrial water supplies."

Red River Lumber Company is making surveys for a logging railroad from Susanville to tap the company's holdings to the north and west of Susanville.

B. J. Williams, director of sales of the Paraffine Companies, Inc., recently returned from a trip to the Pacific Northwest for the purpose of conferring with district managers to outline plans of the company for the current year. His trip included stops at Portland, Seattle, Tacoma and Olympia.

Due to the increased demand for steel, unfilled tonnage of the U. S. Steel Corporation at the close of December will show a gain of more than 200,000 tons, and probably may exceed 300,000 tons. Should this develop, it would be the largest increase in bookings since December, 1925. Unfilled orders at the close of November were 3,341,000 tons.

Demand for electrical equipment continues to show moderate improvement with orders from industrial plants more active than in some time past. Inquiries for apparatus from power companies have increased, Electrical World reports. Several large power projects have been announced in the South and Pacific Coast and the outlook for sales is encouraging.

Two suits to recover costs of materials totaling \$17,878.96 have been filed in the Butte county superior court against the Charles S. Mabrey Company of Sacramento. The Diamond Match Company sued for \$14,587.89 plus \$1500 attorney fees for material used in the Chico Veterans' Memorial Hall and the Booth-Herbooth Company of Marysville entered suit to recover \$3,291.07 plus \$600 for attorney fees for the installation of a heating plant. The complaints allege that the defendant company has failed to meet the obligations to the two plaintiffs.

That the lumber industry will soon rise from its depressed state is the belief of The Brookmire Economic Service, Inc. If output is held within reasonable limits during the period immediately ahead, producers will undoubtedly be able to command prices for their product which will permit betterment in profit margins. The critical stage in production has probably been reached and the economists feel confident that by early spring prices will feel the stimulus of increased demand. General business activity shows signs of revival and during the next few months at least the consumption of lumber by industrial users is likely to grow in volume.

Union wage rates which have been marked by an almost uninterrupted increase for the past 20 years continued their steady advance into the present year, the Bureau of Labor Statistics, Department of Labor, has just announced on the basis of its annual survey covering most of the time-work trades in 66 important industrial cities. According to the Bureau, union wage rates in these cities showed an average of \$1.19 per hour in 1927 compared with an average of slightly less than \$1.15 in the preceding year.

San Francisco will vote on the proposal to issue bonds of \$40,000,000 at the May election to purchase the properties of the Spring Valley Water Company. At the same time the proposition to issue bonds of \$24,000,000 to finance Hetch Hetchy construction will be submitted.

M. M. O'Shaughnessy, city engineer of San Francisco, urges a \$5,000,000 bond issue to finance reconstruction of the city sewer system. Immediate construction of the Fillmore street storm sewer is urged by the engineer, at a cost of \$750,000.

Expenditure of \$40,000,000 over an eight-year period on forest lands along watersheds has been approved by the U. S. Senate. A bill by Senator McNary of Oregon calling for the project was passed and sent to the house. An amendment by Senator Overman, Democrat, of North Carolina, would restrict purchases of 1,000,000 acres except for purposes of flood control.

Purchase of six retail lumber yards, involving approximately \$500,000 from the Columbia Valley Lumber Company by the Columbia Lumber Company of Seattle, is announced by W. C. Miller, president of the latter concern. Accompanying the announcement was a statement by Miller that the capital stock had been increased from \$175,000 to \$350,000. The deal includes two yards at Wenatchee and one each at Cashmere, Monitor, Dryden and Mansfield, giving the company control of 14 yards in the State of Washington.

Bert B. Meek, state director of Public Works, announces that, in consequence of an act of the 1927 Legislature, he has instructed the State Division of Highways to begin an exhaustive investigation of private toll bridges operated as connecting links of the state highway system. The investigation, Meek said, will be comprehensive so that the report to the next Legislature will acquaint the legislators with every phase of the toll bridge problem, including traffic count, revenues and cost of operation. The 1927 act provides that the reported to the 1929 session shall embody recommendations with reference to the state taking over private toll bridges, with a plan for financing their acquisition and amortization of the cost.

Los Angeles capitalists are said to be considering the construction of a \$20,000,000 pipe line from Kern county to convey natural gas to San Joaquin valley points and the San Francisco Bay region.

A. L. Trowbridge, chief engineer for the Kern River Water Storage District, in a report submitted to the Farmers Protective Association, estimates the cost of the proposed water project at \$12,210,000, itemized as follows: Storage of 150,000 ac. ft. of water back of high dam at Isabella, \$2,732,500; canal system, physical works, \$5,225,852; ground water replenishment works, \$227,718; district pumping system, \$1,642,800; surface drainage system, \$259,962; purchase of water rights, \$2,057,987; preliminary engineering, \$37,181; spreading assessment, \$25,000.

In a discussion on bridge design at a recent meeting of the Western Society of Engineers it was remarked by Mr. Reichmann, of the American Bridge Co., that the ordinary truss span nowadays are not often erected by means of overhead travelers, but mainly by locomotive cranes having long booms. This latter method saves a heavy investment in the traveler, saves much time and saves many men who would otherwise be required. To the objection that erection by cantilevering is slow on account of the handling of material, Mr. Reichmann replied that this method is not necessarily slow if the plant layout is designed for bringing the material forward rapidly.

The Stockton city council will investigate the feasibility of the city owning its own electrical distributing system. Preliminary estimates place the cost of construction at \$2,000,000.

TRADE NOTES

Edward N. McLaughlin, recently named city electrical inspector of Richmond, assumed his duties Feb. 1.

Julian Mouroi, 72, pioneer architect of Modesto, died in that city Feb. 1. He resided in Modesto for the past 45 years.

City manager form of government is proposed for Walnut Creek by the Walnut Creek Chamber of Commerce. Public meetings will be held to advance the proposal.

Application for membership in the San Francisco Builders' Exchange has been filed by the Atlas Hauling & Grading Company.

Francis J. Catton, architect, formerly of Los Angeles, announces the opening of offices for the practice of architecture at 358 Sutter St., San Francisco. Mr. Catton was formerly architect with the Los Angeles Board of Education.

George Schwind has been appointed a member of the board of examiners of the department of electricity of the city of San Jose. He succeeds I. B. Allen, whose term expired. Other members of the board are: R. M. Altmire, S. E. Benoit, Samuel Pearce, E. Theo. Russell and Frank Shelley.

Henry Stammer, 80, president of the Garden City Pottery Co., and pioneer brick man, died in San Jose, Feb. 4, following an automobile accident. A son and two sisters survive.

Lawrence E. Schultz, former grid star and member of the Santa Clara University campus engineering society, has left for Mexico to enter the employ of a civil engineering organization. Schultz graduated from the Santa Clara University in 1927 and since that time was in the employ of the city engineer's office at San Jose.

Ellery Young, 66, manager of the Pacific Manufacturing Company and prominent in the Santa Clara Valley section as a lumber man died in San Jose, Feb. 2. Besides his widow he is survived by two children, to sisters and two brothers.

The Southern California Edison Company is obtaining rights-of-way for a 120,000 volt high tension line 44 miles in length from Saticoy to the Castaic substation. The cost is estimated at \$10,000 a mile.

Perseo Righetti, 56, prominent San Francisco architect, passed to the Great Beyond, Feb. 7. Mr. Righetti was formerly associated with the late August Headman, operating under the firm name of Righetti & Headman. During his career as an architect he designed many of San Francisco's prominent structures, particularly apartment buildings.

Wm. Symmonds, architect, formerly operating at Colorado Springs, Boston and Montreal, Canada, has joined the forces of the American Roofing Company, 718 Fourteenth St., San Francisco, as estimator and promoter of sales. The company carries a complete line of Johns-Manville Rigid Asbestos and rag felt shingles; tar and gravel roofing; Pabco; shingles-felt and Weaver-Henry Gothic shingles.

ALONG THE LINE

James Hassen will operate from 1503 Fifth street, Eureka, under the firm name of Hassen Electric Works.

A new saw mill is projected at Alturas, Calif., by the Crane Creek Lumber Co. of Lakeview, Oregon.

Albert McCarley, formerly of San Jose, has been named branch manager for the M. Stulsaft Company at Monterey. The branch will carry a complete line of plumbing equipment.

Witte Iron Works Co. of Kansas City, Mo., capitalized for \$500,000 has filed articles of incorporation at Redwood City. Edward H. Witte of Kansas City is president. The company manufactures and deals in machinery.

M. Steele Co., 320 W. M. Garland Bldg., Los Angeles, and Spreckels Bldg., San Diego, has been appointed sales agent for the Henry Cowell Lime & Cement Co. in the Southern California section. The Cowell interests, it is said, have just entered the Southern California section in a direct sales capacity. Cement will be shipped by water to San Diego.

Bunting Iron Works of Berkeley is having plans prepared for a new plant to replace the structure recently destroyed by fire. The plant will be erected in Parker St., between Fifth and Sixth Sts., Berkeley. It will be part one and two stories in height, containing 12,000 square feet.

Yettah Baker, widow of the late James R. Baker, will continue the paint business of her husband at 632 South Aurora St., Stockton. She will operate under the firm name of Baker Paint Company.

Manufacturers' catalogues from all over the United States are wanted by the Miami, Florida, Builders' Exchange, to be placed on file in the organization's library.

An option filed in the office of the county recorder at Salinas reveals that a real estate deal involving the sum of approximately \$150,000 is pending between the Henry Cowell Lime & Cement Company of San Francisco and Miss Marion Hollins for the purchase by the latter of 4,264.99 acres of land in northern Monterey county near Pajaro. The option will expire on March 1st.

Annual meeting of stockholders of the Pacific Portland Cement Company will be held at 1112 Hunter Dulin Bldg., San Francisco, February 24, it is announced by Harry T. Battelle, secretary of the company.

Columbia Steel Corporation has started construction of additions to the Torrance, Calif., plant which will involve an expenditure of one-half million dollars. The additions will double the output of the plant.

Monolith Portland Cement Company for year ended December 31, 1927, reports 1,445,794 barrels of cement manufactured and shipped. Coy Burnett, president, in making this announcement, failed to comment on earnings for 1927 other than to say that after all charges average annual net profits for the last five years have exceeded \$500,000 and that dividend paid since the company was organized amount to more than was originally paid into the company. Orders since the first of this year are reported to be four times that of the corresponding period of last year.

GROWING MENACE TO CONSTRUCTION INDUSTRY CITED BY MATERIAL DEALERS

Mr. Frank L. Hatch, secretary of the California Material Dealers' Association with headquarters in San Francisco, has sent out the following letter to Credit Departments which is worthy of serious consideration. Mr. Hatch, in his communication, paves the way to eliminate the practice of members of the construction industry in warning chairs at creditors' meetings.—EDITOR.

A speculative builder or an owner wants to build—he hasn't the finances—he arranges for the purchase of a lot—pays something down and agrees to secure the balance with a deed of trust. After he gets the legal title in his name he arranges for a building loan, the security for which is usually a mortgage, sometimes a deed of trust. These encumbrances invariably are put on record before the building is commenced. He then commences his arrangements for the supply of building materials, and the material man usually sells him, feeling that in any event he can file a lien and thus secure his claim for materials furnished the building.

The Evil

If the speculative builder or the owner hasn't made any mistake in his figures, and applies the money received from the building loan in the right channels, it may be that the material man will receive his money without trouble and litigation, but what, many times, happens—Unwise figuring or improper use of funds brings the building to a state of completion with a shortage. Then the material man is forced to file his lien and by the time the law requires him to commence foreclosure proceedings he learns that the parties holding the encumbrances have also commenced foreclosure proceedings, and their liens (if they were put on record before the building was commenced) take precedence over the material man's lien. The result is usually a meeting of creditors and, if the equities of the material men in the building are sufficiently large, arrangements are made for the material

man to advance his pro rata of cash to clear the building of either the mortgage or deed of trust, or both, and then the process of selling the building commences. When the experience is over the material man is lucky if he receives thirty or forty cents on the dollar. Many times he loses out entirely.

Many instances may be cited in confirmation of the above which have happened here in San Francisco in the last few years, and the tendency to build in this manner is alarmingly increasing.

The Remedy

Under our present Mechanics Lien Law there is only one remedy. Secure a search of the property before you commence selling and distributing your materials to the building. If you find the property encumbered as we have pictured do not sell except for cash in advance, or if you do sell do so only after securing the written acceptance of the parties lending the money to take care of your claim.

This is simple, and yet it is hard to do, but if you will do it, you will not be warning chairs at creditors' meetings, and when you come to recount at the end of the year yours will be a different story.

The California Material Dealers Association, Mr. Hatch announces, has completed special arrangements with reliable sources to provide the association with immediate property reports within the San Francisco city limits at a special searching rate. Members are strongly urged to make themselves available of the service.—EDITOR.

NATIONAL COUNCIL FOR LABOR DISPUTES IS PLAN

Establishment of a national council to handle industrial disputes is the suggestion of a sub-committee of the committee of commerce of the American Bar Association which has been studying the cause of industrial controversy for several years.

The suggestion is embodied in the platform put forth by the committee as a basis for discussion in the public hearings it has announced for February 16th, 17th, 18th.

The duties of the industrial commission are not defined in the declaration issued by the sub-committee, but the New York World says it understands that it would not be in any sense an industrial court, the World says the commission's duties would be that of a permanent fact-finding body which would do more thoroughly what is from time to time done by separate commissions appointed in times of industrial strife. It would be then collector and custodian of reliable material to which arbitration boards and the public might have access.

The announced platform advocates promotion of peaceful adjustment and prevention of industrial controversy by encouragement of the making and maintenance of contracts when freely and voluntarily made would be legal and binding says the platform, and the provision for settlement of differences by arbitration irrevocable and enforceable.

CHICAGO BUILDING INTERESTS TO FIGHT 5-DAY WEEK

Chicago builders will solidly oppose any attempt by the building trades to bring about the general adoption of the five-day work week, Oscar W. Rosenthal, president of the Builders' Association of Chicago, stated following an agreement made between the journeymen plasterers and the employers.

Officials of the bricklayers, carpenters and plumbers unions announced that they favored the five-day week. The plumbers will meet shortly to discuss the issue.

"The building trades of Chicago would be violating their agreements with the Association of Contractors if they attempted to follow the example of the plasterers in setting up a work week of forty hours instead of one of forty-four," said Rosenthal.

"The contractors of the United States have expressed themselves as being opposed to the five-day week. They believe it impractical.

"While many persons in the construction industry view with alarm the 90-day trial of the short work week agreed upon by the employing plasterers and journeymen plasterers, I do not. Those familiar with the construction industry realize that all units must function simultaneously if an economic program is to be carried on."

Rosenthal said it was natural that the plasterers' union should try to distribute work to its 1500 unemployed members.

WILL OPPOSE BREAKWATER

Plans for the \$14,000,000 breakwater project at Los Angeles harbor, formed by the Board of United States Engineers, are an imposition and will place "burdensome conditions upon the people of Los Angeles," Council Colden declares. He introduced a resolution in which he asked for an appeal to the board and members of congress to "revamp" the plans to make a "real and immediate benefit" to the public. It was declared that present plans provide for the new breakwater to be built in such a way that it will separate Long Beach harbor from Los Angeles harbor, thus creating an added expense to the ships traveling between the two ports.

BUILDING WAGE REDUCTIONS PREDICTED FOR THE CURRENT YEAR

(Special Correspondence from United Business Service, Boston, Mass.)

From present indications, the year 1927 will go down on the record as a period of unusually stable labor conditions.

The number of strikes recorded has been the lowest since 1914; and payrolls throughout the first nine months of 1927 have declined about 2 per cent, with employment only some 3 per cent lower than during the same period last year. Industrial wages have apparently reached a temporary peak during 1927, and turned gradually but definitely downward. We anticipate that the seasonal improvement in trade and industry now under way will stem the present moderate downward trend of employment for at least the next 30 days.

Stable Labor Conditions

The same absence of industrial unrest, and the presence of high purchasing power among the workers that has existed during most of 1927 may be expected to continue through the first three months of 1928. During this period we look for very little change in number of strikes; tendency for new wage adjustments to work lower, rather than higher; and a further downward movement in the total number of employed. Along with the expected continuation of this trend will come further increases in employee efficiency, and the introduction of more labor-saving devices and equipment.

During the period from April 1 to June 15, several hundred wage agreements

and contracts came up for renewal. Some of the most important of these are in the building industry; and it is in this field that we anticipate the major portion of the downward wage adjustments of early 1928 will take place. It is also probable that the strike totals for all industries will show a rather sharp upward trend during this critical three to four months' period, beginning April 1.

As we have pointed out to clients before, we believe that building wages are in line for reductions of from 5 to 10 per cent; and that this will come, despite relatively high level of construction activity now looked for in 1928. A recent survey of common labor wage rates, made by the Department of Labor, shows the general contracting (building) trades at the head of the list with average wages of 48.2 cents per hour.

While it is a little early to hazard a definite forecast for the labor situation during the second half of 1928, we are now of the opinion that the last six months will see increased industrial activity, along with increased employment and slight stiffening of wage rates.

Increased labor efficiency; some increase in strikes, particularly in the second quarter; further downward adjustment of wage levels during the first half of 1928; and a general improvement in labor's position during the fall—these appear to us to be the outstanding labor developments that may be expected in 1928.

STANDARDS COMMITTEE IS NAMED BY S. F. ARCHITECTS TO IMPROVE BUILDING METHODS—MOVE ENDORSED

With a view to assisting members of the American Institute of Architects in the performance of their technical and professional duties, the president of the Northern Chapter, American Institute of Architects, has appointed a committee on "Drafting Room and Office Standards," it is announced by E. L. Norberg, San Francisco architect, chairman of the committee.

Others to serve on the committee include: G. Albert Lansburgh, Geo. Kelham, C. F. Maury, Geo. A. Applegarth and Chas. P. Weeks.

This committee is working out a number of practical ways and means of standardizing, simplifying and making more complete and systematic the architects' office work and through the use of standard symbols and scientific methods eliminating wasted effort in the draughting room and materially assisting in the compilation of more accurate and complete working drawings, so that the guessing by estimators and extras on the job will be eventually eliminated.

A set of Standard Symbol sheets are now being draughted and will consist of:

(A) Revisions to the Standard Symbol sheet for electric wiring.

(B) A Standard Symbol Sheet for plumbing work.

(C) A Standard Symbol Sheet for heating, ventilating and mechanical equipment.

(D) A Standard Symbol Sheet of structural and architectural notations including abbreviations.

(E) Architect's Office Sheet—showing the simplest and yet the most complete manner of indicating different items, schedules, etc., and data not contained in the Standard Symbol sheets.

(F) Model plans illustrating use of the above symbols, methods, etc.

These sheets after being approved by the local Chapter of the A. I. A. and various engineering societies, etc., will be presented at the National Convention

of the A. I. A. so that eventually they will be adopted throughout the entire United States.

After the approval of the symbol sheets they will be distributed to all architects of the Institute and in turn to the various engineers, contractors, estimators, etc., down to and including the job foreman.

The advantages of the symbol sheets will be:

(A) All architects of the A. I. A. will use the same symbols and notations on their plans, which will be a great assistance to all estimators, contractors, and foremen who work with many different architects' plans.

(B) Draughtsmen will learn the Standard Symbols and Methods and in moving from one architect's office to another will not be confused as at present and as a consequence time will be conserved, errors eliminated and better plans produced at less cost to the architect.

(C) It will no longer be necessary to draw a set of symbols and abbreviations on each set of drawings as at present—a note will simply state that all symbols and abbreviations are according to A. I. A. Standard Sheets.

In connection with the above, model plans embodying the above features will be obtained free from the various architects and exhibited for educational purposes.

The committee has also worked out a catalogue filing system, to be known as the Architects' Standard File. The system will provide for the filing of all manufacturers' catalogues and data of building materials available for use on the Pacific Coast. The filing will be arranged under forty headings, similar to the A. I. A. system and may be incorporated with that system or kept as a separate unit.

A number of other improvements are outlined in the program of the committee and will be worked out in the immediate future.

COMMITTEE URGES CONSTRUCTION OF IRON CANYON DAM PROJECT

That steps be taken at once looking toward the early construction of the Iron Canyon dam, reservoir and power plant, "preferably by the federal government with such co-operation as the state of California and local interests" may accord, was the sense of resolutions adopted by a committee of 25 meeting in Sacramento, Feb. 4. The committee was appointed by W. A. Beard of Marysville, long a backer of the project.

Decision also was expressed in the resolutions to make immediate application to the United States Bureau of Reclamation for a survey "preferably with the co-operation of the state department of public works for the purpose of re-planning the distribution of water to serve existing needs and to afford a basis of knowledge upon which formal application for construction of the project may be based."

Beard named five men to a special committee to handle preliminary work looking toward early construction of the proposed dam and power plant, the site of which is on the Sacramento river, a few miles above Red Bluff.

Those on this committee are A. L. Conrad of Red Bluff, James Mills of Hamilton City, Glenn county; Arthur C. Huston of Woodland, and Jesse Poundstone of Grimes.

The resolutions also set forth that the project, as shown in the report of Walter R. Young, reclamation bureau engineer, would conserve 800,000 acre feet; that the Young report also shows that "upon the basis of certain assumption as to quantities of hydro-electric power that may be sold and the price to be obtained therefor, and an interest rate of 5½ per cent the entire cost of this water storage can be repaid out of the net power earnings; that federal department officials are sympathetic toward the project; that the United States Reclamation Service has surveyed and approved the project and call upon the Iron Canyon Project Association to be the active agent in the matter.

The resolutions further state that the canal system considered in the latest report is abandoned and the channel of the Sacramento river is adopted as the main artery of distribution.

The resolutions also provided for continuation of the committee and authorize the chairman to add to its membership by appointment until it shall become a committee of one hundred.

BERKELEY FOUND GOOD SPOT FOR BIG BEN BARGAIN SALE

Oh, for the wisdom of Solomon! is the prayer uttered today by Sam H. Cohn, deputy state superintendent of public instruction.

It came about in this manner. After a recent survey of the buildings at the deaf school at Berkeley, George B. McDougall, state architect, ordered the tower on the educational building dismantled. He declared it unsafe, and a positive hazard in the event of an earthquake.

But now comes a petition signed by 53 residents of Berkeley protesting against leveling the tower because in the tower is a clock which the petitioners describe as "an asset to the community and a great convenience, if not a necessity."

To dismantle the tower without removing the clock is now the problem. Cohn is writing to Miss Mary E. Viner, who circulated the petition, telling her that the state is not dismantling the clock, but the tower, and if some method can be devised whereby the clock can be retained without the tower, all good and well.

But—there's the law of gravity to be reckoned with.

AN ECHO FROM SANTA BARBARA ON THE TOPIC OF ORGANIZATION

Some time ago we commented upon the "peppy" bulletin of Harry Cayford, secretary-manager of the Fresno Builders' Exchange wherein he keeps the membership informed as to the "whys" and the "hows" of his organization. We advised that other exchange secretaries should follow in his footsteps and inject a quantity of enthusiasm into the membership of their own organization. The suggestion carried. From Santa Barbara, A. J. Nolder, secretary-manager of the Builders' Exchange in that city, sends out the story published herewith under the caption—"Isn't it So?—Then Get Out Your Horn and Toot For Success, and Make it a Happy and Prosperous New Year."—EDITOR

When a man first becomes a member of any organization, he is usually very active, always thinking of the needs of this particular new venture of his—but as time rolls on he becomes less and less active, then finally settles down to a directed routine of affairs, or—

He tries and tries to keep the Fire of Ambition burning within the ranks, but when he sees that they care not for progress, and are throwing cold water upon his ideas for success, are shirking from their duties as a member, he becomes dissatisfied with the Organization, begins to wonder if he should remain a good, loyal member or just a knocker and a poor member like the others. He then decides to find a new field for his endeavors and to plant the seeds of Pros-

perity in it. The Organization then wonders why they can't keep their members, why so many are falling delinquent and taking out Withdrawal Cards.

When an Organization is Prosperous, you can readily see that their Code is one of Ambition, Co-operation and Responsibility. These three factors are responsible for Great Activity and Prosperity in their Community—but on the other hand when Selfishness, Dissatisfaction and No-cooperation rule, there is nothing worthwhile, according to their views, so it is not worth the while to Go-Ahead and strive for the Success which is theirs for the asking. A lot of self-centered greedy members who are living in the Century past, with no desire to get ahead should wake up to the fact, and let the other fellows' ideas take some effect for their own good.

You must be careful that a member is not too conservative, with the idea that to venture forth too far would heap destruction on their heads—he is always living in constant dread for fear that the inevitable will surely happen, that he will then be held directly responsible for the annihilation of his pet organization. To be so conservative is not getting your Organization anywhere,—give the other fellow a chance to win success for you. NOW if you do not want to stay in the same old rut, and play the same old tune, then get on the band wagon and toot your horn for SUCCESS.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

HERE — THERE — EVERYWHERE

George L. Hooson, cement and sewer contractor of Hayward, Alameda county, will be a candidate for the office of city councilman of Hayward at the April election.

Preliminary plans for the district conference of the California State Builders' Exchanges, are being made by the Stockton Builders' Exchange. The conference will be held in Stockton in April, on a date yet to be determined.

Santa Barbara Builders' Exchange is occupying new quarters in the Central Bldg., State and De la Guerra Sts., Santa Barbara. The new quarters are centrally located and will afford members a better chance of doing business on the exchange floor.

Sub-contractors engaging in plastering, plumbing, roofing and masonry are required to show licenses and deposit bond under new ordinance effective in San Leandro. It is announced by Chris Hopper, city building inspector. The new ordinances are designed to eliminate the practice of letting sub-contracts to unreliable firms or individuals.

B. E. Underwood of Salinas was elected president of the Coast Counties Master Plumbers' Association at the annual meeting held recently in Watsonville. Edward Simpson was re-elected secretary and C. M. Ryan re-elected treasurer. The election of a board of directors and appointments of committee will be held at the next meeting, scheduled for this month at Santa Cruz. Fourteen members attended the annual meeting when five new members were admitted. The association includes master plumbers from Gilroy to San Luis Obispo.

Santa Barbara Builders' Exchange has elected the following to serve as directors for the ensuing year: Roy L. Richardson and J. A. Clarey, general contractors; W. S. Fultz and Fred Lampe, sub-contractors; A. R. Drexel and C. M. Duff, material dealers. Richardson, Clarey, Fultz and Drexel were re-elected, according to A. J. Nolder, secretary-manager of the exchange.

Officers of the exchange are: Roy L. Richardson, president; J. A. Clarey, vice-president; A. R. Drexel, treasurer and O. R. McNall, secretary.

San Diego has adopted an ordinance that creates a municipal electrical department to be operated directly under the control of the City Manager. Under the terms of the ordinance, which is now in effect, all electrical contractors must file a bond of \$2500 each. The ordinance creates a board which will pass on the qualifications of all who seek to engage in electrical work in San Diego and licenses for such work will be issued to those who qualify.

G. L. Weber, transmission engineer of the Pacific Telephone & Telegraph Co., recently addressed the Sacramento Chapter, American Association of Engineers, on the newest of telephonic wonders—seeing by wire or radio.

Arthur Brisbane in his syndicated Column "Today" writes. No man known what a state can do in road building until he has driven over a few thousand miles of California roads. New Jersey and other states have made a beginning—California shows the finished product. Bring your car here, travel ten thousand miles and leave without a bump.

R-1428-S INDUSTRIAL ENGINEER, not over 35 years old, with experience in handling labor production problems and rate setting, for employment with consulting engineer. Must have organizing ability, initiative, tact and abundant energy. Must be a salesman with technical training and ability along mathematical lines and a proven interest in the labor and production element in manufacturing problems. Apply by letter giving experience in detail, education, and general qualifications, with photo. Location Pacific Coast. Salary open.

R-1463-S FIELD SUPERINTENDENT, to take charge of welding outfit and crew of 20. Must be good gas engine man with fair knowledge of electricity. Work is continuous and isolated. Salary about \$250 to start. Headquarters, San Francisco.

X-2353-CS PERMANENT POSITION in South America is open for an energetic graduate civil engineer who speaks Spanish and is qualified to successfully sell and promote materials entering into modern street and road construction. Remuneration commensurate with ability. Submit complete statement of experience and training and a recent photo. Applications will be treated with strict confidence. Headquarters East.

R-1468-S DREDGE MASTER, middle age, for mine in Chile. Must have experience operating large electric driven dredge, preferably New York Engineering Co. machines. Permanent. Salary \$250-\$300 a month. Apply by letter. Headquarters New York, agent in San Francisco.

R-1431-S SALES MEN, to sell electrical appliances for public utility company. Some positions for gas appliances and heating men. Technical graduates preferred for advancement based upon sales record. Northern California territory involves traveling and men with cars preferred. Small salary and commission. Headquarters San Francisco.

\$7,509,691 IS LOS ANGELES BUILDING TOTAL IN JANUARY

Los Angeles' building total for the first month of the new year exceeded that for December by about 13 per cent, but was 7 per cent less than that for January, 1927. During January, 1928, the Los Angeles city building department issued 2665 permits with an estimated valuation of \$7,509,691. For December the number of permits issued was 2483, and the estimated valuation was \$6,630,402, while for January a year ago the number of permits issued was 2844 and the estimated valuation was \$8,129,749.

Class A construction for January, 1928, amounted to \$1,600,000 for two structures, Class B construction \$305,000 for three buildings, Class C construction \$1,257,648 for 55 buildings, and Class D all-frame construction \$3,572,293 for 1496 buildings. This is the low mark for Class D construction in a number of years, falling slightly under that of January a year ago.

Housing operations for January, 1928, were represented by permits for 660 dwellings and apartment houses estimated to cost \$1,256,271, or 21.7 per cent 56.6 per cent of the entire valuation for the month. Accommodations were provided for 1541 families. These figures approximate those for December, but are under the monthly average for the year 1927.

Albert G. Larsen, of Piedmont. AIR COMPRESSOR. This invention relates to compressors, particularly air compressors, and it has been common practice to mount both the intake and exhaust valves in the head directly over the cylinder end.

Arthur C. Wheelock, of Oakland. ADJUSTABLE PIVOT MOUNTING FOR BED-SUPPORTING PANELS. This relates to a vertically adjustable floor pivot mounting for a panel or door arranged to carry a bed in up-end position for movement through a wall-opening engaged by the panel.

ARCHITECTS ENDORSE PLAN FOR NEW BUILDING CODE

The appointment by the Board of Public Works of an advisory board to assist in drawing up a new building code for San Francisco was heartily indorsed in a letter received by the board from the Northern California chapter of the American Institute of Architects. The indorsement was made at a recent meeting of the A. I. A., at the Mark Hopkins Hotel, San Francisco.

The present building code was branded as "entirely inadequate" by C. H. Snyder, civil engineer, and Paul Pfeuger, architect and chairman of the earthquake insurance committee of the California State Bankers' Association.

A uniform building code, to be adopted by all the municipalities of California, was advocated by Pfeuger. He pointed out the desirability of a rigid code from the bankers' viewpoint, and the ease with which proper loans could be gauged when uniform codes prevail.

HARDWARE MEET SET FOR S. F.

Retail hardware dealers from all sections of California will gather in San Francisco, Feb. 15, 16 and 17, for the annual convention of the California State Hardware Association. Sessions will be held at the Palace Hotel. Members of the San Francisco Hardware & Housewares Association are handling the program. R. J. Atkinson, president of the National Retail Hardware Association, will be a speaker.

Building News Section

APARTMENTS

Sub-contracts Awarded

APARTMENTS Cost \$40,000
OAKLAND, Alameda Co., Cal., Warfield avenue.

Three-story and basement frame and stucco apartment building, 12 3-room apts.

Owner—E. Field.
Architect and Contractor—Ephriam Field American Bank Bldg., Oakland.

Tile work—Superior Tile & Products Co., 2725 Shattuck ave., Berkeley.

Sash and doors—Pacific Manufacturing Co., 253 Hobart st., Oakland.

Mill work—Blackman Anderson Mill & Lumber Co., High and Tidal ave. Oakland.

Painting—Howard & Co., Oakland.

As previously reported, electric wiring awarded to Fritz Electric Co., 343 Ninth st., Oakland; plastering to S. Callarafi, 2083 Broadway, Oakland; heating and plumbing to A. Poulsen, 354 Hobart st., Oakland.

Planned

APARTMENTS Cost \$60,000
OAKLAND, Alameda Co., Cal., Oakland ave. near Harrison st.

Three-story frame and stucco apartment building, 24 2-room apts.

Owner—E. Field.
Architect and Mgr. of Con.—E. J. Field, American Bank Bldg., Oakland

Owner Taking Bids.

APARTMENTS Cost, \$100,000
SAN FRANCISCO, NW Fell and Buchanan Streets.

Three-story frame and brick veneer apartment building (21 2-room and 6 3-room apts.); electric refrigeration; elevator; steam heating, etc.

Owner—Fred Hechter, 1424 Balboa St., San Francisco.

Architect—R. R. Irvine and L. Ebbets, Call Bldg., San Francisco.
Building permit applied for.

Plans Being Prepared

APARTMENTS Cost \$15,000
SAN FRANCISCO, E 11th ave. N Geary street.

Two-story and basement frame and stucco apt. bldg., 4 4-room apts.

Owner—Mrs. T. Offutt.
Architect—R. R. Irvine and L. Ebbets, Call Bldg.

Contractor—James Smith, 268 11th ave.
Sub-bids will be taken in 2 weeks.

Plans Being Completed

APARTMENTS Cost \$—
SAN FRANCISCO, Mission District.
Ten-story class C steel frame and concrete bldg., 50 apts., stores, offices and garage.

Owner—Withheld.
Architect—R. R. Irvine & L. Ebbets, Call Bldg.

Two stories of the structure will be devoted to garage. One story for stores and one floor for doctors' offices. Construction will be started as soon as bank loan is obtained.

Sub-bids Being Taken

APARTMENTS Cost \$30,000
BERKELEY, Alameda Co., Cal.

Three-story frame and stucco apartment building (12 2 and 3-room apts.)

Owner and Builder—J. H. Collins, 842 Creed rd., Oakland.
Architect—Hutchison & Mills, 1214 Webster st., Oakland.

Sub-bids Being Taken

APARTMENTS Cost \$30,000
OAKLAND, Alameda Co., Cal., Warfield ave. near Fairbanks ave.

Two-story and basement frame and stucco apartment building, 8 3-room apts.

Owner and Builder—James Forster, 1131 Fleet rd., Oakland.

Architect—W. W. Dixon, 1844 5th ave., Oakland.

Sub-contracts Awarded

APARTMENTS Cost \$150,000
SAN FRANCISCO, N Pacific ave., W Franklin st.

Six-story class C apartment building (18 3-room and 18 2-room apts.)

Owner and Builder—J. D. Hannah, 825 Sansome st., S. F.

Architect—Edward E. Young, 2002 California st., S. F.

Plastering—Chris Berg, 719 45th ave.,
Chimney flues—Atlas Heating & Ventilating Co., 557 4th st.

As previously reported: electrical work awarded to Aetna Electric Co., 1337 Webster st., S. F.; frame to L. H. Birth, 1715 19th st., S. F.; concrete to Mission Concrete Co., 125 Kissling st., S. F.

Plans Being Figured.

APARTMENTS Cost, \$—
OAKLAND, San Mateo Co., Cal., Burlingame Ave. near Lorton St.

Three-story steel frame and concrete apartment and store building (five 3- and 5-room apts; number of stores not decided).

Owner—Mr. Moyer.
Architect—E. L. & J. E. Norberg, 580 Market St., San Francisco.

Bids will be taken for a general contract with separate bids for plumbing, heating and electrical work.

Sub-contracts Awarded

APARTMENTS Cost \$30,000
SAN FRANCISCO, SW Beach and Pierce streets.

Three-story and basement frame and stucco apartment building (6 3-room and 3 2-room apts.)

Owner and Builder—Thos. L. Scoble, 376 Kearny st., S. F.

Architect—E. E. Young, 2002 California st., S. F.

Wallpaper—D. & R. M. Leonhardt, 1580 Market st.

Plumbing—W. Campbell.
Lumber—Sudden Lumber Co., 1950 3rd street.

Frames—Redwood Mfg. Co., Hobart Bldg.
Roofing—Star Roofing Co., 1562 Hayes st.

Stair work—Atlas Stair Building Co.
Plastering—Michael King, 424 27th ave.

Painting—Standard Painting Co., 1359 37th ave.

As previously reported: Electrical work awarded to Aetna Electric Co., 1337 Webster st., S. F.

TULARE, Tulare Co., Cal.—Purchase of property formerly known as the San Joaquin Hospital is announced by M. L. O'Hara who will renovate the structure throughout for apartments. Plumbing contract will be awarded Canby Plumbing Co., painting to C. D. Lavin, and carpentry to H. J. O. and Edgar Reed, all of Tulare. Contract for electrical work and furnishings yet to be awarded. Will contain several two and three-room apts., and nine single rooms with gymnasium and reading rooms on third floor.

Sub-Bids Being Taken.
APARTMENTS Cost, \$—
SAN FRANCISCO, SE Lombard and Polk Streets.

Six-story steel frame and concrete apartment building (number of apts. not decided).

Owner and Builder—Herman Hogrefe, 637 Powell St., San Francisco.

Architect—E. E. Young, 2002 California St., San Francisco.

As previously reported, excavating awarded to B. Rosenberg, 58 Merlin St., San Francisco.

Owner Taking Segregated Bids.
APARTMENTS Cost, \$108,000
SAN FRANCISCO, N Pine Street E Hyde Street.

Six-story steel frame and concrete Class C apartment building (54 rooms, 2 and 3-room apts.)

Owner—Lincoln Investment Co., Louis Goldstein, 1522 12th Ave., San Francisco.

Architect—Albert H. Larsen, 447 Sutter St., S. S.

Owner Taking Segregated Bids.
APARTMENTS Cost, \$180,000
SAN FRANCISCO, SW Sixteenth Ave. and Lincoln Way.

Six-story steel frame and concrete Class C apartment building (90 rooms, 2 and 3-room apts.)

Owner—Lincoln Investment Co., Louis Goldstein, 1522 12th Ave., S. F.

Architect—Albert H. Larsen, 447 Sutter St., San Francisco.

Plans Being Revised
APARTMENTS Cost \$—
SAN FRANCISCO, Marina Dist.

Nine-story reinforced concrete apartment bldg., all modern conveniences.

Owner—George E. McCrea.
Architect—George E. McCrea, Hearst Bldg.

All contracts for proposed bldg. will be handled by contractors already selected by owner.

Plans Being Prepared
APARTMENTS Cost \$110,000
SAN JOSE, Santa Clara Co., N First st. and Hensley ave.

Two-story frame and stucco apartment bldg., 24 apts.

Owner—C. W. Hovson.
Architect—Wolfe & Higgins, Realty Bldg., San Jose.

Plans will be ready for bids in thirty days.

Preliminary Plans Completed.
APARTMENTS Cost, \$150,000
OAKLAND, Alameda Co., Cal. Location withheld.

Ten-story Class C apartment hotel and store building, 90 rooms, 4 stores.

Owner—Withheld for present.
Architect—Willis Lowe, 354 Hobart St., Oakland.

Preliminary plans are now awaiting approval.

To be Done by Day's Work
APARTMENTS Cost \$150,000
SAN FRANCISCO, SW Sacramento & Laguna sts.

Six-story and basement reinforced concrete apartment bldg., 24 apts.

Owner and Builder—H. C. Keenan, 110 Sutter st.

Architect—H. C. Baumann, 251 Kearny.

Building permit applied for.

MARYSVILLE, Yuba Co., Cal.—A. G. Ramirez, 420 6th st., Marysville, is having plans prepared by a Sacramento architect for a four or five-story apartment building to be erected at Sixth and High sts; will be approx. 55 x 80 ft.

Built-in refrigerators, steam heating, hot water system, laundry equipment, etc., will be provided.

BONDS

GLENDALE, Los Angeles Co., Cal.—The board of education of Glendale City school district is contemplating the calling for an election to vote bonds for erecting new grammar school buildings to relieve the congested condition of the school system. A preliminary survey has determined that three or four new sites and buildings are needed as well as additions to about ten existing schools. It is also possible that a new junior high school will be required.

ROSEVILLE, Placer Co., Cal.—Center Joint School District votes bonds of \$9,000 to finance erection of new school building; issued carried by 3 to 1 vote.

NORTH SACRAMENTO, Cal.—April 9 is date set by city to vote bonds of \$16,000 to finance erection of combined city hall and firehouse. Dean & Dean, architects, California State Life Bldg., Sacramento, will prepare the plans.

MARTINEZ, Contra Costa Co., Cal.—Eight architects are conferring with Alhambra High School and Martinez Grammar School Trustees regarding preparation of plans for proposed new Martinez Junior High School for which bonds will be voted to finance. Architects are: Coffman, Sahlberg & Stafford, Sacramento; Davis, Pearce & Co., Stockton; Allen & Young, Stockton; George W. Cantrell and W. H. Weeks, San Francisco; Rollin S. Tuttle, Louis S. Stone and E. W. Cannon, Oakland.

Howard W. Senter, Secretary

Central Office—Hearst Building

Plants and Yards At

San Francisco, Prattrock (Near Folsom), Sacramento, Marysville, Prattco (Monterey County), Mayhew (Sacramento County)

SAND—CRUSHED ROCK—GRAVEL—CONCRETE MIX

Dear Sirs:—Open the enclosed small envelope and examine the sample of washed American River plastering and brick mortar sand, and you will see what four (not one, two or three) washings of our river sand will produce. One would think that one washing or maybe two would clean this sand. Not for us—we wash it four times and it is absolutely clean, that is every carload—even a thousand carloads.

We produce this sand at the 12th street bridge in Sacramento and at Mayhew, nine miles up the river from Sacramento (formerly the sand, rock and gravel plant of the American River Sand & Gravel Company, which we purchased last October).

As you probably know we also produce clean sand, both plastering and concrete at Marysville (white sand out of the Yuba River), Prattco, Monterey County, ("Prattco Amber" sand No. 2—fine and No. 4—coarse), and Mayhew, (Sacramento County).

All the leading dealers handle Pratt's clean, washed sand. Don't ask for sand—say "I want Pratt's washed and screened clean sand."

Our \$250,000.00 crushed rock and washed gravel plant is located at Prattrock (near Folsom)—twenty miles from Sacramento.

Yours for clean sand,

CLARENCE (SANDY) PRATT, President.
P. S.—The enclosed American River Sand as well as our White Marysville sand and our "Prattco Amber" sand are good locomotive sands.

MANY OF the readers.

DO NOT match.

OF THIS near-comedy.

SANDY'S HOBBY has been.

WRITTEN BY Clarence (Sandy) Pratt.

CLEAN SAND (and rock).

RECEIVED THE above letter.

IT HAS built up.

LAST JULY (warm weather).

A WONDERFUL business.

BUT SANDY feared.

FOR SANDY'S companies.

SOME FEW might forget.

AND BECAUSE Sandy's concern.

JUST HOW many times.

WASHES AMERICAN River sand.

SANDY'S CROWD wash the sand.

OVER AND over again.

OUT OF the American River.

IS THE cause.

AND PARAGRAPH one only.

OF PART of that success.

OF THE above letter.

"I THANK you."

GIVES THIS information.

IMPORTANT AS it is.

SCHOOLS

PLANS ON FILE

FRESNO, Fresno Co., Cal.—Plans and specifications and forms for bidding in connection with the Benjamin Franklin Elementary School; Morris E. Dailey Elementary School and John C. Fremont Elementary School are on file in the office of Larsen Advance Construction Reports—Building & Engineering News and may be inspected by those interested. Bids will be opened, as previously reported, Feb. 23, 5 P. M. All structures will be of brick construction, one-story in height but with floor construction for a future story. These structures comprise the first unit of each building of what is to be a 25-room school. Plans prepared by Shields, Fisher & Lake, architects and engineers, Pacific Southwest Building, Fresno.

CORCORAN, Kings Co., Cal.—G. A. Graham, Dinuba, at \$10,122 awarded contract by Corcoran Union High School District, to erect first unit of concrete gymnasium. Swartz & Ryland, architects, Rowell-Chandler Bldg., Fresno. Other bids: Hodgson & Son, Porterville, \$10,950; Roy Martin, Fresno, \$10,990; Earl Bowen, Strathmore, \$10,992; A. C. Neal, Lemoore, \$11,088; J. F. Brown, Hanford, \$11,306; R. Pedersen, Fresno, \$11,419; Martin Construction Co., Fresno, \$12,439; E. G. Washburn, Hanford, \$12,357.

McFARLAND, Kern Co., Cal.—Kern County High School District contemplates erection of a new high school building. Pupils at present are housed in a portion of the grammar school which quarters are needed by the elementary grades. Estimates of cost for a new structure will be prepared at once. Similar conditions prevail at Shafter and it is possible a new structure will be erected there. Costs will probably be prepared by Architect Chas. H. Biggar, Bank of Italy Bldg., Bakersfield.

Sketches Prepared.

GYMNASIUM, ETC. Cost, \$20,000
MODESTO, Stanislaus Co., Cal. Modesto High School Campus.
 One-story frame assembly hall and gymnasium building.
 Owner—Modesto City School District.
 Architect—Davis-Pearce Co., 47 N. Grant St., Stockton.
 Plans will be completed about April 1st.

PULLMAN, Wash.—Until Feb. 27, bids will be received by Regents of the University of Washington, Pullman, to erect class A physics building on campus; est. cost \$400,000. Bids are wanted for a general contract with separate bids for plumbing, heating and ventilating, electric wiring and fixtures. John Graham, architect, Dexter-Horton Bldg., Seattle. Plans obtainable from Regents on deposit of \$25, returnable.

REDWOOD CITY, San Mateo Co., Cal. Sequoia Union High School District votes bonds of \$250,000 to finance one additional wing for main building to house 17 classrooms; girl's gymnasium; addition; remodel present gymnasium for boys; erect new mechanical arts building on unit plan; a woodshop and machine shop being the first unit (the present building to be used for general shop), new structure to house cafeteria and music departments. These improvements will provide school facilities for 1500 pupils propose to purchase site for a new high school failed to carry.

FRESNO, Fresno Co., Cal.—As previously reported, bids will be received March 6, 2 P. M., by State Department of Public Works, Division of Architecture, to erect science building for Fresno State Teachers' College. Will be reinforced concrete construction; est. cost \$200,000. Allison & Allison, architects, Hibernian Bldg., Los Angeles. Bids are wanted for (a) general contract and (b) mechanical work. General work will include all work except plumbing, heating and electrical work. Mechanical work includes plumbing, heating and electrical work. Separate bids will be received for electrical work and for plumbing and heating. Combined bids will also be considered for all three branches of the work. Geo. B. McDougall, state architect. See call for bids under official proposal section in this issue.

Plans Being Prepared.

SCHOOL Cost, \$35,000
DOS PALOS, Merced Co., Cal.
 High school auditorium.
 Owner—Dos Palos High School District.
 Architect—W. J. Wright, Mail Bldg., Stockton.

Plans will be ready for bids after March 1st.

Commissioned to Prepare Plans

SCHOOL Cost \$—

Plans To Be Prepared
BUILDING Cost, \$—
SAN JOSE, Santa Clara Co., Cal. W. Santa Clara St.
Two-story building (mail order house on 1st floor; offices, etc., on 2nd floor. Spanish type).
Owner and Builder—Normander-Campen Co., 220 W. Santa Clara St., San Jose.
Architect—W. H. Weeks, Hunter Dulin Bldg., San Francisco; 1736 Franklin St., Oakland; 246 S-First St., San Jose.

Lessee—Montgomery-Ward.
The type of construction has not as yet been decided upon. More definite information will be given in one week.

Planned
MARKET BLDG. Cost, \$50,000
SAN JOSE, Santa Clara Co., Cal. W. Santa Clara St.
Large market building.
Owner and Builder—A. J. Hart, Market and Santa Clara Sts., San Jose.
Architect—Not Selected.

Plans Being Prepared
BANK Cost \$20,000
SAN FRANCISCO, Diamond and Bosworth sts.
One-story frame and stucco bank bldg.
Owner—Bank of Italy.
Architect—H. A. Minton, Bank of Italy Bldg.

Construction Started
ALTERATIONS Cost, \$—
OAKLAND, Alameda Co., Cal. No. 1530 Broadway.
Alterations and additions to present building.
Owner—The Bedell Co. (William Davis, Mgr.), Premises.
Architect—Mr. McVey, New York.
Contractor—S. Kulchar & Co., 731 E-10th St., Oakland.

HOLLISTER, San Benito Co., Cal.—Coast Counties Gas and Electric Co. has purchased structure at 325 Fifth st. and will remodel the quarters for office and service rooms. New fronts, lockers and locker rooms, meeting room, etc., will be provided.

OAKLAND, Cal.—Until Feb. 21, 10:45 a. m., bids will be received by John W. Edgemond, sec'y., Board of Education, to erect Hawthorne School Assembly Building. Will be 1-story of brick construction; est. cost \$35,000. Cert. check 10 per cent payable to Board of Education req. with bid. Plans obtainable from Supt. of Bldgs., 337 17th st., Oakland. See call for bids under official proposal section in this issue.

Plans Being Figured
ALTERATIONS Cost, \$8000
SAN MATEO, San Mateo Co., Cal. Third Street.
Alterations and additions to present building (add grand stairway, show room, etc.)
Owner—Frederick-Smith Furniture Co., 300 B St., San Mateo.
Architect—Clarence Jackson, 1st National Bank Bldg., San Mateo.

THEATRES

Sprinkler System Contract Awarded
THEATRE Cost \$1,000,000
OAKLAND, Alameda Co., Cal., Telegraph ave., and 19th st.
Class A steel frame and concrete theatre building (seating capacity 4000).
Owner—Central Oakland Block, Inc.
Lessee—West Coast Theatres, Inc., 988 Market St., S. F.
Architect—Maury I. Diggs, 1625 Broadway, Oakland.
Supt. of Constr.—Maury I. Diggs, 1625 Broadway, Oakland.
Sprinkler system—Grinnell Co. of The Pacific, 5th and Brannan sts., S. F.
Other awards reported Jan. 12.

Plans Being Figured—Bids Close Feb. 15
THEATRE Cost \$150,000
REDWOOD CITY, San Mateo Co., Cal., Broadway, opp. courthouse.
Class A theatre (seating capacity 1500).
Owner—Hare, Brewer & Clark, Inc., 130 University ave., Palo Alto.
Architect—Reid Bros., 105 Montgomery St., S. F.
Lessee—E. J. Arkhurst.

What architects and all who build have learned to expect from Quandt craftsmen:

"Co-operation for Quality"

Materials applied efficiently and expeditiously by brush or spray application to achieve the best result at the minimum cost to the owner.

A. Quandt & Sons
Painters and Decorators
SINCE 1885
374 GUERRERO STREET, SAN FRANCISCO
Telephone Market 1711

Quandt-quality is available for the small job as well as the large. Pioneers and Specialists in the application of Lacquer in the architectural field. Complete decorative color schemes designed and furnished. Advice for technical painting requirements furnished. Our operations are state-wide.

Plans Being Completed
THEATRE Cost, \$1,000,000
OAKLAND, Alameda Co., Cal. S 17th St., bet. San Pablo and Telegraph Aves., 100x105 feet.
Class A theatre building, to be known as Duffwin Theatre, seating capacity 1250.

Owner—Income Properties of Calif., Inc., 436 14th St., Oakland (Fred Proctor).
Lessee—Henry Duffy, % Alcazar Theatre, O'Farrell St. near Powell, San Francisco.

Architect—Weeks & Day, Financial Center Bldg., San Francisco.
Interior Decorator—Martin & Co., 1500 Sutter St., San Francisco.
Building has been leased for a period of 20 years and it is expected to have it ready for occupancy about Sept. 1, 1923.

Sub-Contracts Awarded
THEATRE Cost, Approx. \$2,000,000
SAN FRANCISCO, Block bounded by Market, Hayes, Larkin and Polk Sts.
Class A theatre building with seating capacity of 5200.

Owner—The Capital Company, A. P. Giannini, President.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—The names and addresses of the parties concerned in these opportunities may be obtained from the office of the Larsen Advance Construction Reports, 547 Mission st., San Francisco, either by phone, letter or personal call. Such requests should be accompanied by the index number of each opportunity, and self-addressed envelope for reply by mail.

D-2751—Refrigerating Machines. Glendale, Cal. Party wishes to get in touch with San Francisco business man or a manufacturing concern, interested in taking over the exclusive manufacturing and selling rights of a line of small refrigerating machines, from 1/8 horsepower up. Machines are said to have several advantageous features not included in similar machines which are now on the market.

D-2754—Refrigerators. Waterloo, Ia. Manufacturers of a line of refrigerators, suitable for every purpose, wish to secure a suitable representative to handle the distribution of their line in this territory on a commission basis.

12641—Douglas Fir Lumber and Timber. Bremen, Germany. Old-established firm of lumber importers, exporters and manufacturers, formerly having large holdings in Florida, are very desirous of establishing business connections with California mills producing and exporting Douglas Fir lumber and timber, who

would be interested in having an agent or representative firm in Germany through which they could sell their products.

12644—Air Compressors. Absorption Machines. Karlovy Vary, Czechoslovakia. Company desires to represent, in Czechoslovakia, American manufacturers or exporters of air compressors, absorption machines, etc.

12645—Cuban Representation. Havana, Cuba. Commission merchants and manufacturers' representative in Cuba desire to handle additional lines not conflicting with present connections, either introduction of new product or distribution of staples and trade-marked merchandise. Company is American controlled and operated and has selling, distributing, collecting and warehouse facilities.

12648—Hardware. Darjeeling, India. Company desires to represent American exporters and manufacturers of hardware.

12651—Representation in Germany. Berlin, Germany. Citizen of the United States, now established in Berlin as a patent attorney, desires to get in touch with American firms wishing representation or advise in general patent matters, international patent practice, trade marks, etc.

12652—Hardware, Window and Plate Glass. Hongkong, China. Trading company seeks connections with American manufacturers of the above-mentioned lines.

12654—Hardware. Cape Town, South Africa. Party having agencies throughout the Union of South Africa desires to represent American exporters of hardware.

12662—American Products for Japan. San Francisco, Cal. Gentleman, leaving shortly for Japan, desires to establish connections with manufacturers who require selling agent in Japan to operate on a commission basis.

12665—Radio Supplies and Equipment. Kobe, Japan. Importers of radio supplies and equipment seek connections with San Francisco manufacturers and exporters of radio novelties, loud speakers, transformers, tubes, headphones, crystals, battery chargers, etc.

12666—Tiles. Tokyo, Japan. Company wishes to receive catalogs, samples and prices f. o. b. from American manufacturers of tiles, particularly ceramic mosaic tile.

12669—Brazilian Representation. Los Angeles, Cal. Business man, now in Los Angeles, having excellent connection and experience with the leading commercial houses, industrial and manufacturing concerns, railways, etc., in Rio de Janeiro, Montevideo and Buenos Aires, desires to represent California manufacturers in Brazil and the New Plate territory, from Pernambuco to Buenos Aires, with a view to getting first orders, increasing sales and establishing agencies.

CERTIFICATES GRANTED

California State Board of Architecture, Northern District, has issued certificates for the practice of architecture to: Leon D. Lockwood, 229 North Riverside Ave., Rialto, Calif., or 105 Montgomery St., San Francisco; Rollin S. Tuttle, 505 California Bldg., Oakland, and Eugene N. Maurer, 9 Ancha Vista Lane, San Anselmo.

SACRAMENTO BUILDING

J. R. Shields, Sacramento city building inspector, reports the issuance of 149 permits in January for improvements involving an expenditure of \$375,119. January, 1927, permits totaled 182, the work costing \$546,958.

BAY LUMBER IMPORT SHOWS BIG INCREASE

Lumber shipments into San Francisco for January totaled 77,674,000 feet, the marine department of the local chamber of commerce announces, representing a gain of 22,016,000 feet over December. From Oregon and Washington ports the January total was 49,653,000 feet, a gain of 7,714,000, while from the California coast ports the total was 19,850,000. This was a gain of 3,247,000 feet.

Engineering News Section

BRIDGES

FRESNO COUNTY, Cal.—State Highway Department, C. H. Purcell, chief engineer, is preparing plans for Herndon bridge over San Joaquin river near Fresno. Will consist of four 162 ft. deck steel truss spans, two 83 ft. deck girder spans and one 66 ft. deck girder span supported by concrete piers. The curbs and end posts are to be const. of reinf. conc. The structure will provide a 30-ft. clear width of roadway, the truss being so designed that an additional ten feet of roadway may be added at such time as traffic demands it. The bridge is to be constructed on the south side of the railroad bridge, thus eliminating the present grade crossing over the railroad tracks at each side of the river.

YUBA CITY, Sutter Co., Cal.—Live Oak residents petition county supervisors to const. bridge over Feather River at Live Oak.

SAN FRANCISCO—Until Feb. 29, 2 P. M., bids will be rec. by Board of Public Works to furnish and repair fender piling at Third and Channel bridge; est. cost, \$1800. Spec. obtainable from Bureau of Engineering, 3rd Floor, City Hall.

REDLANDS, Cal.—City plans new bridge over San Timoteo creek at new S. P. Station, est. cost \$20,000, and three bridges over the Zanja at University, Judson and Seventh sts., est. cost \$5000.

BAKERSFIELD, Kern Co., Cal.—Until Feb. 14, 5 p. m., bids will be rec. by V. Van Riper, city clerk, to const. one pipe siphon at Arraujo Ditch. Spec. obtainable from W. D. Clarke, city eng. Cert. check 10 per cent req. with bid.

PHOENIX, Ariz.—Levy Construction Co., Denver, Colo., at \$154,144 awarded cont. by State Highway Comm. to const. suspension bridge over Gila river, 3½ miles from Dome. Will have steel towers with conc. bases, 798 feet in length, bet. towers, with 114-ft. steel truss on Phoenix side and 57-ft. truss on Yuma side; laminated wood floor with sand asph. surface.

LOS ANGELES, Cal.—County of Los Angeles will expend \$360,000 in Long Beach district this year for bridge construction.

MARTINEZ, Contra Costa Co., Cal.—G. H. Field, Antioch, at \$7910 (eng. est. \$9450) awarded cont. by county to const. steel and conc. bridge over Marsh creek, near Brentwood.

OAKLAND, Cal.—County Surveyor Geo. A. Posey making surveys for Brightside bridge in Crows Canyon road. Geo. A. Gross, county clerk.

FRESNO COUNTY, Cal.—Bids will be asked shortly by State Highway Commission to const. Herndon bridge over the San Joaquin river west of Herndon. The proposed structure will eliminate two r. r. crossings; will consist of four 162-ft. deck steel truss spans and one 66-ft. deck girder span supported by conc. piers resting on a pile foundation. Deck and curbs and end posts of reinf. conc.; will provide a 34-ft. clear width rdwy., truss being designed so that 10 ft. width of rdwy. may be added at traffic conditions demand. Cost, \$220,000. C. H. Purcell, state highway engineer.

DREDGING, HARBOR WORKS AND EXCAVATIONS

PALO ALTO, Santa Clara Co., Cal.—A. S. Dutra, 1122 Greenwood st., Palo Alto, at \$3500 awarded cont. by city for diking and dredging Mayfield slough and portion of intended yacht harbor on city lands on bay front.

SAN FRANCISCO—City Engineer M. M. O'Shaughnessy completing spec. to reclaim 280 acres of land in Islais Creek Reclamation District. Assessments against the property are practically completed. Project involves construction of more than 1 mile of seawall and other imps. Est. cost, \$1,500,000.

SAN JOSE, Santa Clara Co., Cal.—Business and professional men, meeting in Hotel Salnte Claire Hotel, propose to develop harbor at Alviso, 8 miles north of San Jose at the south end of San Francisco Bay. E. A. Hayes, former congressman; W. W. Wall, traffic manager of San Jose Chamber of Commerce, and Theron D. Tracey, industrial engineer, back the proposal to be known as "Port San Jose."

IRRIGATION PROJECTS

BAKERSFIELD, Kern Co., Cal.—A. L. Trowbridge, chief engineer for the Kern River Water Storage District, in a report submitted to the Farmers Protective Association, estimates the cost of the proposed water project at \$12,210,000, itemized as follows: Storage of 150,000 ac. ft. of water back of high dam at Isabella, \$2,732,500; canal system, physical works, \$5,225,852; ground water replenishment works, \$227,718; district pumping system, \$1,642,800; surface drainage system, \$259,962; purchase of water rights, \$2,057,987; preliminary engineering, \$7,181; spreading assessment, \$25,000.

MODESTO, Stanislaus Co., Cal.—Morris-Noble Co. of San Francisco has purchased the \$50,000 bond issue of the West Stanislaus Irrigation District. The funds are to be used for the development of an irrigation system for approximately 20,000 acres in Western Stanislaus county. The proposed work will include the installation of a pumping plant at the junction of the San Joaquin and Tuolumne Rivers, near the old town of Grayson, and the construction of a main canal, concrete lined, seven miles in length. The canal is to have a capacity of 250 second feet. The water will be raised by a series of seven lifts, each 22 ft. high. W. F. Wooley, engineer, has announced that work will start in 60 to 90 days.

MERCED, Merced Co., Cal.—Chief Eng. A. Blakesley of Merced Irrigation District authorized to expend \$23,300 to clear main canal; \$6069 for wells and pipe lines on Evans Ranch south of Livingston and \$5000 to clear branch canals.

A FIRST AID CABINET
is a convenient way of keeping first aid essentials.

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Room 107 Highway Building, Sacramento, California, until 2:00 P. M., on February 20, 1928, at which time they will be publicly opened and read, for performing work as follows:

El Dorado County, between Shingle Springs and El Dorado (III-ED-11-B) about forty-nine hundredths (0.49) mile to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the order to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
R. M. MORTON,
State Highway Engineer.
F. W. HASELWOOD,
District Engineer, Dist. III.
Dated: January 31, 1928.

NOTICE TO CONTRACTORS

(Hawthorne School Assembly—Oakland Calif.)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 21st day of February, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the Hawthorne School Assembly of the Oakland School District, to be erected on the northeast corner of E. 17th Street and Twenty-eighth Avenue. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office heretofore mentioned. Plans taken out by bidders on or before February 21, 1928, shall be returned on or before February 22, 1928. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not be

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 21st day of February, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGE-MOND,
Secretary of the Board of Education of Oakland, California.

NOTICE—BIDS FOR DOCK TRACTORS

The Board of Port Commissioners of the City of Oakland, at its office, 424 Oakland Bank Building, will receive sealed bids on Monday, February 13, 1928, between the hours of 4:30 and 5:30 P. M., for the furnishing and delivering of four (4) Dock Tractors. Specifications and blank form of proposal will be furnished by the Secretary of the Board on application. Certified check in the amount of 10% of the total amount of the bid shall accompany the bid. Bond in full amount of the contract to be given by successful bidder. Contract to be entered into within 7 calendar days after award. Delivery of the tractors to be completed within 30 calendar days from date of Auditor's approval of contract. The Board reserves the right to reject any and all bids.

G. B. HEGARDT,
Secretary, Board of Port Commissioners.

NOTICE TO BIDDERS

(Calaveras Union High School District—Furniture and Equipment)

Notice is hereby given that the Board of Trustees of the Calaveras Union High School District, San Andreas, California, hereby invites sealed bids or proposals to be received up to the hour of 2 o'clock P. M. on the 24th day of February, 1928, at the office of the County Superintendent of Schools of Calaveras County, for the furnishing of Furniture and General Equipment for the buildings of the above named District, all as listed and described in specifications made for the

same by Mayo, Bissell & Co., Architects. Specifications and lists may be obtained at the office of Mayo, Bissell & Co., Architects, 421 Miner Ave., Stockton, or at the office of the President of the above named District in San Andreas.

Each bid must be accompanied by a certified check on some responsible California bank payable to Frank A. Meyer, President of the Board of Trustees, in a sum not less than 10 per cent of Bid A, as a guarantee that a contract will be signed within ten (10) days after date of opening bids and approved surety bond furnished as required by law.

Each bid must be delivered in a sealed envelope and addressed to the Board of Trustees and endorsed, "Proposal for Furniture and General Equipment," and must be in the hands of the President of the Board on or before the above mentioned hour and date. Ample time will be afforded the bidders by the board or its authorized representatives for the inspection of any samples or pictures of equipment submitted in connection with proposals. The Board will give due consideration to alternate proposals submitted by bidders.

The Board reserves the right to reject any and all bids, and to waive informalities in presentation of proposals.

By order of the Board of Trustees of said District.

Dated February 3, 1928.

FRANK A. MEYER,
President.

NOTICE TO CONTRACTORS

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, March 6, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the President's Home and Garage and Dining Hall Addition, California Polytechnic School, San Luis Obispo, California, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The President's Home is a two-story frame building with stucco exterior and tile roof. The Garage is a frame building with stucco exterior and composition roof. The Dining Hall Addition is a one-story frame addition to an existing building with stucco exterior and shingle roof. Plumbing, Heating and Electrical work is included.

Bids must be submitted on Proposal Forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for President's Home and Garage and Dining Hall Addition, California Polytechnic School, San Luis Obispo, California." NOTICE TO BIDDERS

(Refrigerating System — Mare Island Navy Yard)

Sealed bids, indorsed "Bids for Refrigerating Equipment, Specification No. 5523, will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock A. M., February 29, 1928, and then and there publicly opened for motor driven compressor, motor driven brine pump, motor for existing agitator, automatic thermostatic control equipment, switchboard, wiring and piping to complete refrigerating system at the Marine Barracks, Navy Yard, Mare Island, Calif. Specification No. 5523 and accompanying drawings may be obtained on application to the bureau or to the commandant, Navy Yard, Mare Island, Calif. Deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification. L. E. GREGORY, Chief of Bureau, Jan. 23, 1928.

NOTICE TO BIDDERS

Construction Work For Improvement District No. 7, in the Turlock Irrigation District, Turlock, California.

Notice is hereby given that sealed proposals for the doing of the work described in the schedules hereinafter set forth will be received by the Board of Directors of the Turlock Irrigation District acting for Improvement District No. 7, at its office in the City of Turlock, State of California, at any time up to 10:00 o'clock A. M. of Monday, February 27th, 1928, at which time and place all bids so received will be opened in public by said Board. Thereafter said Board will let said work as indicated in the schedules below as a whole, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and re-advertise for proposals or proceed to construct the work under their own superintendence.

The work for which proposals are hereby invited is divided into 2 schedules, as follows:

SCHEDULE NO. 2.—Consisting of approximately 4 concrete structures, a total of 10 cubic yards of concrete.

SCHEDULE NO. 3.—Consisting of approximately 651 lineal feet of 36" diameter concrete pipe.

Said work is more particularly described in the plans and specifications therefor, which may be seen at said office of said District.

A bidder to whom a contract for doing said work may be awarded must furnish bonds as required by law, to wit: A bond in the sum of at least one-half of the estimated contract price to secure the payment of the claims of material men, mechanics, and laborers, and a bond in the sum of at least one-fourth of the estimated contract price conditioned

upon the faithful performance of the contract.

Each bid must be accompanied with cash or a cashier's or a certified check made payable to the Turlock Irrigation District, for an amount equal to at least five percent of the amount of the bid as guaranty that if the bid is accepted, the bidder will, within five days after notice of its acceptance enter into a contract with the District in the form attached to said specifications and furnish the bonds aforesaid.

The quantities given in the aforesaid schedules are approximations only but will be used in computing the amounts of the deposit and the bonds hereinbefore required.

The contractor will be paid for the work bid, with warrants issued by the Directors of the Turlock Irrigation District as provided in Senate Bill No. 5, "An Act to provide for the organization and creation of improvement districts within irrigation districts organized under the 'California Irrigation District Act'; to provide for the construction of improvements therein, and for the levy of assessments on the lands of such improvement districts." (Approved by the Governor May 25, 1927.)

Bids must be on the proposal forms attached to the specifications and must be in sealed envelopes addressed to the Board of Directors of the Turlock Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Turlock, California, January 30th, 1928.

By order of said Board of Directors.
ANNA SORESENSEN
Secretary of Board of Directors of Turlock Irrigation District.

**STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS**

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., on February 29, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, as follows:

Sonoma County, at Sonoma Creek bridge, one-half mile south of Schellville (IV-Son-8-A,B), about seven-tenths (0.7) mile in length, to be graded and surfaced with crushed gravel or stone.

Imperial County, between Seelye and El Centro (VIII-Imp-12-C), about seven and two-tenths (7.2) miles in length, to be widened and surfaced with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and may be seen at the office of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Elkhart.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
R. M. MORTON,
State Highway Engineer.
Dated: February 1, 1928.

NOTICE TO BIDDERS

(Furnishings—Nevada State Hospital)

Notice is hereby given that the Board of Commissioners for the Care of the Indigent Insane will receive bids at its office in Carson City, for furnishing of the New Ward Building, Nevada Hospital for Mental Diseases, at Reno, Nevada, said bids to be opened at the hour of two o'clock, Monday, February 27, 1928.

All bids shall be accompanied by a certified check for not less than ten per cent of the total amount of bid as a guarantee of good faith. Checks of unsuccessful bidders will be returned when contract is awarded. Check of successful bidder will be returned on fulfillment of contract to satisfaction of board.

Lists of furnishings and specifications are on file at the office of the Superintendent of the Nevada State Hospital for Mental Diseases, near Reno, Nevada, and at the office of the State Treasurer at Carson City, Nevada.

Furnishings are divided into two distinct lists and bidders may offer proposals on one or both lists.

The Board reserves the right to reject any and all bids.

Bids must be sealed in an opaque envelope and addressed to the Secretary of the Board and plainly marked, "Bid for Furnishing of New Ward Building."

A. A. ARMSTRONG,
Secretary of Board
Carson City, Nevada, February 3, 1928.

NOTICE TO BIDDERS

(Redwood City Grammar School District Chairs)

Pursuant to an order of the Board of Trustees of the Redwood City Grammar School District, County of San Mateo, State of California, notice is hereby given that the said Board will receive sealed bids for the following furniture to be installed in the Auditorium of the new McKinley School.

600 (more or less according to approved plan) Heywood Wakefield Opera Chairs number 432 or approved equal. Backs and seats are to be 5 ply $\frac{1}{8}$ inch thick. End Standards to be Cast Iron and Centers of Pressed Steel. Seat Hinges to be of the Rocker Roller Type or approved equal. Chairs are to be equipped with Number Plates and Hat Wires and chairs installed complete on wood floor. Time for Delivery must be specified.

All bids must be in the hands of the Clerk of the Board on or before 8 P. M. of February 23rd, 1928, at the office of the Central School Redwood City, at which time and place they will be opened.

A certified check, made payable to the Clerk of the Board, in an amount equal to at least 10% of the total amount of the bid submitted must accompany each proposal.

The Board reserves the right to reject any or all bids received.

Dated at Redwood City, California, January 31, 1928.

(Signed) HENRY STEINBERGER,
Clerk of the Board of Trustees of the Redwood City Grammar School.

NOTICE TO CONTRACTORS

(Schools—Fresno)

Pursuant to an order of the Board of Education of the City of Fresno School District, County of Fresno, California, duly made and entered in its minutes this 1st day of February, 1928, public notice is hereby given that the said board will receive up to 5 o'clock p. m. on the 23rd day of February, 1928, at the office of said board in the Hawthorne School Building, 2125 Fresno St., Fresno, Cal., sealed proposals for the construction of the following schools:

Benjamin Franklin Elementary school.

Morris E. Bailey Elementary school.

John C. Fremont Elementary school.

as per plans and specifications prepared by Shields, Fisher & Lake, Pacific Southwest Bldg., Fresno, Cal.

Bids will be received for general contract A-1 to A-11 on each building and the balance segregated as per building form No. 2.

Contractors may bid on the three buildings in a lump sum under the above mentioned segregations.

Reference is hereby made to "General Information to Bidders" building form No. 6 for further particulars regarding all bids.

Plans and specifications together with forms for submitting all bids and further details regarding any and all bids may be obtained from the undersigned secretary of the said board at the office of the said board above designated.

A bidder's surety bond or certified check equal to at least 10 per cent of the amount of the bid submitted, must accompany all proposals.

The board reserves the right to reject any and all bids.

By order BOARD OF EDUCATION,
City of Fresno School District.
L. L. Smith, Secretary

NOTICE TO CONTRACTORS

(Finish Hardware—Kern General Hospital)

Notice is hereby given that sealed bids will be received by the Board of Supervisors, County of Kern, Bakersfield, California, up to 11 o'clock A. M., February 20, 1928, for furnishing of finish hardware for the addition to the Kern General Hospital, Bakersfield, California, in accordance with the plans and specifications prepared by and under the supervision of Charles H. Bliggar, Architect, Bakersfield, California.

Plans and specifications for same may be obtained at the office of the Architect upon deposit of Twenty Dollars, which will be returned upon receipts of the said plans and specifications in good order at the time designated by the Architect.

A certified check or bidder's bond in the amount of ten per cent of amount bid is to be to the order of the Clerk of the Board of Supervisors as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Supervisors, and in addition thereto will furnish good and sufficient surety bonds with an approved surety company, therefor.

Board reserves the right to reject any and all bids not deemed advantageous to the County and to waive any informality in any bid received.

By order of the Board of Supervisors of the County of Kern, State of California, adopted January 23rd, 1928.

F. E. SMITH,
County Clerk and ex-Officio Clerk of the Board of Supervisors.

NOTICE TO CONTRACTORS

(Hydrotherapeutic Equipment — Mare Island Navy Yard)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals in the near future on specification No. 5556, "Hydrotherapeutic Equipment, Navy Yard (Hospital), Mare Island, California." The work includes furnishing and installing hydrothera-

peutic equipment all complete and ready for use.

Any firms to whom this work is of interest should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, California, a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification, which will be forwarded to them as soon as available.

Prospective bidders on the West Coast should make application for the bidding data to the Navy Yard, Mare Island, California.

BUILDING ACCIDENTS INCREASING, BUILDING CONGRESS TOLD

James A. Hamilton, Industrial Commissioner, state of New York, told the members of the New York Building Congress at its monthly luncheon meeting in New York that accidents in the building industry during the last four years increased in number, while in manufacturing they have been in general decreasing.

"It is high time that the building industry was tackled in a systematic and thoroughgoing way as to accident prevention, as has been true of manufacturing industries for a considerable period of time," he said. "When the problem is taken up in that way, there is every reason to believe it is only a question of sufficiently extended effort of that kind to produce very important results, such as have been brought about actually in the iron and steel industry."

BOOK AID TO HOME CARPENTER

Containing many helpful suggestions for the benefit of the home carpenter is a booklet entitled "A Few Boards—A Little Work—Big Results," which has just been published by the Trade Extension Department of the National Lumber Manufacturers' Association, Washington, D. C. The booklet, through the courtesy of the publishers of The American Lumberman, was adapted from a story which appeared in that publication. While it was designed particularly for Mrs. Marlon Teal, field worker, to use in her talks on farm home improvement, it is adapted to general distribution and will be available in quantities to retailers at nominal prices.

Specify A GROTH FIREPLACE DAMPER FURNACE

and insure yourself against a smoky fireplace. It saves your heat and circulates pure warm air, keeping home at an even temperature. 50 percent saving of fuel will pay for installation. Burns Coal, Wood or Gas.

GROTH-GAGE CO.,

816 W. 5th Street

Los Angeles, Calif.

1928 EDITION

San Francisco Building Laws Now Ready for Distribution

With the issuance of this 1928 Edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

The 1928 Edition contains all the revisions and additions to the code up to and including January 31, 1928.

In addition to the Building Laws, the 1928 Edition contains FIRE ORDINANCES as regards the construction industry—the ELECTRICAL ORDINANCES and RULES of the San Francisco Department of Electricity—the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

STATE COURT CANNOT REVIEW ACT OF WATER COMMISSION

The right of superior courts to review the acts of the California State Water Commission in passing on applications to appropriate water was recently declared unconstitutional by the California State Supreme Court and that section of the state water act that specifies that superior courts have the right to review the acts and decisions of the State Water Commission, upholding or reversing them, was declared null and void. The State Water Commission is an administrative body of the state government, the Supreme Court held, and a judicial body such as a superior court has no legal right to review its acts except to determine whether its jurisdiction has been exceeded.

The matter was brought into court when the Water Commission granted the Mojave Irrigation District rights of appropriation on the Mojave river. Riparian owners protested and asked for a review by the Superior Court. The irrigation district petitioned the Supreme Court and secured a writ of prohibition preventing the Superior Court from granting the review.

The section of the state water act that is declared unconstitutional is Amendment I-B, passed by the Legislature in 1923, which provides that "persons interested in any application for a permit to appropriate water may bring an action in the Superior Court for a review of the Water Commission's order within thirty days after the order is made."

ARCHITECT LOSES SUIT

Eugene Seadler, Sacramento architect, lost his suit at Woodland, Calif., against E. J. Stevenson, Woodland automobile dealer, for \$750, the alleged balance due on plans and specifications for the construction in Woodland of a new garage for Stevenson. Superior Judge W. A. Anderson entered judgment in favor of Stevenson, declaring Seadler had not presented sufficient evidence to support his claim.

ORGANIZED LABOR WILL WAR ON INJUNCTION

Organized labor, in its fight against the use of the injunction in labor disputes, will seek federal and state legislation to exclude labor contracts from classification as property, William Green, president of the American Federation of Labor, announces.

"Labor is confronted with one of the most serious menaces of its long career," he declared at a mass meeting in Cooper Union, New York. He said that more than 600 injunctions had been granted against labor in 1927.

"We propose to fight this thing out to the end," he said, "for the use of the injunction has reached such proportions that it has become an instrument with which working men are being reduced to a condition bordering upon involuntary servitude."

"We will hold meetings everywhere and will rouse the people to the real danger which they face. We will seek legislative relief in congress and in the state legislatures, and we will play a more important part than ever before in the national election campaigns which are just ahead of us."

He said labor was not opposed to a proper use of the injunction to protect property, but was opposed to classifying as property the contract between the laborer and his employer.

JOHN B. LEONARD SLATED FOR BUILDING INSPECTOR

John B. Leonard, civil engineer, has been recommended as the successor of the late John P. Horgan, as chief building inspector of the City and County of San Francisco. In a letter to City Engineer M. M. O'Shaughnessy, Mayor Rolph submitted the name of Leonard.

It is said that Mr. Leonard has the endorsement of the San Francisco Builders' Exchange, the Down Town Association and local engineering societies.

"In recommending the appointment of Mr. Leonard to this position, I have acted on the belief that the city needs a first-class engineer at the head of the Building Inspection Department," said the Mayor. "Building nowadays is an engineering problem, and with the tremendous growth of this city and the vast number of steel frame and reinforced concrete buildings, it is necessary to have technical men in charge of the inspection."

ENGINEERING MEDALS AWARDED

Medals for distinguished achievement in engineering have been awarded General John J. Carty, vice president of the American Telephone and Telegraph Co., and Dr. William D. Coolidge, assistant director of the research laboratory of the General Electric Co.

General Carty will receive the John Fitz medal for "pioneer achievement in telephone engineering," and Dr. Coolidge the Edison medal "for his contributions to the incandescent lighting and X-rays arts" at the annual winter meeting of the American Institute of Electrical Engineers in New York, February 15th.

Previous recipients of the Fritz medal include Thomas A. Edison, Guglielmo Marconi, Orville Wright and General George W. Goethals. The Edison medal has been awarded to Alexander Graham Bell, Professor Michael I. Pupin, and George Westinghouse, among others.

SAVING PUBLIC MONEY IN SCHOOL BUILDING

That thousands of dollars of public tax moneys could be saved by scientific planning of school buildings, particularly in the rural districts of California, was the statement of Andrew P. Hill of Sacramento, chief of the division of school planning of the state department of education, before the Rotary Club at Stockton.

Hill explained that recently the state had taken over the supervision of school construction outside of the larger cities. It is assumed, he said, that the larger cities through experience in school building construction, have developed efficiency and are able to avoid mistakes. In smaller communities, he said, costly mistakes have often been made through improper construction, location and failure to ascertain the real needs of the district.

The State now requires all school districts outside the larger cities to submit drafts of school plans preliminary to proceeding with construction. These are checked to determine their sufficiency to meet needs; also the ability of the district to finance the enterprise.

Hill said that the location of sites should be determined only after surveys have been made. In some communities, he said, boards have been anxious to place school buildings in conspicuous locations, expressing their community pride. He told how his department had found where one district had purchased a site fronting on a main highway with traffic passing within thirty-five feet of the proposed building line. Immediately in the rear ran the Southern Pacific railroad. The State authorities convinced the board that the site should be sold and one more suitable to the needs of education purchased instead.

The speaker declared that education is the world's most important need and urged that every consideration and attention be given to this cause.

ELECTRICAL INTERESTS ELECT

D. E. Harris of San Francisco was elected chairman of the Pacific Division, Electrical Supply Jobbers' Association, at the concluding session of the organization's convention at the Hotel Del Monte. H. L. Harper was elected national executive committeeman to represent the Pacific Coast. Albert H. Elliott of San Francisco, for 20 years secretary, was re-elected to that post. Incidentally, this was the first meeting in 20 years at which Elliott was not present. He is now in Europe for a vacation.

ENGINEERS NAME COMMITTEE

Modesto Chapter, American Association of Engineers, has appointed a committee to work with and advise the Modesto Chamber of Commerce in mapping a program of civic development projects for 1928. The committee is composed of Jack Wieland, chairman; I. T. Ball, W. Van Winkle, H. N. Carey and M. H. Crews. Although it was not definitely decided what the committee shall work for, it was said it would probably favor development of the municipal airport, a zoning law for the city and the greater Modesto movement.

ECONOMY IN HOUSING PRODUCTION INSISTENTLY DEMANDED BY PUBLIC

"Economy of production is insistently demanded, not only in mercantile lines, but in the production of housing as well," says C. C. Moore, vice president of the American Bond & Mortgage Co.

"The economy movement has gained much impetus through the tremendous competition which is occurring in those lines where distribution as well as production, is a prominent factor.

Renting Is Problem

"The solution of the problem is of utmost importance, likewise more difficult in the building industry than in other lines, due to the fact that there is with the owner who builds for investment a different problem of distribution than that found in mercantile lines. The problem here is of renting the building. The economies to be effected lie mostly within the field of production.

"There are, however, certain economies in the production of housing which may be pointed out, and which if possible of adoption should be of the greatest benefit, not only to contractors, but to labor as well. These in turn will ultimately benefit the public.

Eliminate Selling Cost

"There is much talk among contractors about keeping down the costs of estimate jobs. It has been suggested that if contractors sell the idea of quality rather than price that much of this selling cost can be eliminated.

"Contractors have found that the best practice in securing contracts is to try only for those contracts which appear likely to be secured; to spend considerable money and concentration on getting those, rather than of adopting the practice of going after a large number of contracts which are not logical or probable. By this method it is claimed contractors secure a large number of contracts, but do not bid for so many.

Standardized Materials

"Standardization of materials and design is another place where it should

be possible to eliminate great waste. This work is going forward rapidly under the supervision of the Department of Commerce. With half an eye it can be seen that a furtherance of this work will make possible the purchase of buildings of better quality and at less cost than today. Architects can aid greatly in this as they are in a position to stop the use of expensive and over-decorative design which calls for too many special features.

"The greatest point in effecting economies is, however, labor. Wage scales are apparently standardized for the present, but the amount of work turned out by labor is by no means standardized. The unions are accomplishing much at present in increasing the amount of production of their trades, but that much more can be accomplished is apparent even by the most cursory examination.

Industrial Efficiency

"In all lines of activity today the movement is toward greater individual efficiency. This movement has been caused by stern necessity accentuated by stiff competition.

"It is reported in industrial lines that we are employing 9 per cent less labor today than we did five years ago, but that we are producing 40 per cent more in volume.

"This is in part due to the great increase in the number of machines used in our industries and in part to the desire of labor to go to work.

"In the building industry it must be remembered that to use a great number of machines is wellnigh impossible. Those trades which have to do with construction work being of such a nature that judgment, which cannot be supplied by machines, is continually demanded.

"The problem of greater economy is thus squarely up to labor. Labor must produce a greater amount of work per hour and per day thus increasing the economy of producing buildings."

MISCELLANEOUS

LIGHT AND POWER SECURITIES 1927

Electric light and power companies of the country issued new securities, the amount of \$98,850,000 in January, compared with \$223,859,000 in January, 1927, and \$303,332,500 in December, 1927, a compilation by McGraw-Hill publication shows. January financing was almost exclusively of a long term nature.

LONG ROAD BRIDGE COMPLETED

The motorist now may drive from Broadway, in New York city, to Canal street, New Orleans, without using ferry once. One of the longest causeway bridges in the world, 14.5 miles across Lake Pontchartrain, has been finished to complete the new Colonial highway. The span, five miles of which is over water cost \$5,500,000.

STATE PARK CHIEF NAMED

Chas. B. Wing of Stanford University has been selected by Fred G. Stevenson, state director of natural resources, as chief of the division of parks of the Department of Natural Resources. Mr. Wing will maintain headquarters at Sacramento. The position pays \$5000 a year. Mr. Wing is executive head of the Department of Civil Engineering at Stanford.

ROMANCE OF POWER SUBJECT OF ENGINEER'S TALK

Chas. M. Ripley, engineer, author and lecturer of the General Electric Company, will present an illustrated review of "The Romance of Power in the Little Theatre of the Memorial Auditorium at Sacramento, February 21. A generous portion of Ripley's address will be devoted to a recital of his experiences and observations during a recent tour of European countries, showing, by way of contrast with the comparatively primitive custom of some of those countries, the remarkable progress that the United States has made through the nearly-universal employment of electricity.

Ripley was an associate of the eminent Dr. Steinmetz, the electrical wizard. He is the author of several books upon power development.

There will be no admission charged, and the public is welcome.

CRACKING OF PAINT FILMS

The paint section of the U. S. Bureau of Standards has constructed apparatus for determining when a paint, varnish or bituminous coating on a metal panel has failed by cracking. Such failures can not ordinarily be seen with the naked eye unless the cracks are very bad.

The operation of the apparatus is as follows: (1) A metal panel is coated on one side with the paint. (2) A set of headphones is connected in series with the back of the panel. (3) The painted surface is stamped with a number of drops (50 in all) of a conducting solution prepared so as to wet the surface. (4) A voltage from an interrupted source is placed across the headphones and panel, and the circuit is completed by touching the return wire to the drops. If there is a break in the paint film a loud buzz will be heard in the headphones.

So far the results obtained by this method check with observations made on the paint.

FIREPROOF ROOFING ORDINANCE FINALLY PASSED BY S. F. SUPERVISORS

The fireproof roofing ordinance, a subject of debate before the San Francisco Supervisors since it was introduced Jan. 9, was approved Feb. 14 by a vote of 12 to 6.

The bill amends Section 4 of Ordinance No. 1008 and known as "The Building Law," relating to the fireproof roofing limits. The amendment provides:

The roofs of all buildings hereafter constructed within the limits hereinafter in this section described shall consist of fire-resistant materials, and whenever the covering of the roof or roofs of any building or buildings heretofore constructed within the said limits shall, in the judgment of the Board of Public Works, be or become damaged through fire, decay or otherwise, to the extent of twenty (20) per centum of the value of the area of the said covering of the roof or roofs shall be reconstructed of or replaced with fire-resistant materials. Said fire-resistant materials shall consist of the same materials required for the roof coverings of all buildings erected within the fire limits of the City and County.

Section 3. Said limits shall be bounded by a line commencing at the

intersection of the Bay of San Francisco with the easterly boundary of the Presidio reservation; thence southerly and westerly along the boundary line of the Presidio reservation to the shore line of the Pacific ocean; thence along the shore line of the Pacific ocean westerly and southerly to its intersection with the county line; thence easterly along said county line to its intersection with Mission street; thence along the center line of Mission street to its intersection with Twenty-fifth street; thence easterly along the center line of Twenty-fifth street to the center line of Potrero avenue; thence along the center line of Potrero avenue to the center line of Division street; thence along the center line of Division street to the center line of King street; thence northeasterly along the center line of King street to the center line of Seventh street; thence southerly along the center line of Seventh street to the center line of Channel street; thence northerly along the center line of Channel street to the shore line of the Bay of San Francisco; thence following the shore line of the Bay of San Francisco to the point of commencement.

This ordinance shall take effect immediately.

SIMPLIFIED PRACTICE HAS 82 PER CENT ADHERENCE — 1927 REVIEW REVEALS

Continued growth of Simplified Practice as a means of eliminating waste in industry is evidenced by the completion during the calendar year 1927, of eighteen new Simplified Practice Recommendations, thus bringing the total projects completed to eighty, according to a review of the past year's activities of the Commercial Standards Group, Bureau of Standards, by Ray M. Hudson, Assistant Director, in charge.

That simplification yields benefits sufficient to attract manufacturers, distributors and consumers alike, is demonstrated in the high degree of adherence shown by recent reviews of 15 of Simplified Practice Recommendations already promulgated. The report shows that acceptors representing an average of 2.61 per cent of the total volume of the industry effected are following the simplified practice schedules. These recommendations are subject to annual reconsideration to determine the desirability of further eliminations, substitutions or reinstatements. This procedure keeps the Simplified Practice Recommendations up-to-date and in line with the best current practice of the industry concerned.

Value Is Proven

Further evidence that simplification is proving of great value to manufacturers and purchasers is found in the increased number of associations accepting the completed recommendations. The list of associational endorers grew from 686 to 93 during the year, the individual concern, from 2775 to 6676. This means an increasing number of industrial purchasers are specifying simplified lines when buying, because they are finding that such items are usually more readily obtained; that their quality is better; and, in many instances, by reason of the savings wrought through simplification, prices are lower.

"Inasmuch as adherence to the adopted simplified practice recommendations has been most gratifying during 1927, with its increased percentage in acceptors, it is safe to assume that the percentage in adherence during 1928 will be much closer to 100 per cent. It must be remembered that savings from adoption of the simplified lines are obtained by the small manufacturers as well as the large, and also by the public. A survey of the benefits to acceptors from simplified practice

recommendations shows many cases of definite money savings, by the small manufacturers as well as the large," states Mr. Hudson.

Building Products Cited

He cites the following experiences in connection with this form of waste elimination: "One metal lath manufacturer reports reduction of \$140,000 in his inventory, while a manufacturer of eaves trough and conductor pipe reports a \$30,000 reduction in his inventory. One community reports savings of five cents per square yard, and another 25 cents per square yard, on its paving due to asphalt grade simplification. One lumber company reports reduction of \$250,000 on its inventory, another \$474,000 due to lumber standardization program. A manufacturer of concrete building units reports savings of \$11,500 per year due to simplification in his field, while another reports savings of \$500 in his office operations alone and another states it has enabled him to reduce the selling price of his product 25 per cent. Many others report better turnover, quicker delivery, and improved service to the trade as benefits accruing from simplified practice.

"During 1927 approximately 39 industries conducted preliminary conferences, looking toward the adoption of simplified practice recommendations; 18 general conferences were held; and, 24 new proposals for consideration were received.

Items To Be Reconsidered

"The Standing Committees of several industries that had already adopted Simplified Practice Recommendations for their respective commodities, held their regular annual conferences. Among the items to be re-considered were range boilers; steel reinforcing bars; concrete building units; boxboard thicknesses; woven wire fencing; hollow building tile; files and rasps; sheet steel; eaves trough and conductor pipe and terne plate; the schedules on all of which were re-affirmed without change. The terne plate conference changed the title of its recommendation to roofing terne, in order to eliminate any confusion which might arise from the fact that terne plate sheets are used for many purposes in addition to roofing, and the consumption of roofing terne plate is small compared to the volume which goes into other manufactured products."

TRADE NOTES

W. G. Aldenhagen, secretary and treasurer of the Western Pipe & Steel Co. of California, has been elected a member of the Board of Directors, succeeding C. B. Wells. Officers and the balance of the Board of Directors remain unchanged.

Richmond Plumbing & Heating Co., with headquarters at 266 Twelfth St., Richmond, has been incorporated with a capital stock of \$25,000. Directors are: C. V. Bradbury, president; Emma Bradbury and Fred L. Kreig.

Announcement is made by the State Corporation Commission that the old Mission Portland Cement Company, which last March merged with Pacific Portland Company, now in the process of liquidation, has received permission from the Corporation Commissioner to issue a liquidating dividend of 12 cents a share to its common stockholders of record January 3, 1928. The dividend payment amounts to \$39,105.

Deeds have been recorded at Mariposa showing the transfer of 320 acres of timber land on Signal Peak from H. Shaffer & Bros. of Merced to the Madera Sugar Pine Co. The land adjoins the present holdings of the purchasers and will be logged when the new operations of the timber company being on Signal Peak this spring.

John Morse, general contractor, Red Bluff, has installed equipment at his yards, 424 Jefferson st., Red Bluff, for the manufacture of concrete bricks. The plant will have a daily capacity of 1500 brick.

J. B. Casey Lumber Co. will start operating a lumber mill on the Peavine Hills northwest of Reno, Nevada, Feb. 25. The plant will employ about one hundred men in the early operations. The plant will have a capacity of approximately 100,000 board feet of lumber a day.

J. M. Belleville, vice-president and general manager of the Pittsburgh Plate Glass Company is inspecting sites in Richmond on which it is proposed to erect a plant involving an ultimate expenditure of \$5,000,000. A Pacific Coast plant is needed by the company, according to Belleville, and if a suitable site cannot be found in Richmond, other sites in the San Francisco Bay district will be considered. Some months ago the company was considering locations in Southern California.

W. Olson & Son, general contractors, formerly operating with headquarters at Santa Rosa, are completing the construction of new office quarters and storage yards on the Lakeville Highway, Petaluma. Operations of the firm will hereafter be carried on from this location.

Cotati Lumber Co., of Cotati, (Sonoma county), capitalized for \$50,000 has been incorporated. Directors are: W. C. Woodward, Cotati; Pauline Woodward, Berkeley, and M. W. McIntosh, of San Francisco.

Fred H. Smith and Geo. Y. Morton, both of San Francisco, have been granted master plumbers' licenses to operate in Redwood City. The licenses were granted at a recent meeting of the city trustees.

MATCH-END LUMBER REDUCES COSTS, TIME AND MATERIALS IN CONSTRUCTION

Savings of 25 per cent in labor costs, 5 per cent in time of construction, and 1 per cent in material and nails have been credited to the use of end-matched lumber in a small house building job by Conrad M. Chaney, Washington contractor. Dressed sheathing and sub-flooring, end-matched, were used in the house located at 2821 Myrtle Avenue. It is the first reported house construction project in the city in which end-matched lumber was used extensively.

This was a test conducted by Mr. Chaney in co-operation with S. Percy Thompson, Washington member of the National Committee on Wood Utilization of the Department of Commerce, and the Southern Pine Association End-Matched bureau. End-matching is the application of tongue and groove to the ends of lumber whereby random lengths are tightly joined. It is advocated by the committee for more general use because it is economical and reduces lumber

waste, and the experience of Mr. Chaney is considered an example of the saving possible.

The sheathing stock of 1x8" dimension, while the sub-flooring was 1x6" material. The house is of six rooms, two-story bungalow type of lumber frame construction throughout.

Mr. Thompson and Mr. Chaney gave unqualified endorsement to the use of end-matched lumber. The saving which is accomplished in labor costs alone justifies the use of this stock, Mr. Chaney declared. He stated that since this, his first test of the material, has been so successful he plans to use end-matched lumber at every opportunity. Mr. Chaney is widely known for residence construction in Washington, and his adoption of end-matched lumber was taken by members of the Committee as heralding a new era in small house construction in this vicinity.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Amendment of the Chicago, Ill., building code to require all new buildings to provide adequate automobile storage space for the cars of its occupants has been proposed by a city traffic engineer as another step in the solution of the traffic congestion problem.

Unfilled steel orders of the U. S. Steel Corp. at the close of January amounted to \$4,275,947 tons, an increase of 303,072 tons compared with the end of the preceding month. This is the first time the unfilled tonnage figures have crossed the 4,000,000 mark since March, 1926.

According to word from Sonora, the Pickering Lumber Company will be the purchaser of 14,000,000 feet of government timber to be cut in the Stanislaus National Forest. Bids are now advertised for the sale. The greater part of the timber is yellow pine and the cutting is to be done with caterpillars. The cutting in the Stanislaus Forest, it is stated, will this year be confined to the tracts furnishing the 14,000,000 feet and some cutting at Strawberry.

Two brothers and two sisters are named beneficiaries of the estate of the late Perseo Righetti, San Francisco architect, who died February 2, and whose will was filed for probate February 14. The estate is in excess of \$100,000. The petitioner and executrix of the will is Mrs. Ida Tognazzini, a sister. The other three heirs are: Mrs. Erma Kuhl, a sister, and two brothers, Armand Righetti, and Olivio Righetti. The estate is divided evenly among them.

The third annual exhibit of architecture and the allied arts and crafts of the Architects League of Hollywood will be held at the California Art Club, Olive Hill, March 13 to 28, inclusive. Various architectural societies of Los Angeles and vicinity will co-operate in the exhibition. The general committee in charge of the affair consists of Edwin D. Martin, Verner B. McClurg, Nathan D. Coleman and Ralph C. Flewelling, the last named being chairman.

Five thousand red cedar shingles, bound in pairs, descended on the capitol and other appropriate places in the city of Washington, D. C., February 2, bearing protests against alleged tariff discrimination and seeking a better deal for the shingle man of the Pacific Northwest. Each pair of shingles bore a 14-cent postage stamp and the following inscription: "Hundreds of men are out of employment!—Families and communities are suffering because American labor cannot compete with Orientals, cedar mills idle, logging camps idle, tariff protection this session of Congress is urgent and vital!" The little wooden slabs, handled cautiously by the letter carriers to escape splinters, were postmarked Everett, Wash.

Carl E. Grunsky, San Francisco engineer, has been appointed by Secretary Herbert Hoover as a member of the American Committee to the World Congress of Engineers to be held in Tokyo in November, 1929. The purpose of the conference, the first of its kind ever held, is to promote international co-operation in the study of engineering science and problems in all its branches and to stimulate a sense of brotherhood among the engineers of the world. Secretary Hoover is honorary chairman.

Texas now has a law protecting contractors for public works from claims against their sub-contractors. The law provides that general contractors on public works, or their bondsmen, shall not be liable for labor or material furnished to sub-contractors on the work unless notice of such claim is filed not later than 30 days after its accrual, either with the contractor or the county clerk of the county where the work is located. The bill further provides that claims against the sub-contractor originating prior to the date of the contract by which he comes on the work cannot be set up for collection under the bond.

Construction of an \$80,000,000 dam at Kennett on the upper Sacramento river is recommended as the first unit of the California \$58,000,000 conservation water program by State Engineer Edward Hyatt Jr. Under the plans of the report, the proposed Iron Canyon reservoir was abandoned as a main unit and considered only as a subsidiary project to take care of the run-off waters between the Kennett dam and Red Bluff. The Kennett dam was preferred over Iron Canyon because its assured larger storage capacity, the report said. The reservoir would be constructed at a height of 420 feet, giving storage for 2,940,000 acre feet of water, or enough to supply all the irrigation needs of the Sacramento Valley and some of the San Joaquin Valley lands.

Manganese is a constituent of most rocks and is readily dissolved in ground water and reprecipitated. In the belt of lakes that lie along the south edge of the area covered by glaciers in the northern United States during the continental glaciation manganese and iron oxides have been found, here and there, in quantities that warranted mining. Most of these deposits have not yet been covered by sediment, but there was recently discovered in southern Idaho a minable bed of manganese oxides that had been deposited in a lake of the glacial period and later covered by 100 feet of silt. Up to May 1, 1927, it had yielded 1200 tons of high-grade manganese ore. This deposit is described in Bulletin 795-H, recently published by the Geological Survey, Department of the Interior. Proof of its ancient origin was shown by the presence of several teeth of an extinct mammoth under the bed.

Oakland city council contemplates a \$844,500 bond issue to finance the purchase of 400 acres of land to improve for public park purposes. The proposal is backed by the East Side Consolidated Civic Clubs.

To hasten the end of a friendly controversy between the city of Burlingame and E. L. Norberg, San Francisco architect, over the latter's contention that the cornice on the south side of the city hall overhangs on his property and interferes with plans for the construction of a building, the Burlingame city council has ordered City Engineer James S. James to make a survey of the city property. Considerable argument over Norberg's legal ownership of the property in question, a creek, and his rights in placing a building there, has ensued for the past month.

The construction of an international highway, linking the United States with Central and South America, is provided for under the terms of a bill just introduced in the Senate by Senator Tasker L. Oddie of Nevada. The purpose of the highway, which is sponsored by the American Motorists Association and other organizations, would not only be for better highway facilities and communication between the countries, but would be conducive of good will, Senator Oddie declared in introducing the bill.

**FRAME HOUSE BUILT IN 1660
STANDING IN N. Y.**

"How To Select Your Lumber," is the title of a comprehensive and attractively illustrated article in the February number of Popular Science Monthly. John R. McMahon, the author, was furnished much of the material for his article by the information service of the National Lumber Manufacturers Association.

McMahon lays particular emphasis on the importance of choosing the right wood for each part of the house and illustrates his points with a diagram showing where the different species should be used.

The first page of his story carries the picture of a house at Elmhurst, Queensborough, New York, built in 1660. "After 268 years" the caption reads, "there is no evidence of decay in a plank or beam of this quaint old structure, built when Uncle Sam was yet unborn."

McMahon conducts the Home Building Department of Popular Science Monthly.

**PATENT RIGHTS ARE SOUGHT ON
CONCRETE BUILDINGS**

Chas. E. McCartney, general contractor, 1560 Lincoln street, Red Bluff, has applied to the U. S. Patent Office for a patent on what he classifies as the "unli" system for construction of concrete buildings.

McCartney described his new system as involving the use of continuous reinforced concrete. Nearly devoid of the forms commonly utilized in building concrete structures, his plan calls for only light column forms in two pieces.

The first work is to space the columns and set vertical column rods in place. Then the joice are put in place and the sub-floor laid.

The next move is to set and brace the inside column forms. The pallets then are set between each column, after which the side slabs are poured with concrete on the pallets.

Two or three days will be required to set these. With the aid of a winch each pallet containing the slab is raised to a vertical position. Following this operation reinforcing laps are fastened together with clips. The end forms are set the same as the outside. Half of the column form is raised and securely bolted. The identical process is used on the four sides of the structure in the course of construction.

With the new system window frames and doors are readily cast on the pallets.

Any type of roofing can be used, though slate, at some additional expense, would render the structure more fireproof. Likewise such a building is adapted to any kind of finish used in modern construction.

McCartney declared his system could be applied to buildings of all types of structures, including dwelling houses, business blocks, warehouses, garages, etc.

ALONG THE LINE

Professor John Gregg of the Division of Landscape Design of the College of Agriculture, University of California, has been named a member of the national committee on professional registration of the American Society of Landscape Architects. The purpose of the committee is to consider the possibility and desirability of having some means of registering technically trained landscape architects, in order that the public may have some definite method of differentiating between the professional designers and simple gardeners.

W. H. Lynch, district engineer for the U. S. Bureau of Public Roads, at Omaha, has been named to succeed C. H. Purcell in the same capacity at Portland, Ore. Mr. Purcell recently resigned to become chief engineer for the California State Highway Commission.

Chas. Everett Blanchard, formerly owner of the California Construction Company of San Francisco, announces he will enter the road contracting business in Southern California, making his headquarters at San Diego.

Wendell P. and Wendell C. Hammon and Newton Cleaveland will operate from 51 California street, San Francisco under the firm name of Yuba Associated Engineers.

Francis Drake, Los Angeles labor paper editor, is being groomed as the successor to J. E. Olsted of Petaluma on the State Industrial Accident Commission.

Nels Nelson was elected president of the Hayward (Alameda County) Builders' Exchange at the regular annual meeting. He succeeds Roscoe Byrnes. George Hooson was elected vice-president, E. P. Whitman, secretary and L. R. Rosenberg, treasurer. Directors are: L. R. Rosenberg, George Hooson, Nels Quist, E. P. Whitman, Jim Willison, Carl Sorensen, George Perry and Millard Moon. Following the election a banquet was served. Vice-President Hooson acting as host.

California building and loan associations, now numbering 220, are proving to be one of the chief instrumentalities in the state in the promotion of thrift and home owning. There are now more than 350,000 members, investors and borrowers in these associations, according to California Building Loan League.

Distribution of the \$90,000 estate of E. J. Randall, Contra Costa lumber dealer, who died more than a year ago, has been ordered by Superior Judge A. B. McKenzie at Martinez. The widow, Mrs. Margaret Randall, entitled to the entire estate in the absence of a will, nevertheless agreed to assign 30 per cent of the estate to the lumber dealer's six children.

A comprehensive booklet on farm building and remodeling and farm carpentry is being prepared by the technical men of the Central Division, National Lumber Manufacturers' Association, in cooperation with advertising agencies. The outline of the booklet will be presented at the meeting of the Trade Extension Executive Committee this month and it is expected that it will be ready for distribution shortly.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

K-25-X-4202-CS WOODWORKING ENGINEERS. graduate, 5-10 years' experience with furniture designing, woodworking machinery and plant layouts. Some knowledge of cost analysis essential. Opportunity. Apply by letter, giving age, education and experience. Location, Middlewest.

K-24-X-4203-CS MECHANICAL ENGINEER, graduate with 10 years' experience familiar with woodworking, plant layouts and conveyors. Apply by letter, giving full details of experience. Location Middlewest.

R-1475-S FIELD CONSTRUCTION ENGINEER, to take charge of extensive hydraulic work in connection with Hydro-electric development in India. Foreign experience desirable and either single or willing to go as single man preferred. Salary 150 pounds sterling per month and bonus after satisfactory completion of three year contract. Apply by letter with statement of experience and references.

R-1474-S CIVIL ENGINEERING GRADUATE, with same hydraulic experience and the ability to make first class drawings and tracings. \$225 a month. Temporary. Location San Francisco.

R-1479-S STRUCTURAL STEEL DETAILER, experienced. Must be American citizen. Temporary. Local. \$250 a month.

CHICAGO IS NOW BUILDING VARIEGATED SKYSCRAPER

Chicago's first variegated skyscraper, nineteen-story apartment and exclusive shop building, is in the process of construction. It will be located on the northwest corner of State and Elm Sts. the first floor is to be of dark French blue terra cotta. The second, third and fourth floors will be a light blue green. The next ten floors will have an exterior of salmon colored face brick and the last will be trimmed in multi-colored terra cotta composed of five hues with the salmon colored face brick background. Crowning the structure will be a mansard of copper which ultimately will be a rich green through the process of oxidation. All sides of the building are to be of the same material.

No signs will be allowed to destroy the beauty of the colors, not even on the outside of the shops, the owners of the building said.

EXAMINATIONS MADE FOR CEMENT PLANT AT ALTURAS

William Russell Bryne, Los Angeles mining engineer, has completed surveys of a large area of mineral deposits on Fitzhugh Creek, just south of Alturas.

The deposits consist of a considerable area of cement-bearing rock and from samples submitted the cement manufactured from this rock formation makes a concrete unequaled for hardness.

Bryne says he will make a favorable report to his clients in Los Angeles, who may establish a \$1,500,000 plant.

Bryne's figures show that thirty cars of cement per day could be manufactured at a plant and that there is sufficient raw material in sight to keep a plant running full time for fifty years or more.

The two main owners of the claims in which these deposits are found are Clarence Schleuder and Carl Wilson of Alturas.

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

John L. Sullivan, Berkeley. **ANCHORING DEVICE FOR ROOFING TILE.** This provides a device which may be handled and applied as a unit to secure the inbrex tiles in position without necessitating the addition of special members to the roof structure.

John G. Dybens, Los Angeles. **HYDRAULIC JACK.** This provides a hydraulic jack in which the cylinders forming the piston chamber and the reservoir chamber are assembled together in an improved and simplified manner. Mr. Dybens assigns his patent to Herman D. Eberle.

Edward H. Johnson, Bishop. **FIRE-PLACE.** This fireplace is so provided that it is easy to construct, assemble and install, that is strong, durable and efficient in use, and which also is adapted to conserve fuel.

Ernest H. Bucknell and Ralph E. Bletcher, Los Angeles. **VALVE.** This relates to a valve structure with renewable port control elements and pertains more particularly to a valve with an operating stem for moving a port control member into closed and open position.

ARCHITECT'S FEES AMOUNTING TO \$50,617 ASKED IN LAWSUIT

Architect's fees on a \$500,000 home, totaling \$50,617, are asked in a lawsuit filed in the Superior Court at Redwood City by Houghton Sawyer, San Francisco architect, against Robert B. and Jennie Henderson of Hillsborough.

The plaintiff alleges that a contract for the erection of a palatial residence was entered into on April 11, 1927, in which it was agreed that the architect was to receive 10 per cent of the cost, as fees.

After preliminary plans had been drawn at a cost of \$18,150, the defendants repudiated the contract, Sawyer alleges. For breach of contract he asks \$50,000.

In a second cause of action, the plaintiff asserts that a contract for the construction of a tennis court at the home was entered into in September, 1927, on which he seeks \$617. No payments have been made on either contract, Sawyer alleges.

The plaintiff is represented by the law firm of Athearn Chandler & Farmer of San Francisco.

EXISTENCE OF CEMENT MONOPOLY DENIED BY BL ROADS CHIEF

There is no evidence of a cement combine to inflate prices in the United States, the House Committee on Roads has been informed by the Chief of the Bureau of Public Roads of the Department of Agriculture, Thomas MacDonald.

"Prices for road materials are ruled solely by supply and demand," Mr. MacDonald said. "We carry heavier loads on less expensive roads than any other country in the world."

"We are perfecting the types of construction toward smaller initial costs and less maintenance costs. In the second place, due to our research work, types of roads that cost less are carrying heavier loads than ever before."

URGE INDUSTRIAL ENGINEER

Employment of an industrial engineer to bring new industries to Modesto, was urged by P. S. Bomberger in his inaugural address as president of the Modesto Real Estate Board.

HERE — THERE — EVERYWHERE

Wallace Snelgrove, general contractor, has withdrawn his membership in the Contra Costa County Builders' Exchange.

Members of the Stockton Builders' Exchange were guests of the Calaveras Portland Cement Company at the company's plant near San Andreas, Feb. 12. The delegation was headed by Wm. J. O'Keefe, president of the Stockton organization.

St. Louis cement finishers demand the five-day week, effective April 1, while the carpenters demand the same schedule, effective May 1. Employers' organization have formally protested against both proposals.

High-lights of Sacramento's major street plan of the Bartholomew Co. city planning experts, were described at a recent meeting of the Architects' and Engineers' Club of Sacramento by Jas. S. Dean, chief of the commission street-committee.

State conference of the California Master Plasterers' Association will be held at the Hotel Saint Claire, San Jose, February 20, 21 and 22. Delegates from every section of the state will attend.

Committees have been appointed by the Contra Costa County Builders' Exchange for the February 28 banquet to be held in the exchange quarters at Richmond, it is announced by L. C. Dexter, secretary of the exchange.

Cleveland bricklayers signed a two-year agreement with employers at the 1927 rate of \$1.62½ per hour.

As a further effort to keep fly-by-night competition out of Salinas, the city council has voted to raise the license for master plumbers from \$20 to \$100 per year, payable in advance, and raised the bond from \$250 to \$1000. This was made at the suggestion of the local plumbers who are willing to pay \$125 per year licence and also wanted a \$5000 bond.

Three new members are announced by the Santa Barbara Builders' Exchange: Rudolf Ruhnauf, painter and decorator; Channel Electric Co. and Holiday Hardware Co.

Conditions are particularly bad among carpenters in Chicago. A contractor who advertised for five carpenters was confronted by three hundred applicants.

F. J. Catton, architect, formerly of Los Angeles, has opened offices at 358 Sutter St., San Francisco, for the practice of architecture.

All officers of the San Francisco Master Plumbers' Association were re-elected for 1928. William J. Monahan, returned to the office of president, will serve his third consecutive term in that position. The others are William J. Forster, vice president; Alexander Coleman, treasurer, and George V. Morton, corporation secretary. Charles Noury and Charles Mayer were elected new members of the board of directors at the annual meeting of stockholders of the corporation. The directors who will continue for another term are: W. E. Burnham, Otto Anderson, William P. Goss, Jack Camp, S. Peterson, Joseph Rohr, A. J. Wilson, J. V. Young and James H. Pinkerton. Ernie Schaeffle will continue as business manager.

\$28,585,560 IS PACIFIC COAST BUILDING EXPENDITURE IN JANUARY

A grand total of 10,101 permits for new buildings to cost \$28,585,560 were issued during January in 98 Pacific Coast cities, according to official reports of municipal building inspectors tabulated in the National Monthly Building Survey of S. W. Straus & Co.

Los Angeles, issuing 2665 permits for buildings to cost \$7,509,691, reports a 13% increase over December's figures, but a 7% reduction from the January total of last year. The Los Angeles building volume amounts to more than one-fourth of the Pacific Coast total.

In the Los Angeles metropolitan area, exclusive of Los Angeles, 14 municipalities issued \$2,966,744 in building permits during January, 17% more than for December, but 17% less than for last January.

San Francisco's January record of 611 permits for \$3,710,925 of new buildings is 43% greater than the December figures and 5% above the total for last January. In the San Francisco Bay area, 13 municipalities outside of San Francisco, issuing \$2,493,906 in January building permits, show a 13% increase over December, but a 24% reduction from January, 1927.

Seattle reports a gain of 110% over December's figures and of 16% over last January with 702 permits for \$2,692,530 of new buildings issued during January.

Portland, issuing 569 permits during January, for buildings to cost \$983,200, shows a reduction of 12% from December's total and a reduction of 71% from the January total of last year.

Following are the official January, 1928, construction cost figures reported by building departments executives from 98 cities, comprised in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.:

CALIFORNIA				
January, 1928				
City—	No.	Cost	Jan., 1927	Dec., 1927

FIRST BUILDING LABOR AGREEMENT - 1500 YEARS OLD - PROVIDED FOR THE CLOSED SHOP AND PREVENTED STRIKES

An ancient document describes an agreement for preventing disputes in the building industry, drawn up at Sardis, Asia Minor, some 1500 years ago, according to the Electrical Workers' Journal. The agreement was entered into by the Sardis Union of Building Artisans and the master employers of that city and deposited before the city magistrate, dated April 27, 459 A. D.

"Not only the contents of the agreement, but its form of expression remind us closely of present-day documents in the same field," says the Journal. "The same stiff phrases, the never tiring love for words that nobody but lawyers use and no one understands. That is more important, however, is the same industrial outlook from which the parties to the agreement proceed, the conditions under which a worker is obliged to discharge his duties and under which he is guaranteed the protection of his rights.

An Ancient Agreement

"The document is written in these terms:

"Whereas, Your excellency has received various accusations against divers persons practising our craft, to the effect that they take in hand pieces of building work, leave these unfinished and obstruct the employers, deeming it important to abolish an injustice so detrimental to the employers, you have requested from us this agreement and declaration under oath in the following terms:

"We do agree and make oaths by the

holy and life-giving Trinity, and by the safe preservation and victory of the Lord and the inhabited earth, Flavius Leo, everlasting August and emperor.

(1) That we will complete all pieces of work given out to us by any one of the employers, provided that the employer is prompt in paying us the wages mutually agreed upon.

(2) Should the man undertaking the work have any plea on which he declines it for some reason of his own, either private or public, another artisan from among us shall take his place and shall entirely complete the work under construction on the distinct understanding that the man declining it, whether he be the artisan who began or the man who shall have taken his place, is one of ourselves, and that no reason of our own stands in the way of the work.

(3) Should the man undertaking the work once hinder the employer in any way while it is, as we said, under construction, if he who either began it from the beginning or shall have taken the place of any artisan is one of ourselves, we shall for such hindrance pay indemnities according to the actual contract between the employer and the artisan.

(4) Should the employer show indulgence, if he be for seven days hindered from working, the work shall be left to the artisan undertaking it.

(5) Should the artisan fall ill, the employer shall wait twenty days and if after such indulgence for twenty days the man should get well but show no

disposition to work at that time, another shall take his place on the terms stipulated by us to the man who has declined.

(6) If when the man undertaking the work declines it, some one of us be found neither doing anything nor performing work in accordance with the provisions herein written, we bind ourselves to pay the (sum) as a fine to be used for the city's public works, while the artisan shall be compelled to pay eight pieces of gold, and shall further be liable, even after exaction of the fine, to prosecution under the divine edict on the charge of injustice. The present agreement remaining firm, unbroken and undisturbed in perpetuity and being irrevocably carried out in strict conformity with all things above determined and promised by us.

(7) And for the full discharge of the fine we pledge, under a lien both general and individual, all our property, present and future, of every kind and sort, and when as to all things above written the question was put to us by your excellency, we gave our assent to this agreement and declaration under oath on the day and in the consulship above written."

Benefits of Agreement

"As you read you can judge what good agreements were written 1500 years ago. We should be pleased with such at this present age. And let me see what the two parties to a building contract can gain from agreement. To the employer it insures, except for possible delay of twenty days under Clause 5, uninterrupted work, with indemnities for any interruption by the workman. If he throws up the job other workmen will be supplied by the union till it is finished. If he is dilatory or obstructive, the union guarantees his indemnity payments.

"To the artisan the advantages are: That he need only work if his wages are punctually paid; that in case of sickness he is allowed twenty days for recovery before he can be replaced; that since only members of the union may be employed, he has no competition to fear from the outside.

"The benefits concerned by the agreements are thus similar to those which now induce employers and trade unions to adopt the principle of the 'closed shop.' This aims at securing for the former a steady supply of workers and a continuity of labor, and for the latter more stable wages and working conditions through the elimination of non-union competitors. Respecting rates of wages, strikes and intimidation, the evidence here embodied is valuable. Wages are ostensibly fixed by the several contracts between the individual mechanics and the employers, and of union standards of minimum rates there is no mention.

"Since, however, an employer can enjoy the benefit of the agreement only if he deals exclusively with members of the union, he has to pay them the wages which it permits them to accept.

"It seems that the reason for making so formal a settlement was the desire to avoid these strikes which it seems had previously been frequent and the charges against the building workers were that they leave these pieces of work unfinished and obstruct the employers, or in other words, they strike and prevent other mechanics from working.

"And compensation by the union in the event of any further obstruction is stipulated in Clause 3. The fear of repetition of such troubles must have protected the union rates of wages by discouraging employers from dealing with non-union workmen, against whose possible striking on misconduct their agreement would have afforded no remedy."

As previously reported, excavating awarded to Ariss Knapp Co., 961 41st St., Oakland; structural steel to Herrick Works, 18th and Campbell Sts., Oakland.

MARIPOSA, Mariposa Co., Cal.—F. A. Bondshu, a member of the advisory board of the Merced Branch of the Bank of Italy, is having plans prepared for a \$75,000 hotel to be erected at Bullion and Eighth sts; site is 240 x 212 ft. Several cabins will also be erected in connection with the project.

DOUGLAS, Ariz.—H. O. Mackey, owner of the Gadsden Hotel which was destroyed by fire recently, has announced his intention of building a 150-room hotel on site of the one destroyed at an approximate cost of \$500,000.

PASADENA, L. A., Co., Cal.—Orndorff Construction Co., 247 N. Western Ave., L. A., has the contract to erect a class A hotel building and class A apartment house at the northeast corner of East Colorado St. and North Oak Knoll Ave., Pasadena, for Lee Orndorff and associates. The total cost will be about \$2,500,000. Plans for the buildings have been prepared by Architects Marston & Maybury, 25 E Euclid Ave., Pasadena. Construction work on the hotel building will be started about April 1 and work on the apartment house will follow in 30 or 60 days. The site is 610x150 feet, and with the exception of patios and courts will be covered by the buildings. The hotel building will contain 24 shops, 300 guest rooms, lobbies, ballroom, private banquet rooms, dining rooms, etc. The apartment house will contain 300 rooms arranged in 125 apartments. The construction will be of reinforced concrete.

SANGER, Fresno Co., Cal.—W. H. Jones, Sanger, at approx. \$50,000 awarded contract to Barsotti Bros., to erect two-story brick hotel opposite the Southern Pacific depot. J. M. Brown, Clinton St., Fresno, awarded contract for brick work. Will contain stores on the ground floor with 24 rooms on upper floors. Will be 100 by 80 feet.

GARDNERVILLE, Nevada—Architect F. J. DeLongchamps, Gazette Bldg., Reno, preparing plans for \$50,000 hotel to be erected in Gardnerville by interests now forming a building association.

ICE AND COLD STORAGE PLANTS

YUBA CITY, Sutter Co., Cal.—See "Factories and Warehouses," this issue. \$500,000 cannery and cold storage warehouse contemplated.

POWER PLANTS

YORBA LINDA, Cal.—The Southern California Edison Co. is commencing the erection of a sub-station at Van Buren st. and Morse ave; bldg. and equipment will cost \$14,900.

TURLOCK, Stanislaus Co., Cal.—As previously reported, bids will be rec. by Anna Sorensen, secy., Turlock Irrigation Dist., until March 5, 10 a. m., to fur. transmission power material and other equipment, as follows: (1) four 250-amp., 73 KV, oil circuit breakers; (2) twenty-four 250-amp., 73 KV, disconnecting switches; two 250-amp. 73 KV pole top switches; (3) 42 mi. of conductor; (4) 22 double circuit steel poles; 12 single circuit steel poles (light); 61 single circuit steel poles (heavy); (5) 1500 suspension insulators with hardware; (6) labor installing pole foundations; (6) labor erecting poles and stringing wire; (8) lump sum bid for items 1 to 7 inclusive. Cert. check 5 per cent payable to dist. req. with bid. Spec. obtainable from secretary on deposit of \$20, returnable. See call for bids under official proposal section in this issue.

MONTEREY COUNTY, Cal.—Coast Valley's Gas and Electric Co., 161 Main st., Salinas, will expend \$17,600 for new line construction, oil circuit breakers and regulators and equipment to meet increased demand for service on Castroville and Alisal feeder lines. J. F. Pollard is branch manager at Salinas.

GLENDALE, Los Angeles Co., Cal.—H. K. Jones, 39 S Congress st., Pasadena, was awarded contract by city council of Glendale, at \$90,450 for all work complete for erecting a class A sub-station at Glendale for the municipal public service department. The building will be two-stories and basement, 50x125 ft., reinforced concrete construction. F. Diehrich is the plant supt.

GRIDLEY, Butte Co., Cal.—Pacific Gas & Electric Co., 245 Market St., San Francisco, will expend \$26,500 to const. new lines and provide additional facilities in the Gridley-Live Oak District.

TUCSON, Ariz.—Until 4 P. M., Feb. 23, bids will be rec. to furf. f. o. b. Tucson, one constant current regulator. Regulator must be the moving coil, station type of approximately 17 k. w. capacity. Primary voltage 2200, 60 cycle single circuit secondary for 6.6 amp. Regulator to be used on series incandescent st. lighting. Standard control panel to be furnished with the regulator. Panel to be equipped with ammeter, primary and secondary oil switches and necessary fusing arrangements. Bidder must give complete specifications of the equipment which he proposes to furnish and shall state delivery. Certified check, 10%. L. O. Cowan, city clerk.

OAKLAND, Cal.—Fastey Cable Co., at \$1688.40 sub. low bid to City Port Commission to fur. and del. 1200 ft. submarine power cable for city dredge. Other bids, taken under advisement, were: Standard Underground Cable Co., \$1896; General Electric Co., \$2187.

OAKLAND, Cal.—B. F. Sturtevant Co., San Francisco, at \$69,337 awarded cont. by county to fur. and install ventilating fans for Alameda county estuary tube project. Lincoln Electric Co., at \$14,172, awarded contract for motors.

SAN JOAQUIN VALLEY, Cal.—San Joaquin Light & Power Corp., Power Bldg., Fresno, and Midland Counties Public Service Corp., will spend \$9,037,571 during the current year in the San Joaquin Valley and coast communities served by their systems, according to A. Emory Wishon, vice president and general manager.

Three new 110,000-volt lines will reinforce the southern part of the system. The lines from Rio Bravo substation to Bakersfield steam plant will be completed this year with an expenditure of \$87,723. Work will start soon on line from Corcoran sub-station to Midway steam plant; cost \$339,550; and line from Midway steam plant to Taft sub-station, cost \$112,000. These lines will be built on steel poles through their entire length.

Steel structure will be installed on present line along Merced river above

Exchequer power house, providing for an increase to 70,000 volts. Construction has started on a 70,000-volt line from Merced to Merced Falls to facilitate interconnection with Don Pedro plant of Turlock Irrigation system. A 70,000-volt line is to be built bet. Newman and Gustine also.

New lines in southern part of system will require considerable change and enlargement of sub-station facilities. New apparatus at Taft will cost \$100,000. Installation of four 10,000-K.V.A. transformers started last year at Kern oil sub-station north of Bakersfield to accommodate the new Rio Bravo line will be completed at a cost of \$161,000. Additional switching equipment will be added at Corcoran sub-station and Rio Bravo sub-station at a cost of \$64,800.

A new sub-station will be erected north of Fresno. The first unit of this project will be completed this year at a cost of \$75,000. The Merced Falls sub-station will be entirely rebuilt, steel structure being used throughout, and transformer equipment being installed to provide for the output of the proposed new power house at this location. Approx. \$60,000 will be spent here. The Caruthers sub-station is to be rebuilt at a cost of \$33,655. Additional transformers will be installed at Livingston substation.

Provisions for connecting new business to the lines make up one of the

largest items of the budget. Routine extensions for the new service will cost \$7,800,467. Expenses for reinforcing distribution lines in districts where increased load warrants the work will amount to approximately \$387,042.

At the Bakersfield steam plant, switching equipment will be installed to accommodate new line from Rio Bravo sub-station, cost \$45,800. New equipment will be installed at Midway steam plant for the two additional 110,000-volt lines being brought in there, cost \$41,260.

In the Crane Valley system of hydro-plants it is proposed to reconstruct portions of conduit supplying No. 1 power house at a cost of \$13,029. Proposed improvements to the Crane Valley dam amount to \$170,000. Alteration work on the Merced Falls power house will start with an investment of about \$100,000 this year.

Provision is made in budget for Bakersfield Gas system, Merced Gas, Selma Gas and Water, and Arroyo Grande Water, subsidiaries of the power companies, a total of \$154,377 being allotted to these companies. Bakersfield Gas will expend approx. \$127,617 for construction during 1928, including \$65,292 for the expenses of connecting new business. More than 14,000 feet of additional six-inch high pressure transmission line will be laid at a cost of \$29,800. In Merced new

SAND

"I observed a locomotive in the railroad yards one day. It was waiting at the roundhouse where the locomotives stay. It was panting for the journey; it was coaled and fully manned, And it had a box the fireman was filling full of sand.

It appears that locomotives cannot always get a grip, on their slender iron pavements 'cause the wheels are apt to slip, and when they reach a slippery spot their tactics they commence. And to get a grip upon the rails, they sprinkle it with sand.

If your track is steep and hilly, and you have a heavy grade, And if those who've gone before you have the rails quite slippery made; If you ever reach the summit of the upper table land, You'll find you'll have to do it with the liberal use of sand.

If you strike some frigid weather and discover to your cost, That you are liable to slip on a heavy coat of frost, Then some prompt decided action must be called into demand, For you'll slide clear to the bottom, if you haven't any sand.

But you can get to any station that is on life's schedule seen, If there's fire beneath the boiler of ambition's strong machine; And you'll reach the place that's called success at a rate of speed that's grand, If for all the slippery places, you've a good supply of SAND."

SAND IS what.

WE ALL need.

WHETHER WE build a house.

OR OUR characters.

YOU NEED clean sand.

WHEN YOU build buildings.

AND YOU also.

NEED CLEAN sand.

WHEN YOU build characters.

CLARENCE (SANDY) Pratt, president.

OF THE Pratt Building Material Co.

WITH SAND (and rock) plants.

AT SACRAMENTO, Marysville.

PRATTCO (MONTEREY County).

PRATTROCK (NEAR Folsom).

AND MAYHEW (Sacramento County).

(CENTRAL OFFICE—San Francisco).

HAS CLEAN sand.

FOR ALL building construction.

AND SANDY hopes.

HE HAS the sand.

TO HELP build clean characters.

"I THANK you."

This is leap year and it takes "sand" to refuse a beautiful girl when she asks you to marry her (Sandy Pratt, producer of clean, sharp sand, rock and gravel, refers to unmarried men, the married ones have to say no). If you marry the girl, you need "rocks" (from Prattrock) to support her.

as sampling equipment will be installed, a total of \$12,900 making up the company's budget. Selma Gas has no major items in contemplation but expects to spend some \$2250 for connecting new consumers.

PUBLIC BUILDINGS

MERCED, Merced Co., Cal.—Until March 5, bids will be received by P. J. Thornton, county clerk, to erect Veterans' memorial building at Dos Palos. Est. cost \$5000. Plans prepared by W. E. Sedden, county surveyor, Shafter Bldg., Merced, and obtainable from that official.

FAIRFIELD, Solano Co., Cal.—Until March 5, bids will be received by county supervisors to fur. and install steel cells and jail equipment in branch county jail at Vallejo. Plans obtainable from clerk at Fairfield.

SAN LEANDRO, Alameda Co., Cal.—Election will be held April 9 to vote bonds of \$30,000 to purchase site and erect firehouse.

SACRAMENTO, Cal.—Until March 9, 2 P. M., bids will be received by State Department of Public Works, Division of Architecture, Forum Bldg., Sacramento, to erect one-story brick machinery building with reinforced concrete foundations, common brick walls and tile roof. Est. cost \$135,000. Henry H. Gutterston, architect, 526 Powell St., San Francisco. Bids are wanted for (a) general contract to include all work except plumbing and electric work and (b) mechanical work which includes plumbing and electric work. Separate bids will be considered for electrical work and plumbing or combined bids for plumbing and electrical work. See call for bids under official proposal section in this issue.

RENO, Nevada.—Until March 14, 10 A. M., bids will be received by E. H. Beemer, county clerk, to install automatic and home heating plant in basement of Washoe County Jail. Plans on file in office of clerk. See call for bids under official proposal section in this issue.

LIVINGSTON, Merced Co., Cal.—Until Feb. 28, 8 P. M., bids will be received by Edward J. Hicks, city clerk, to erect two-story brick city hall and firehouse, 25 by 40 ft. Cert. check 10% payable to city req. with bid. Plans on file in office of clerk. See call for bids under official proposal section in this issue.

ONTARIO, San Bernardino Co., Cal.—The city council will call an election to vote bonds in the sum of \$110,000 for constructing municipal plunge and bathhouse and improvements for city parks. The plunge and bathhouse are estimated to cost \$40,000 and the remainder will be for buildings, sewerage, recreation facilities and lawns in the parks.

GUERNEVILLE, Sonoma Co., Cal.—A. J. P. Jensen, local contractor, will erect quarters for fire department on a lease basis; will be frame and stucco construction; Spanish type of architecture.

SOUTH SAN FRANCISCO, Cal.—New bids, to be opened Feb. 27th, 7:30 P. M., are being taken by Mr. McSweeney, city clerk, for the construction of a one-story concrete fire house for housing fire alarm system. R. C. Stickle, 304 Linden St., South San Francisco, submitted the only bid at previous bid opening, at \$3297, which was rejected.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—The names and addresses of the parties concerned in these opportunities may be obtained from the office of the Larsen Advance Construction Reports, 547 Mission st., San Francisco, either by phone, letter or personal call. Such requests should be accompanied by the index number of each opportunity, and self-addressed envelope for reply by mail.

12677—Buying and Selling Representation. Paris, France. Old established commission agents, having large offices, stock rooms, experienced staff, are desirous of establishing business connections with San Francisco firms interested in importing goods from the Continent, or in exporting their products to Europe.
12682—Representation in Germany. San Francisco. Gentleman with international business experience, sailing for Germany shortly, offers his services to San Francisco firms as investigator, buyer or salesman.

12690—Iron Ore. Bo'Ness, Scotland. Exporters of iron ore desire to submit quotations on this commodity to interested San Francisco importers.

12694—Balso and Mahogany. Panama City, R. P. Suppliers of balso and mahogany wish to establish connections with San Francisco importers of these woods.

12695—Redwood Sawdust and Wooden Kegs. Parras, Coah., Mexico. Concern is in the market for redwood sawdust and wooden kegs to be used for packing grapes.

D-2758—Automatic Tire Inflating Equipment. Toledo, Ohio. Manufacturers of automatic tire inflating equipment known as the "airscale" air weighing machine, are desirous of securing a distributor for their line in this territory.

D-2759 — Laundry and Dry Cleaning Equipment. Atlanta, Ga. Dealers in advanced laundry and dry-cleaning equipment wish to communicate with San Francisco agents or dealers interested in handling such machinery.

D-2761—Battery Terminal. Omaha, Neb. Manufacturers of an improved type of battery terminal are anxious to market their product through some sales organization on the Pacific Coast. Descriptive circular on file with the Foreign and Domestic Trade Department.

D-2762 — Ladder Adjuster. Hayfork, Calif. Inventor of the "sure foot" ladder adjuster wishes to get in touch with a San Francisco manufacturer of iron or steel articles, who would be interested in manufacturing his invention.

A general conference of manufacturers, dealers and consumers to consider the standardization of refrigerators will be held in New York in March under the auspices of the American Engineering Standards Committee. A preliminary meeting was recently held to consider requests for standardization received by the Committee from the American Home Economics Association and the American Institute of Architects.

MEDUSA

White Portland Cement

(WATERPROOFED)

WITHOUT Portland Cement Stucco, the architecture of California would have missed much of its rare charm. Taking this architectural beauty and translating it into a thing of structural permanence has been a responsibility which builders everywhere have placed upon Medusa White Portland Cement with complete success.

THE SANDUSKY CEMENT COMPANY ENGINEERS' BUILDING CLEVELAND, OHIO

Manufacturers of Medusa White Portland Cement (Plain and Waterproofed); Medusa Waterproofing (Powder or Paste); Medusa Gray Portland Cement (Plain and Waterproofed); and Medusa Cement Paint.

NOTICE CALLING FOR BIDS

(Outfall Sewer—Town of Hayward)

Pursuant to Statute and to Order of the Board of Trustees of the Town of Hayward directing this notice, Notice is hereby given inviting sealed proposals or bids, for the furnishing materials for and constructing an addition to the outfall sewer of the Town of Hayward, in accordance to the plans and specifications heretofore adopted for doing said work, and now on file in the office of the Town Clerk, of the Town of Hayward, which said plans and specifications are hereby expressly referred to and made a part of this notice the same as if set out in length herein.

A copy of said plans and specifications will be furnished upon application to either the Town Clerk of the Town of Hayward, or to Jesse B. Holly, Town Engineer of the Town of Hayward, and the person applying for the same will be required to deposit \$5.00 for each set of such plans and specifications so furnished, which said sum will be returned upon the return of said copies so obtained.

All proposals or bids shall be in writing in the form set out in said specifications and must be accompanied by a check payable to the Town of Hayward, certified by a responsible bank for an amount which shall not be less than ten per cent of the aggregate total of the proposal or bid, or by a bond for the said amount and so payable, signed by the bidder and two sureties, who shall justify, before an officer competent to administer an oath, in double the said amount and over and above all statutory exemptions.

Such sealed proposals or bids shall be delivered to Clerk of said Town of Hayward, on or before Wednesday, the 7th day of March at the hour of eight o'clock P. M., 1928. Proposals or bids will be opened and opened on said day and hour. The said Board of Trustees reserves the right to reject any and all proposals or bids.

Dated: February 6th, 1928.

(SEAL) M. B. TEMPLETON,
Town Clerk of the Town of Hayward.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock p. m., on March 7, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Sacramento County, an undergrade crossing under the tracks of the Southern Pacific Company at Brighton (III-Sac-11-B), consisting of two concrete abutments with wing walls, about 2850 feet of roadway and 630 feet of sidewalk graded and paved with Portland cement concrete, and flood protection.

San Luis Obispo County, 1.9 miles north of San Luis Obispo (V-SLO-2-D), about two-tenths (0.2) mile in length, to be graded and surfaced with water-bound macadam.

Imperial County, between Trifolium Drainage Canal and Arroyo Salado Wash (VIII-Imn-26-B-C-D), about nineteen and seven-tenths (19.7) miles of drainage ditches and dykes, and eight timber bridges to be constructed.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated: February 8, 1928.
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
R. M. MORTON,
State Highway Engineer

NOTICE TO CONTRACTORS

(Shop Building—Lakeview Jr. High School)

Office of the Secretary of the Board of Education of the City of Oakland

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 28th day of February, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the Lakeview Junior High School Shop Building of the Oakland High School District, located on the West side of Harrison Street North of 26th Street, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th street, Oakland, California.

GENERAL LISTING BUREAU

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder, application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time or if mutilated, the said deposit shall be retained by the said School District, agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank, banker and made payable to the Board of Education of the City of Oakland, or of Oakland High School District, as retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bond required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars, but for all bids of less than Five Thousand (\$50,000.00) Dollars, (10%) percent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 28th day of February, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of said bids.

JOHN W. EDMOND,
Secretary of the Board of Education
the City of Oakland, California.

NOTICE TO BIDDERS

(Reservoir—City of Burlingame)

Sealed proposals will be received at the City of Burlingame, up to eight o'clock P. M., Monday, February 20, 1928, at the office of the City Clerk, the City Hall of said City, for the following work to be done in connection with the construction of the proposed Brewer Reservoir of the Burlingame Water System, viz.:

The clearing and stripping of the reservoir site, amounting to approximately 25,700 square feet, the excavation of a cut-off trench containing approximately 126 cubic yards, the excavation of a trench for outlet containing approximately 84 cubic yards, and the excavation for reservoir amounting to approximately 3400 cubic yards and the placing of the same in embankment.

Said work includes also other work appurtenant to and necessary for the proper completion of the work contemplated.

All of the said work is shown on the plans or provided for in the specifications therefor, prepared by the Loveland Engineers, Inc., and on file with the City Clerk and with the City Engineer of Burlingame, copies of which may be obtained by bidders from the City Engineer.

All proposals must be made upon blank forms which may be obtained of the City Engineer. Each proposal must give the bid prices both in writing and in figures, and must be signed by the bidder with his address.

Each bid must be presented under sealed cover and must be accompanied by a Certified Check made payable to the City of Burlingame for an amount equal to or exceeding twenty five per cent of the total amount of the said bid.

The City Council reserves the right to reject any or all bids, and to accept at bid which it deems best for the City of Burlingame.

J. R. MURPHY,
City Clerk.

NOTICE TO BIDDERS

(C. I. Pipe—Redwood City)

Public notice is hereby given that sealed bids will be received by the City Council of the Town of Redwood City, California, up to and including Monday, the 20th day of February, 1928 at the hour of 7:30 o'clock P. M., for the following material to be delivered f. o. b. at Redwood City, to-wit:

- 4000 feet of four (4) inch cast iron water pipe.
- 6 four (4) inch cast iron Tees.
- All pipe to be of hub and spigot form, lengths of not less than twelve (12) feet nor more than sixteen (16) feet, and to be of Class "B" Standard weight and thickness in conformity to American Water Works Association Specifications, or pipe guaranteed by manufacturer to be of equal strength and durability but of less thickness and weight.
- All Tees to have three (3) hub ends.
- All pipe and specials to be subject to inspection by the superintendent of the Redwood City Water Department upon delivery and rejected pieces to be stored at the expense and subject to the order of the shipper.

Bids are required to state time of delivery, and contract to be entered into within five (5) days after acceptance of bid.

Bids to be accompanied by a certified check in the amount of ten (10%) per cent of total of bid made payable to the Town of Redwood City. Checks of unsuccessful bidders to be returned upon rejection of bids, and check of successful bidders to be returned upon delivery and acceptance of goods ordered.

By order of the City Council of the Town of Redwood City, California, dated February 6, 1928.

W. A. PRICE,

Clerk of the Town of Redwood City.

NOTICE TO BIDDERS

(Pipe Laying, Etc.—Burlingame)

Sealed proposals will be received by the City of Burlingame up to eight o'clock P. M., Monday, February 20, 1928, at the City of the City Hall of said City, for the installation and construction of certain portions of the Burlingame Water System known as Section 2.

The work includes the installation of the following approximate quantities of water mains: 910 feet of four inch cast iron pipe, 17,455 feet of six inch cast iron pipe, 660 feet of eight inch cast iron pipe, 3405 feet of ten inch cast iron pipe, and 8674 feet of twelve inch cast iron pipe. Said work includes also the installation of fifty-four fire hydrants, together with the proper fittings for all the work listed above. Said work also includes the excavation and backfilling of trenches, cutting and replacement of pavement, sidewalk, gutters and drive-ways, and all other work appurtenant to and necessary for the proper completion of the work contemplated.

All of said work is shown on the plans provided for in the specifications hereof, on file with the City Clerk and with the City Engineer, copies of which may be obtained from the City Engineer.

All proposals must be made upon blank forms which may be obtained of the City Engineer. Each proposal must give the bid prices both in writing and in figures, and must be signed by the bidder with his address.

Each bid must be presented under sealed cover and must be accompanied by a Certified Check made payable to the City of Burlingame for an amount equal to or exceeding twenty-five per cent of the total amount of said bid.

The City Council reserves the right to reject any or all bids, and to accept any bid which it deems best for the City of Burlingame.

J. R. MURPHY,

City Clerk.

NOTICE CALLING FOR BIDS

Tulare Lake Basin Water Storage District

Notice is hereby given, pursuant to resolution adopted at the regular monthly meeting of the Board of Directors of Tulare Lake Basin Water Storage District on February 7, 1928, that a call for bids is hereby made for the doing of the work hereinafter specified, plans and specifications of the work and the form of contract can be seen at the office of the district at 109 West Eighth

street, Hanford, California. Proposals must be sealed and must be delivered to the office of the district not later than 7 o'clock p. m. of March 9, 1928. Bids will be opened on said date at the regular monthly meeting of the Board of Directors of the district and thereupon the contract will be let to the lowest responsible bidder. The right to reject any and all bids is hereby reserved. The work to be done consists in channel improvements and construction of new channel along San Jose Slough and Sand (or Fault) Slough from Gepford Bridge on the south line of Section 23, Township 18 South, Range 19 East, M. D. B. & M., to the south line of Section 15 in the same township and range, in the County of Kings, State of California. The work will require the excavation of 185,000 cu. yds. of earth, approximately, and the removal of trees, stumps and brush and the construction of levees on each side of the channel.

Dated February 7, 1928.

By order of the Board of Directors of Tulare Lake Basin Water Storage Dist.
D. HADSELL, Secretary.

NOTICE TO BIDDERS

(Ditch Deepening and Widening—El Dorado Irrigation Dist.)

Sealed proposals will be received by the Board of Directors of the El Dorado Irrigation District at the office of the Board, Placerville, California, until 10 o'clock A. M. March 3, 1928, for the following work: Regrading Lower Webber Ditch from outlet of Webber Reservoir to outlet of Texas Hill Tunnel near Placerville, El Dorado county, California. 28,807 lineal feet of ditch deepening and widening. Contract will be let to the lowest responsible bidder, the board reserving the right, however, to reject any and all bids.

Plans and specifications can be seen at the office of the board, Placerville, California.

R. W. BROWNE,

Secretary.

El Dorado Irrigation Dist.

NOTICE TO STEEL LOCKER COMPANIES

(Steel Lockers—City of Fresno)

Pursuant to an order of the Board of Education of the Fresno City High School District, County of Fresno, California, duly made this 9th day of February, 1928, the public notice is hereby given that the said board will receive up to 5 o'clock p. m., on the 8th day of March, 1928, at the office of the said board in the Hawthorne School Bldg., 2425 Fresno street, Fresno, Calif., sealed proposals for the furnishing and installing of 2184 more or less steel lockers, 12x12x24 in rows 7 lockers long, 3 tier high, back to back, a total of 52 bays of 42 lockers each.

Reference is hereby made to "General Information to Bidders" Building Form No. 6 for further particulars regarding all bids.

Further specifications together with forms for submitting all bids and further details regarding all bids may be obtained from the secretary of the board at the office of said board above designated.

A bidder's surety bond or certified check equal to at least ten per cent of the amount of the bid submitted, must accompany each proposal.

The Board of Education reserves the right to reject any and all bids.

By Order BOARD OF EDUCATION,
Fresno City High School District.
L. L. Smith, secretary.

NOTICE TO BIDDERS

Turlock Irrigation District, Turlock, California

Transmission Power Line, Material and Other Equipment

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors or the Turlock Irrigation District, Turlock, California, until 10 A. M. Monday, March 5, 1928, for the furnishing of transmission power line material and other equipment according to the following table:

- Item 1—4, 250 Ampere, 73 KV, oil Circuit breakers.
- Item 2—24, 250 Ampere, 73 KV. Disconnecting switches.
- Item 3—42 miles of conductor.

- Item 4—22 double circuit steel poles.
- Item 5—12 single circuit steel poles (Light).
- Item 6—61 single circuit steel poles (Heavy).
- Item 7—1500 Suspension insulators with hardware.

Item 8—Labor installing pole foundations.

Item 9—Labor erecting poles and stringing wire.

Item 10—Lump sum bid for items one to seven inclusive.

Specifications for said material can be seen at the office of said Board and copies thereof will be furnished upon application to the Secretary of said Board accompanied by a deposit of \$20.00 to be repaid to all bidders and to all others upon return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

Said Board will be in session at its office at 10 o'clock A. M., on Monday, March 5th, 1928, and will open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

Bidders may submit bids upon any or all of the items, but no item will be subdivided.

Each proposal must be accompanied by a certified check for five per cent of the amount of the items bid upon, payable to the order of the Turlock Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five per cent of the amount of the bid for material and fifty per cent of the amount of the bid on labor, in accordance with plans and specifications, said bond to be approved by said Board.

The proposal forms bound with the specifications must be properly filled out by the bidder and the plans and specifications, including the proposal, must be submitted intact with the bid on a sealed envelope addressed to the Board of Directors of the Turlock Irrigation District, and marked to indicate that it is a proposal for transmission power line material, and other equipment.

Done in pursuance of an order of the Board of Directors of the Turlock Irrigation District, this sixth day of February, 1928.

ANNA SORESENSEN,

Secretary of Board of Directors of Turlock Irrigation District.

NOTICE TO CONTRACTORS

(Lakeview Jr. High School—Gymnasium)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of Alameda and High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 28th day of February, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the Lakeview Junior High School Gymnasium of the Oakland High School District, located on the West side of Harrison Street, North of 26th Street, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or broker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party

be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars, but for all bids of less than Fifty Thousand (\$50,000.00) Dollars, said checks shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the board of said District on Tuesday, the 28th day of February, 1928, at 10:45 A. M., in the board room, 211 Second Floor, of said City Hall, in said City of Oakland. The board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND, Secretary of the Board of Education of the City of Oakland, California.

NOTICE TO CONTRACTORS

GENERAL WORK

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Bldg., Sacramento, California, up to 2 o'clock P. M., Friday, March 9th, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the General Work, Machinery Building, Agricultural Park, Sacramento, California, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The Machinery Building will be a one-story brick building with reinforced concrete foundations, common brick walls, and tile roof.

General work will include all manner of work except Plumbing, and Electrical Work. Bids must be submitted on Proposal Forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bids, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for General Work, Machinery Building, Agricultural Park, Sacramento, California."

NOTICE TO BIDDERS

(Tractor and Heating Plant—Washoe County, Nevada)

Pursuant to an order of the Board of County Commissioners, of Washoe County, Nevada, made and entered on the 6th day of February, 1928, sealed bids and proposals will be received by the undersigned at the office of the County Clerk of Washoe County, in the City of Reno, County of Washoe, State of Nevada, not later than ten o'clock A. M., Wednesday, March 14, 1928, for the following, to-wit:

One tractor of Caterpillar type, not to exceed the value of \$2650.

Also installation of an Automatic and House heating plant in the basement of the Washoe County Jail, as per specifications on file in the County Clerk's office at Reno, Nevada.

The said Board of County Commissioners reserves the right to reject any or all bids and to accept the bid best suited to the needs of Washoe County.

E. H. BEEMER, Clerk of Board of County Commissioners.

NOTICE TO CONTRACTORS

(Road Work—Montague Water Conservation District)

Sealed bids for road construction will be received by the Directors of Montague Water Conservation District at their office in Montague, California, until 4 o'clock p. m., March 6th, 1928, and will at that hour be publicly opened. The location of the proposed work is between the Weed Road near the Old Moffitt Mill and the Edgewood Road, extending about two and one-half miles around the south end of Dwinell Reservoir. The work involves, the construction of about 3½ miles of fence, about ½ mile of clearing, about 2 miles of grading, and placing about eight small culverts.

Plans and specifications may be seen at the office of the board. Contracts will be let to the lowest responsible bidder, subject to the right of the District to reject any or all bids.

By order of the Board of Directors of Montague Water Conservation District.
ROY E. SWIGART, secretary.

NOTICE INVITING SEALED PROPOSALS OR BIDS

(City Hall—Livingston, Calif.)

Pursuant to Resolution of the Council of the City of Livingston, directing this Notice, the said Council of the City of Livingston hereby invites sealed proposals or bids for the material for and the construction of a two-story brick building twenty-five (25) feet wide and forty (40) feet long, this building to be used for municipal purposes as a City Hall, Fire House and Water Superintendent's Office.

All of said work and said material shall be in accordance with the plans and specifications for said work now on file in the office of the Mayor of said City of Livingston.

All proposals or bids shall be accompanied by a check, payable to the City of Livingston, certified by a re-

sponsible bank, for an amount which shall not be less than ten per cent (10%) of the amount of said bid, or by a bond for the said amount, and so payable, signed by the bidder and two sureties who shall justify, before an officer competent to administer oaths, in double said amount and over and above all statutory exemptions.

Said sealed proposals or bids shall be delivered to the Clerk of said Council of the City of Livingston, to-wit: To the City Clerk of the City of Livingston, not later than 8:00 P. M. of the 28th day of February, 1928. Bids will be opened on said day and hour.

The Council reserves the right to reject any and all bids.

Dated: February 6th, 1928.

EDWARD J. HICKS, City Clerk and Clerk of the Council of the City of Livingston.

NOTICE TO BIDDERS

(Science Laboratory Furniture—Oakland, Calif.)

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District and Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said board, Room 211 City Hall, Oakland, California, until 10:30, the 28th day of February, 1928, at 10:30 a. m., at which time and place said bids will be opened for:

Science Laboratory Furniture. Bids to be accompanied by a certified check for at least 10 per cent of the amount of the bid or proposal.

These bids shall be presented in accordance with the specifications on file in the office of the Assistant Business Manager, City Hall, Oakland.

Price, fitness and quality being equal, preference will be given to products of the State of California.

Persons or firms desiring to be on the mailing list of the Oakland Board of Education may list themselves with the Purchasing Department.

JOHN W. EDMOND, Secretary of the Board of Education of Oakland, Calif.

NOTICE TO BIDDERS

(Pipe—City of Modesto)

Notice is hereby given that sealed bids or proposals will be received by the City Council of the city of Modesto, at the office of the city clerk, at 717 10th street, not later than seven thirty (7:30) o'clock p. m. on Thursday, the 23rd day of February, 1928, for the furnishing of the following material f. o. b. Modesto, Calif.

2200.00 feet of 10-in. cast iron pipe.
2800.00 ft. of 8-in. cast iron pipe.
2300.00 ft. of 6-in. cast iron pipe.
400.00 ft. of 4-in. cast iron pipe.

The pipe must conform to class B or C American Water Works Association standard, or class 150 pipe, manufactured by the centrifugal process or the horizontal sand cast process.

Figures on precast joint pipe will be accepted.

All proposals or bids shall be accompanied by a certified check or bidding bond payable to the Mayor of said city, which check or bond shall be an amount not less than ten (10) per cent of the total bid.

Bidders must state time of delivery. The City Council reserves the right to reject any or all proposals or bids.

By order of the City Council of the city of Modesto, County of Stanislaus, State of California.

H. E. GRAGG, city clerk.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

SAN ANSELMO BUILDING PERMIT

(Month of January, 1928)

The following building permits were issued in San Anselmo, Marin county during the month of February, 1928:

San Francisco Presbyterian Orphan and Farm, boy's dormitory; est. cost \$30,000.

E. Frank; erect porch; lot 6, block Sunnyside tract; est. cost \$175.

San Francisco Theological Seminary; gymnasium; portion of Seminary property in block 10, Sunnyside tract, Waverly road; est. cost \$10,000.

J. E. Sward, dwelling; lot Y Reserve Bella Vista tract; est. cost \$4500.

A. C. Nicolaisen, dwelling; lot 8, block 4, Morningside Court, Meadowcroft drive; est. cost \$4000.

A. C. Nicolaisen, two dwellings; lots and 7, block 4, Morningside Court, Meadowcroft drive; est. cost \$4000 each.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

For special information write or wire

1928 EDITION

San Francisco Building Laws Now Ready for Distribution

With the issuance of this 1928 Edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

The 1928 Edition contains all the revisions and additions to the code up to and including January 31, 1928.

In addition to the Building Laws, the 1928 Edition contains FIRE ORDINANCES as regards the construction industry—the ELECTRICAL ORDINANCES and RULES of the San Francisco Department of Electricity—the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

LIME SALES IN 1927 TOTAL 4,337,000
SHORT TONS

The lime sold by producers in the United States in 1927 amounted to 4,337,000 short tons, valued at \$33,210,000, according to estimates furnished by lime manufacturers to the United States Bureau of Mines, Department of Commerce. This is a decrease of 5 per cent in quantity and 8 per cent in value as compared with sales in 1926. The sales of hydrated lime, which are included in these figures, amounted to 1,562,000 tons, valued at \$14,300,000, a decrease of 3 per cent in quantity and 6 per cent in value. The average unit value of all lime showed a decrease from \$9.11 a ton in 1926 to \$8.81 in 1927, and that of hydrated lime a decrease from \$9.45 a ton in 1926 to \$9.15 in 1927.

Conditions in the lime industry during 1927 were reported as unsettled and unsatisfactory, especially for the last six months of the year. Demand for building, chemical, and agricultural lime was irregular, and although in general it was reported as less or the same as in 1926, there were many reports of good or increased demand.

Ohio, the leading state, showed a decrease of 7 per cent in total quantity of sales and 8 per cent in sales of hydrated lime. Pennsylvania, which ranked second, showed a decrease of 2 per cent in total sales. Of the 23 states in which more than 25,000 tons were sold, only 8 showed increased sales.

Sales of lime for building in 1927 are estimated at 2,200,000 tons; for chemical uses, 1,847,000 tons; and for agriculture 290,000 tons.

Sales of deadburned dolomite for refractory use were estimated at 270,000 tons, valued at \$3,316,000, a decrease of 1 per cent in quantity.

In 1926 the Bureau of Mines estimated the value of California lime sales at \$800,089 and in 1927 at \$774,000.

LONDON ARCHITECT PRAISE AMERICAN ARCHITECTURE

America leads the world today in architecture, declared Percy W. Darbyshire, London architect, in San Francisco on a visit following to trip across the continent.

He was viewing San Francisco, skyline from his window at the Clift Hotel as he spoke. He said:

"Americans certainly have shown more originality in architecture than any other present day people. The skyscraper is an American product, and it has evolved from an ordinary boxlike building into a thing of beauty.

"The characteristic feature of architecture in this country is simplicity. But is beauty in simplicity.

"I always enjoy my visits to America because there is always something new to see here."

Darbyshire considers San Francisco one of the most beautiful cities in the world. To appreciate this beauty on a large scale, he says, one must view the skyline from the bay and survey the city from the summits of its several hills.

According to Darbyshire, there is considerable building going on in London, and most of the new buildings are constructed in American style. Among them are the now popular apartment houses and flats, he said.

"Not long ago a whole street was completely built over again," he said. "It was Regent street, recently reopened by the King."

Darbyshire is accompanied by his wife.

PACIFIC STEEL BOILER TO VOTE ON MERGER WITH U. S. RADIATOR

Terms of the proposed merger of the Pacific Steel Boiler Company with the United States Radiator Company just made public provide that stockholders of the former company will meet to ratify the terms. These provide that Pacific Company shareholders may receive \$15 a share, less a liquidation charge of 10 cents, for their holdings, or common stock and debentures of the radiator company. The amount involved is \$3,157,560. The Pacific Company will reserve a sum equivalent to 10 cents a share to meet the expenses of liquidation.

The Radiator Company will authorize \$7,000,000 of 5 per cent sinking fund debenture bonds, of which \$3,500,000 will be issued and dated February 1. Bankers will underwrite debentures of the issue not required in the merger and will sell them at about 98%. The debentures will be offered to the Pacific company's stockholders at the same price at which they will be offered to the public.

The Radiator company's common stock will be offered to the Pacific company's stockholders at \$45.876 a share. The offer contemplates payment of 56% per cent of debentures and 43% per cent of common stock in the first company for stock of the second company. Cash adjustments will be made for fractional shares or debentures.

O. T. Nelson, president of the Pacific company, said that holders of a substantial amount of Pacific company stock had agreed to the merger terms.

President Coolidge has approved of a \$6,792,000 expenditure to finance construction of new barracks, quarters, hangars and other appurtenances of the army air service throughout the country.

GEORGE GRIFFITH, ROAD BUILDER, DIES IN LOS ANGELES

George Perry Griffith, president of The Griffith Company, one of the largest paving concerns in the West, died at his home, 201 Orchard Ave., Los Angeles, Feb. 12, of bronchial pneumonia after an illness of five weeks. He was born at Erie, Pa., May 8, 1868, and at 18 entered the service of the Barber Asphalt Paving Company, for which his father was legal counsel. He was in charge of civilian reconstruction work in Cuba at the close of the Spanish-American War. In 1901 he went from Scranton, Pa., to San Francisco to become president of the Alcatraz Paving Company of the latter city. Later he was in business in Philadelphia and Tacoma, Wash. Mr. Griffith started operations in Los Angeles in 1906 as vice-president of the Fairchild-Gilmore-Wilton Company, one of the big street and road contracting firms of the Pacific Southwest. As the partners in this firm retired one by one Mr. Griffith increased his interests in the concern until the business passed entirely into his hands, his cousin, S. M. Griffith, and his son, George P. Griffith, becoming associated with him in the firm. The old firm name was continued, however, for several years, and it was not until 1923 that it was changed to The Griffith Company.

SALES TRUST ESTABLISHED IN FRANCE FOR STEEL SHAPES

A comptoir or sales trust to handle the sale and distribution of semi-finished iron and steel and structural shapes has been established in France, the assistant commercial attache at Paris, Daniel J. Reagan, reports, the Department of Commerce announces. The announcement in full text follows:

Offices for the new sales organization are to be in Paris in the same building which houses the French pig iron cartel and the machine wire comptoir.

Proposals are underway for the formation of another comptoir to handle sheets, it is reported. This comptoir would control production of all classes of sheets and ordinary soft steel products, and very probably flat billets as well.

SOCIETY OF ENGINEERS MEET

The regular meeting of the Society of Engineers was held Feb. 14 in the Palace Hotel, San Francisco.

E. G. Sheibley, civil engineer and late superintendent of Safety Division of the California Industrial Accident Commission, delivered an interesting address on "Psychology vs. Safety Engineering."

B. Chester Browne, secretary-treasurer of the California Metal & Mineral Producers Association, addressed the membership on mining conditions in California.

A feature of the meeting was the introduction by N. H. Higbie, president of the Student Body of the Oakland Polytechnic College of Engineering, of eighty new members who have joined the society within the past month.

The north fork of the Feather river will be the location of the new \$7,665,000 state highway between Oroville and Quincy, according to the recommendation of B. B. Meek, state director of public works. This unit will be the first step by the state to open up a new all-year transcontinental highway connection at the Nevada State line.

EXECUTIVE AT DEL MONTE CONVENTION

"WASTED PROFITS" - TOPIC OF STEEL

ADDRESS OF CHARLES F. ABBOTT, EXECUTIVE DIRECTOR, AMERICAN INSTITUTE OF STEEL CONSTRUCTION, DELIVERED BEFORE THE FOURTH ANNUAL MEETING OF THE IRON, STEEL AND ALLIED INDUSTRIES OF CALIFORNIA, DEL MONTE, FEB. 18, 1928

It is estimated that industrial waste in this country is causing an annual loss of \$10,000,000,000. Of this waste, well over 50 per cent is preventable. Fully 20 per cent could be saved if industry would take the obvious steps to minimize wasteful operation, standardize products, and utilize equipment and materials to the maximum.

The appalling nature of such an indictment against American business is emphasized by the report of the Hoover Committee on Elimination of Waste in Industry. The report lays over 50 per cent of the responsibility for waste at the door of management, less than 25 per cent at the door of labor, and attributes less than 25 per cent to outside influences.

It is fortunate that this is a wealthy nation. Otherwise it would be impossible for us to bear up beneath the load. As it is, waste takes a heavy tribute from our prosperity. Although we have little to complain of so far as the volume of sales is concerned, profits are satisfactory in few lines. Within ten years after organization, seven out of ten concerns are either defunct, reorganized or absorbed. Failures during 1927 were 6 per cent above the number for the preceding year. Liabilities were 27 per cent higher than in 1926.

Steel Industry Guilty

The steel industry must plead guilty to being responsible for a considerable proportion of our annual industrial waste. Listen to what Charles M. Schwab, chairman of the board of the Bethlehem Steel Corp., and president of the American Iron and Steel Institute, has to say on this subject:

"There is one thing that we must get into our minds. We have spent vast sums in the development of our plants and the economies of operation. The Bethlehem Steel Corp. has spent \$167,000,000 in four years in the development of our plants. We have made less money than we ever made before, notwithstanding the vast savings made in that direction. We have given away in other directions all the savings that we made in this vast expenditure of capital."

In the steel industry, and in other industries, waste in methods of production is being attacked with vigor and success. It is in the field of distribution that the greatest waste prevails at the present time. We have not yet learned the importance of standardizing the product in accordance with the consumer's needs, nor do we give due consideration to the development of new uses or to those factors that influence the sale of the product at a fair profit.

Difficulties Added

What possible benefit can follow the production by the rolling mills of continuously varying designs and dimensions of structural shapes? To do so adds to the difficulties of producer, fabricator, designer, and purchaser. Real service on the part of the producer is evident when he is able to offer a product which reduces to a minimum the time and thought that must be expended by the buyer in making his purchase and using the product in the most effective manner.

Why should the public in many sections of the United States and Canada

be burdened with the cost of about 10 per cent more steel than is really necessary under modern methods of building construction? Think of the wasted capital and the interest charge on that waste—a charge that endures to all eternity. Why should the public pay for labor and material necessitated by the practice of painting surfaces in contact when such painting does more harm than good?

Can any one tell why the public should have to pay for unnecessary rivets simply because someone thinks that additional circles would make a prettier picture? or why the public should be forced to foot the bill for the unnecessary fireproofing of structural steel? Why fireproof the steel around a swimming pool where there is nothing to burn but the water? I'm not joking. That very thing has been done.

Seeks to Eliminate Waste

The American Institute of Steel Construction is now actively engaged in a campaign to eliminate the wastes which I have enumerated. Progress has been made, but much remains to be done, both

Much has been said and written about the tangible causes of waste in American industry, but the distorted mental attitudes that are responsible for wasted opportunities and wasted profits have received far less attention than they deserve. The largely with such attitudes of waste at address, printed herewith, dealing largely with such attitudes and their unfortunate effects is published complete in the belief that it will prove of interest to our readers.—EDITOR.

by the structural steel industry and the producers of steel whose cooperation is essential in any such far-reaching program. Similar wastes exist in other branches of the industry, and in some of the branches similar efforts are being made to eliminate them. Again much remains to be done.

In October, 1921, the enormous waste in distribution was called to the attention of business men and the general public by the Joint Committee on Marketing and Distribution of the Sixty-seventh Congress. The report of the committee stated that we have now reached a point where it costs more to distribute and serve than to produce.

Among the principal causes of the high cost of distribution, Secretary Hoover mentioned the following:

1. Lack of information of national stocks, of production, and of consumption.
2. Lack of standards of quality and grades.
3. Lack of uniformity of business practices in terms and documents.
4. Disorderly marketing.
5. Destructive competition.

These causes fall naturally into two separate classifications. The first four can be grouped as tangible, physical causes of waste. The remedies, too, are tangible, or physical, whichever you wish to call them. Destructive competition falls under a different heading. This is a spiritual cause of waste in the sense that it is an intangible phenomenon due to defects in mental attitudes. Here the

remedy must be largely educational.

Research has proved one of the most effective means of reducing the tangible causes back of the wholesale squandering of our opportunities for more profitable business. Profits depend largely upon continuous research. Reduced costs, improvement in quality, and new uses are among the possibilities. With no improvements in its products, no new uses as a concern or an industry is stalemated.

How much business could be obtained that is now overlooked? What could we do that we are not doing? These are questions that should be answered. Executives should be as much concerned with the undiscovered sales possibilities as with the volume of business actually being obtained.

Watch the Market!

Failure to study markets represents a tremendous loss in money and effort. A survey conducted by the New England Council developed the information that the textile producers were nine steps removed from the ultimate consumers and this at a time when the ever-changing whims and fancies of a fickle public were continually creating new style habits.

It is stated that the automobile industry now saves a thousand million dollars annually, due to standardization based on research. A dozen years ago the waste in many of the materials used in the manufacture of a car was almost as great as the amount of the material finally incorporated in the finish automobile. Much of the progress that has been made can be attributed to the campaign against waste in industry organized by the Department of Commerce.

The same department can be of great assistance to any industry, but its help should follow an organized effort within the industry. It is not the function of the department to take the lead or to exert pressure on any industry. Each industry should initiate its own program of standardization and simplification, and make its own decisions in all matters vital to its welfare.

Develop the Market

The market for steel, like other markets, must be nourished and developed. Otherwise the fertility, like the soil, becomes impaired. In business, as in agriculture, one cannot take everything out without in some degree compensating for what is taken away. A survey of the market for steel would unquestionably reveal missed opportunities for the sale of many millions of tons. Neglect of such possibilities adds millions of dollars to the wasted profit account.

Research furnished an essential part of the data required for the Standard Specification for Structural Steel for Buildings, and the Standard Specification for Fireproofing Structural Steel Buildings, formulated by committees appointed by the American Institute of Steel Construction. The first specification is effecting a saving of about 10 per cent of the amount of steel required for any steel frame building in those cities in which its use has been authorized. The fireproofing specifications reduces costs by eliminating the unnecessary dead loads demanded by obsolete fireproofing methods.

Institute Cooperates

The institute is now cooperating with the manufacturers of electric and gas welding devices in a program of research regarding the use of welding in the erection of structural steel. Tests are being conducted in the laboratories of the University of Toronto, and there is reason to believe that it may be possible to bring the costs of steel construction still lower through the use of the welding process.

It is, of course, scarcely necessary to point out that all research resulting in a reduction of cost tends to promote the wider use of the product, since it places it in a more favorable position in the struggle with competitive materials for the buyer's favor. Lower costs have the same effect as improvements in quality, or better adaptation to the consumer's preferences.

Steel Industry Hit in Bridge Field

At the present time, steel is suffering a serious displacement in the field of highway bridge construction. The public is being educated to believe that steel bridges are unsightly, expensive, and lacking in durability. In Pennsylvania it is next to impossible to erect a steel highway bridge, because those in control hold that—

There are two conditions under which steel is justified:

First: When the span and height are such as to make concrete impracticable.

Second: Where there is no way to get the additional funds required for concrete. The justification for this position is in the fact that there is no economy in a steel bridge and public funds should, if at all possible, be spent for non-perishable improvements.

It is strange that such a situation should exist in the state that is the home of the steel industry. Other states enforce restrictions favoring competition, and the number of such states is increasing.

If the public wants artistic steel bridges, why not build them? The shortest route to a sale is to overcome resistance by meeting the buyer's desires. Why should steel always be painted black or some other unattractive color? Why shouldn't the steel industry initiate research designed to provide the data for the construction of beautiful steel bridges?

Industry Expanding

As to the development of new uses for steel, steel roadbeds, steel railroad ties, and steel for residences provide promising fields for expansion. Steel-frame residences have already passed out of the experimental stage, but we have not yet even scratched the surface of the potential market.

The yearly increase in the country's population amounts to 2,242,875, or 6145 persons a day. The average number of persons in a family is 4.33; so it is necessary to provide 1419 new homes every hour. This means that 517,935 new homes are needed each year to take care of the increase in population alone. By means all families live in individual dwellings, but granting the exceptions, think what the proper cultivation of the residence market offers the steel industry in the shape of a new and steady demand for its product?

An encouraging indication that the steel industry is awakening to the necessity of studying the market is given by the recent organization of a Commercial Research Department by the Colorado Fuel and Iron Co. The future sales activities of this company will be based upon accurate information as to customers, prospective customers, market possibilities, buying influences, and economic trends. However slow they may be to act upon their knowledge, most business men can readily be brought to a realization of the value of research, particularly as it applies to standardization and its resulting economies. But as we approach the less tangible elements of modern business we find growing confusion and increasing

reluctance on the part of any individual to admit that he is in any way responsible for such unfortunate conditions as may exist.

Destructive Competition

I refer to those mental attitudes which I have already mentioned as being responsible for destructive competition. In my opinion greed, suspicion, hatred and jealousy are to blame for even greater wastes than are obsolete methods and lack of proper standardization of commodities. It is impossible to measure the amount of this waste in money, but that it represents a huge sum is indisputable.

Those who take exception to the importance of waste caused by distorted mental attitudes can satisfy their doubts by a casual inspection of the character of competition existing between individual concerns and between industries.

The mental attitude of business men in nearly all industries is in a state of demoralization. Business men seem to have lost all sense of proportion in a wild scramble to maintain volume. The idea seems to be to keep your competitor from getting any business at all. Compared with conditions before the war, this might be termed the flapper age of industry. We are controlled by the emotions of jazz.

When one stops to consider that the volume of business is as great as, or greater than, the volume in previous years, the absurdity of the present demoralization and lack of profits becomes apparent. The remedy is equally obvious. Owen B. Young, chairman of the board of the General Electric Co., has said that the solution of business problems lies in group action. Charles M. Schwab has made the statement that cordial cooperation among the various elements of the steel industry would be worth more than a billion dollars.

James A. Farrell, president of the United States Steel Corp., has always advocated a general adoption of the principle of cooperation in the place of ruinous competition, as a means of bringing about more stable conditions and better profits in the steel industry. Close and mutually helpful relations between the producing mills and their intermediate industries constitute an essential step in achieving such cooperation.

The mills have a well defined responsibility in the movement of their products to the ultimate consumer. Intermediate industries, otherwise designated as distributors, are in most instances essential to efficient distribution. Public interest demands service based upon the most economical system of distribution, and responsible for such service rests equally upon producer and distributor. It continues until the public's requirements have been adequately met.

Lack of Cooperation

Structural steel, steel pipe, tanks, boilers and other steel products have suffered a drastic shrinkage in their markets, due largely to lack of cooperation in the past between the producing mills and the distributing industries. I believe, however, that this deplorable state of affairs is destined to show marked improvement in the not far distant future.

Some months ago a committee of the board of directors of the American Institute of Steel Construction met to consider what might be done to improve relations between the mills and the fabricators. It was recognized that the present unsatisfactory relationship has been firmly established for many years and that time will be required to change it. The committee prepared the following list of principles which, it was felt, provide the proper basis for a constructive move in the desired direction.

1. The relations between the mills and the fabricators should be cordial and cooperative.
2. The mills should definitely recognize the fabricators as the logical distributors with certain limitations which

could be mutually agreed upon; and the fabricators should be protected in that capacity.

3. Mills and fabricators should join in constructive efforts to promote the use of structural steel by extending the markets therefor, as well as in other ways.
4. The fabricating units of the mills should be operated under a policy of encouragement to legitimate fabricators in their efforts to sell structural steel.
5. Mills should cease the practice of using either brokers or small fabricators as a means of selling fabricated steel to be gotten out by the mill interests themselves.
6. It should be conceded that the public interests will be better served if certain classes of work are handled by fabricators only; the nature and size of such work can be easily defined.
7. On all other work prices made by mill interests should be fairly determined, having in mind the conditions under which the fabricator competitor must buy his steel and operate his plant, and such prices should include a reasonable profit.

Cooperation Shows Desire

These principles were submitted to the leading rolling mills. Since their submission, there have been a number of instances of cooperation which give tangible evidence of a sincere desire on the part of the leaders of the mill interests to work in harmony with the members of the fabricating industry. Only a beginning has been made. The principles are not yet being applied on anything like a national scale. Nevertheless, enough has been accomplished to lead the fabricating industry to hope for a growing degree of cooperation on the part of the mills.

Somewhat similar principles could advantageously be applied to improve the relations between the producers and practically all the distributing elements of the steel industry. Here we find definite opportunity to conserve profits that are now being dissipated because of the uncertainties that always prevail when a close cooperative relationship between producer and distributor is not established on a basis of fairness to both of the parties concerned.

Salesmanship based upon a greedy determination to secure all the business in sight, I would put as a second principal cause of the present day demoralization of the business man's mental attitude—in our industry and in other industries. The fundamental principles of salesmanship, of proper pricing, of costs and profits, are cast overboard as hysteria is substituted for sound judgment.

Under present day conditions, the most important phase of business—the most important phase of life, for that matter—is selling. Every successful business man is first of all a salesman; every farmer, every lawyer, every doctor. There are doctors with profound medical knowledge who make a bare living. There are others with far less knowledge who are making \$50,000 a year because they know how to hold a spoiled woman's wrist sympathetically and tell her that her husband does not understand her temperament.

Selling Policies

In pointing out that in many instances our selling policies are unsound and destructive, I am more than ready to acknowledge that the sales department is faced with a difficult task. To the total cost of the product the sales department is expected to add a reasonable profit and then transfer the merchandise to the buyer on terms and at prices previously determined.

Even then the task is not completed. The function of the sales department is not fulfilled until the merchandise has passed through the hands of the wholesaler and retailer into the hands of the ultimate consumer, and is placed in satisfactory service. This is the only process that completes a sale. Merchandise in the hands of the wholesaler or retailer is not sold. So long as it remains

in their hands it is simply plugging up the channels of distribution.

We must also bear in mind that if the merchandise is sold solely on the basis of price the term "sales department" is a misnomer. "Order-taking department" would be nearer the truth. To offer price inducements as a means of concluding the sale is to write the whole story on a price tag and even a messenger boy can then repeat it.

Real salesmanship begins when selling prices have been established on a basis of total cost plus a reasonable profit, and when the sale is completed without concessions affecting either terms or prices. The difficult part of salesmanship is not in selling to people who have already made up their minds to buy at the price quoted, but in selling to those who either do not want to buy, or who are not willing to pay what has been determined upon as a fair price.

Hardwork and Persistence

If all sales executives and all salesmen were as hard-working and persistent as the ordinary newsboy we would have far more justification for the assertion often made that we are the greatest commercial nation in all history. Both hard work and persistence, however, are likely to do more harm than good unless activities are controlled by sound policies.

Study the selling policies of the automobile industry and you will find them well standardized. The prices and terms established by each company are the same to all, and there are no secret concessions. The buyer has confidence in the automobile industry because he knows that when he is ready to buy he can make his purchase without feeling that haggling with the salesman might have resulted in better terms.

Compare these policies with those of an industry where there is no such standardization. Each seller's offer differs greatly as to terms and prices for the same article. Imagine the state of mind of the buyer, his confusion and lack of confidence, his inability to find a dependable basis for a comparison of values.

There is no essential difference between the sale of an automobile, structural steel, a toothpick, or an aeroplane. The names differ, but the principles are the same. But in one instance public interest is protected and confidence is sustained. In other, public welfare is disregarded, confidence is displaced by uncertainty, and waste exacts a penalty that in the end the public must pay.

In a number of our key industries there is actually severe trade depression due largely to methods that have obliterated all semblance of salesmanship. If the tendency in this direction continues at its present rate it threatens to develop into trade prostration of the worst kind. In my opinion, the best hope of checking this trend lies in convincing our executives that volume is not the sole aim of business.

Fair Volume—Fair Profit

We must learn that fair volume coupled with fair profit is far more desirable than maximum volume coupled with minimum or no profit at all. We must learn that a million times nothing is still nothing.

Price-cutting is a direct result of unreasonable greed for business, and rancorous, cut-throat competition is a direct result of price-cutting. J. H. McLaurin, president of the Wholesale Grocers' Association, has this to say about the effects of price cutting:

"Some man 'cuts the price,' another man 'gets mad' and immediately draws his gun (figuratively speaking) and shoots. Business ethics are murdered, the lifeblood of his own business (and that of others) is wasted, riot and demoralization in trade ensue, and mob ethics prevail. Some one got mad! So mad, indeed, that he stamped on his own toes, dug his nails into his own flesh, struck his own head against the wall, rushed to the safe and scattered all the money in sight to the four winds. Getting 'mad' (losing one's temper, fly-

ing into a rage) is perhaps not unnatural for a child, but surely it has no place in the business of a grown man—the business for the success of which he is responsible."

A man becomes dignified by the term salesmen when he demonstrates his ability to enter a territory and obtain business without deviating from the terms and prices defined by his employer. The man or the organization with more than one price up the sleeve is soon branded as a trader whose every statement must be taken with a grain of salt. Men and organizations are relegated to the ranks of failure when they begin to cut prices and promise concessions.

It takes salesmanship to sell a shrewd and doubtful customer, but it takes an even higher degree of salesmanship to know when to let go rather than meet his terms. To look a big order in the face and say "No" is the mark of a master salesman.

Absence of approved selling methods in the steel industry has brought customers to the point where they regard price as the most important, if not the only consideration in the purchase of steel products. The falsity of this conception is apparent to all of us, but if it is to be dissipated we must give salesmanship the same consideration we give the other elements of our business.

Salesman Without a Price

Not long ago a representative of a large steel company called on a prominent customer in an attempt to obtain an order. He told his story and the buyer asked his price. He hemmed and hawed. "Well," he finally said, "if you have some particular job you are estimating give me a ring and we'll see what we can do." The buyer doesn't know the price today. Would you call a man without a price a salesman?

How often do we hear of a seller so anxious to take business from his competitor that a little clever jockeying on the part of the buyer will induce him to cut his bid, although his price is already low, entitling him to the order? A cut of \$10 a ton, or more, on structural steel, in spite of the fact that the original price submitted was the lowest received, is not an uncommon incident. The extreme stupidity of it all makes all the more disheartening the terrific drain it imposes upon our prosperity.

Price-cutting is the most vicious practice ever introduced into business. Wherever it exists profits are thrown away. It is purely a case of out-guessing competition with the price trend always downward. Failure to maintain the one-price policy leads to a deep pit, the bottom of which no organization has ever reached alive.

Furthermore, the practice is directly contrary to the interests of the buyer. While the law of supply and demand operates it is economically sound for the buyer to try to get the best possible price, but to drive the bargain below the line of fair profit, good quality, and proper service, is poor business in the long run. Substitutions, inferior quality, and inadequate service logically follow. The buyer suffers, and pays in the end a price much greater than one based upon cost plus a fair profit.

Fair Dealing

The secretary of the National Association of Purchasing Agents is quoted as saying that a tendency to subscribe to a broader policy—to a standard of fair dealing and fair prices for all—is undoubtedly representative of the new attitude that is being taken by buyers in many lines. He adds that he feels certain such a policy is a wise one.

L. F. Boffey, editor of The Purchasing Agent, has written me a letter in which he says:

"Every purchasing agent worthy of his title will support a movement to eliminate price haggling in industry. . . . The salesman who changes his quotation admits that his original figure was too high, and the purchasing agent is chary of dealing with him because he can fly into a rage) is perhaps not unnat-

never be sure that the last figure upon is the rock-bottom price. . . . The buyer is concerned with price, of course, but wants to pay a reasonable profit, and more than a reasonable profit, to a source of supply."

The growth of any such movement gradually do away with a form of economic warfare which, while it lasts, is any warfare, is accompanied by economic loss.

The era of narrow, selfish individualism is passing. We are entering upon a new era of cooperation and cordial understanding between buyer and seller, producer and distributor, and the individual units of our industries. Only such foundation can a sound economic structure be erected. Individuals and organizations alike are learning that twisted mental attitudes produce friction, heat and violence, and the resulting destructive competition threatens the welfare of an entire community.

External competition is forcing a new conception of business upon the steel industry. So much has been said and written about the competition between industries that it is unnecessary for us to dwell upon it at any length. You know that every industry is fighting for a share of the consumer's dollar. Steel, concrete, radios, phonographs, pianos, automobiles, oil, coal—all are engaged in life and death struggle.

Cooperation Urged

Cooperation between all the elements of an industry is becoming the price of survival. The trade associations formed by various branches of the steel industry are doing effective work in warding off the encroachments of other industries, in developing new markets and in proving the standards of competition between their members. But the steel industry has not yet gone far enough.

The members of the industry, even those that belong to its trade associations, are too much in the habit of asking, "What has the trade association done for me?" They too seldom ask, "What have I ever done for the trade association?" They forget that an industrial organization is beneficial only in proportion to the extent to which its members, as individuals, go actively and intelligently to work to benefit themselves and their industry.

Further, the steel industry is in need of intelligent, aggressive cooperation on a wider scope than is represented by any of its trade organizations now in existence. In view of the competition for the consumer's dollar, it is to the interest of every man in the steel industry to support the fight for steel. We must begin to sell the outstanding qualities of steel as a material before we try to sell steel in the form of a particular product or a particular order for that product.

The industrial battle line is far from well organized. Against such forces individual's efforts are wasted. Even the organization representing an entire branch of our industry frequently finds itself fighting against desperate odds. What we need is an organization that will represent the whole industry—a substitute of Steel.

An institute of this nature, properly financed and supported by the product mills and all the intermediate industries, would have the following as its objectives:

1. Standardization and simplification.
2. Better business methods.
3. Better competitive conditions within the industry.
4. Protection of the industry against the encroachments of competing industries.
5. Broader markets and better profit for all steel products.

Such an institute would be in a position to cope successfully with the tangible and spiritual causes of waste that are adversely affecting the steel industry today. Here, gentlemen, is an eminent, practicable way to realize that degree of cooperation whose value Mr. Schwab has placed at a billion dollars.

KOSTER IS RE-ELECTED PRESIDENT OF STEEL INDUSTRIES - COMMITTEES NAMED

Federick J. Koster of San Francisco was unanimously re-elected chairman of the Iron, Steel and Allied Industries of California, at the closing business session of the convention at Hotel Del Monte, Feb. 18. Koster is president of the California Barrel Company.

Walter Taylor, vice president of the Laclede Iron Works, was elected vice chairman from Los Angeles. Edward L. Sol, president Soule Steel Company, was named vice-chairman from San Francisco.

Formation of a western states iron and steel institute is expected to result from the Del Monte meeting. A resolution was adopted calling for a committee to investigate this project and to represent California at the Northwestern Iron and Steel Conference in Tacoma, February 27.

The following objectives for the coming year were adopted: Centralized leadership, standard specifications and practices, uniform building code, support of California payrolls, extensions of marketing territory in western states and publicity.

Principal addresses at the sessions were by John B. Leonard, American Society of Civil Engineers, San Francisco, on "The New Uniform Building Code and Its Relation to the Iron and Steel Industry of California"; Frank C. Mortimer, vice-president Citizens National Bank, Los Angeles, on "Steel Points the Way" and Charles F. Abbott, executive director, American Institute of Steel Construction, New York, on "Wasted Profits."

Members of Committees

The following Northern California committee appointments were announced:

Manufacturers—H. W. Forge, chairman, California Corrugated Culvert Co., Berkeley; R. M. Alvord, General Electric Company, San Francisco; G. A. Bahler, Caterpillar Tractor Company, San Leandro; R. A. Folsom, W. R. Ames Company, San Francisco; H. P. Phillips, Link Belt, Meese & Gottfried Company, San Francisco.

Structural Steel—H. Mortensen, chairman, McClintic-Marshall Company, San Francisco; P. F. Gillespie, Judson Pacific Company, San Francisco; S. S. Herrick, Herrick Iron Works, Oakland; Charles E. Spencer, California Steel Company, San Francisco; H. Morris, Western Iron Works, San Francisco; Merchant Steel, F. J. Bruzzone, chairman, Baker, Hamilton & Pacific Co., San Francisco; H. D. Simon, Fourcar Ray & Simon, San Francisco; Ray Sanford, A. M. Castle & Co., San Francisco; C. H. Merrill, Holbrook, Merrill & Stetson, San Francisco; Fay F. Thomson, Thomson-Diggs Company, Sacramento.
